Zinc Coated (Galvanised) Steel and Aluminium Zinc Coated Steel Exported from the People's Republic of China, the Republic of Korea and Taiwan Initiation of Investigations into alleged dumping Public notice under section 269TC

The Chief Executive Officer (CEO) of the Australian Customs and Border Protection Service (Customs and Border Protection) has initiated investigations, following separate applications lodged by BlueScope Steel Limited on 3 August 2012, a manufacturer of zinc coated (galvanised) steel and aluminium zinc coated steel (the goods) in Australia. The applications request the publication of dumping duty notices in respect of the goods exported to Australia from the People's Republic of China (China), the Republic of Korea (Korea) and Taiwan.

The imported goods the subject of the applications are:

Galvanised steel

The imported goods the subject of the Galvanised Steel Application are:

"flat rolled products of iron and non-alloy steel of a width less than 600mm and equal to or greater than 600mm, plated or coated with zinc"

The goods the subject of this application are generally called galvanised steel (referring to zinc coated steel).

Galvanised steel is classified to tariff subheadings 7210.49.00 (statistical codes 55, 56, 57 and 58) and 7212.30.00 (statistical code 61) of Schedule 3 to the Customs Tariff Act 1995 (Tariff Act).

Aluminium zinc coated steel

The imported goods the subject of the Aluminium Zinc Coated Steel Application are:

"flat rolled products of iron and non-alloy steel of a width equal to or greater than 600mm, plated or coated with aluminium-zinc alloys, not painted whether or not including resin coating"

The goods the subject of this application are generally called aluminium zinc coated steel.

Aluminium zinc coated steel is classified to tariff subheading 7210.61.00 (statistical codes 60, 61, and 62) of Schedule 3 to the Tariff Act.

The applications allege that the goods have been exported to Australia at prices less than their normal value. The applications claim that the dumped exports have caused material injury to the Australian industry through loss of sales, reduced market share, reduced revenues, price undercutting, price depression, price suppression, reduced profits, reduced profitability, reduced return on investment, reduced ability to raise capital for re-investment, and reduced employment.

The CEO specifies that goods exported to Australia during the period 1 July 2011 to 30 June 2012 will be examined to determine whether dumping has occurred. The Australian market will be examined from 1 July 2007 for injury analysis. The date of initiation of the investigations is the date of publication of this notice.

Interested parties, as defined by subsection 269T(1) of the Customs Act 1901 (the Act), are invited to lodge submissions concerning the publication of the dumping duty notices sought in the applications, no later than the close of business on Monday 15 October 2012, addressed to:
