INSTRUCTIONS

**Why you have been asked to fill out this questionnaire?**

The Australian Customs and Border Protection Service (Customs and Border Protection) is responsible for investigating the allegation that certain Aluminium Road Wheels (ARWs) have been exported to Australia from China at dumped and/or subsidised prices and are causing, or are threatening to cause, material injury to an Australian industry producing like goods.

Customs and Border Protection will use the information you provide to determine normal values and export prices over the investigation period. This information will determine whether ARWs are dumped. You may make separate submissions concerning any other matter, for example injury.

Customs and Border Protection's investigation will be carried out under the provisions of the Part XVB of the *Customs Act 1901*.

What happens if you do not respond to this questionnaire?

You do not have to complete the questionnaire. However, if you do not respond, Customs and Border Protection may be required to rely on information supplied by other parties (possibly information supplied by the Australian industry).

If you do not provide all of the information sought, or if you do not allow Customs and Border Protection to verify the information, we may deem that you did not cooperate with the investigation. In that case we may assess a dumping margin for your company based upon normal values that may be the highest determined in your country during the investigation period.

It is in your interest, therefore, to provide a complete submission.

Due date for response

Manufacturers and exporters are requested to respond to this questionnaire and return it to Customs and Border Protection within the time specified on the cover page. There is a statutory time limit imposed for the investigation. Customs and Border Protection may not be able to consider submissions received after the due date.

If you cannot lodge your submission by the due date please advise the investigation case manager as soon as possible.

Confidential and non-confidential submissions

You are required to lodge one confidential and two non-confidential versions of your submission by the due date.

Please ensure that *each page* of information you provide is clearly marked either "IN-CONFIDENCE" or "NON-CONFIDENTIAL".

All information provided to Customs and Border Protection in confidence will be treated accordingly. The non-confidential version of your submission will be placed on the public record.

Please note, Australia's anti-dumping and countervailing legislation requires that to the extent that information given to Customs and Border Protection is claimed to be confidential or whose publication would adversely affect a business or commercial interest, the person giving the information must ensure that a summary of that information contains sufficient detail to allow a reasonable understanding of the substance of the information, but does not breach confidentiality nor adversely affect those interests.

The legislation allows that a person is not required to provide a summary for the public record if Customs and Border Protection can be satisfied that no such summary can be given that would allow a reasonable understanding of the substance of the information. However, such a summary would add considerably to an interested party's understanding of information contained in a document.

As provided for in Australia's anti-dumping and countervailing legislation, all submissions are required to have a bracketed explanation of deleted or blacked out information for the non-confidential version of the submission. Note that if such an explanation is not provided, Customs and Border Protection may disregard the information in the submission. An example of a statement to accompany deleted/blacked out text is:

[explanation of cost allocation through the divisions].

If, for some reason, you cannot produce a non-confidential summary, please contact the investigation case manager.

Exporter's declaration

At section J, you are required to make a declaration that the information contained in your submission is complete and correct. Alternatively, if you did not export the goods during the period of investigation, you may make a declaration to that effect.

You must return a signed declaration with your response to the questionnaire.

Verification of the information that you supply

Customs and Border Protection will seek to verify the information provided in your submission. Where there is a large number of exporters, Customs and Border Protection may have to verify information from selected exporters only. The purpose of the visit is to verify the information submitted in response to this questionnaire. It is not meant to be a chance for you to provide new or additional information. Customs and Border Protection expects your response to the questionnaire to be complete and accurate.

Verification visits may take several days. We will want to examine in detail your company's records in respect of the goods and will ask for copies of documents relating to the manufacture and sale of the goods. We will need to consult with your staff, particularly your financial controller (or accountant) and your domestic and export sales people. We may also need to see your factory, in which case we will need to consult with your operational managers.

After gathering the information we will remain in your country to prepare a report of the visit. We will provide you with a draft of the report and then revisit you to discuss the report and to respond to any questions that you may want to ask. We will also ask you to prepare a non-confidential copy of the report for the public record.

If you do not manufacture the goods

You may export but not produce or manufacture the goods (for example, you are a trading company, broker, or vendor dealing in the goods).

In such cases it is important that you forward a copy of this questionnaire to the relevant manufacturers **immediately**. You should also inform the investigation case officer of the contact details for these manufacturers.

You should complete those sections of the questionnaire that you are reasonably able to complete. If, for example, you are unable to supply details of production costs, you should clearly explain why the section does not apply to your company.

If you do not export the goods

Depending on the arrangement for sale of the goods to Australia through an intermediary, Customs and Border Protection will have to determine who is the exporter of the goods for the purpose of this investigation.

In any case, information (such as cost of production data) supplied by the manufacturer will be relevant to establishing the normal value of the goods. In the absence of verified information, Customs and Border Protection may use other available information. This information may result in a decision less favourable to your company.

Outline of information required by this questionnaire

- Section A** General information relating to your company including financial reports.
- Section B** A complete list of your company's exports to Australia over the investigation period.
- Section C** A list of goods sold on the domestic market of the country of export (like goods) that may be compared to the goods under consideration (the goods).
- Section D** A detailed list of all of your company's sales of like goods in your domestic market.
- Section E** Information to allow a fair comparison between export and domestic prices.
- Section F** Information in relation to your company's exports of like goods to countries other than Australia.
- Section G** Costs to make and sell, for exports to Australia and for the domestic market.
- Section H** Information used to assess the market for ARWs and aluminium in China
- Section I** Questions in relation to the receipt of alleged subsidies
- Section J** Your declaration
- Section K** A checklist.

Appendix 1 A glossary of terms used in this questionnaire

Some general instructions for preparing your response

- When answering the questionnaire please carefully read all instructions. Customs and Border Protection requires a response to *all* sections of this questionnaire. Please provide an explanation if a question is not relevant to your situation.
- Answer questions in the order presented in the questionnaire. Please ensure that information submitted conforms to the requested format and is clearly labelled. Please repeat the question to which you are responding and place your answer below it.
- Identify source documents and advise where they are kept. During on-site verification you should be prepared to substantiate all the information you have submitted. Every part of the response should be traceable to company documents that are used in the ordinary course of business.
- You should retain all work sheets used in answering the questionnaire, in particular those linking the information supplied with management and accounting records. This will help us to verify the information.
- Clearly identify all units of measurement and currencies used. Apply the same measurement consistently throughout your response to the questionnaire.

Instructions on providing electronic data

- It is important that information is submitted in electronic format.
- Electronic data should be emailed or submitted on a CD-ROM, in IBM/MS-DOS format, or another operating system whose disk format is compatible with this MS-DOS version.
- The data must be created as spreadsheet files, preferably in Microsoft Excel, or alternatively in an Excel compatible format (for example, Excel can normally access data in Dbase or as an ASCII file).
- The Excel files must be compatible to the USA version.
- If you cannot present electronic data in the requested format contact the investigation case officer as soon as possible.

Further information

Before you respond to the questionnaire you should read all the documentation enclosed with this application including the applicant's non-confidential submission, the booklet *Australia's Anti-Dumping and Countervailing Administration* and the Australian Customs Dumping Notice notifying the initiation of the investigation. We also advise that you read the attached glossary of terms.

If you require further assistance, or you are having difficulties completing your submission, please contact the investigation case manager. Customs and Border Protection will need to know the reasons.

Answer:

【 Please see the Spreadsheet 】

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.

Prepare this information in a spreadsheet named "TURNOVER".

This information will be used to verify the cost allocations to the goods under consideration in Section G.

Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.

**SECTION B
SALES TO AUSTRALIA (EXPORT PRICE)**

This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory. Export prices are usually assessed at FOB point, but Customs and Border Protection may also compare prices at the ex factory level.

*You should report prices of **all** Goods Under Consideration (the goods) **shipped** to Australia during the investigation period.*

The invoice date will normally be taken to be the date of sale. If you consider:

the sale date is not the invoice date (see 'date of sale' column in question B4 below) and;

an alternative date should be used when comparing export and domestic prices

*you **must** provide information in section D on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.*

B-1 For each customer in Australia to whom you shipped goods in the investigation period list:

【name;
address;
contact name
and phone

Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company, This information has been provided to the Authority in the confidential response.

B-2 For each customer identified in B1 please provide the following information.

(a) Describe how the goods are sent to each customer in Australia, including a diagram if required.

Answer:

The goods are sent to the customer in Australia by ship, delivery term is FOB

- (b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

Answer:

We exported the goods to Australia customer directly and there is no commission between us.

- (c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of DDP sales, explain who retains ownership when the goods enter Australia.

Answer:

The delivery term of the Company is FOB, the Australia customer retains the ownership when the goods enter Australia.

- (d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).

Answer:

Not applicable. There is no such distributor agreement or other contracts

- (e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.

Answer:

Please see Exhibit 5-Flow Chart Exported to Australia

The export prices are based on order with the client and there is no price lists of the company

- (f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (eg free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).

Answer:

Not applicable. The Company is not related to any of its Australian customers

- (g) Details of the forward orders of the goods under consideration (include quantities, values and scheduled shipping dates).

Answer:

Not applicable.

- B-3** Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

Answer:

Not applicable. The Company only have one client in Australia

- B-4** Prepare a spreadsheet named "Australian sales" listing all shipments (i.e. transaction by transaction) to Australia of the goods under consideration in the investigation period. You must provide this list in electronic format. Include the following export related information:

Answer:

【 Please see the Spreadsheet 】

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company, This information has been provided to the Authority in the confidential response.

**** FOB export price and Ocean Freight:**

FOB export price: An FOB export price must be calculated for each shipment - regardless of the shipping terms. FOB price includes inland transportation to the port of exportation, inland insurance, handling, and loading charges. It excludes post exportation expenses such as ocean freight and insurance. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.

Ocean freight: as ocean freight is a significant cost it is important that the actual amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis - estimates must reflect changes in freight rates over the investigation period.

Freight allocations must be checked for consistency.

* All of these costs are further explained in section E-1.

- B-5** If there are any other costs, charges or expenses incurred in respect of the exports listed above which have not been identified in the table above, add a column (see "other factors" in question B-4) for each item, and provide a description of each item. For example, other selling expenses (direct or indirect) incurred in relation to the export sales to Australia.

Answer:

Not applicable.

- B-6** For each type of discount, rebate, allowance offered on export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met by the importer to obtain the discount.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amount shown in your response to question B4. If they vary by customer or level provide an explanation.

Answer:

Not applicable.

- B-7** If you have issued credit notes (directly or indirectly) to the customers in Australia, in relation to the invoices listed in the detailed transaction by transaction listing in response to question B4, provide details of each credit note if the credited amount has **not** been reported as a discount or rebate.

Answer:

Not applicable.

- B-8** If the delivery terms make you responsible for arrival of the goods at an agreed point within Australia (eg. delivered duty paid), insert additional columns in the spreadsheet for all other costs incurred. For example:

Import duties	Amount of import duty paid in Australia
Inland transport	Amount of inland transportation expenses within Australia included in the selling price
Other costs	Customs brokers, port and other costs incurred (itemise)

Answer:

Not applicable

- B-9** Select two shipments, in different quarters of the investigation period, and provide a complete set of all of the documentation related to the export sale. For example:

- the importer's purchase order, order confirmation, and contract of sale;
- commercial invoice;
- bill of lading, export permit;
- freight invoices in relation to movement of the goods from factory to Australia, including inland freight contract;
- marine insurance expenses; and
- letter of credit, and bank documentation, proving payment.

Customs and Border Protection will select additional shipments for payment verification at the time of the visit.

**SECTION C
EXPORTED GOODS & LIKE GOODS**

- C-1** Fully describe all of the goods you have exported to Australia during the investigation period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

Answer:

The products the Company exported to Australia is Aluminum alloy wheel, its size from 13-20 inch, the surface treatment is painted, it can be used on 4x4 cars, traller cars etc.

- C-2** List each type of goods exported to Australia (these types should cover all types listed in spreadsheet "Australian sales" – see section B of this questionnaire).

Answer:

The types of goods exported to Australia of the Company are: [.]

C-4 Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

Answer:

The Company have not such documents

D-2 Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

Answer:

Not applicable

D-3 Explain in detail the sales process, including:

- the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
- whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

Answer:

In general, sales get the offer from clients and sent the message to production department, after the confirmation from the production department; sales sign the contract with clients, after receiving the payment from the clients, the Company delivery the products to the warehouse of clients. The price includes the cost of delivery to customer.

And there is no price list of the Company.

D-4 Prepare a spreadsheet named "domestic sales" listing all sales of like goods made during the investigation period. The listing must be provided on a CD-ROM. Include all of the following information.

Costs marked with * are explained in section E-2.

D-5 If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see "other factors"). For example, certain other selling expenses incurred.

Answer:

Not applicable

D-6 For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:

- provide a description; and
- explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

Answer:

Not applicable

D-7 Select two domestic sales, in different quarters of the investigation period, that are at the same level of trade as the export sales. Provide a complete set of documentation for those two sales. (Include, for example, purchase order, order acceptance, commercial invoice, discounts or rebates applicable, credit/debit notes, long or short term contract of sale, inland freight contract, bank documentation showing proof of payment.)

Customs and Border Protection will select additional sales for verification at the time of our visit.

SECTION E FAIR COMPARISON

Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (ie. the normal value).

Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.

As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.

To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. Customs and Border Protection must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.

Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence Customs and Border Protection may disallow the adjustment.

Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.

A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.

The investigation must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. Customs and Border Protection will not consider new claims made after the verification visit.

E-1 Costs associated with export sales

(These cost adjustments will relate to your responses made at question B-4, 'Australian sales')

1. Transportation

Explain how you have quantified the amount of inland transportation associated with the export sale ("**Inland transportation costs**"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

Answer:

Inland transportation costs refer to the inland freight from factory to port in the country of export. The expense is located in operating expenses of the general ledger account

2. Handling, loading and ancillary expenses

List all charges that are included in the export price and explain how they have been quantified ("**Handling, loading & ancillary expenses**"). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes;
- document fees and customs brokers fees;
- clearance fees;
- bank charges, letter of credit fees
- other ancillary charges.

Answer:

The expense is located in operating expenses of the general ledger account

3. Credit

The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, Customs and Border Protection will examine whether a credit adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the investigation period. Explain the nature of the interest rates most applicable to these export sales eg, short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, *and if* export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.

Answer:

Not applicable

4. Packing costs

List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed 'Packing'.

Answer:

Not applicable. The packing costs are included in the manufacture costs, the products do not need to pack after it leaves the factory

5. Commissions

For any commissions paid in relation to the export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed "Commissions". Identify the general ledger account where the expense is located.

Answer:

Not applicable.

6. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("Warranty & guarantee expenses" and "Technical assistance & other services"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

Answer:

Not applicable.

7. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed "Other factors". For example, other variable or fixed selling expenses, including salesmen's salaries, salesmen's travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.

Answer:

Not applicable.

8. Currency conversions

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a 'sustained' movement during the period of investigation (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect 'sustained' movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the investigation period.

Answer:

Please see the exchange rate table, which comes from People's Bank of China

E-2 Costs associated with domestic sales

(These cost adjustments will relate to your responses made at question D-4, "domestic sales")

The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.

1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (S G & A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

Answer:

Not applicable. The products sold in domestic market and export to Australia is the same products.

2. Import charges and indirect taxes

If exports to Australia:

- are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or
- if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon *exportation* and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold *domestically* but is not borne by the exports to Australia;

Answer:

VAT shall be imposed when the Company purchases inputs to produce the merchandise. Currently, the VAT rate is 17%. VAT refunds are given on exports. The export tax refund rate of the products was 17%. More details on export tax refunds are provided in Exhibit 9-legislation on Export Tax Refund. The total tax refunds=the total exported amount * tax refund rate of the subject product, and it is allocated to the product in accordance with the exported amount.

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: *"Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs"*

If such a scheme operates in the country of export adjustments can also be made for the drawback payable on the substituted domestic materials, provided the total amount of the drawback does not exceed the total duty paid.

3. Level of trade

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

- (a) *costs arising from different functions*: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

- (b) *level discount*: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

Answer:

Not applicable

4. Credit

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, Customs and Border Protection will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

- the rate, or average of rates, applying on actual short term borrowings by the company; or
- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over each month of the investigation period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system¹, the average credit period may be determined as follows:

1. *Calculate an accounts receivable turnover ratio*

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

2. *Calculate the average credit period*

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

¹ Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

The following items are identified in the amounts quantified at question D-4:

Answer:

Not applicable

5. Transportation

Explain how you have quantified the amount of inland transportation associated with the domestic sales ("Inland transportation Costs"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

Answer:

The inland transportation cost is allocated in accordance with quantity, inland transportation cost per unit = (total inland transportation expense / total quantity of domestic sales) * unit quantity.

The expense is located in operating expenses of the general ledger account

6. Handling, loading and ancillary expenses

List all charges that are included in the domestic price and explain how they have been quantified ("Handling, loading and ancillary Expenses"). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

Answer:

Not applicable. There is no handling, loading and ancillary expenses.

7. Packing

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed "Packing".

Answer:

Not applicable. The packing costs are included in the manufacture costs, the products do not need to pack once it leaves the factory

8. Commissions

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed "Commissions". Identify the general ledger account where the expense is located.

Answer:

Not applicable

9. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses (“**Warranty & Guarantee expenses**” and “**Technical assistance & other services**”), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

Answer:

Not applicable

10. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed “**Other factors**”. List the factors and show how each has been quantified in per unit terms. For example:

- *inventory carrying cost*: describe how the products are stored prior to sale and show data relating to the average length of time in inventory. Indicate the interest rate used;
- *warehousing expense*: an expense incurred at the distribution point;
- *royalty and patent fees*: describe each payment as a result of production or sale, including the key terms of the agreement;
- *advertising*; and
- *bad debt*.

Answer:

Not applicable

E-3 Duplication

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson’s salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

Answer:

Not applicable

SECTION F
EXPORT SALES TO COUNTRIES OTHER THAN AUSTRALIA
(THIRD COUNTRY SALES)

Your response to this part of the questionnaire may be used by Customs and Border Protection to select sales to a third country that may be suitable for comparison with exports to Australia.

Sales to third countries may be used as the basis for normal value in certain circumstances. Customs and Border Protection may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.

F-1 Using the column names and column descriptions below provide a summary of your export sales to countries other than Australia.

Answer:

【Please see the spreadsheet】

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company, This information has been provided to the Authority in the confidential response.

Supply this information in spreadsheet file named "Third country"

F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.

Answer:

Not applicable

SECTION G

COSTING INFORMATION AND CONSTRUCTED VALUE

The information that you supply in response to this section of the questionnaire will be used for various purposes including:

- testing the profitability of sales of like goods on the domestic market;
- determining a constructed normal value of the Goods Under Consideration (the goods) - ie of the goods exported to Australia; and
- making certain adjustments to the normal value.

You will need to provide the cost of production of both the exported goods (the goods) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (eg. non-operating expenses not included elsewhere) associated with the goods.

In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.

If, in response to question B4 (Sales to Australia, Export Price) you:

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)

you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the investigation period.

At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.

G-1. Production process and capacity

1. Describe the production process for the goods. Provide a flowchart of the process. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or by-products that result from producing the goods.

Answer:

【Please see Exhibit 10- The Manufacturing Process of the Company】

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company. This information has been provided to the Authority in the confidential response.

G-2. Provide information about your company's total production in the following table:

* rather than showing a 'name-plate' optimal capacity it is more meaningful to show the maximum level of production that may reasonably be attained under normal operating conditions. For example assuming: normal levels of maintenance and repair; a number of shifts and hours of operation that is not abnormally high; and a typical production mix.

Provide this information on a spreadsheet named "Production".

Answer:

Please see spreadsheet

G-3. Cost accounting practices

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

Answer:

Please see Exhibit 11-Flowchart of Cost Accounting System

2. Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (ie differences between standard and actual production costs) have been allocated to the goods - and describe how those variances have been allocated.

Answer:

The Company's cost accounting system based on actual cost

3. Provide details of any significant or unusual cost variances that occurred during the investigation period.

Answer:

There are no any significant or unusual cost variances that occurred during the investigation period.

4. Describe the profit/cost centres in your company's cost accounting system.

Answer:

The company adopt actual cost and do not have the profit /cost centres,

5. For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the goods under consideration. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

Answer:

All costs are allocated to each product in accordance with weight of the products

6. Describe the level of product specificity (models, grades etc) that your company's cost accounting system records production costs.

Answer:

The level of product can be specified into size, Surface treatment.

7. List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

Answer:

Not applicable

- 8 State whether your company engaged in any start-up operations in relation to the goods under consideration. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

Answer:

Not applicable

- 9 State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation in its accounting records.

Answer:

Not applicable

G-4 Cost to make and sell on domestic market

This information is relevant to testing whether domestic sales are in the ordinary course of trade.²

1. Please provide (in the format shown in the table below) the actual unit cost to make and sell each model/type* (identified in section C) of the like goods sold on the domestic market. Provide this cost data for each quarter over the investigation period. If your company calculates costs monthly, provide monthly costs.

* You should provide separate costs for at least untreated and treated structural timber. Costs should be provided for lower levels of product type if these are normally calculated by your company.

Answer:

² Customs applies the tests set out in s.269TAA of the Customs Act 1901 to determine whether goods are in ordinary course of trade. These provisions reflect the WTO anti-dumping agreement – see Article 2.2.1.

Prepare this information in a spreadsheet named "**Domestic CTMS**".

- ¹ Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.
- ² Relating to costs of production only; identify each cost separately.
- ³ Identify each cost separately. Please ensure non-operating expenses that relate to the goods under consideration are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

Provide this information for each quarter (or month if your company calculates costs on a monthly basis) over the period of the investigation.

Provide the information broken down into fixed and variable costs, and indicate the % total cost represented by fixed costs.

If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

G-5 Cost to make and sell goods under consideration (goods exported to Australia)

The information is relevant to calculating the normal values based on costs. It is also relevant to calculating certain adjustments to the normal value.

Prepare this information in a spreadsheet named "**Australian CTMS**".

- ¹ Identify each cost separately. Include indirect material costs as a separate item only if not included in manufacturing overheads.
- ² Relating to costs of production only; identify each cost separately.
- ³ Identify each cost separately. Please ensure non-operating expenses that relate to the goods are included. Where gains/losses due to foreign currency exchange are incurred, please provide detail of the amounts separately for transaction and translation gains/losses.

Provide this information for each quarter (or month if your company calculates costs on a monthly basis) over the period of the investigation.

Provide the information broken down into fixed and variable costs, and indicate the % total cost represented by fixed costs.

If you are unable to supply this information in this format, please contact the case officer for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

G-6 Major raw material costs

List major raw material costs, which individually account for 10% or more of the total production cost.

Answer:

The major raw material costs, which individually account for 10% or more of the total production cost is aluminium

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (eg market prices, transfer prices, or actual cost of production).

Answer:

This is highly sensitive commercial information, which cannot be provided in the non-confidential summary. Disclosure of such confidential information could provide the Company's competitors with insights into the Company's commercial strategy thereby posing a serious threat to the commercial interests of the company, This information has been provided to the Authority in the confidential response.

Where the major input is produced by an associate of your company Customs and Border Protection will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at 'spot prices' or under long term contracts etc).

The term associate is defined in section 269TAA of the Customs Act. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

Important note: If the major input is sourced as part of an integrated production process you should provide detailed information on the full costs of production of that input.

SECTION H – PARTICULAR MARKET SITUATION

The applicants claim that a 'market situation' exists in respect of ARWs from China due to government influence on both the prices of the goods and the major raw material inputs (aluminium) used in the manufacture of the goods.

The existence of a 'market situation' could affect Customs and Border Protection's approach to calculating normal value within its dumping assessment.

In broad terms, it is generally the case that the normal value of the goods is the price paid for like goods sold for home consumption in the country of export. One of the exceptions to using domestic selling prices for this purpose provides that the domestic selling prices are not an appropriate basis for normal value if the Minister is satisfied that a situation in the market has rendered domestic selling prices unsuitable for establishing normal values (i.e. a 'particular market situation' exists).

One of these situations may be where the domestic selling prices in the country of export have been materially affected by government influence rendering those prices unsuitable for use in establishing normal values.

Through this questionnaire, Customs and Border Protection is providing producers/exporters of the subject goods in China the opportunity to supply evidence that the sector under investigation is operating under market conditions. In examining the matter, Customs and Border Protection will also send questionnaires to the GOC and continue to examine information available from third-party sources.

It may be necessary for Customs and Border Protection to request additional information following receipt and review of your response.

There are three parts to this section:

PART H-1 - Requests information concerning the organisation of your company and the GOC's involvement in the business of your company.

PART H-2 - Requests information concerning the GOC's measures with respect to the aluminium industry in China.

Legislation on export tax refund

Measures for the Administration on Export Tax Refund (Exemption)

In pursuant to the "Interim Regulations of the People's Republic of China on Value-Added Tax" and the "Interim Regulations of the People's Republic of China on Consumption Tax", the following provisions on the refund or exemption of value-added tax and consumption tax on export goods are hereby promulgated:

1. Enterprises empowered to handle exports (hereinafter referred to as "export enterprises") except otherwise provided for may apply to tax authorities monthly for an approval of refund or exemption of value-added tax and consumption tax for themselves or acting as an export agent after customs declaration and listing of the goods as sales in their accounts upon the presentation of related documents.

2. The following goods are eligible for refund or exemption of value added tax and consumption tax with special approvals:

(1) goods shipped out of the country for use in contracting projects by companies contracting for foreign engineering projects.

(2) goods shipped out of the country for use in repair projects by enterprises undertaking the repairs.

(3) goods sold to foreign ships or Chinese ocean-going ships by foreign ship supporting companies or ocean-going shipping supply companies and paid in foreign exchange.

(4) machinery and electronic products and building materials sold by domestic enterprises after winning international bidding financed by loans provided for by international financial organizations or foreign governments.

(5) goods bought in China and shipped out of the country by enterprises as their shares of investment abroad.

3. The following export goods are exempt from value-added tax and consumption tax:

(1) goods processed with supplied materials and re-exported.

(2) contraceptive drugs and instruments, ancient and second-hand books.

(3) cigarettes.

(4) military goods and goods for export produced by military supplies factories or allocated by military supplies departments.

The tax-free goods prescribed by the State shall not get tax refund.

The provisions on the tax refund or tax exemption for goods exported by enterprises with foreign investment shall be promulgated separately.

4. Except re-export of goods processed with supplied materials as approved by the State, the following goods are not eligible for refund or exemption of value-added tax and consumption tax:

- (1) crude oil.
- (2) export goods as foreign aid.
- (3) goods whose export is banned by the State, including natural bezoar, musk, copper and copper-based alloys and platinum etc.
- (4) sugar.

5. Goods bought by export enterprises from small scale taxpayers with ordinary bills shall get no tax reduction or tax refund whether they are sold at home or exported. But reduction or tax refund shall be made for the following goods considering their large proportion in the export and special conditions in production and procurement:

Drawn work, arts and crafts, spices, mountain goods, wickerwork and bamboo and rattan products, fishing nets and gears, rosin, galls, raw lacquer, bristle tails, goat skin and paper products.

6. The export of the originally high tax rate goods and precious goods shall also follow the relevant provisions in the "Circular of the State Administration of Taxation and the Ministry of Foreign Trade and Economic Cooperation on Tax Refund for High Tax Rate Products and Precious Products Exported by Some Export Enterprises" (GuoShuiFa [1992] No.79). The export of the originally high tax rate goods and precious goods exported by non-designated enterprises shall not get refund.

7. The amount of value-added tax refunded for export goods shall be computed according to the tax amount for purchase of the product. The specific methods of computation are:

- (1) For an export enterprise which has separate inventory account and sales account for export goods, the taxable amount shall be computed according to price and tax amount specified in the special invoice for value-added tax on purchase of goods.

For enterprises which have adopted the weighted average method in inventory and sales, the following formula may be used for computation according to different tax rates and goods:

Refundable amount = Amount of export goods * weighted average purchasing price * Tax rate

- (2) For export enterprises which handle both domestic sales and export goods and there are no separate accounts for export goods, the following formula should be applied after computing the taxable amount of the sales account for domestic sales and deducting the taxable amount of purchase account of the period:

A. Sales amount * Tax rate \geq remaining taxable amount after deduction of the tax amount for the purchase of the product.

Refundable amount = Tax amount remaining for the purchase after deduction

B. Sales amount * Tax < Remaining taxable amount after deduction for the purchase of the product

Refundable amount = Sales amount * Tax rate

Taxable amount for purchase of the product for deduction in the next period = the taxable amount for purchase of the product remaining after deduction of the period - refundable amount

Money amount of sales refers to the FOB price of the goods and the Renminbi amount computed according to the foreign exchange quotation. Tax rate refers to the refund tax rate of the goods.

The taxable amount of refundable goods bought for export from small scale taxpayers shall be computed according to the following formula:

Purchased goods = Sales amount specified in Taxable amount of ordinary invoice (including value-added tax) / (1 + tax rate) * Tax refund rate

The taxable amount of purchased goods for export shall be determined by the amount of value-added tax specified in the special invoices for value-added tax.

8. The refundable consumption tax amount for goods exported by foreign trade enterprises or by foreign trade enterprises for others shall be computed according to the prices for which consumption tax is levied upon purchase of the goods from factories if the consumption tax is levied according to the advaloren rate and according to the amount purchased and declared for export if the consumption tax is levied according to the advaloren rate and according to the amount purchased and declared for export if the consumption tax is levied according to the specific rate. The formulation for computation is:

Refundable consumption tax amount = Factory sales amount of export goods (export quantity) * Tax rate (per unit tax amount)

Production enterprises with the power of handling export shall be exempt from consumption tax according to the actual amount exported in exporting their own taxable goods.

9. If the sales amount of export goods, the amount of goods purchased and tax amount are apparently on the high side and there is no justifiable account for it, tax authorities have the right to refuse tax refund or tax exemption.

10. The rate of tax refund for value-added tax on export goods shall be 17% and 13% as prescribed in the Interim Regulations of the People's Republic of China on Value-Added Tax. The rate of tax refund for refundable goods purchased from small scale taxpayers shall be 6%. The tax-free agricultural produce purchased directly from producers for export shall not be refunded.

The rate of refundable consumption tax for export goods and the per unit tax amount shall be computed according to the Table of Consumption Tax Categories and Tax Rates (Tax Amount) attached to the Interim Regulations of the People's Republic of China on Consumption Tax.

An enterprise shall account and declare goods of different tax rates separately. The lowest tax rate shall apply for goods whose tax rates cannot be differentiated clearly.
