

Hi Patrick,

Regarding the exchange rate, i.e. "ROE 0.80 US\$;A\$" mentioned in the submission by the Australian producers:

It is unclear to me how the above mentioned rate has been worked out. Believe, that the average rate from 1st July 2014 to 30 June 2015 should be used.

Below is the link for the foreign currency information/exchange rate information.

<http://www.ozforex.com.au/forex-tools/historical-rate-tools/historical-exchange-rates>

As per the OzForex Foreign Exchange Services, the average rate of exchange for the period mentioned in the submission is A\$1=US\$0.836394. If we were to round the numbers, it will be A\$1=US\$0.84

Please consider/use in correct average exchange rate in the calculation...

Regards,

Gleb Linnikov
