Subject: CLEAR FLOAT GLASS EXPORTED FROM CHINA, INDONESIA AND THAILAND - RESUMPTION OF INVESTIGATION [SEC=UNCLASSIFIED]

Security Classification:
UNCLASSIFIED

If you are not already aware, the Trade Measures Review Office (TMRO) revoked Customs and Border Protection's decision to terminate the dumping investigation into clear float glass exported from China, Indonesia and Thailand. For your information, below is a link to the TMRO's report.

The TMRO has directed Customs and Border Protection to resume the investigation and give particular attention to certain areas as identified in the report. Customs and Border Protection will provide interested parties with information about the resumed investigation in the near future.

I have been appointed the case manager for the resumed investigation. Please contact me by email or by telephone if you have any questions.
