EXPORTER QUESTIONNAIRE – TAIWAN, JAPAN, THE REPUBLIC OF INDONESIA AND THE REPUBLIC OF KOREA

PRODUCT CONCERNED: HOT ROLLED PLATE STEEL FROM THE

PEOPLE'S REPUBLIC OF CHINA, THE REPUBLIC OF KOREA, THE REPUBLIC OF INDONESIA, JAPAN AND TAIWAN

INVESTIGATION PERIOD: 1 JANUARY TO 31 DECEMBER 2012

RESPONSE DUE BY: 21 MARCH 2013

EXTENDED TO 8 APRIL 2013

ADDRESS FOR RESPONSE: International Trade Remedies Branch

Australian Customs and Border

Protection Service 5 Constitution Avenue Canberra ACT 2601

Australia

Attention: Director Operations 3

CASE MANAGER: Mr Mick Kenna & Mrs Michelle Gibson

TELEPHONE: +61-2-6275-6544 (Mick Kenna)

+61-2-6275-6129 (Michelle Gibson)

FAX: +61-2-6275-6990

EMAIL: itrops3@customs.gov.au

Please note that a non-confidential version of the reply to this questionnaire must also be provided.

SECTION A - COMPANY STRUCTURE AND OPERATIONS

This section requests information relating to company details and financial reports.

A-1 IDENTITY AND COMMUNICATION

Please nominate a person within your company who can be contacted for the purposes of this investigation:

Head office:

| Name | Kim, Choon Shik |
|---------------------------------|---|
| Position in the company | Team Manager |
| Address | 10th Floor GS Tower 679, Yeoksam-dong Gangnam-gu Seoul, Korea |
| Telephone | +82 2 2222 0114 +82 2 317 1466 |
| Facsimile number | +82 2 2005 5350 |
| Email address of contact person | cskim@gsgcorp.com |

Factory:

GS Global Corp is not the manufacturer of the goods it exported to Australia. The goods GS Global exported were produced by [CONFIDENTIAL TEXT DELETED – unrelated third party].

A-2 REPRESENTATIVE OF THE COMPANY FOR THE PURPOSE OF INVESTIGATION

If you wish to appoint a representative to assist you in this investigation, provide the following details:

| Name | Daniel Moulis |
|---------------------------------|--|
| Address | 6/2 Brindabella Circuit Brindabella Business Park Canberra International Airport Australian Capital Territory Australia 2609 |
| Telephone | + 61 2 6163 1000 |
| Facsimile number | + 61 2 6162 0606 |
| Email address of contact person | daniel.moulis@moulislegal.com |

All communications in relation to this matter should be directed to Moulis Legal in the first instance.

Note that in nominating a representative, Customs and Border Protection will assume that confidential material relating to your company in this investigation may be freely released to, or discussed with, that representative.

A-3 COMPANY INFORMATION

1. What is the legal name of your business? What kind of entity is it (e.g. company, partnership, sole trader)? Please provide details of any other business names that you use to export and/or sell goods.

The legal name of the company is GS Global Corp. (hereinafter "GSG"). GSG is a public company under the Korean Commercial Law. The company does not use any other business names to export or sell goods.

2. Who are the owners and/or principal shareholders? Provide details of shareholding percentages for joint owners and/or principal shareholders. (List all shareholders able to cast, or control the casting of, 5% or more of the maximum amount of votes that could be cast at a general meeting of your company).

The principal shareholder of GSG is GS Holdings, a holding company. As at 30 September 2012, GS Holdings held 54.58% of the shares in GSG. GS Holding is the only shareholder that holds more than 5% of shares in GSG.

3. If your company is a subsidiary of another company, list the principal shareholders of that company.

A list of the major shareholders of GS Holdings with their shareholding percentages is provided in Attachment 1 [CONFIDENTIAL ATTACHMENT].

4. If your parent company is a subsidiary of another company, list the principal shareholders of that company.

GS Holdings is not a subsidiary of another company.

5. Provide a diagram showing all associated or affiliated companies and your company's place within that corporate structure.

A diagram showing all companies associated or affiliated with GSG, and GSG's place within that corporate structure, is provided in Attachment 2 [CONFIDENTIAL ATTACHMENT].

6. Are any management fees/corporate allocations charged to your company by your parent or related company?

[CONFIDENTIAL TEXT DELETED – management policies]

7. Describe the nature of your company's business. Explain whether you are a producer or manufacturer, distributor, trading company, etc.

GSG's main business activities are:

- import, export and triangular trade of items;
- foreign resources development;
- import distribution;
- PDI services of imported vehicles, etc.
- **8.** If your business does not perform all of the following functions in relation to GUC, then please provide names and addresses of the companies which perform each function:
 - produce or manufacture

GSG does not produce or manufacture the GUC. The goods exported by GSG to Australia are manufactured by [CONFIDENTIAL TEXT DELETED – unrelated third party]. The factory addresses of [CONFIDENTIAL TEXT DELETED – unrelated third party] are provided above at A-1.

• sell in the domestic market

GSG did not sell the GUC in the domestic market during the POI. GSG has been advised that [CONFIDENTIAL TEXT DELETED – unrelated third party] sold like goods to those exported by GSG to Australia in the domestic market during the POI. The sales office address of [CONFIDENTIAL TEXT DELETED – detail of unrelated third party]

export to Australia, and

GSG exported the GUC to Australia during the POI.

export to countries other than Australia.

GSG exported the GUC to third countries during the period of investigation.

9. Provide your company's internal organisation chart. Describe the functions performed by each group within the organisation.

GSG's internal organisation chart is provided in Attachment 3 [CONFIDENTIAL ATTACHMENT].

In summary, there are four major groups within GSG. They are:

 Steel/Plant, which includes Steel 1 and Steel 2 divisions – the divisions within this group perform import and export activities regarding steel products (including the GUC), industrial plants, plant equipment and base materials.

- Resources/Industrial, which includes petrochemical, resources and living commodities divisions – the divisions within this group perform import and export and resource development activities related to those industries and commodities.
- Planning/HR/Legal the divisions within this group perform planning, coordination and administration activities.
- Finance and Accounting.

A brochure provided in Attachment 4 provides more detailed information regarding each department.

10. Provide a list of your business' Board of Directors, Managing Director (or CEO) and Senior Executives.

A list of GSG's Board members, its managing director (CEO) and its senior executives is provided at Attachment 5 [CONFIDENTIAL ATTACHMENT].

11. Provide a copy of your most recent annual report together with any relevant brochures or pamphlets on your business activities.

GSG does not publish an annual report other than its annual financial reports, once audited. The GSG group brochure is provided at Attachment 4.

- **12.** Provide details of <u>all</u> transactions between your company and all related parties. For example:
 - Supplying/selling completed or partially completed products.
 - Suppling/selling raw materials.
 - Performing management functions (including any financial functions).
 - Processing (including toll processing) of any raw materials, intermediary or completed products.
 - Trading in products/materials supplied by related parties.

A list of transactions between GSG and related parties is provided at Attachment 6 [CONFIDENTIAL ATTACHMENT].

A-4 GENERAL ACCOUNTING/ADMINISTRATION INFORMATION

1. Indicate your accounting period.

GSG's accounting period is the calendar year of 1 January to 31 December.

2. Indicate the address where the financial records are held.

GSG's accounting and financial records are kept at and are accessible from its head office address. GSG notes that it utilizes the SAP system, which is an integrated global ERP system, in its ordinary course of business

- **3.** Provide the following financial documents for the two most recently completed financial years plus all subsequent monthly, quarterly or half yearly statements:
 - chart of accounts;
 - audited consolidated and unconsolidated financial statements (including all footnotes and the auditor's opinion);
 - internal financial statements, income statements (profit and loss reports), or management accounts, that are prepared and maintained in the normal course of business for the goods under investigation.

These documents should relate to:

- the division or section/s of your business responsible for the production and sale of the goods under investigation, and
- the company overall.

Please refer to the following Attachments:

- Attachment 7 [CONFIDENTIAL ATTACHMENTS] chart of accounts;
- Attachments 8 and 9 GSG's audited consolidated and unconsolidated financial statements including audit or review reports (English translated version) for 2011;
- Attachments 10, 11 and 12 [CONFIDENTIAL ATTACHMENTS] GSG's audited consolidated and unconsolidated financial statements including audit or review reports for 2012 (English translated version not presently available).

GSG's SAP system can generate income statements to Steel/Plant division level. A sample income statement prepared in this way is provided in Attachment 13 [CONFIDENTIAL ATTACHMENT].

4. If you are not required to have the accounts audited, provide the unaudited financial statements for the two most recently completed financial years, together with your relevant taxation returns. Any subsequent monthly, quarterly or half yearly statements should also be provided.

GSG is required to have its financial statements audited annually.

5. Do your accounting practices differ in any way from the generally accepted accounting principles in your country? If so, provide details.

GSG's accounting practices do not differ in any way from the generally accepted accounting principles in Korea. Korea adopted the Korean International Financial Reporting Standards ("K-IFRS") for publicly listed companies from 1 January 2011. GSG's financial accounting practices are in accordance with K-IFRS.

6. Describe the significant accounting policies that govern your system of accounting, in particular:

GSG's accounting policies are explained in the notes to its audit report. GSG's financial and cost accounting policies regarding the specific matters raised by

Customs are explained below.

 the method of valuation for raw material, work-in-process, and finished goods inventories (e.g. last in first out –LIFO, first in first out- FIFO, weighted average);

Inventories are stated at the lower of cost or net realizable value. Cost of inventories, except for merchandise and in transit (specific identification method), is measured under the gross average method. It consists of the purchase price, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

The carrying amount of inventories sold in the period and the amount of any write-down of inventories to net realizable value and all losses of inventories in the period, less the amount of any reversal in the period of any write-down of the inventories arising from an increase in net realizable value, are recognized as an expense during the period.

 costing methods, including the method (e.g. by tonnes, units, revenue, direct costs etc) of allocating costs shared with other goods or processes (such as front office cost, infrastructure cost etc);

All direct costs are captured for each specific transaction and product. Indirect costs are recorded as selling and administration expense and in cost of goods sold.

 valuation methods for damaged or sub-standard goods generated at the various stages of production;

Not applicable to GSG.

valuation methods for scrap, by products, or joint products;

Not applicable to GSG.

valuation and revaluation methods for fixed assets:

Property, plant and equipment are stated at historical cost less depreciation and accumulated impairment loss. Historical cost includes expenditures directly attributable to the acquisition of the items. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is possible that future economic benefits associated with the item will flow to the company and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the income statement during the financial period in which they are incurred.

 average useful life for each class of production equipment and depreciation method and rate used for each;

Land is not depreciated. Depreciation on other assets is calculated using the

straight-line method to allocate the difference between their cost and their residual values over their estimated useful lives, as follows:

| Type of Asset | Estimated Useful Life |
|-------------------------|-----------------------|
| Buildings | 20-40 years |
| Structures | 20-40 years |
| Machinery and Equipment | 4-10 years |
| Vehicles | 4-10 years |

Residual values and useful lives of assets are reviewed, and adjusted if appropriate, at the end of each reporting period. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount. Gains and losses on disposals are determined by comparing the proceeds with the carrying amount and are recognized within "Other operating income (expense)" in the income statement.

 treatment of foreign exchange gains and losses arising from transactions;

Gain or loss on foreign exchange transactions are incurred on foreign exchange transactions due to exchange rate fluctuations between the time an expense (or revenue) is incurred (or recognized) in a foreign currency and the time of payment (or receipt). Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within "Financial income (expense)". All other foreign exchange gains and losses are presented in the income statement within "Other operating income (expense)".

 treatment of foreign exchange gains/losses arising from the translation of balance sheet items;

GSG's functional and presentation currency is KRW. Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or financial statement closing. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognized in the income statement, except when deferred in other comprehensive income as qualifying cash flow hedges and qualifying net investment hedges.

inclusion of general expenses and/or interest;

General and specific borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are recognized in profit or loss in the

period in which they are incurred.

provisions for bad or doubtful debts, and treatment thereof in your accounts:

GSG records provisions for bad debts by analysing the remaining balance of account receivables and its past experience on bad debts.

expenses for idle equipment and/or plant shut-downs;

Not applicable to GSG.

costs of plant closure;

Not applicable to GSG.

restructuring costs;

Not applicable to GSG.

by-products and scrap materials resulting from your company's production process; and

Not applicable to GSG.

• effects of inflation on financial statement information.

As a general matter, K-IFRS requires companies to prepare financial statements on a historical cost basis, without taking into account the effects of inflation.

7. In the event that any of the accounting methods used by your company have changed over the last two years provide an explanation of the changes, the date of change, and the reasons for it.

GSG's financial statements for the annual periods beginning on 1 January 2011 have been prepared in accordance with K-IFRS. These are the standards, subsequent amendments and related interpretations issued by the International Accounting Standards Board ("IASB") that have been adopted by the Republic of Korea.

GSG's FY2011 financial statements were prepared in accordance with K-IFRS and are subject to K-IFRS 1101 ("First-time Adoption of K-IFRS"). According to K-IFRS 1101, the transition date from the accounting principles previously generally accepted in the Republic of Korea ("Previous K-GAAP") to K-IFRS accounting principles is 1 January 2010. Reconciliations and descriptions of the effect of the transition from previous K-GAAP to K-IFRS on GSG's equity, comprehensive income and cash flows are described in Note 39 to GSG's nonconsolidated financial statements for FY 2011.

A-5 INCOME STATEMENT

Complete the spreadsheet entitled 'Income statement' within the Exporter questionnaire – Hot Rolled Plate Steel – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire.

Please refer to "Income statement" provided at Attachment 14 – GSG EQ spreadsheets [CONFIDENTIAL ATTACHMENT].

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The formulae are provided in the spread sheet.

Explain how costs have been allocated between all products and the GUC within these calculations.

Selling expense and cost of goods sold are captured for each specific transaction and product within the GUC. Administration expense and common expense are allocated according to sales amount of all products. The detailed worksheet for these allocations is provided in Attachment 15 [CONFIDENTIAL ATTACHMENT].

This information will be used to verify the completeness of cost data that you provide in Section G. If, because of your company's structure, the allocations would not be helpful in this process, please explain why this is the case.

Note: if your financial information does not permit you to present information in accordance with this table please present the information in a form that closely matches the table.

A-6 SALES

Complete the spreadsheet entitled '**Turnover**' within the *Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet* provided alongside this questionnaire.

Please refer to "Turnover" provided at Attachment 14 - GSG EQ spreadsheets [CONFIDENTIAL ATTACHMENT]

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

In completing the sheet, use the currency in which your accounts are kept. This information will be used to verify the cost allocations to the GUC in Section G.

Also, you should be prepared to demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.

GSG can demonstrate that sales data shown for the goods is a complete record by linking total sales of these goods to relevant financial statements.

A-7 PRODUCTION PROCESS AND CAPACITY

1. In addition to manufacturing hot rolled plate steel, does your company manufacture any of the raw materials used in the production of the plate steel? (e.g. HRC or steel slab) Please list all raw materials manufactured by your company.

Not applicable to GSG. Please refer to the EQ response to be submitted by [CONFIDENTIAL TEXT DELETED – unrelated third party].

2. Describe the production process for the GUC. If there is more than one production process, describe each production process. Provide a flowchart of the process/es. Include details of all products manufactured using the same production facilities as those used for the goods. Also specify all scrap or byproducts that result from producing the goods.

Not applicable to GSG.

3. Complete the spreadsheet entitled '**Production**' within the *Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet* provided alongside this questionnaire.'

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

Not applicable to GSG.

SECTION B - SALES TO AUSTRALIA (EXPORT PRICE)

This section requests information concerning your export practices and prices to Australia. You should include costs incurred beyond ex-factory.

Export prices are usually assessed at FOB point, but Customs and Border Protection may also compare prices at another level (e.g. ex factory).

You should report prices of all GUC shipped to Australia during the investigation period.

The invoice date will normally be taken to be the date of sale. If you consider:

- the sale date is not the invoice date (see 'date of sale' column explanation in question B4 below) and;
- o an alternative date should be used when comparing export and domestic prices

you **must** provide information in section D on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.

In addition, if you have reported that the date of sale is not the invoice date, you should provide information on the lead times for domestic and export sales (from order confirmation to fulfilment), lead-time differences in raw material purchasing and delivery and/or in the production rolling schedules, so far as those differ between export and domestic sales.

- **B-1** For each customer in Australia to whom you shipped goods in the investigation period list:
 - name:

GS Global Australia Pty Ltd ("GSGA")

address;

Level 38, Northpoint 100 Miller Street North Sydney NSW Australia 2060

contact name and phone/fax number where known; and

Peter Han

Deputy General Manager Tel: +62 2 99540911 Fax: +62 2 99540919

• trade level (for example: distributor, wholesaler, retailer, end user, original equipment).

Importer

- **B-2** For each customer identified in B1 please provide the following information.
 - (a) Describe how the goods are sent to each customer in Australia, including a diagram if required.

[CONFIDENTIAL TEXT DELETED – detail of sales process]

A diagram of the sales process is provided in Attachment 16 [CONFIDENTIAL ATTACHMENT].

(b) Identify each party in the distribution chain and describe the functions performed by them. Where commissions are paid indicate whether it is a pre or post exportation expense having regard to the date of sale.

The parties involved in the distribution chain from GSG's point of view are:

- GSG's manufacturing platform for its export to Australia [CONFIDENTIAL TEXT DELETED – unrelated third party];
- Korean transport company [CONFIDENTIAL TEXT DELETED detail of unrelated service provider];
- · the relevant ocean freight company;
- the importer GSGA.

[CONFIDENTIAL TEXT DELETED – details of commercial arrangements with unrelated third parties].

The role of the next party in the distribution chain - the ocean freight company - is self-explanatory. GSG is responsible for arranging the ocean freight company and the port of export. [CONFIDENTIAL TEXT DELETED - name of importer] importer then receives and clears the goods.

[CONFIDENTIAL TEXT DELETED – details of sales arrangement]

(c) Explain who retains ownership of the goods at each stage of the distribution chain. In the case of delivered duty paid (DDP) sales, explain who retains ownership when the goods enter Australia.

The chain of ownership proceeds as follows:

- (a) [CONFIDENTIAL TEXT DELETED arrangement with supplier].
- (b) GSG exported all of the goods to Australia to GSGA on [CONFIDENTIAL TEXT DELETED sales terms] during the POI.
- (c) On this basis, [CONFIDENTIAL TEXT DELETED detail of sales arrangement].

GSG did not export the goods to Australia on DDP terms during the POI.

(d) Describe any agency or distributor agreements or other contracts entered into in relation to the Australian market (supply copy of the agreement if possible).

GSG had no agency or distribution arrangements, or other contracts, in relation to the Australian market during the POI. The export transaction is a sale by GSG to GSGA.

(e) Explain in detail the process by which you negotiate price, receive orders, deliver, invoice and receive payment. If export prices are based on price lists supply copies of those lists.

Please see our response to question B-2(a) above.

[CONFIDENTIAL TEXT DELETED – pricing policy]

(f) State whether your firm is related to any of its Australian customers. Give details of any financial or other arrangements (e.g. free goods, rebates, or promotional subsidies) with the customers in Australia (including parties representing either your firm or the customers).

GSG's only Australian export customer during the POI was GSGA. [CONFIDENTIAL TEXT DELETED – detail of sales arrangement]

(g) Details of the forward orders of the GUC (include quantities, values and scheduled shipping dates).

Details of the forward orders are listed below.

Shipping Dates Quantity (MT) Value (AUD)

[CONFIDENTIAL TEXT DELETED]

B-3 Do your export selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.

GSG has only one distribution channel to Australia.

B-4 Complete the spreadsheet entitled '**Australian sales**' within the *Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet* provided alongside this questionnaire.

This spreadsheet is to list **all** shipments (<u>i.e. transaction by transaction</u>) to Australia **of the GUC** (do not include non-GUC items) in the investigation period.

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The below table provides information as to what is meant by each column heading within the spreadsheet.

| Column heading | Explanation | |
|-------------------|--|--|
| Customer name | names of your customers | |
| Level of trade | the level of trade of your customers in Australia | |
| Model/type | commercial model or type | |
| Plate surface | Surface of the plate - patterns in relief Yes/No | |
| Product code | code used in your records for the model/grade/type | |
| 1 Toddot code | identified. Explain all product codes in your submission. | |
| Thickness (mm) | Thickness measured in millimetres of the steel plate | |
| Width (mm) | Width measured in millimetres of the steel plate | |
| Length (mm) | Length of the steel plate | |
| Trimmed edge or | Identify if the edges of the steel plate are trimmed or | |
| untrimmed edge of | untrimmed | |
| Grade | Identify the grade of the steel plate, e.g. 250/350/450 | |
| Grade | MPa | |
| Low temperate | Low temperature (Charpy) tested, and if so, tested to | |
| tested | what temperature. | |
| High temperature | Indicate if the steel plate has undergone high | |
| (tensile) tested | temperature (tensile) testing. | |
| Through | Indicate if the steel plate has undergone through | |
| thickness | thickness (tensile) testing. | |
| (tensile) tested | , , , | |
| Ultrasonic tested | Indicate if the steel plate has undergone ultrasonic | |
| | testing and if yes to what quality level. | |
| Prime or non- | Identify if the steel plate is prime product or non-prime | |
| prime | | |
| Standard | Identify the standard that the steel plate has been | |
| | produced to (e.g. Australian Standard, Japanese | |
| | Standard, British Standard) | |
| Order number | Order number | |
| Date of order | Date order is confirmed confirm | |
| confirmation | | |
| Invoice number | invoice number | |
| Invoice date | invoice date | |
| Date of sale | refer to the explanation at the beginning of this section. If | |
| | you consider that a date <i>other than</i> the invoice date best | |
| | establishes the material terms of sale, report that date. | |
| | For example, order confirmation, contract, or purchase order date. | |
| Shipping terms | Delivery terms e.g. CIF, C&F, FOB, DDP (in accordance | |
| | with Incoterms) | |
| Payment terms | agreed payment terms e.g. 60 days=60 etc | |
| Quantity | Quantity in units shown on the invoice. Show basis e.g. | |
| | kg. | |

| Gross invoice | gross invoice value shown on invoice in the currency of | |
|-------------------|---|--|
| value | sale, excluding taxes. | |
| Discounts | if applicable, the amount of any discount deducted on | |
| | the invoice on each transaction. If a % discount applies | |
| | show that % discount applying in another column. | |
| Rebates | The amount of any deferred rebates or allowances paid | |
| | to the importer in the currency of sale. | |
| Other charges | any other charges, or price reductions, that affects the | |
| | net invoice value. Insert additional columns and provide | |
| | a description. | |
| Invoice currency | the currency used on the invoice | |
| Exchange rate | Indicate the exchange rate used to convert the currency | |
| | of the sale to the currency used in your accounting | |
| NI II | system | |
| Net invoice value | the net invoice value expressed in your domestic | |
| | currency as it is entered in your accounting system | |
| | | |
| Other discounts | The actual amount of discounts not deducted from the | |
| | invoice. Show a separate column for each type of | |
| | discount. | |
| Ocean freight** | the actual amount of ocean freight incurred on each | |
| | export shipment listed. | |
| Marine insurance | Amount of marine insurance | |
| FOB export | the free on board price at the port of shipment. | |
| price** | · | |
| Packing* | Packing expenses | |
| Inland | inland transportation costs included in the selling price. | |
| transportation | For export sales this is the inland freight from factory to | |
| costs* | port in the country of export. | |
| Handling, loading | handling, loading & ancillary expenses. For example, | |
| & ancillary | terminal handling, export inspection, wharfage & other | |
| expenses* | port charges, container tax, document fees & customs | |
| | brokers fees, clearance fees, bank charges, letter of | |
| | credit fees, & other ancillary charges incurred in the | |
| 144 | exporting country. | |
| Warranty & | warranty & guarantee expenses | |
| guarantee | | |
| expenses* | | |
| Technical | expenses for after sale services, such as technical | |
| assistance & | assistance or installation costs. | |
| other services* | Commissions paid. If more than one type is paid income | |
| Commissions* | Commissions paid. If more than one type is paid insert additional columns of data. Indicate in your response to | |
| | , , , | |
| | question B2 whether the commission is a pre or post exportation expense having regard to the date of sale. | |
| Other factors* | any other costs, charges or expenses incurred in | |
| Other ractors | relation to the exports to Australia (include additional | |
| | columns as required). See question B5. | |
| | columno ao requireu). Oce question do. | |

Notes

^{**} FOB export price and Ocean Freight:

<u>FOB export price</u>: An FOB export price must be calculated for each shipment regardless of the shipping terms. FOB price includes inland transportation to the port of exportation, inland insurance, handling, and loading charges. It excludes post exportation expenses such as ocean freight and insurance. Use a formula to show the method of the calculation on each line of the export sales spreadsheet.

Ocean freight: as ocean freight is a significant cost it is important that the <u>actual</u> amount of ocean freight incurred on each exportation be reported. If estimates must be made you must explain the reasons and set out the basis estimates must reflect changes in freight rates over the investigation period.

Freight allocations must be checked for consistency.

All of these costs are further explained in section E-1.

Please refer to "Australian sales" provided at Attachment 14 – GSG EQ spreadsheets [CONFIDENTIAL ATTACHMENT].

GSG advises that in preparing this spreadsheet it has consulted with [CONFIDENTIAL TEXT DELETED – unrelated third party] in relation to the identification of the products concerned. GSG considers that for the purpose of consistency and fair comparison, the best approach is to adopt the same product coding method in both the Australian sales and domestic sales. GSG is advised by [CONFIDENTIAL TEXT DELETED – unrelated third party] adopts a unified product coding system for both its production and sales records.

Accordingly, GSG matched its own sales record, which identifies the product by [CONFIDENTIAL TEXT DELETED – account details], with the more accurate and detailed product coding system of [CONFIDENTIAL TEXT DELETED – unrelated third party], and identified its Australian sales in line with [CONFIDENTIAL TEXT DELETED – unrelated third party] product code. The same approach has been adopted in preparing the Australian CTMS spreadsheet at Section G below.

Further, please note that GSG's SAP system recorded all of its Australian sales during the POI in [[CONFIDENTIAL TEXT DELETED – details of sales terms and accounting method].

B-5 If there are any other costs, charges or expenses incurred in respect of the exports listed above which have not been identified in the table above, add a column within the 'Australian sales' spreadsheet (see "other factors" in question B-4) for each item, and provide a description of each item. For example, other selling expenses (direct or indirect) incurred in relation to the export sales to Australia.

GSG has identified the credit expense incurred [CONFIDENTIAL TEXT DELETED – details of credit expense]. This has been separately reported in the spread sheet.

- **B-6** For each type of discount, rebate, or allowance offered on export sales to Australia:
 - provide a description; and

 explain the terms and conditions that must be met by the importer to obtain the discount.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amount shown in your response to question B4. If they vary by customer or level provide an explanation.

[CONFIDENTIAL TEXT DELETED – details of sales arrangement].

B-7 If you have issued credit notes (directly or indirectly) to the customers in Australia, in relation to the invoices listed in the detailed transaction by transaction listing in response to question B4, provide details of each credit note if the credited amount has **not** been reported as a discount or rebate.

[CONFIDENTIAL TEXT DELETED – details of sales arrangement].

B-8 If the delivery terms make you responsible for arrival of the goods at an agreed point within Australia (e.g. delivered duty paid), insert additional columns in the spreadsheet for all other costs incurred. For example:

| Import | Amount of import duty paid in Australia |
|-----------|---|
| duties | |
| Inland | Amount of inland transportation expenses within |
| transport | Australia included in the selling price |
| Other | Customs and Border Protection brokers, port and |
| costs | other costs incurred (itemise) |

[CONFIDENTIAL TEXT DELETED – details of sales arrangement].

- **B-9** Select <u>two</u> shipments, in different quarters of the investigation period, and provide a <u>complete</u> set of all of the documentation related to the export sale. For example:
 - o the importer's purchase order, order confirmation, and contract of sale;
 - o commercial invoice;
 - o bill of lading, export permit;
 - freight invoices in relation to movement of the goods from factory to Australia, including inland freight contract;
 - o marine insurance expenses; and
 - o letter of credit, and bank documentation, proving payment.

Customs and Border Protection will select additional shipments for payment verification at the time of the visit.

Please refer to the two sample sets of documents provided at Attachments 17 and 18 [CONFIDENTIAL ATTACHMENTS].

GSG respectfully submits that its position as supplier of the GUC to Australia constitutes it as the exporter in the circumstances of this case.

GSG submits that the evidence it has provided establishes that this is the type of case that Finn J considered in *Companhia Votorantim De Celulose E Papel v Anti-Dumping Authority, Christopher Cleland Schacht In His Capacity As Minister of Science and Small Business and Australian Paper Limited* [1996] FCA 1399 (19 April 1996) to be one in which the supplier of the goods – and not the manufacturer – is the exporter.

In that case Finn J was called upon to determine who might be considered as the "exporter" in a situation of "multipartite export, where... there is a sequence of dealings surrounding exportation and importation". The learned judge characterised the supplier in that case as purposely being the instrument of the manufacturer's exportation of its product to Australia, "a market selected by [the manufacturer] and not by the [supplier]". [CONFIDENTIAL TEXT DELETED – details of commercial arrangements with unrelated third party]

Finn J made clear that "circumstances may exist where a supplier of goods so uses a manufacturer as its instrument in its supply of goods to an importer that the supplier can properly be characterised as the exporter of those goods from the country of origin in question". We believe that in the matrix of facts concerning GSG's business [CONFIDENTIAL TEXT DELETED – details of commercial arrangements with unrelated third party].

GSG stands ready to further address these matters as may be required by Customs in its investigation.

SECTION C - EXPORTED GOODS & LIKE GOODS

C-1 Fully describe all of the goods you have exported to Australia during the investigation period. Include specification details and any technical and illustrative material that may be helpful in identifying, or classifying, the exported goods.

Please see response above at B-4. GSG does not manufacture the GUC, and does not sell the GUC on the domestic market. [CONFIDENTIAL TEXT DELETED – unrelated third party] manufactures the GUC.

Accordingly, GSG has requested the manufacturer [CONFIDENTIAL TEXT DELETED – unrelated third party] to provide responses to the questions in this Section C.

- C-2 List each model/type of the good exported to Australia (these models should cover all models listed in spreadsheet "Australian Sales" See section B of this questionnaire).
- C-3 If you sell like goods on the domestic market, for each model/type that your company has exported to Australia during the investigation period, list the most comparable model(s) sold domestically and provide a detailed explanation of the differences where those goods sold domestically (i.e. the like goods see explanation in glossary) are not identical to the goods exported to Australia.

This should be done by completing the spreadsheet entitled 'Like goods' within the Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire, detailing as follows:

| EXPORTED MODEL | DOMESTIC MODEL | IDENTICAL? | DIFFERENCES |
|---|---|---|--|
| Product code of each model of the goods exported to Australia | Product code of comparable model sold on the domestic market of the country of export | If goods are identical indicate "YES". Otherwise "NO" | Where the good exported to Australia is not identical to the like goods, describe the specification differences. If it is impractical to detail specification differences in this table refer to documents which outline differences |

C-4 Please provide any technical and illustrative material that may be helpful in identifying or classifying the goods that your company sells on the domestic market.

SECTION D - DOMESTIC SALES

This section seeks information about the sales arrangements and prices in the domestic market of the country of export.

<u>All</u> domestic sales **of like goods to the GUC** made during the investigation period must be listed transaction by transaction. If there is an extraordinarily large volume of sales data <u>and</u> you are unable to provide the complete listing electronically you **must** contact the Case Manager **before** completing the questionnaire.

If the Case Manager agrees that it is not possible to obtain a complete listing he or she will consider a method for sampling that meets Customs and Border Protection requirements. If agreement cannot be reached as to the appropriate method Customs and Border Protection may not visit your company.

Customs and Border Protection will normally take the invoice date as being the date of sale in order to determine which sales fall within the investigation period.

If, in response to question B4 (Sales to Australia, Export Price), you have reported that the date of sale is not the invoice date and you consider that this alternative date should be used when comparing domestic and export prices you **must** provide information on domestic selling prices for a matching period - even if doing so means that such domestic sales data predates the commencement of the investigation period.

If you do not have any domestic sales of like goods you must contact the Case Manager who will explain the information Customs and Border Protection requires for determining a normal value using alternative methods.

In addition, if you have reported that the date of sale is not the invoice date, you should provide information on the lead times for domestic and export sales (from order confirmation to fulfilment), lead-time differences in raw material purchasing and delivery and/or in the production rolling schedules, so far as those differ between export and domestic sales.

GSG did not sell the GUC on the domestic market. However, to GSG's knowledge, its manufacturer-supplier [CONFIDENTIAL TEXT DELETED – unrelated third party] sold like goods to the GUC on the domestic market during the POI.

Accordingly, GSG has requested [CONFIDENTIAL TEXT DELETED – unrelated third party] to provide responses to the questions in this Section D on an "other seller" basis.

D-1 Provide:

- a detailed description of your distribution channels to domestic customers, including a diagram if appropriate;
- information concerning the functions/activities performed by each party in the distribution chain; and
- a copy of any agency or distributor agreements, or contracts entered into.

If any of the customers listed are associated with your business, provide details of that association. Describe the effect, if any, that association has upon the price.

- **D-2** Do your domestic selling prices vary according to the distribution channel identified? If so, provide details. Real differences in trade levels are characterised by consistent and distinct differences in functions and prices.
- **D-3** Explain in detail the sales process, including:
 - the way in which you set the price, receive orders, make delivery, invoice and finally receive payment; and the terms of the sales; and
 - whether price includes the cost of delivery to customer.

If sales are in accordance with price lists, provide copies of the price lists.

D-4 Complete the spreadsheet entitled '**Domestic sales**' within the Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire.

This spreadsheet is to list **all domestic sales of like goods** (i.e. transaction by transaction) in the investigation period (do not include non-GUC items).

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The below table provides information as to what is meant by each column heading within the spreadsheet.

| Column Heading | Explanation |
|--------------------------------|--|
| Customer name | names of your customers. If an English version of the name is not easily produced from your automated systems show a customer code number and in a separate table list each code and name. |
| Level of trade | the level of trade of your domestic customer |
| Model/type | commercial model or type |
| Plate surface | Surface of the plate - patterns in relief Yes/No |
| Product code | code used in your records for the model/grade/type identified. Explain the product codes in your submission. |
| Thickness (mm) | Thickness measured in millimetres of the steel plate |
| Width (mm) | Width measured in millimetres of the steel plate |
| Length (mm) | Length of the steel plate |
| Trimmed edge or untrimmed edge | Identify if the edges of the steel plate are trimmed or untrimmed |
| Grade | Identify the grade of the steel plate, e.g. 250/350/450 MPa |
| Low temperate | Low temperature (Charpy) tested, and if so, tested |
| tested | to what temperature. |
| High temperature | Indicate if the steel plate has undergone high |
| (tensile) tested | temperature (tensile) testing. |
| Through | Indicate if the steel plate has undergone through |
| thickness (tensile) tested | thickness (tensile) testing. |
| Ultrasonic tested | Indicate if the steel plate has undergone ultrasonic |

| | T. e. 19 e | |
|---|--|--|
| Duline a - :: : | testing and if yes to what quality level. | |
| Prime or non- | Identify if the steel plate is prime product or non- | |
| prime | prime | |
| Standard | Identify the standard that the steel plate has been | |
| | produced to (e.g. Australian Standard, Japanese | |
| 0 1 | Standard, British Standard) | |
| Order number | show order confirmation number | |
| Date of order | Date order is confirmed | |
| confirmation | | |
| Invoice number | invoice number | |
| Invoice date | invoice date | |
| Date of sale | refer to the explanation at the beginning of this section. If you consider that a date <i>other than</i> the invoice date best establishes the material terms of sale and should be used, report that date. For example, order confirmation, contract, or purchase order date. | |
| Delivery terms | e.g. ex factory, free on truck, delivered into store | |
| Payment terms | payment terms agreed with the customer e.g. 60 days=60 etc | |
| Quantity | quantity in units shown on the invoice e.g. kg. | |
| Gross Invoice | gross value shown on invoice in the currency of | |
| value | sale, net of taxes. | |
| Discounts | the amount of any discount deducted on the | |
| | invoice on each transaction. If a % discount | |
| | applies show that % discount applying in another | |
| | column. | |
| Rebates | The amount of any deferred rebates or allowances paid to the importer in the currency of sale. | |
| Other charges | Any other charges, or price reductions, that affect the net invoice value. Insert additional columns and provide a description. | |
| Net invoice value | the net invoice value expressed in your domestic currency as recorded in your accounting system | |
| Other discounts | The actual amount of discounts not deducted from the invoice. Show a separate column for each type of discount. | |
| Packing* | packing expenses | |
| Inland transportation Costs* | amount of inland transportation costs included in the selling price. | |
| Handling, loading And ancillary Expenses* | handling, loading & ancillary expenses. | |
| Warranty & | warranty & guarantee expenses | |
| Guarantee expenses* | and the grant and an portion | |
| Technical | expenses for after sale services such as technical | |
| assistance | assistance or installation costs. | |
| & other services* | | |
| Commissions* | commissions paid. If more than one type is paid insert additional columns of data. | |
| Other factors* | any other costs, charges or expenses incurred in | |
| Cirioi idolois | relation to the domestic sales (include additional | |

columns as required). See guestion D5.

Notes

Costs marked with * are explained in section E-2.

- **D-5** If there are any other costs, charges or expenses incurred in respect of the sales listed which have not been identified in the table in question D-4 above add a column for each item (see "other factors"). For example, certain other selling expenses incurred.
- **D-6** For each type of commission, discount, rebate, allowance offered on domestic sales of like goods:
 - provide a description; and
 - explain the terms and conditions that must be met by the customer to qualify for payment.

Where the amounts of these discounts, rebates etc are not identified on the sales invoice, explain how you calculated the amounts shown in your response to question D4.

If you have issued credit notes, directly or indirectly to the customers, provide details if the credited amount has **not** been reported as a discount or rebate.

D-7 Select two domestic sales, in different quarters of the investigation period, that are at the same level of trade as the export sales.

Provide a <u>complete</u> set of documentation for those two sales. Include, for example:

- purchase order
- order acceptance
- commercial invoice
- discounts or rebates applicable
- credit/debit notes
- long or short term contract of sale
- inland freight contract
- bank documentation showing proof of payment

Customs and Border Protection will select additional sales for verification at the time of our visit.

SECTION E - FAIR COMPARISON

Section B sought information about the export prices to Australia and Section D sought information about prices on your domestic market for like goods (i.e. the normal value).

Where the normal value and the export price are not comparable adjustments may be made. This section informs you of the fair comparison principle and asks you to quantify the amount of any adjustment.

As prices are being compared, the purpose of the adjustments is to eliminate factors that have unequally modified the prices to be compared.

To be able to quantify the level of any adjustment it will usually be necessary to examine cost differences between sales in different markets. Customs and Border Protection must be satisfied that those costs are likely to have influenced price. In practice, this means that the expense item for which an adjustment is claimed should have a close nexus to the sale. For example, the cost is incurred because of the sale, or because the cost is related to the sale terms and conditions.

Conversely, where there is not a direct relationship between the expense item and the sale a greater burden is placed upon the claimant to demonstrate that prices have been affected, or are likely to have been affected, by the expense item. In the absence of such evidence Customs and Border Protection may disallow the adjustment.

Where possible, the adjustment should be based upon actual costs incurred when making the relevant sales. However, if such specific expense information is unavailable cost allocations may be considered. In this case, the party making the adjustment claim must demonstrate that the allocation method reasonably estimates costs incurred.

A party seeking an adjustment has the obligation to substantiate the claim by relevant evidence that would allow a full analysis of the circumstances, and the accounting data, relating to the claim.

The investigation must be completed within strict time limits therefore you must supply information concerning claims for adjustments in a timely manner. Where an exporter has knowledge of the material substantiating an adjustment claim that material is to be available at the time of the verification visit. Customs and Border Protection will not consider new claims made after the verification visit.

E-1 COSTS ASSOCIATED WITH EXPORT SALES

(These cost adjustments will relate to your responses made at question B-4, 'Australian Sales')

1. Transportation

Explain how you have quantified the amount of inland transportation associated with the export sale ("Inland transportation costs"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

GSG has reported the actual export inland freight from the factory to the port on a transaction-specific basis.

The General ledger account code for the inland transportation costs is [CONFIDENTIAL TEXT DELETED – account code].

2. Handling, loading and ancillary expenses

List all charges that are included in the export price and explain how they have been quantified ("Handling, loading & ancillary expenses"). Identify the general ledger account where the expenses are located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

The various export related ancillary costs are identified in the table at question B4, for example:

- terminal handling;
- wharfage and other port charges;
- container taxes:
- document fees and customs brokers fees;
- clearance fees:
- bank charges, letter of credit fees
- other ancillary charges.

GSG has reported actual handling, loading and ancillary expenses on a transaction-specific basis in KRW. General ledger account codes for the expenses are listed below.

| Account Code | Expense |
|---|---------|
| [CONFIDENTIAL TEXT DELETED – account codes] | |

3. Credit

The cost of extending credit on export sales is not included in the amounts quantified at question B4. However, Customs and Border Protection will examine whether a credit adjustment is warranted and determine the amount. Provide applicable interest rates over each month of the investigation period. Explain the nature of the interest rates most applicable to these export sales e.g., short term borrowing in the currency concerned.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, *and if* export prices are influenced by this longer or shorter period, calculate the average number of collection days. See also item 4 in section E-2 below.

GSG has reported actual credit expenses on a transaction-specific basis in KRW. General ledger account code for the credit expenses is [CONFIDENTIAL TEXT DELETED – account code].

4. Packing costs

List material and labour costs associated with packing the export product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed 'Packing'.

GSG did not incur packing costs for the GUC during the POI. If there are any packing costs, they would be incurred by [CONFIDENTIAL TEXT DELETED – unrelated third party] and included in [CONFIDENTIAL TEXT DELETED – unrelated third party] price to GSG.

5. Commissions

For any commissions paid in relation to the export sales to Australia:

- provide a description; and
- explain the terms and conditions that must be met.

Report the amount in the sales listing in question B-4 under the column headed "Commissions". Identify the general ledger account where the expense is located.

[CONFIDENTIAL TEXT DELETED – sales policy]

6. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("Warranty & guarantee expenses" and "Technical assistance & other services"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

[CONFIDENTIAL TEXT DELETED – details of sales]

7. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed "Other factors". For example, other variable or fixed selling expenses, including salesmen's salaries, salesmen's travel expenses, advertising and promotion, samples and entertainment expenses. Your consideration of questions asked at Section G, concerning domestic and export costs, would have alerted you to such other factors.

GSG has identified the credit expense incurred [CONFIDENTIAL TEXT DELETED – details of credit expense]. GSG has reported the actual credit expenses on a transaction-specific basis in KRW.

General ledger account code for the credit expenses is [CONFIDENTIAL TEXT DELETED – account code].

8. Currency conversions

In comparing export and domestic prices a currency conversion is required. Fluctuations in exchange rates can only be taken into account when there has been a 'sustained' movement during the investigation period (see article 2.4.1 of the WTO Agreement). The purpose is to allow exporters 60 days to adjust export prices to reflect 'sustained' movements. Such a claim requires detailed information on exchange movements in your country over a long period that includes the investigation period.

GSG has reported the accounting currency in its Australian sales spread sheet.

E-2 COSTS ASSOCIATED WITH DOMESTIC SALES

(These cost adjustments will relate to your responses made at question D-4, "domestic sales")

The following items are not separately identified in the amounts quantified at question D-4. However you should consider whether any are applicable.

GSG did not sell the GUC on the domestic market. However, to GSG's knowledge, its manufacturer supplier [CONFIDENTIAL TEXT DELETED – unrelated third party] sold like goods to the GUC on the domestic market during the POI.

Accordingly, GSG has requested its supplier [CONFIDENTIAL TEXT DELETED – unrelated third party] to provide responses to the questions in this Section D on an "other seller" basis.

1. Physical characteristics

The adjustment recognises that differences such as quality, chemical composition, structure or design, mean that goods are not identical and the differences can be quantified in order to ensure fair comparison.

The amount of the adjustment shall be based upon the market value of the difference, but where this is not possible the adjustment shall be based upon the difference in cost plus the gross profit mark-up (i.e. an amount for selling general and administrative costs (S G & A) plus profit).

The adjustment is based upon actual physical differences in the goods being compared and upon the manufacturing cost data. Identify the physical differences between each model. State the source of your data.

2. Import charges and indirect taxes

If exports to Australia:

• are partially or fully exempt from internal taxes and duties that are borne by the like goods in domestic sales (or on the materials and components physically incorporated in the goods), or

 if such internal taxes and duties have been paid and are later remitted upon exportation to Australia;

the price of like goods must be adjusted downwards by the amount of the taxes and duties.

The taxes and duties include sales, excise, turnover, value added, franchise, stamp, transfer, border, and excise taxes. Direct taxes such as corporate income tax are not included as such taxes do not apply to the transactions.

Adjustment for drawback is not made in every situation where drawback has been received. Where an adjustment for drawback is appropriate you must provide information showing the import duty borne by the domestic sales. (That is, it is not sufficient to show the drawback amount and the export sales quantity to Australia. For example, you may calculate the duty borne on domestic sales by quantifying the total amount of import duty paid and subtracting the duty refunded on exports to all countries. The difference, when divided by the domestic sales volume, is the amount of the adjustment).

In substantiating the drawback claim the following information is required:

- a copy of the relevant statutes/regulations authorising duty exemption or remission, translated into English;
- the amount of the duties and taxes refunded upon exportation and an explanation how the amounts were calculated and apportioned to the exported goods;
- an explanation as to how you calculated the amount of duty payable on imported materials is borne by the goods sold domestically but is not borne by the exports to Australia;

Substitution drawback systems

Annex 3 of the WTO Agreement on Subsidies provides: "Drawback systems can allow for the refund or drawback of import duties on inputs which are consumed in the production process of another product and where the export of this latter product contains domestic inputs having the same quality and characteristics as those substituted for the imported inputs"

If such a scheme operates in the country of export please provide <u>full</u> details about the operation of the scheme as well as providing the information requested above.

3. Level of trade

Question D-4 asks you to indicate the level of trade to the domestic customer. To claim an adjustment for level of trade differences you will need to quantify the amount by which level of trade influences price.

Trade level is the level a company occupies in the distribution chain. The trade level to which that company in turn sells the goods and the functions carried out distinguish a level of trade. Examples are producer, national distributor, regional distributor, wholesaler, retailer, end user, and original equipment manufacturer.

It may not be possible to compare export prices and domestic prices at the same level of trade. Where relevant sales of like goods at the next level of trade must be used to determine normal values an adjustment for the difference in level of trade may be required where it is shown that the difference affects price comparability.

The information needs to establish that there are real trade level differences, not merely nominal differences. Real trade level differences are characterised by a consistent pattern of price differences between the levels and by a difference in functions performed. If there is no real trade level differences all sales are treated as being at the same level of trade.

A real difference in level of trade (may be adjusted for using either of the following methods:

(a) costs arising from different functions: the amount of the costs, expenses etc incurred by the seller in domestic sales of the like goods resulting from activities that would not be performed were the domestic sales made at the same level as that of the importer.

This requires the following information:

- a detailed description of each sales activity performed in selling to your domestic customers (for example sales personnel, travel, advertising, entertainment etc);
- the cost of carrying out these activities in respect of like goods;
- for each activity, whether your firm carries out the same activity when selling to importers in Australia;
- an explanation as to why you consider that you are entitled to a level of trade adjustment.

or

(b) level discount: the amount of the discount granted to purchasers who are at the same level of trade as the importer in Australia. This is determined by an examination of price differences between the two levels of trade in the exporter's domestic market, for example sales of like goods by other vendors or sales of the same general category of goods by the exporter. For this method to be used it is important that a clear pattern of pricing be established for the differing trade levels. Such pattern is demonstrated by a general availability of the discounts to the level - isolated instances would not establish a pattern of availability.

4. Credit

The cost of extending credit on domestic sales is not included in the amounts quantified at question D-4. However, Customs and Border Protection will examine whether a credit adjustment is warranted and determine the amount. An adjustment for credit is to be made even if funds are not borrowed to finance the accounts receivable.

The interest rate on domestic sales in order of preference is:

 the rate, or average of rates, applying on actual short term borrowing's by the company; or

- the prime interest rate prevailing for commercial loans in the country for credit terms that most closely approximate the credit terms on which the sales were made; or
- such other rate considered appropriate in the circumstances.

Provide the applicable interest rate over <u>each</u> month of the investigation period.

If your accounts receivable shows that the average number of collection days differs from the payment terms shown in the sales listing, and if domestic prices are influenced by this longer or shorter period, calculate the average number of collection days.

Where there is no fixed credit period agreed at the time of sale the period of credit is determined on the facts available. For example, where payment is made using an open account system, the average credit period may be determined as follows:

1. Calculate an accounts receivable turnover ratio

This ratio equals the total credit sales divided by average accounts receivable. (It is a measure of how many times the average receivables balance is converted into cash during the year).

In calculating the accounts receivable turnover ratio, credit sales should be used in the numerator whenever the amount is available from the financial statements. Otherwise net sales revenue may be used in the numerator.

An average accounts receivable over the year is used in the denominator. This may be calculated by:

- using opening accounts receivable at beginning of period plus closing accounts receivable at end of period divided by 2, or
- total monthly receivables divided by 12.

2. Calculate the average credit period

The average credit period equals 365 divided by the accounts receivable turnover ratio determined above at 1.

The resulting average credit period should be tested against randomly selected transactions to support the approximation.

The following items are identified in the amounts quantified at question D-4:

5. Transportation

Explain how you have quantified the amount of inland transportation associated with the domestic sales ("Inland transportation Costs"). Identify the general ledger account where the expense is located. If the amount has been determined from contractual arrangements, not from an account item, provide details and evidence of payment.

¹ Under an open account system, following payment the balance of the amount owing is carried into the next period. Payment amounts may vary from one period to the next, with the result that the amount owing varies.

6. Handling, loading and ancillary expenses

List all charges that are included in the domestic price and explain how they have been quantified ("Handling, loading and ancillary Expenses"). Identify the general ledger account where the expense is located. If the amounts have been determined using actual observations, not from a relevant account item, provide details.

7. Packing

List material and labour costs associated with packing the domestically sold product. Describe how the packing method differs from sales on the domestic market, for each model. Report the amount in the listing in the column headed "Packing".

8. Commissions

For any commissions paid in relation to the domestic sales:

- provide a description
- explain the terms and conditions that must be met.

Report the amount in the sales listing under the column headed "Commissions". Identify the general ledger account where the expense is located.

9. Warranties, guarantees, and after sales services

List the costs incurred. Show relevant sales contracts. Show how you calculated the expenses ("Warranty & Guarantee expenses" and "Technical assistance & other services"), including the basis of any allocations. Include a record of expenses incurred. Technical services include costs for the service, repair, or consultation. Where these expenses are closely related to the sales in question, an adjustment will be considered. Identify the ledger account where the expense is located.

10. Other factors

There may be other factors for which an adjustment is required if the costs affect price comparability – these are identified in the column headed "Other factors". List the factors and show how each has been quantified in per unit terms. For example:

- inventory carrying cost: describe how the products are stored prior to sale and show data relating to the average length of time in inventory.
 Indicate the interest rate used:
- warehousing expense: an expense incurred at the distribution point:
- royalty and patent fees: describe each payment as a result of production or sale, including the key terms of the agreement;
- advertising; and
- bad debt.

E-3 DUPLICATION

In calculating the amount of the adjustments you must ensure that there is no duplication.

For example:

- adjustments for level of trade, quantity or other discounts may overlap, or
- calculation of the amount of the difference for level of trade may be based upon selling expenses such as salesperson's salaries, promotion expenses, commissions, and travel expenses.

Separate adjustment items must avoid duplication.

An adjustment for quantities may not be granted unless the effect on prices for quantity differences is identified and separated from the effect on prices for level of trade differences.

SECTION F - EXPORT SALES TO COUNTRIES OTHER THAN AUSTRALIA

Your response to this part of the questionnaire may be used by Customs and Border Protection to select sales to a third country that may be suitable for comparison with exports to Australia.

Sales to third countries may be used as the basis for normal value in certain circumstances. Customs and Border Protection may seek more detailed information on particular third country sales where such sales are likely to be used as the basis for determining normal value.

F-1 Complete the spreadsheet entitled 'Third country sales' within the Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire.

Please refer to "Third country sales" provided at Attachment 14 – GSG EQ spreadsheets [CONFIDENTIAL ATTACHMENT]

This spreadsheet is to list **all export sales of like goods** (i.e. transaction by transaction) to countries other than Australia in the investigation period (do not include non-GUC items).

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

The below table provides information as to what is meant by each column heading within the spreadsheet.

| Column heading | Explanation |
|--------------------------------|---|
| Country | Name of the country that you exported like goods to over the investigation period. |
| Number of | The number of different customers that your |
| customers | company has sold like goods to in the third country over the investigation period. |
| Level of trade | The level of trade that you export like goods to in the third country. |
| Model/grade/type | Commercial model/grade or type |
| Thickness (mm) | Thickness measured in millimetres of the steel plate |
| Width (mm) | Width measured in millimetres of the steel plate |
| Length (mm) | Length of the steel plate |
| Trimmed edge or untrimmed edge | Identify if the edges of the steel plate are trimmed or untrimmed |
| Grade | Identify the grade of the steel plate, e.g. 250/350/450 MPA |
| Prime or non- | Identify if the steel plate is prime product or |
| prime | non-prime |
| Standard | Identify the standard that the steel plate has been produced to (e.g. Australian Standard, Japanese Standard, British Standard) |

| Quantity | Indicate quantity, in units, exported to the third country over the investigation period. |
|------------------|---|
| 11.7.6 | |
| Unit of quantity | Show unit of quantity e.g. kg |
| Value of sales | Show net sales value to all customers in third |
| | country over the investigation period |
| Currency | Currency in which you have expressed data in |
| _ | column SALES |
| Payment terms | Typical payment terms with customer(s) in the |
| | country e.g. 60 days=60 etc |
| Shipment terms | Typical shipment terms to customers in the |
| | third country e.g. CIF, FOB, ex-factory, DDP |
| | etc. |

F-2 Please identify any differences in sales to third countries which may affect their comparison to export sales to Australia.

Export sales to Australia and to third countries are affected by the different market conditions and factors applying to each such market.

SECTION G - COSTING INFORMATION AND CONSTRUCTED VALUE

The information that you supply in response to this section of the questionnaire will be used for various purposes including:

- testing the profitability of sales of like goods on the domestic market;
- determining a constructed normal value of the GUC i.e. of the goods exported to Australia; and
- making certain adjustments to the normal value.

You will need to provide the cost of production of both the exported goods (GUC) and for the like goods sold on the domestic market. You will also need to provide the selling, general, and administration costs relating to goods sold on the domestic market; the finance expenses; and any other expenses (e.g. non-operating expenses not included elsewhere) associated with the goods.

In your response please include a worksheet showing how the selling, general, and administration expenses; the finance expenses; and any other expenses have been calculated.

If, in response to question B4 (Sales to Australia, Export Price) you:

- reported that the date of sale is not the invoice date and consider that this alternative date should be used when comparing domestic and export prices, and
- provided information on domestic selling prices for a matching period as required in the introduction to Section D (Domestic Sales)

you must provide cost data over the same period as these sales even if doing so means that such cost data predates the commencement of the investigation period.

At any verification meeting you must be prepared to reconcile the costs shown to the accounting records used to prepare the financial statements.

GSG does not manufacture the GUC.

Accordingly GSG has provided a general response to the questions in G-2, in that they are not necessarily tied to "manufacturing" or to a company that is a "manufacturer".

In relation to question G-4, GSG has provided a response using its buy-in price of the GUC as "cost to make".

GSG has requested the manufacturer [CONFIDENTIAL TEXT DELETED – unrelated third party] to provide responses to all of the questions in Section G, on an "other seller" basis. GSG respectfully requests that Customs refer to the responses provided by [CONFIDENTIAL TEXT DELETED – unrelated third party].

G-2. COST ACCOUNTING PRACTICES

1. Outline the management accounting system that you maintain and explain how that cost accounting information is reconciled to your audited financial statements.

GSG utilizes an SAP system for its records of purchase costs for the GUC. A specific identification method has been used. A description of GSG's normal management accounting system for GUC is set out below:

- GSG uses a process accounting system. The cost accounting system is an integral part of GSG's financial accounting system used to prepare the company's audited financial statements. The cost of goods sold and inventory values reported in GSG's financial statements are based on the costs generated by its cost accounting system for individual products.
- GSG's cost accounting system is structured so that all costs incurred at the purchasing level are recorded as purchasing costs that flow to the cost of sales on the company's financial statements.
- Costs incurred in the various corporate departments, including the selling departments, corporate administration, business planning, etc., are classified as selling, general and administrative expenses. However, international freight and commission paid are recorded as costs of goods sold.
- A flowchart of the financial accounting system is provided in Attachment 19 [CONFIDENTIAL ATTACHMENT].
- 2. Is your company's cost accounting system based on standard (budgeted) costs? State whether standard costs were used in your responses to this questionnaire. If they were state whether all variances (i.e. differences between standard and actual production costs) have been allocated to the goods and describe how those variances have been allocated.

GSG utilizes an SAP system for its records of purchase costs for the GUC by using a specific identification method. Therefore the question is not applicable.

3. Provide details of any significant or unusual cost variances that occurred during the investigation period.

GSG utilizes an SAP system for its records of purchase costs for the GUC by using a specific identification method. Therefore the question is not applicable.

4. Describe the profit/cost centres in your company's cost accounting system.

Please refer to the profit centers as shown in Attachment 20 [CONFIDENTIAL ATTACHMENT].

5. For each profit/cost centre describe in detail the methods that your company normally uses to allocate costs to the GUC. In particular specify how, and over what period, expenses are amortised or depreciated, and how allowances are made for capital expenditures and other development costs.

GSG uses the allocation methods which have already been explained at other places in its EQ response. GSG has reported actual purchase costs of the GUC in this response by tracing purchase order numbers in its inventory ledger. GSG's cost calculations are the same as those used in its normal course of

business.

6. Describe the level of product specificity (models, grades etc) that your company's cost accounting system records production costs.

Please see response above at B-4.

7. List and explain all production costs incurred by your company which are valued differently for cost accounting purposes than for financial accounting purposes.

GSG's cost accounting system is a part of its financial accounting system. The cost of goods sold and inventory values reported in GSG's financial statements are based on the costs generated by its cost accounting system. GSG's SAP system fully integrates cost and financial accounting modules.

8. State whether your company engaged in any start-up operations in relation to the GUC. Describe in detail the start-up operation giving dates (actual or projected) of each stage of the start-up operation.

GSG did not engage in any start-up expenses in relation to the GUC during the POI.

9. State the total cost of the start-up operation and the way that your company has treated the costs of the start-up operation it its accounting records.

GSG did not engage in any start-up expenses in relation to the GUC during the POI.

G-3 COST TO MAKE AND SELL ON DOMESTIC MARKET

This information is relevant to testing whether domestic sales are in the ordinary course of trade.²

1. Complete the spreadsheet entitled 'Domestic CTMS' within the Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire.

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

In doing so, provide the actual unit cost to make and sell <u>each</u> model/type (identified in Section C) of the like goods sold on the domestic market.

Provide this cost data for each quarter over the investigation period. If your company calculates costs monthly, provide monthly costs.

² Customs and Border Protection applies the tests set out in s.269TAAD of the *Customs Act 1901* to determine whether goods are in ordinary course of trade. These provisions reflect the WTO Anti-Dumping Agreement – see Article 2.2.1.

Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

If you are unable to supply this information in this format, please contact the Case Manager for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

G-4 COST TO MAKE AND SELL GOODS UNDER CONSIDERATION (GOODS EXPORTED TO AUSTRALIA)

Complete the spreadsheet entitled 'Australian CTMS' within the Hot Rolled Plate Steel Exporter Questionnaire – Taiwan, Japan, Indonesia & Korea' – accompanying spreadsheet provided alongside this questionnaire.

Please refer to "Australian CTMS" provided at Attachment 14 – GSG EQ spreadsheets [CONFIDENTIAL ATTACHMENT]. As explained above, GSG has used its buy-in price of the GUC as the starting point before the addition of its other costs of selling and exporting the goods to Australia.

Provide the completed spreadsheet in electronic format on CD-ROM (or via email) with your response. If formulas are used to calculate the field within this sheet, please ensure they remain included in the submitted version.

In doing so, provide the actual unit cost to make and sell <u>each</u> model/type (identified in Section C) of the like goods sold on the domestic market.

Provide this cost data for each quarter over the investigation period. If your company calculates costs monthly, provide monthly costs.

Indicate the source of cost information (account numbers etc) and/or methods used to allocate cost to the goods. Provide documentation and worksheets supporting your calculations.

If you are unable to supply this information in this format, please contact the Case Manager for this investigation at the address shown on the cover of this questionnaire.

Please specify unit of currency.

The information is relevant to calculating the normal values based on costs. It is also relevant to calculating certain adjustments to the normal value.

- **G-5** Where there are cost differences between goods sold to the domestic market and those sold for export, give reasons and supporting evidence for these differences.
- G-6 Give details and an explanation of any significant differences between the costs shown, and the costs as normally determined in accordance with your general accounting system. Reference should be made to any differences arising from movements in inventory levels and variances arising under standard costing methods.

- G-7 In calculating the unit cost to make and sell, provide an explanation if the allocation method used (e.g. number, or weight etc) to determine the unit cost differs from the prior practice of your company.
- **G-8** List major raw material costs, which individually account for <u>10% or more</u> of the total production cost.

For these major inputs:

- identify materials sourced in-house and from associated entities;
- identify the supplier; and
- show the basis of valuing the major raw materials in the costs of production you have shown for the goods (e.g. market prices, transfer prices, or actual cost of production).

Where the major input is produced by an associate of your company Customs and Border Protection will compare your purchase price to a normal market price. If the associate provides information on the cost of production for that input such cost data may also be considered.

Normal market price is taken to be the price normally available in the market (having regard to market size, whether the input is normally purchased at 'spot prices' or under long term contracts etc).

The term associate is defined in section 269TAA of the Act. Included in that definition are companies controlled by the same parent company (a company that controls 5% or more of the shares of another is taken to be an associated company); companies controlled by the other company; and companies having the same person in the board of directors.

If the major input is purchased or supplied from an integrated production process you should provide detailed information on the full costs of production of that input.

G-9 Complete the attached spreadsheet entitled 'Raw Material Purchases' within the Hot Rolled Plate Steel Exporter Questionnaire — Taiwan, Japan, Indonesia & Korea' — accompanying spreadsheet provided alongside this questionnaire (i.e. transaction by transaction) for all purchases of hot rolled coil, steel slab, coking coal and coke. Provide the completed spreadsheet in electronic format with your response.

(NB if your company is purchasing more than one material type (HRC, steel slab, coking coal and coke), please provide your responses in separate spreadsheets).

SECTION H - EXPORTER/PRODUCER'S DECLARATION

I hereby declare that **GS Global Corp** did, during the investigation period export the GUC and have completed the attached questionnaire and, having made due inquiry, certify that the information contained in this submission is complete and correct to the best of my knowledge and belief.

Name: KIM CHOON SHIK

Signature: C. S. The

| DOMESTIC COST TO MAKE & SELL – costs of goods sold domestically | |
| AUSTRALIAN COST TO MAKE & SELL – costs of goods sold to Australia | Ø |

GS Global VALUE NO.1 SOLUTION PROVIDER

Global Networker with Exceptional Competencies

GS Tower, 679, Yeoksam-Dong, Gangnam-Gu, Seoul, Korea tel: 82-2-2005-5301 fax: 82-2-2005-5300 http://www.gsgcorp.com

Ever since the establishment of the company in 1954, GS Global not only contributed to economic development through expansion of exports but also vigorously advanced businesses of export, import and triangular trade of Steel & Metal, Petrochemical, Cement material, Machinery & Plant and Logistics services. Beyond such accomplishments, GS Global will incessantly strive to function as a spearhead of GS group's global business and discover channels for new opportunities that will lead us to a continuous growth in the future.

As a global networker with exceptional competencies, GS Global advances forward by developing optimal solutions in response to the various needs of our customers worldwide. By weaving our innovative and active minds with accumulated experiences, GS Global promises to create no. 1 value that flourishes beyond the benefits of our customers, and into the betterment of our nation's economy.

Striving at the frontier of global business arena, GS Global Corp. has played a key role in contributing to our nation's economic development.

GS Global Corp. became an honorable member of the GS Group in July 2009. Ever since its integration, GS Global Corp. is fully performing its role as a platform for new business opportunities by strengthening our global network and developing innovative business capabilities.

Constantly propelling to advance, GS Global Corp. utilizes its expansive global network of approximately 30 bases, as well as its accumulated business experiences of trading in various fields including steel, petrochemical, cement, coal and many more.
GS Global Corp. also endeavors to diversify its business models via related business investments.

Alongside these efforts, GS Global Corp. is securing future growth engines by investing in resource development endeavors. Renewable

energies such as biodiesel and wood pellet are key areas that we strive to pioneer. Moreover, GS Global Corp. is making corresponding investments in machinery and plant business. In 2010, we have acquired DKT, a plant/machinery manufacturing company, to create a strong foothold for upcoming future.

We pledge to devote our full efforts to provide optimal solutions to our customers.

GS Global Corp. promises to be a company placing finest value creation as its utmost priority by developing preeminent professionals and extensive global network.

We appreciate your unwavering support and assistance. Thank you.

CEO'S MESSAGE

AGLOBAL NETWORKER WITH SUPREME COMPETENCIES

ABOUT GS GROUP

A COMPANY MOST RESPECTED BY CUSTOMERS AND SOCIETY

Fostering the vision of "Value No. 1 GS Adored by Everyone"

GS succeed in attaining its position within TOP 5 of the financial sector. GS announced the official start as a group of companies specializing in energy, distribution and construction in March 2005. Since then, GS has been endeavoring to become a global company extending its limits beyond Korea onto the global stage.

GS always places top priority on our customers with the management philosophy of "Creating New Values in Life and Dreaming of a Better Future for our Customers". Through endless changes and innovations, GS will become a lifetime partner for our customers with the mission of providing complete customer satisfaction, a rewarding workplace for our employees, and a corporate citizen of the society.

Always keeping in mind to promote sustainable growth as a corporate citizen, GS will persist on realizing the highest customer satisfaction and outstanding achievements through mutual respect, transparent management and contributions to the development of the community.

CORPORATE HISTORY

A COMPANY CONTINUOUSLY GROWING THROUGH GLOBAL BUSINESS DIVERSIFICATION

1954 Establishment of Kumsung Industry Corporation

In 1954, Kumsung Industry Corporation was established as a professional import and export company. The company was located at 63, 2-ga, Jeo-dong, Jung-gu, Seoul, Korea.

1964 Creation of Foreign Network

In 1964, GS Global opened Tokyo Office in Japan as its first overseas office.
The company consecutively opened its international offices in New York and Jakarta, expanding its foreign network. The Tokyo and New York Offices were converted to GS Global Japan Corporation (1977) and GS Global U.S.A. Inc. (1973).

1972 Awarded the Gold Tower Order of Industrial Service Merit

GS Global was awarded Gold Tower Order of Industrial Service Merit in Nov 1972.

1975 Designated as a general trading company

GS Global was designated as Korea's 2nd General Trading Company, and played an significant role in developing the national

1980 Opening up of Chiness Market

Recognizing the potentials of Chinese markets since 1980s, GS Global initiated indirect trading with China via GS Global Hong Kong Corporation.

The Company established Beijing Office (1991), Guangzhou Office (1993), Shanghai Office (1993) and Dalian Office (1993), solidifying its position as a pioneering company in opening Chinese markets. In particular, Beijing and Shanghai offices each accomplished exports over \$100 million dollar since first five years of its establishments.

1985 Construction of cement distribution terminals in Japan

GS Global Japan Corporation executed equipment investments to construct cement distribution network base in Japan.

Consequently, GS Global possesses 4 cement silos in Japan, supplying high-quality cement to Japanese customers.

1990 Expansion of Foreign Resources

As a general trading company, GS Global not only strived in exports, but also began to develop foreign natural resources in full-fledge. The company is stably sourcing coal from China, Indonesia, Russia and Australia to domestic customers.

1991 Awarded the Export Tower Prize

In addition to 100 Million Dollar Export Tower Prize 1975 and 1 Billion Dollar Export Tower Prize in 1982, GS Global was awarded with 2 Billion Dollar Export Tower Prize in 1991.

2004 Expansion of Logistics and Domestic

GS Global opened Korea's first and biggest PDI center for imported cars in Incheon as part of the business diversification plan. The PDI center was later relocated to Pyeongtaek in 2011. In 2008, GS Global newly expanded into Leisure Sports business by dealing various types of bicycles.

2009 Modification of Management System and Reformation of Corporate Culture

Current GS Global CEO, Taik–Keun, Jung, constantly enhances the company management system by introducing ERP system, reinforcing organization's capabilities and recreating the corporate culture of GS Global.

2010 Securing New Growth Engines

GS Global acquired a chemical machinery and power generator producing company, DKT, as part of its plan to secure future growth engines. By advancing into the manufacturing industry, GS Global has obtained a stable business portfolio that exceeds beyond the former boundaries of general trading company.

CORPORATE PRINCIPLES

Corporate Principle

Creating New Values in Life and Dreaming of Better Future for our Customers

Corporate Vision

Value No.1 Solution Provider

GS Global is a leading company that creates finest values for our customers/ shareholders/employees and national economy by actively and creatively responding to our customers' needs with optimal solutions.

REVIEW OF OPERATIONS

businesses related to energy sources

GS Global aims to be a world-class
minerals and resource trading specialis

GS Global creates core values in the Steel industry

ษร ษเออสเ engages in exports and imports of petrochemical-inorganic and fine chemical products

GS Global manages lubricants bunkerin and various oil products trading busines

GS Global supplies plant machinery equipments and various plant projects

S Global imports HONDA general - purpose ngines that are used as a power source for omestic constructional and agricultural

S Global develops new business pportunities and diversifies business ortfolio

GS Global is formulating a commercial base with the focus on meat, grains, feedstuff, fresh fruits, processed foods and construction materials

GS Global provides imported car PDI service cargo storage and shipping business

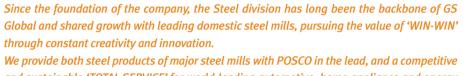

DKT provides finest satisfaction to customers with its innovative technologies and essential equipments of the chemical & energy business to meet the customer's needs in oil, gas and power plant sector

and sustainable 'TOTAL SERVICE' for world-leading automotive, home appliance and energy companies. As Steel business experts, we spearhead new paradigm against the rapid changes of steel industry environment, and ultimately nourish core values of customers.

Steel division aims to be the world no.1 trading company in the steel industry. GS Global is preparing a new leap not only by fulfilling its role as a principal trading company for numerous steel makers and buyers around the globe, but also by pioneering new investment territories.

BUSINESS FIELDS

Imports or engages in triangular trade of competitive products around the world including China, Russia and Japan

Manages Coil Centers and Press vendors in China, India and Southeast Asia to secure sustainable market dominance and satisfaction of customer needs

Suzhou Steel Service Center

OVERSEAS INVESTMENT

MILL-PRO PTY LIMITED

Mill Pro, as subsidiary of GS Global has been successfully supplying structural steel products to large scale resource projects for overseas pipe mills & fabrication operations in Korea and China. Not only has it been the leading supplier of steel pipe piles and modules, but it has also been supplying the major resource companies, port authorities & major construction companies constantly over years in Australia.

USI SERVICE CENTER PRIVATE LIMITED

GS Global jointly established Coil Center specializing in Color sheets in October 2012 with Union Steel in India. We are supplying high quality color sheets to India—a nation with vastly growing home appliance sector, and prestigious electronics makers (LG Electronics, Samsung Electronics, etc.) in nearby nations. USI is under the process of expanding sales to constructional and E&C companies.

STEEL STRIPS WHEELS LTD.

GS Global acquired shares worth USD 5million (approximately 2.5% of shares) of India's largest steel wheel manufacturing company in December 2010. Through the investment, GS Global laid the groundwork for the yearly sales of 40,000MT of POSCO's P&O AHSS (Advanced High Strength Steel) for steel wheel manufacturing in India and secured opportunities to jointly invest with SSWL in newly establishing wheel factories in Middle East and Northern Africa.

GS Global Suzhou Steel Service Center is the first steel coil service center that functions as a new platform for GS Global's steel business. Established in July 2011, Suzhou Steel Service Center is located in Suzhou, Jiangsu province, hence geographically enjoys high accessibility from major cities such as Shanghai and Hangzhou.

BUSINESS FIELDS

Suzhou Steel Service Center provides slitting, shearing, importing, exporting and distribution of high quality steel products such as coated steel (EG, GI, GL, COLOR and etc) and cold rolled steel for various customers including global OA, IT, Home appliance, machine manufactures and automotive companies.

MAJOR BUSINESS ACTIVITIES

Suzhou Steel Service Center processes and supplies steel products for internationally renowned electronics and OA manufacturers located at Huadong region. With its high quality processing techniques and services in steel industry, Suzhou Steel Service Center is gradually expanding beyond its commercial zone in Jiangsu and Zhejiang provinces.

PETROCHEMICAL

GS Global manages lubricants-bunkering and various oil products trading business

VISION

Petrochemical division holds the vision of world-class petrochemical trading company in pursuit of no.1 value for customers by utilizing its vast global network.

RUSINESS FIELDS

Petrochemical division consists of two major sectors: petrochemicals and polymers.

Commodities of Petrochemicals are composed of aromatics, fiber intermediates such as BZ, TOL, SM, MX, PX, PTA, MEG, and inorganic chemicals such as caustic soda, sulfuric acid, hydrochloric acid etc.

Commodities of Polymers are composed of PE, PP, PVC, PET, ABS, PS, EPS, PC etc.

MAJOR BUSINESS ACTIVITIES

Petrochemical division is trading petrochemical and polymer products made by domestic and overseas companies across the globe, ranging from China, Southeast Asia, Middle East, Europe and the Americas.

VISION

Oil product team holds the vision of becoming the world best oil product trader by providing optimal solutions and top quality services to customers with its global network and top-notch oil products.

BUSINESS FIELDS

Oil product team is in charge of lubricants, bunkering and oil product trading businesses.

MAJOR BUSINESS ACTIVITIES

Oil product team has its cornerstone at GS Global's international network, selling automotive, industrial and marine lubricants and grease from GS Caltex to Russia/CIS, China, Japan, Southeast Asia and others nations. The team is expanding its business regions across the globe.

The Bunkering partition of the team is providing optimal bunkering solution to its traders, shipping companies and other customers utilizing its competitiveness in domestic and international ports.

Furthermore, Oil product team is extending its business to different types of oil product trading such as diesel oil, fuel oil, jet oil and gasoline. Oil product team aims to pioneer new international markets, hence solidifying its stance as a globally renowned oil product trader.

NATURAL RESOURCES

ENERGY TEAM

VISION

Energy team endeavors to become a Global Energy Professional with its solid foundation as a reliable supplier of various energy sources.

BUSINESS FIELDS

The team handles and supplies raw materials such as Coal, Iron ore, and Petroleum coke.

MAIOR BUSINESS ACTIVITIES

Coal being the main business item, Energy team has accumulated for more than 30 years of experiences in supplying Coal to Power Plants, Steel Mills, and Cement companies throughout the Asian region.

Furthermore, GS Global has established a trading corporate body in Indonesia to develop various business models in organizing direct coal supply from the local sites and exporting to the Asian markets.

In addition, Energy team is searching for opportunities to invest in coal mines located in Australia and Indonesia to secure stable supplying trading volume.

RESOURCE DEVELOPMENT TF

VISIO

Resource development TF functions as a promoter of long-term growth engine and expansion of both global network and development momentum of our company.

BUSINESS FIELDS

Resource development TF promotes mineral development and participates in petrochemical/gas development businesses around the globe.

MAIOR BUSINESS ACTIVITIES

Resource development TF aims to maximize the company's profit by utilizing its vast international trading network to provide a stable, long-term source of revenue such as copper, steam coal, nickel, oil and gas field development.

• ON-GOING PROJECT

Nemaha Project: GS Global's Nemaha project is located at northern Oklahoma targeting Mississippian Limestone, which lies 2,000 meter below surface. The project is under progress via horizontal well development program that incorporates fracturing technologies.

GREEN ENERGY TF

VISION

Green Energy TF is performing its duty as a total solution provider of future energy sources such as biomass and renewable energy.

BUSINESS FIELDS

Green Energy TF supplies various biomass resources such as wood pellet, PKS, rice-husk pellet, EFB pellet to our nation's power providers, industries, agricultural and household markets in Japan, China and Europe. In addition, Green Energy TF is also expanding its business arena to total new and renewable energy like solar and wind powers, fuel cell and others.

Moreover, Green Energy TF supplies future energy sources such as palm, soybean, canola oil to bio-diesel industries and also supply bio-ethanol and its raw material tapioca. As a long term strategy, Green Energy TF plans to build up palm and cassava plantation to secure suppliance of raw materials

MAJOR BUSINESS ACTIVITIES

Green Energy TF is strengthening the supply system of biomass by establishing foreign production bases and broadening supply chains. In April 2012, Green Energy TF completed a wood pellet factory at Hainan islands, China. Furthermore, it possesses a supply chain of 700 thousand tons of PKS per year. Green Energy TF also invests in local factories and supply chain structures abroad to solidify its stable biomass suppliance.

CEMENT MATERIAL

GS Global aims to be a world-class minerals and resource trading specialist

"""

LIVING COMMODITIES

GS Global is formulating a commercial base with the focus on meat, grains, feedstuff, fresh fruits, processed foods and construction materials

VISION

Cement material team is a professional trading group of cement and industrial materials. With our capabilities and global network accumulated over team's long history, the team strives to become a Global Bulk Trading Expert.

BUSINESS FIELDS

The team conducts cement related business (Cement, Clinker, Fly Ash, Slag and others), industrial material business (nickel sulfate, spent catalyst, etc.) and mineral business (nickel ore etc).

MAIOR BUSINESS ACTIVITIES

Initiated its business by exporting cement to Vietnam in 1964, the team currently supplies cement and related materials to Asia, North America, South America, Africa and many more. Moreover, we have established 4 cement silos in Japan (Yokohama, Chiba, Nagoya, and Osaka) from 1985 to 1988 to develop domestic sales in Japan.

The team supplies materials/sources of secondary cell's cathode materials as well as retrieved rare metals from spent catalyst via cooperation with other GS subsidiaries. Recently, the team is consistently developing its growth engine by expanding its business to mineral and raw materials with our accumulated capabilities from bulk trading. We are expanding our business to mineral and raw materials including nickel ore with accumulated capabilities from bulk trading.

VISIO

Living commodities team holds the mission of maximizing customer satisfaction and further stabilizing our domestic price level by introducing competitive general commodities via importing businesses. The team is in consistent efforts to establish distinguished foreign supply corridors and global networks, as well as to solidify a distinct domestic distribution infrastructure.

BUSINESS FIELDS

Living commodities team consists of meat, grain, feedstuff, fresh fruits, processed foods and construction material parts.

MAJOR BUSINESS ACTIVITIES

Living commodities team is discovering outstanding raw/subsidiary materials and distinguished international supply corridors. Moreover, embracing the sense of duty to secure food related resources for future food security, the Living commodities team is expanding its range and volume of business items and is increasing its participation of triangular trade.

MACHINERY AND PLANT

VISION

Machinery/Plant division supplies various industrial plants, plant equipments and base materials. We strive to become a global project organizer of various plant projects abroad.

BUSINESS FIELDS

Machinery/Plant division supplies machinery plants and mechanical equipments necessary for plant facilities. In addition, the Machinery/Plant division conducts Plant EPC contract business, expanding its scope of business to development, environment and infrastructure-related project organizations.

MAJOR BUSINESS ACTIVITIES

Machinery and Plant team

Machinery / Plant division is engaging in export, import and triangular trade in the field of industrial machinery and plant. The division's main business categories are steel processing equipment, general machinery, road construction equipment, industrial plant, piping materials, casting/forging materials, magnetic/ceramics products and electrical cable/transformer and etc. Moreover, Machinery / Plant division's special vehicle part autonomously produces aircraft refuellers and hydrant dispensers that are supplied across the globe.

Project TF

Project TF promotes Oil & Gas projects, Petrochemicals projects and Infrastructure projects related Power & Environment sectors. In addition to EPC participation based on qualified project proposal, GS Global's Project TF actively performs its role as a project organizer by arranging finance, investments, off-take, O&M and many other fields.

MACHINERY IMPORTS

GS Global develops new business opportunities and diversifies business portfolio

VISION

Machinery import team will solidify its position within the domestic market by being the sole distributor of general - purpose engines provided by HONDA. Moreover, the team seeks to expand its role in the domestic market by providing diverse range of items.

BUSINESS FIELDS

Machinery import team has its foundation at importing HONDA general - purpose engines that are utilized in domestic construction equipments and agricultural machines.

MAJOR BUSINESS ACTIVITIES

Since the distributorship contract with HONDA in 1988, GS Global contributed to domestic constructional and agricultural sectors by providing engines that function as a power source for various equipments on field. GS Global established regional service centers in South Korea's major cities such as Seoul, Daejeon, Gwangju and Daegu to provide swift and well-rounded services.

VISIOI

Business Development team develops future growth engines and amplifies the synergy within GS Group.

BUSINESS FIELDS

Business Development team places its focus on project development and emerging markets caused by the changes of business environment such as new materials, new technologies, new governmental regulations and etc.

MAJOR BUSINESS ACTIVITIES

Business Development team looks for new business opportunities, carries out economic and technical feasibility studies including the investment decisions and incubates & commercializes potential business opportunities.

UNDER BUSINESS INCUBATION

-Household Appliances

Household Appliance business consists of consumer electronics, household healthcare, fitness equipments and daily commodities provided by global sourcing of such items.

VISION

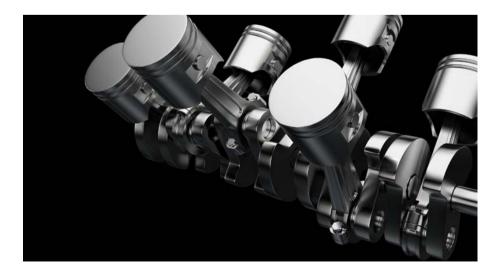

Household Appliances part develops potential foreign brands and promotes them to become top brands in the domestic market.

BUSINESS FIELDS

Household Appliance business consists of consumer electronics, household healthcare, fitness equipments and daily commodities provided by global sourcing of such items.

MAJOR BUSINESS ACTIVITIES

Household Appliance part looks for potential foreign brands, discusses terms and conditions of import and distribution with suppliers, organizes local distribution networks and promotes the value of brands in domestic market.

DKT provides finest satisfaction to customers with its innovative technologies and essential equipments of the chemical & energy business to meet the customer's needs in oil, gas and power plant sector.

VISION

Logistics services aim to become world-best complex logistics company. Aiming to establish integrated logistics hub for next generation, GS Global aims to provide premium PDI services to imported cars, attract high value-added cargo and promote forwarding businesses linked with logistics services via GS Global's high-tech PDI System.

BUSINESS FIELDS

Logistics services consist of PDI business of imported cars (unloading, storing, PDI, shipping to dealers), container business (normal cargo storage, shipping), and forwarding business (marine shipping, integrated shipping).

MAIOR BUSINESS ACTIVITIES

With over 15 years of accumulated know-how, PDI business for imported cars arranged a large-scale PDI facilities over 165 thousand squared meters at free trade zone near Pyeongtaek harbor. Since then, GS Global is providing best services to automobile companies (Honda, Nissan, Inifiniti, Porsche, Subaru, Audi and Volkswagen) with its latest PDI system.

As of April 2012, GS Global's PDI service maintains a market share of approximately 35%, and is striving to increase its PDI volume. By introducing various foreign items into domestic market, the team strives to discover and promote brands that are capable of flourishing with GS Global.

VISIO

DKT holds the vision of developing as the "World Best Engineering & Manufacturing Company in Heavy Equipment Industry". Since its foundation in 1988, DKT, amid strong support from its shareholders and customers, has rapidly developed capabilities in the chemical & energy plant/equipment industry. Now as a member of GS group, DKT is continuously solidifying its position as a leader in the industry. In addition, DKT is expanding its business into Turn-key based project and off-shore plant market based on a great reservoir of technology.

BUSINESS FIELDS

• Chemical Process Equipment Division

CPE products manufactured by DKT are widely recognized as the world's best masterpieces. DKT maintains top level technique & capability in manufacturing reactors and large-scale towers & columns based on accumulated technical competence. Recently we retained exclusive manufacturing shop for Heat-exchanger.

• Energy/ Power Plant Division

DKT has solidified its leadership in the market conducting the Heat Recovery Steam Generators and BOP Items in power plant equipment based on its accumulated experiences and expertise. Recently, we are making an effort to expand business area into Turn-key based Project including engineering, procurement, construction and operation.

• Off-shore/Module Division

Using advanced technical know-how, DKT is actively diversifying business area to cover Offshore Plant and On-shore Module. Recently we executed manufacturing contracts for SPA module in on-shore plant and fixed platform in off-shore plant. We foster the vision of securing our position in manufacturing large scale items such as CCR, SRU module in on-shore plant and top side module, vessel and heat exchanger for FPSO.

ETHICS MANAGEMENT

Independent Auditors' Report

English Translation of a Report Originally Issued in Korean

To the Shareholders and Board of Directors of GS Global Corporation and its subsidiaries:

We have audited the accompanying consolidated statements of financial position of GS Global Corporation and its subsidiaries (the "Group") as of December 31, 2011, and the related consolidated statements of income, comprehensive income, changes in shareholders' equity and cash flows for the year then ended, all expressed in Korean won. These consolidated financial statements are the responsibility of the Group's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of certain subsidiaries, including GS Global Australia Pty Ltd., whose statements reflect 14.3% of the consolidated total assets as of December 31, 2011, and 16. 8% of the consolidated total sales for the year ended December 31, 2011. Those financial statements were audited by other auditors whose reports have been furnished to us, and our opinion, insofar as it relates to the amounts included for those entities, is based solely on the reports of the other auditors.

We have audited the consolidated financial statements as of December 31, 2010, and we expressed that the consolidated financial statements are in conformity with the accounting principles generally accepted in the Republic of Korea on April 28, 2011, which are not adjusted in transition effect to Korean International Financial Reporting Standards ("K-IFRS") (see Note 3). However, the consolidated financial statements as of December 31, 2010, for the accompanying comparative period are adjusted to these differences.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Group as of December 31, 2011, and its results of operations and its cash flows for the year then ended in conformity with K-IFRS.

Our audits also comprehended the translation of Korean won amounts into U.S. dollar amounts, and in our opinion, such translation has been made in conformity with the basis in Note 2. Such U.S. dollar amounts are presented solely for the convenience of readers outside of the Republic of Korea.

Deloitte Anjin LLC

March 12, 2012

Notice to Readers

This report is effective as of March 12, 2012, the auditors' report date. Certain subsequent events or circumstances may have occurred between the auditors' report date and the time the auditors' report is read. Such events or circumstances could significantly affect the accompanying consolidated financial statements and may result in modifications to the auditors' report.

Deloitte refers to one or more of Deloitte Touche Tohmatsu Limited, a UK private company limited by guarantee, and its network of member firms, each of which is a legally separate and independent entity. Please see www.deloitte.com/kr/about for a detailed description of the legal structure of Deloitte Touche Tohmatsu Limited and its member firms.

GS GLOBAL CORPORATION AND ITS SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

AS OF DECEMBER 31, 2011, DECEMBER 31, 2010 AND JANUARY 1, 2010, AND FOR THE YEARS ENDED DECEMBER 31, 2011 AND 2010

1. GENERAL:

Organization and Description of Business

The parent company, in accordance with Korean International Financial Reporting Standards ("K-IFRS") 1027, Consolidated Financial Statements and Separate Financial Statements, GS Global Corporation (the "Company") was incorporated on July 31, 1954, under the Commercial Code of the Republic of Korea for the purpose of trading in various goods internationally. On June 26, 1976, the Company became publicly owned, with the common stock of the Company listed on the Korea Exchange (formerly, the Korea Stock Exchange). As of December 31, 2011, the Company's authorized and issued shares of common stock are 400,000,000 and 22,533,764, respectively, and the paidin capital amounted to \$56,334 million (\$48,846 thousand). The Company changed its name from Ssang Yong Corporation to GS Global Corporation on July 21, 2009.

As of December 31, 2011, the major shareholders of the Company are as follows:

| Shareholders | Number of shares | Ownership (%) |
|----------------|------------------|---------------|
| GS Corporation | 12,298,820 | 54.58 |
| Others | 10,234,944 | 45.42 |
| | 22,533,764 | 100.00 |

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The Company and its subsidiaries (the "Group") have adopted the K-IFRS for the annual period beginning on January 1, 2011. In accordance with K-IFRS 1101, *First-time adoption of International Financial Reporting Standards*, the transition date to K-IFRS is January 1, 2010. The significant accounting policies under K-IFRS followed by the Company in the preparation of its consolidated financial statements are summarized in Note 3.

The accompanying consolidated financial statements were approved by the board of directors on February 8, 2012.

Major accounting policies used for the preparation of the consolidated financial statements are stated below. Unless stated otherwise, these accounting policies have been applied consistently to the consolidated financial statements for the current period and the accompanying comparative period.

The accompanying consolidated financial statements have been prepared on the historical cost basis, except for certain non-current assets and financial instruments that are measured at revalued amounts or fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Currently, enactments and amendments of the K-IFRSs are in progress, and the financial information presented in the consolidated financial statements may change accordingly in the future. The Group has not applied the following new and revised K-IFRSs that have been issued, but are not yet effective:

K- IFRS 1107, Financial Instruments: Disclosures - Transfers of Financial Assets

The amendments to K-IFRS 1107 increase the disclosure requirements for transactions involving transfers of financial assets. These amendments are intended to provide greater transparency around risk exposures when a financial asset is transferred, but the transferor retains some level of continuing exposure in the asset. The amendments also require disclosures where transfers of financial assets are not evenly distributed throughout the period. K-IFRS 1107 is effective for annual periods beginning on or after July 1, 2011.

Amendments to K-IFRS 1012, Deferred Tax – Recovery of Underlying Assets

The amendments to K-IFRS 1012 provide an exception to the general principles in K-IFRS 1012 that the measurement of deferred tax assets and deferred tax liabilities should reflect the tax consequences that would follow the manner in which the entity expects to recover the carrying amount of an asset. Investment property or a non-depreciable asset measured using the revaluation model in K-IFRS 1016, *Property, Plant and Equipment*, is presumed to be recovered through sale for the purposes of measuring deferred taxes, unless the presumption is rebutted in certain circumstances. The amendments to K-IFRS 1012 are effective for annual periods beginning on or after January 1, 2012.

K-IFRS 1019 (as revised in 2011), Employee Benefits

The amendments to K-IFRS 1019 change the accounting for defined benefit plans and termination benefits. The most significant change relates to the accounting for changes in defined benefit obligations and plan assets. The amendments require the recognition of changes in defined benefit obligations and in fair value of plan assets when they occur and, hence, eliminate the 'corridor approach' permitted under the previous version of K-IFRS 1019 and accelerate the recognition of past service costs. The amendments to K-IFRS 1019 are effective for annual periods beginning on or after January 1, 2013, and require retrospective application with certain exceptions.

K-IFRS 1113, Fair Value Measurement

K-IFRS 1113 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The standard defines fair value, establishes a framework for measuring fair value and requires disclosures about fair value measurements. K-IFRS 1113 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

The Group does not anticipate that the amendments referred above will have a significant effect on the Group's consolidated financial statements and disclosures.

(1) Basis of Consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities (including special-purpose entities) controlled by the Company (its subsidiaries). Control is achieved where the Company has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

Income and expenses of subsidiaries acquired or disposed of during the year are included in the consolidated statements of comprehensive income from the effective date of acquisition and up to the effective date of disposal, as appropriate. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

When necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies in line with those used by the Company.

All intragroup transactions, balances, income and expenses are eliminated in full on consolidation.

Changes in the Company's ownership interests in subsidiaries that do not result in the Company losing control over the subsidiaries are accounted for as equity transactions. The carrying amounts of the Company's interests and the non-controlling interests are adjusted to reflect the changes in their relative interests in the subsidiaries. Any differences between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognized directly in equity and attributed to owners of the Company.

When the Company loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the

previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any non-controlling interests. When assets of the subsidiary are carried at revalued amounts or fair values and the related cumulative gain or loss has been recognized in other comprehensive income and accumulated in equity, the amounts previously recognized in other comprehensive income and accumulated in equity are accounted for as if the Company had directly disposed of the relevant assets (i.e., reclassified to profit or loss or transferred directly to retained earnings). The fair value of any investment retained in the former subsidiary at the date when control is lost is recognized as the fair value on initial recognition for subsequent accounting under K-IFRS 1039, *Financial Instruments: Recognition and Measurement*, or, when applicable, the cost on initial recognition of an investment in an associate or a jointly controlled entity.

(2) Business combination

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Company, liabilities incurred by the Company to the former owners of the acquiree and the equity interests issued by the Company in exchange for control of the acquiree. Acquisition-related costs are generally recognized in profit or loss as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognized at their fair value at the acquisition date, except that:

- deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognized and measured in accordance with K-IFRS 1012, *Income Taxes*, and K-IFRS 1019, *Employee Benefits*, respectively;
- •liabilities or equity instruments related to share-based payment arrangements of the acquiree or share-based payment arrangements of the Company entered into to replace share-based payment arrangements of the acquiree are measured in accordance with K-IFRS 1102, *Share-based Payment*, at the acquisition date; and assets (or disposal groups) that are classified as held for sale in accordance with K-IFRS 1105, *Non-current Assets Held for Sale and Discontinued Operations*, are measured in accordance with that standard.

Goodwill is measured as the excess of the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree, and c) the fair value of the acquirer's previously held equity interest in the acquiree (if any);

over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of a) the consideration transferred, b) the amount of any non-controlling interests in the acquiree, and c) the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognized immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the entity's net assets in the event of liquidation may be initially measured either at fair value or at the non-controlling interests' proportionate share of the recognized amounts of the acquiree's identifiable net assets. The choice of measurement basis is made on a transaction-by-transaction basis. Other types of non-controlling interests are measured at fair value or, when applicable, on the basis specified in another K-IFRS.

When the consideration transferred by the Company in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and included as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement-period adjustments are adjusted retrospectively, with corresponding adjustments against goodwill. Measurement-period adjustments are adjustments that arise from additional information obtained during the 'measurement period' (which cannot exceed one year from the acquisition date) about facts and circumstances that existed at the acquisition date.

The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement-period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounted for within equity. Contingent consideration that is classified as an asset or a liability is remeasured at subsequent reporting dates in accordance with K-IFRS 1039, *Financial Instruments: Recognition and Measurement*, or K-IFRS 1037, *Provisions, Contingent Liabilities and Contingent Assets*, as appropriate, with the corresponding gain or loss being recognized in profit or loss

When a business combination is achieved in stages, the Company's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e., the date when the Company obtains control) and the resulting gain or loss, if any, is recognized in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognized in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Company reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see above), or additional assets or liabilities are recognized, to reflect new information obtained about facts and circumstances that existed at the acquisition date that, if known, would have affected the amounts recognized at that date.

(3) Foreign currencies

The individual financial statements of each Company entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each Company entity are expressed in Republic of Korean won ("KRW"), which is the functional currency of the Group and the presentation currency for the consolidated financial statements.

In preparing the financial statements of the individual entities, transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences are recognized in profit or loss in the period in which they arise, except for:

- 1) exchange differences on foreign currency borrowings related to assets under construction for future productive use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on those foreign currency borrowings;
- 2) exchange differences on transactions entered into in order to hedge certain foreign currency risks; and
- 3) exchange differences on monetary items receivable from or payable to a foreign operation for which settlement is neither planned nor likely to occur (therefore forming part of the net investment in the foreign operation), which are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal or partial disposal of the net investment.

For the purpose of presenting consolidated financial statements, the assets and liabilities of the Group's foreign operations are expressed in KRW using exchange rates prevailing at the end of the reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuated significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognized in other comprehensive income and accumulated in equity (attributed to non-controlling interests as appropriate).

On disposal of a foreign operation (i.e., a disposal of the Group's entire interest in a foreign operation or a disposal involving loss of control over a subsidiary that includes a foreign operation and loss of joint control over a jointly controlled entity that includes a foreign operation or loss of significant influence over an associate that includes a foreign operation), all of the accumulated exchange differences in respect of that operation attributable to the Group are reclassified to profit or loss. Any exchange differences that have previously been attributed to non-controlling interests are derecognized, but they are not reclassified to profit or loss.

In case of a partial disposal (i.e., no loss of control) of a subsidiary that includes a foreign operation, the proportionate share of accumulated exchange differences is reattributed to non-controlling interests in equity and not recognized in profit or loss. For all other partial disposals (i.e., associates or jointly controlled entities not involving a change of accounting basis), the proportionate share of the accumulated exchange differences is reclassified to profit or loss.

Goodwill and fair value adjustments on identifiable assets and liabilities acquired arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognized in equity.

(4) Cash and cash equivalents

Cash and cash equivalents include cash, bank deposit, and floating short-term investments with maturities of three months or less from acquisition.

(5) Financial assets

All financial assets are recognized and derecognized on the trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the time frame established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss ("FVTPL"), which are initially measured at fair value.

Financial assets are classified into the following specified categories: 'financial assets at FVTPL,' 'held-to-maturity investments,' 'available-for-sale ("AFS") financial assets' and 'loans and receivables.' The classification depends on the nature and purpose of the financial assets, and is determined at the time of initial recognition.

1) Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument or, where appropriate, a shorter period, to the net carrying amount on initial recognition. Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as at FVTPL.

2) Financial assets at FVTPL

FVTPL includes the financial assets held for trading and those designated as at FVTPL at the first time of recognition. Financial assets acquired for the purpose of selling in the near term are classified as held for trading and all derivatives, including embedded ones in other financial instruments or other host contracts that are treated as separate derivatives, are classified as held for trading, unless not designated by the effective hedging instruments. Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. Transaction expenses related to acquisition at the time of the first recognition are recognized as current gain or loss immediately.

Financial assets are classified as at FVTPL when the financial asset is either held for trading or designated as at FVTPL.

A financial asset is classified as held for trading if:

- It has been acquired principally for the purpose of selling in the near term
- On initial recognition, it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking
- It is a derivative that is not designated and effective as a hedging instrument

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would
 otherwise arise
- The financial asset forms part of the Group's financial assets or financial liabilities, or both, which is managed and its
 performance is evaluated on a fair value basis in accordance with the Group's documented risk management or
 investment strategy, and information about the Group is provided internally on that basis
- It forms part of a contract containing one or more embedded derivatives, and K-IFRS 1039, *Financial Instruments*: *Recognition and Measurement*, permits the entire combined contract (asset or liability) to be designated as at FVTPL

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the other gains and losses line item in the consolidated statements of comprehensive income.

3) Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold till maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortized cost using the effective interest method, less any impairment, with revenue recognized on an effective yield basis.

4) Financial assets AFS

Non-derivative financial assets that are not classified as held to maturity, held for trading, designated as at FVTPL or loans and receivables are classified as financial assets AFS. Financial assets can be designated as AFS on initial recognition. Financial assets AFS are initially recognized at fair value, plus directly related transaction costs. They are subsequently measured at fair value. Unquoted equity investments whose fair value cannot be measured reliably are carried at cost. Gains and losses arising from changes in fair value are recognized in other comprehensive income and accumulated in the investments revaluation reserve, with the exception of impairment losses; interest calculated using the effective interest method; and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. Where the investment is disposed of or determined to be impaired, the cumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified to profit or loss. Dividends on AFS equity instruments are recognized in profit or loss when the Group's right to receive the dividends is established.

The fair value of AFS monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. The foreign exchange gains and losses that are recognized in profit or loss are determined based on the amortized cost of the monetary asset. Other foreign exchange gains and losses are recognized in other comprehensive income.

AFS financial assets that are not traded in an active market and for which the fair value cannot be reliably measured, derivatives linked to non-trade equity instruments and should be settled by transferring them, are measured by the amount of acquisition cost, deducting identified impairment.

5) Loans and receivables

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables.' Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

6) Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For listed and unlisted equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, including redeemable notes classified as AFS and finance lease receivables, objective evidence of impairment could include:

- Significant financial difficulty of the issuer or counterparty
- Default or delinquency in interest or principal payments
- It becoming probable that the borrower will enter bankruptcy or financial reorganization
- Extinguishing of activated market due to financial difficulties

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in that period.

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect of AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income.

7) Derecognition of financial assets

The Group derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognize the financial asset and also recognizes a collateralized borrowing for the proceeds received.

In case of derecognizing all financial assets, the difference between the total of disposal amount received and accumulated gain or loss recognized as other comprehensive income and book value is recognized as current gain or loss in the consolidated statements of comprehensive income.

(6) Inventories

Inventories are stated at the lower of cost or net realizable value. Cost of inventories, except for merchandise and in transit (specific identification method), is measured under the gross average method. It consists of the purchase price, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

The carrying amount of inventories sold in the period and the amount of any write-down of inventories to net realizable value and all losses of inventories in the period, less the amount of any reversal in the period of any write-down of the inventories arising from an increase in net realizable value, are recognized as expense during the period.

(7) Investments in associates (equity-accounted investees)

An associate is an entity over which the Group has significant influence and it is neither a subsidiary nor an interest in a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but having no control or joint control over those policies. In general, when an investor holds between 20 percent and 50 percent of the voting power of the investee, it is presumed that the investor has significant influence.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting, except when the investment is classified as held for sale, in which case it is accounted for in accordance with K-IFRS 1105, *Non-current Assets Held for Sale and Discontinued Operations*. Under the equity method, an investment in an associate is initially recognized in the consolidated statements of financial position at cost and adjusted thereafter to recognize the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognizing its share of further losses. Additional losses are recognized only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

Any excess of the cost of acquisition over the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities of an associate recognized at the date of acquisition is recognized as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets, liabilities and contingent liabilities over the cost of acquisition, after reassessment, is recognized immediately in profit or loss.

The requirements of K-IFRS 1039, *Financial Instruments: Recognition and Measurement*, are applied to determine whether it is necessary to recognize any impairment loss with respect to the Group's investment in an associate. When necessary, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with K-IFRS 1036, *Impairment of Assets*, as a single asset by comparing its recoverable amount (higher of value in use and fair value, less costs to sell) with its carrying amount. Any impairment loss recognized forms part of the carrying amount of the investment. Any reversal of that impairment loss is recognized in accordance with K-IFRS 1036 to the extent that the recoverable amount of the investment subsequently increases.

When the Group transacts with its associate, profits and losses resulting from the transactions with the associate are recognized in the Group's consolidated financial statements only to the extent of interests in the associate that are not related to the Group.

(8) Goodwill

Goodwill arising on acquisition of a business is carried at cost that is established at the date of acquisition of the business, less accumulated impairment losses, if any.

A cash-generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its

carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit on a pro rata basis based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognized directly in profit or loss in the consolidated statements of comprehensive income. An impairment loss recognized for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

(9) Property, plant and equipment

Property, plant and equipment are stated at cost, less subsequent accumulated depreciation and accumulated impairment losses. The cost of an item of property, plant and equipment is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in the carrying amount of an asset or as an asset if it is probable that future economic benefits associated with the assets will flow to the Group and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

The Group does not depreciate land. Depreciation expense is computed using the straight-line method based on the estimated useful lives of the assets as follows:

| | Estimated useful lives | | Estimated useful lives |
|------------|------------------------|-----------|------------------------|
| Accounts | (years) | Accounts | (years) |
| Buildings | 20–40 | Vehicles | 4–10 |
| Structures | 20–40 | Equipment | 4–10 |
| Machinery | 4–10 | Tools | 3-20 |

The Group reviews the depreciation method; the estimated useful lives; and residual values of property, plant and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

The Group derecognizes property, plant and equipment from the consolidated statements of financial position at the time of disposal and when the economic benefits are not probable through their disposal or use. Gain or loss from the disposal of property, plant and equipment is determined by the difference between disposal amount and its book value, and is recognized as current gain or loss in the consolidated statements of comprehensive income at the time of derecognition.

(10) Intangible assets

Intangible assets with finite useful lives that are acquired separately are carried at cost, less accumulated amortization and accumulated impairment losses. Amortization is recognized on the straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost, less accumulated impairment losses.

Intangible assets are stated at cost, less accumulated amortization, as described below:

Research and Development Costs

Expenditure on research activities, undertaken with the prospects of gaining new scientific or technical knowledge and understanding, is recognized as expense as incurred.

When the future economic benefits from disposition or use of intangible assets are not foreseeable, the related intangible assets are eliminated from the consolidated statements of financial position. Such gain or loss incurred from the elimination is the difference between the net sale price and book value that is recognized as gain or loss for that period.

(11) Impairment of tangible and intangible assets other than goodwill

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or the cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

(12) Equity instruments and financial liabilities

1) Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

2) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognized as the proceeds are received, net of direct issue costs.

When the Group repurchases its equity instruments (treasury stock), the incremental costs, net of tax effect, are deducted from the shareholders' equity and recognized as other capital item deducted from the total equity in the consolidated statements of financial position. In addition, profits or losses from purchase, sale or retirement of treasury stocks are directly recognized in shareholders' equity and not in current profit or loss.

3) Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

(1) Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or designated as FVTPL.

A financial liability is classified as held for trading if:

- It has been acquired principally for the purpose of repurchasing in the near term
- On initial recognition, it is part of a portfolio of identified financial instruments that the Group manages together and has a recent actual pattern of short-term profit-taking
- It is a derivative that is not designated and effective as a hedging instrument

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- The financial liability forms part of Group's financial assets or financial liabilities, or both, which is managed, and its performance is evaluated on a fair value basis in accordance with the Group's documented risk management or

investment strategy, and information about the grouping is provided internally on that basis

- It forms part of a contract containing one or more embedded derivatives, and K-IFRS 1039 permits the entire combined contract (asset or liability) to be designated as at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item in the consolidated statements of comprehensive income.

② Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs. Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

③ Financial guarantee contract liabilities

Financial guarantee contract liabilities are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of the obligation under the contract, as determined in accordance with K-IFRS 1037, *Provisions, Contingent Liabilities and Contingent Assets*, and
- the amount initially recognized, less cumulative amortization recognized in accordance with the K-IFRS 1018, Revenue

4 Derecognition of financial liabilities

The Group derecognizes financial liabilities when, and only when, the Group's obligations are discharged, canceled or they expire.

(13) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

(14) Derivative financial instruments

The Group manages foreign exchange risk by using currency forward.

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument; in which case, the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognized as a financial asset and a derivative with a negative fair value is recognized as a financial liability.

The Group designates certain derivatives as hedging instruments to hedge the risk of changes in fair value of a recognized asset or liability or an unrecognized firm commitment (fair value hedge) and the risk of changes in cash flow of a highly probable forecast transaction and the risk of changes in foreign currency exchange rates of firm commitment (cash flow hedge).

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Group documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item.

Derivatives are measured at fair value after the initial recognition, and the profit or loss from fair value change is recognized as follows:

1) Hedge accounting

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The changes in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognized in the line item of the consolidated statements of comprehensive income related to the hedged item.

Hedge accounting is discontinued when the Group revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

2) Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss related to the ineffective portion is recognized immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognized in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item is recognized in profit or loss in the same line item of the consolidated statements of comprehensive income as the recognized hedged item. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the Group revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or it no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time remains in equity and is recognized when the forecast transaction is ultimately recognized in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

Hedge accounting is discontinued when the Group revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

The gain or loss related to the ineffective portion is recognized immediately in profit or loss, and is included in the 'other gains and losses' line item.

(15) Retirement benefit costs

Contributions to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

The retirement benefit obligation recognized in the consolidated statements of financial position represents the present value of the defined benefit obligation, less fair value of plan assets and adjustment for unrecognized past service cost. Defined benefit obligations are calculated by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is presented in currency to be paid and measured by discounting estimated future cash outflows by the interest rate of high-quality corporate bonds with similar maturity as the expected postemployment benefit payment date. Actuarial gain or loss from changes in actuarial assumptions or differences between actuarial assumptions and actual results is recognized in other comprehensive income in the consolidated statements of comprehensive income. Past service cost is recognized immediately to the extent that the benefits are

already vested and, otherwise, is amortized on the straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognized in the consolidated statements of financial position represents the present value of the defined benefit obligation, as adjusted for unrecognized actuarial gains and losses and unrecognized past service cost and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

(16) Provisions and contingent liability

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that the Group will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during that period.

(17) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. The Group recognizes revenue when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Group. Revenue is recognized when all the following conditions are satisfied for each of the Group's operating activities:

1)Sale of goods

The Group recognizes revenue from sale of goods when significant risks and rewards from ownership of goods have been transferred, and retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods.

2)Rendering of services

Revenue from a contract to provide services is recognized by reference to the stage of completion of the contract. The stage of completion of a transaction may be determined by a variety of methods. The Group uses the method that measures reliably the services performed. Depending on the nature of the transaction, the methods may include:

- Surveys of work performed,
- Services performed to date as a percentage of total services to be performed, or
- The proportion that costs incurred to date bear to the estimated total costs of the transaction.

3)Dividend and interest income

Dividends are recognized as revenue when the right to dividends is determined.

Interest income is recognized if it is probable that future economic benefits will flow to the Group and the amount can be measured reliably. Interest income is recognized through passage of time by effective interest rate method and when unpaid interest has accrued before the acquisition of an interest-bearing investment. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

(18) Construction contracts

Where the outcome of a construction contract can be estimated reliably, revenue and costs are recognized by reference to the stage of completion of the contract activity at the end of the reporting period, measured based on the proportion of contract costs incurred for work performed to date relative to the estimated total contract costs, except where this would not be representative of the stage of completion. Variations in contract work, claims and incentive payments are included to the extent that the amount can be measured reliably and its receipt is considered probable.

Where the outcome of a construction contract cannot be estimated reliably, contract revenue is recognized to the extent of contract costs incurred that it is probable will be recoverable. Contract costs are recognized as expenses in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognized as an expense immediately.

For all contracts in progress for which costs incurred, plus recognized profits (less recognized losses) exceed progress billings, the surplus is shown as amounts due from customers for contract work. For all contracts in progress for which progress billings exceed costs incurred, plus recognized profits (less recognized losses), the surplus is shown as the amounts due to customers for contract work. Advances in the consolidated statements of financial position are amounts received by the contractor before the related work is performed. Trade receivables in the consolidated statements of financial position are billed amounts for work performed, but not received by the contractor.

(19) Income tax

Income tax consists of current tax and deferred tax.

1) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statements of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income tax levied by the same taxation authority. Also, they are offset when different taxable entities that intend either to settle current tax liabilities and assets on a net basis or realize the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3) Current tax and deferred tax for the year

Current tax and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current tax and deferred tax are also recognized in other comprehensive income or directly in equity. Where current tax or deferred tax arises from the initial accounting

for a business combination, the tax effect is included in the accounting for the business combination.

(20)Correction of prior-period financial statements

DKT Co., Ltd. was acquired on December 31, 2010. The Company found errors in applying percentage-of-completion method for recognizing revenue from previously issued financial statements under accounting principles generally accepted in the Republic of Korea ("Korean GAAP" or "K-GAAP"). The effects of transition for the comparative periods in consolidated financial statements are as follows:

| | | Trai | nslation into |
|---|-------------|--------------------|---------------|
| Description | Korean wo | <u>on</u> <u>U</u> | .S. dollars |
| | (In million | s) (In | thousands) |
| Decrease in trade receivables | ₩ (45,6 | 96) \$ | (39,623) |
| Increase in raw materials | 20,2 | 54 | 17,562 |
| Increase in Goodwill | 22,8 | 27 | 19,793 |
| Decrease in trade payables | 3,5 | 99 | 3,121 |
| Increase in provision for construction warranty | (10,9 | 72) | (9,513) |
| Decrease in equity | (9,9 | 88) | (8,660) |

3. TRANSITION TO K-IFRS:

Transition adjustments from previous Korean GAAP to K-IFRSs that affected the Group's financial position, financial performance and cash flows are as follows:

(1) K-IFRS 1101 – Optional exemptions

K-IFRS 1101 provides a number of optional exemptions from the general principle of full retrospective applications. The optional exemptions for first-time adoption of K-IFRSs of the Group are as follows:

1) Business combinations

Business combinations that occurred before the date of transition to K-IFRS are not to be retrospectively restated.

2) Borrowing costs

Borrowing costs related to all qualifying assets are capitalized when the commencement date for capitalization is on or after the date of past special days (January 1, 2003).

3) Investments in subsidiaries, joint ventures and associates

For the investments in subsidiaries, joint ventures and associates in the consolidated statements of financial position as of the transition date, the Group uses the book value under previous Korean GAAP as deemed cost.

- (2) The effect of the transition from Korean GAAP to K-IFRS on the Group's financial status.
- 1) Changes in the scope of consolidated subsidiaries

As at the date of transition to K-IFRS, the Company's change in scope of consolidation is as follows:

| | Description | Company |
|-------------|---|--|
| Newly added | Under the former 'Act on External Audit of Stock companies' Article 1.3 Section 2.1 in the Republic of Korea, companies whose total assets are less than 10 billion Korean won were not subject to consideration, but subject to consolidation. | Ssangyong Singapore Pte Ltd. GS Global Trading (Shanghai) Co., Ltd. GS Global Guangzhou Co., Ltd. SSY-SWISS GMBH GS PLS Corp. Dairyu Cement MILL-PRO PTY LIMITED |
| Excluded | Under the former 'Act on External Audit of Stock companies' Article 1.3 Section 2.1 in the Republic of Korea, entities where the Company owns more than 30% of shares and is the largest shareholder with the largest voting rights were included in the scope. | Ssangyong Resources Pty. Ltd. |

2) The principal effects on the consolidated statement of financial position at January 1, 2010 (date of transition)

| | Korean won | | | | |
|---|------------|----------|-------------------|------------|---------|
| Description | | Assets | Liabilities | Net Assets | |
| | | | (In millions) | | |
| Korean GAAP | ₩ | 263,800 | ₩ 175,900 | ₩ | 87,900 |
| Adjustment: | | | | | |

| K-IFRS | ₩ | 19,723 | ₩ | 19,251 | \$ 17,101 | \$ 16,693 | |

- (*1) Effect of changes in the scope of consolidation
- (*2) Effect of foreign currency translation from investment in overseas operations
- (*3) The Group recognizes the defined benefit obligation by using actuarial assumptions.
- (*4) Effect of changes in the scope of investment in associate
- 5) Explanation of the effects of K-IFRS transition adjustments in the consolidated statement of cash flows Under K-IFRS, dividends received, interest received, interest paid and income tax paid, which were not presented separately under Korean GAAP, are now separately presented and the related income (expense) and assets (liabilities) have been adjusted accordingly.

Also, under K-IFRS, foreign currency translation amounts are presented gross as part of the related transactions and deducted against the effects of foreign exchange rate changes on the balance of cash held in foreign currencies. No other significant differences between the consolidated statement of cash flows prepared under Korean GAAP compared to K-IFRS have been noted. Also, under K-IFRS, gain (loss) on foreign currency translation is presented gross and against which the gain (loss) on foreign currency translation on the cash and cash equivalent was deducted. No other significant differences between the consolidated statement of cash flows prepared under Korean GAAP compared to K-IFRS have been noted.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS:

In the application of the Group's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

5. RESTRICTED FINANCIAL INSTRUMENTS:

| | | | December 31, 2011 Translation into | |
|----------------------------------|---|---------------|---------------------------------------|-------------------------------|
| | | Korean won | U.S. dollars (Note 2) | <u>Description</u> |

| Short-term financial instruments | | | | Collateralized for |
| | ₩ | 14 | \$ 12 | borrowings |
| Long-term financial instruments | | 480 | 416 | Collateralized for borrowings |

6. **SEGMENT INFORMATION:**

(1) The Group adopted 'K-IFRS 1108 Segment Information' since January 1, 2010. K-IFRS 1108 requires that the Group should recognize its operating segments based on the internal report on the Group's constituent units that are reviewed regularly by the chief executive officer to allocate resources and evaluate the performance of each unit.

(2) The Group's segments are as follows:

| Description | Business |
|----------------------|---|
| Industrial resources | Ferrous, non-ferrous metals, cement, coal, mechanical plant |
| Import-distribution | Custody, maintenance and checkup of imported vehicles and rent of warehouse |
| Manufacturing | Manufacturing facilities for oil and gas industries, producing materials for combined-cycle |

(3) Sales and income before income tax by operating segments as of December 31, 2011 and 2010, are as follows:

| | | | December 31, 2011 | | | | | | | | | | | | | |
|----------|-------------------------|---|-------------------|----------------|---------------|-----|----------------|---------------------|----|--------------|------|-----------------|-----------|-------------|--|--|

(5) Fair value of financial instruments

Fair value measurements are those that are derived from quoted prices (unadjusted) in active markets for identical assets or liabilities. They are also derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Fair value measurements are those that are derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The management regards that the book values of financial assets (liabilities) recognized in amortized cost as of December 31, 2011 and 2010, are similar to the fair values.

8. <u>DERIVATIVES:</u>

(1) Details of derivatives held for trading as of December 31, 2011, are as follows:

| Description | Buy | position | Sell | position |

- (*) As of December 31, 2011, ₩ 181,502 million (\$157,376 thousand) of trade receivables has been transferred. However, the equivalent book value continues to be recognized as trade receivables as the Group has guaranteed the expected loss, and the cash received through transfer was recognized as collateral loans.
- (2) The allowance for doubtful accounts for the year ended December 31, 2011, is as follows:

(5) Actuarial assumptions used as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | December 31, | December 31, | January 1, |
|----------------------------------|--------------|--------------|---------------|
| Description | 2011 | 2010 | 2010 |
| Discount rate | 4.74%-5.73% | 5.10%-5.73% | 7.06%-7.11% |
| Expected return on plan assets | 3.56%-4.96% | 3.56%-3.80% | 6.00% |
| Expected rate of salary increase | 1.22%-4.94% | 0.30%-5.00% | 0.01% - 5.00% |

23. SHAREHOLDERS' EQUITY:

(1) Capital stock as of December 31, 2011, December 31, 2010 and January 1, 2010, consists of the following:

| Description | | December 31, 2011 | | December 31, 2010 | | January 1, 2010 |
|---|----|--------------------|------|----------------------|-----|--------------------|
| - | | (In millio | ns o | f Korean won, except | par | value) |
| Authorized | | 400,000,000 shares | | 400,000,000 shares | _ | 400,000,000 shares |
| Issued | | 22,533,764 shares | | 11,266,882 shares | | 11,266,882 shares |
| Par value | ₩ | 2,500 | ₩ | 2,500 | ₩ | 2,500 |
| Capital stock | | 56,334 | | 28,167 | | 28,167 |
| Translation into U.S. dollars (Note 2) (In thousands) | \$ | 48,846 | \$ | 24,423 | \$ | 24,423 |

(*) Since there was a paid-in capital increase in the current year, the number of shares issued and capital stock have increased by 11,266,882 shares and ₩28,167 million (\$24,423 thousand), respectively, as of December 31, 2011.

(2) Details of other shareholders' equity as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | | | | | | | Translation into | | | | | | | | |
|---------------------------------------|-----|-----------|-----|-------------|---|-----------|-----------------------|------|--------------|------------|--|--|--|--|--|
| | | | Ko | orean won | | | U.S. dollars (Note 2) | | | | | | | | |

36. RISK MANAGEMENT:

(1) Capital risk management

The Group performs capital management to maintain its ability to continuously provide profits to shareholders and parties in interest and to maintain optimum capital structure. The overall capital risk management policy is consistent with that of the prior year.

Debt-to-equity ratio is calculated as total liabilities divided by equity and is used as an index to manage the Group's capital. Debt-to-equity ratios as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | | | K | orean won | | | Translation into U.S. dollars (Note 2) | | | | | |
|---------------------------|-----|---------------------------|------|-----------|------------|----------|--|----------|-------------|------------|---------|-------------------|
| | Dec | December 31, December 31, | | J | January 1, | | ecember 31, | De | ecember 31, | Janu | ıary 1, | |

| Liabilities ratio | | 268.9% | | 445.7% | | 135.0% | | | | | | |

(2) Financial risk management

The Group is exposed to various financial risks, such as market risk (foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk related to financial instruments. The purpose of risk management of the Group is to identify potential risks related to financial performance and reduce, eliminate and evade those risks to a degree acceptable to the Group. Overall financial risk management policy of the Group is the same as the prior period.

1) Foreign exchange risk management

The Group is exposed to various foreign currencies' risk in which it makes transactions. The Group is mainly exposed to USD, EUR, AUD and JPY risk.

The Group manages foreign exchange risk by matching the inflow and outflow of foreign currencies according to each currency and maturity, and by adjusting the foreign currency settlement day according to the exchange rate forecast. The Group uses foreign currency derivatives, such as currency forward, currency swap and currency option, as hedging instruments; however, speculative foreign exchange trade on derivative financial instruments is basically prohibited.

Assets and liabilities denominated in foreign currencies as of December 31, 2011, December 31, 2010 and January 1, 2010, are summarized as follows:

| | | I | Foreign currencie | S | Korean won equivalent | | | | | |
|-------------|----------|--------------|-------------------|------------|-----------------------|---------------|------------|--|--|--|
| | | December 31, | December 31, | January 1, | December 31, | December 31, | January 1, | | | |

| INR | 356 | 975 | - | 8 | | | | |
| | | | | ₩ 396,750 | ₩ 237,769 | ₩ 62,833 | | |

The Group's sensitivity to a 10% change in exchange rate of the functional currency (Korean won) against each foreign currency on income before income tax as of December 31, 2011, is as follows:

| Currency | | Korean wor | n | Translation into U.S. dollars (Note 2) | | | | |
|----------|--------|---------------|---------------|--|------------|--|--|--|
| | Increa | se by 10% Dec | crease by 10% | 2011 | 2010 | | | |

| USD | ₩ | (1,565) ₩ | 1,565 | \$ (1,357) | \$ 1,357 | | | |
| JPY | | (275) | 275 | (238) | 238 | | | |
| EUR | | 2,923 | (2,923) | 2,534 | (2,534) | | | |
| AUD | | 3,483 | (3,483) | 3,020 | (3,020) | | | |
| Other | | 11 | (11) | 10 | (10) | | | |
| | ₩ | 4,577 ₩ | (4,577) | \$ 3,969 | \$ (3,969) | | | |

2) Market interest rate variable risk

The Group is exposed to financial risks arising from the interest rates. Risk aversion activity is evaluated regularly with adjusting conditions and natures of its interest rates.

3) Credit risk

Credit risk refers to risk of financial losses to the Group if the counterpart defaults on the obligations of the contract. The Group operates a policy to transact only with counterparties that have more than a certain level of credit rating, based on the counterparty's financial conditions, default history and other factors. The credit risk on liquid funds and derivative financial instruments is limited as the Group transacts only with financial institutions with high credit ratings assigned by international credit rating agencies.

Except for below, the book value of financial assets in the consolidated financial statements represents the maximum amount of exposure to credit risk.

| | Korean won | | | | | | | |
|--|------------|--------------|--------|-------------|-----------------|----|--|--|
| Description | Decem | ber 31, 2011 | Decemb | er 31, 2010 | January 1, 2010 | _ | | |

| Total amount that the Group has guaranteed | ₩ | 16,289 | ₩ | 16,085 | ₩ 16,37 | 0' | | |
| Translation into U.S. dollars (In thousands) | \$ | 14,124 | \$ | 13,947 | \$ 14,19 |)4 | | |

(*) This is the total amount that the Group has guaranteed, and as of December 31, 2011, December 31, 2010 and January 1, 2010, the used commitments are \W143 million (\\$124 thousand), \W141 million (\\$122 thousand) and \W144 million (\\$125 thousand), respectively.

4) Liquidity risk

The Group establishes short-term and long-term fund management plans. The Group analyzes and reviews actual cash outflow and its budget to correspond the maturity of financial liabilities to that of financial assets. Management believes that with proper financial liabilities, it will be able to easily access cash when necessary for its operating activities and financial assets.

The Group's maturity analysis of its financial liabilities according to their remaining contract expiration as of December 31, 2011, is as follows:

| | | | Korea | n won | | |
|---|-------------------------|------------|-----------|-----------|----------|---------|

| U.S. dollars (Note 2) (In thousands) | \$ | 546,634 \$ | 92,098 | \$ 27,63 | 4 \$ | 666,367 |

(3) The fair value of financial instruments

The Group estimates the fair value and book value of financial assets and liabilities to be close.

Financial instruments that are measured subsequent to initial recognition at fair value are grouped into Level 1 to Level 3, based on the degree to which the fair value is observable as described below:

- Level 1: Fair value measurements are those that are derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements are those that are derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: Fair value measurements are those that are derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair value measurements of financial instruments by fair value hierarchy levels as of December 31, 2011, are as follows:

| | | | | | | | | | | Translation into | | |
|-------------------------|------------|--------|---|---------|-------|---------|---|-------|----|-----------------------|--|--|
| | Korean won | | | | | | | | | U.S. dollars (Note 2) | | |

Independent Auditors' Report

English Translation of a Report Originally Issued in Korean

To the Shareholders and Board of Directors of GS Global Corporation

We have audited the accompanying separate statements of financial position of GS Global Corporation (the "Company") as of December 31, 2011, and the related separate statements of income, comprehensive income, changes in shareholders' equity and cash flows for the year then ended, all expressed in Korean won. These separate financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these separate financial statements based on our audits.

We have audited the separate financial statements as of December 31, 2010, and we expressed that the separate financial statements are in conformity with the accounting principles generally accepted in the Republic of Korea on March 7, 2011, which are not adjusted in transition effect to Korean International Financial Reporting Standards ("K-IFRS") (see Note 3). However, the separate financial statements as of December 31, 2010, for the accompanying comparative period are adjusted to these differences.

We conducted our audits in accordance with auditing standards generally accepted in the Republic of Korea. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the separate financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the separate financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall separate financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the separate financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2011, and its results of operations and its cash flows for the year then ended in conformity with Korean International Financial Reporting Standards ("K-IFRS").

Our audits also comprehended the translation of Korean won amounts into U.S. dollar amounts, and in our opinion, such translation has been made in conformity with the basis in Note 2. Such U.S. dollar amounts are presented solely for the convenience of readers outside of the Republic of Korea.

Deloitte Anjin LLC

NOTES TO SEPARATE FINANCIAL STATEMENTS

AS OF DECEMBER 31, 2011, DECEMBER 31, 2010 AND JANUARY 1, 2010, AND FOR THE YEARS ENDED DECEMBER 31, 2011 AND 2010

1. THE COMPANY:

Organization and Description of Business

GS Global Corporation (the "Company") was incorporated on July 31, 1954, under the Commercial Code of the Republic of Korea for the purpose of trading in various goods internationally. On June 26, 1976, the Company became publicly owned, with the common stock of the Company listed on the Korea Exchange (formerly, the Korea Stock Exchange). As of December 31, 2011, the Company's authorized and issued shares of common stock are 400,000,000 and 22,533,764, respectively, and the paid-in capital amounts to \$56,334 million (\$48,846 thousand). The Company changed its name from Ssang Yong Corporation to GS Global Corporation on July 21, 2009.

As of December 31, 2011, the major shareholders of the Company are as follows:

| Shareholders | Number of shares | Ownership (%) |
|----------------|------------------|---------------|
| GS Corporation | 12,298,820 | 54.58 |
| Others | 10,234,944 | 45.42 |
| | 22,533,764 | 100.00 |

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

The Company has adopted the Korean International Financial Reporting Standards ("K-IFRS") for the annual period beginning on January 1, 2011. In accordance with K-IFRS 1101 First-time adoption of International Financial Reporting Standards, the transition date to K-IFRS is January 1, 2010. The significant accounting policies under K-IFRS followed by the Company in the preparation of its separate financial statements are summarized in Note 3

The accompanying separate financial statements were approved by the board of directors on February 8, 2012.

Major accounting policies used for the preparation of the separate financial statements are stated below. Unless stated otherwise, these accounting policies have been applied consistently to the separate financial statements for the current period and the accompanying comparative period.

The accompanying separate financial statements have been prepared on the historical cost basis, except for certain noncurrent assets and financial instruments that are measured at revalued amounts or fair values, as explained in the accounting policies below. Historical cost is generally based on the fair value of the consideration given in exchange for assets.

Currently, enactments and amendments of the K-IFRSs are in progress, and the financial information presented in the separate financial statements may change accordingly in the future. The Company has not applied the following new and revised K-IFRSs that have been issued, but are not yet effective:

K- IFRS 1107 Financial Instruments: Disclosures – Transfers of Financial Assets

The amendments to K-IFRS 1107 increase the disclosure requirements for transactions involving transfers of financial assets. These amendments are intended to provide greater transparency around risk exposures when a financial asset is transferred, but the transferor retains some level of continuing exposure in the asset. The amendments also require disclosures where transfers of financial assets are not evenly distributed throughout the period. K-IFRS 1107 is effective for annual periods beginning on or after July 1, 2011.

Amendments to K-IFRS 1012 Deferred Tax – Recovery of Underlying Assets

The amendments to K-IFRS 1012 provide an exception to the general principles in K-IFRS 1012 that the measurement of deferred tax assets and deferred tax liabilities should reflect the tax consequences that would follow the manner in which the entity expects to recover the carrying amount of an asset. Investment property or a non-depreciable asset measured using the revaluation model in K-IFRS 1016 *Property, Plant and Equipment* are presumed to be recovered through sale for the purposes of measuring deferred taxes, unless the presumption is rebutted in certain circumstances. The amendments to K-IFRS 1012 are effective for annual periods beginning on or after January 1, 2012.

K-IFRS 1019 (as revised in 2011) Employee Benefits

The amendments to K-IFRS 1019 change the accounting for defined benefit plans and termination benefits. The most significant change relates to the accounting for changes in defined benefit obligations and plan assets. The amendments require the recognition of changes in defined benefit obligations and in fair value of plan assets when they occur and, hence, eliminate the 'corridor approach' permitted under the previous version of K-IFRS 1019 and accelerate the recognition of past service costs. The amendments to K-IFRS 1019 are effective for annual periods beginning on or after January 1, 2013, and require retrospective application with certain exceptions.

K-IFRS 1113 Fair Value Measurement

K-IFRS 1113 establishes a single source of guidance for fair value measurements and disclosures about fair value measurements. The standard defines fair value, establishes a framework for measuring fair value and requires disclosures about fair value measurements. K-IFRS 1113 is effective for annual periods beginning on or after January 1, 2013, with earlier application permitted.

The Company does not anticipate that the amendments referred above will have a significant effect on the Company's separate financial statements and disclosures.

(1) Functional currency and presentation currency

The separate financial statements are presented in the currency of the primary economic environment in which the entity operates (its functional currency). The Company's functional currency and the presentation currency for the separate financial statements is Korean won.

(2) Foreign currency translation

Transactions that occur in currencies other than the Company's functional currency will be recorded in translated amount using the exchange rate on the day of the transaction. At the end of reporting period, all monetary assets and liabilities will be translated using the exchange rate at the end of reporting date. Meanwhile, non-monetary assets and liabilities measured at fair value will be retranslated using the exchange rate on the day of fair value evaluation, whereas non-monetary assets and liabilities measured at historical cost will not be translated.

The accompanying separate financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operated. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers outside of the Republic of Korea and has been made at the rate of \$1,153.30 to USD 1.00 at December 31, 2011. Such translations should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that or any other rate.

Exchange differences are recognized in profit or loss in the period in which they arise, except for:

- Exchange differences on foreign currency borrowings relating to assets under construction for future productive
 use, which are included in the cost of those assets when they are regarded as an adjustment to interest costs on
 those foreign currency borrowings and
- 2) Exchange differences arising from the transactions to avoid certain currency risk.

(3) Cash and cash equivalents

Cash and cash equivalents include cash, bank deposit, and floating short-term investments with maturities of three months or less from acquisition.

(4) Financial assets

All financial assets are recognized and derecognized on the trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the time frame established by the market concerned, and are initially measured at fair value, plus transaction costs, except for those financial assets classified as at fair value through profit or loss ("FVTPL"), which are initially measured at fair value.

Financial assets are classified into the following specified categories: 'financial assets at FVTPL,' 'held-to-maturity investments,' 'available-for-sale ("AFS") financial assets' and 'loans and receivables.' The classification depends on the nature and purpose of the financial assets, and is determined at the time of initial recognition.

1) Effective interest method

The effective interest method is a method of calculating the amortized cost of a debt instrument and allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the debt instrument or, where appropriate, a shorter period, to the net carrying amount on initial recognition. Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as FVTPL.

2) Financial assets at FVTPL

FVTPL includes the financial assets held for trading and those designated as at FVTPL at the first time of recognition. Financial assets acquired for the purpose of selling in the near term are classified as held for trading and all derivatives, including embedded one in other financial instruments or other host contracts that are treated as separate derivatives, are classified as held for trading, unless it is not designated by the effective hedging instruments. Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. Transaction expenses related to acquisition at the time of the first recognition are recognized as current gain or loss immediately.

Financial assets are classified as at FVTPL when the financial asset is either held for trading or designated as at FVTPL.

A financial asset is classified as held for trading if:

- It has been acquired principally for the purpose of selling in the near term
- On initial recognition, it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking
- · It is a derivative that is not designated and effective as a hedging instrument

A financial asset other than a financial asset held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- The financial asset forms part of the Company's financial assets or financial liabilities, or both, which is managed and its performance is evaluated on a fair value basis in accordance with the Company's documented risk management or investment strategy, and information about the Company is provided internally on that basis
- It forms part of a contract containing one or more embedded derivatives, and K-IFRS 1039 *Financial Instruments*: *Recognition and Measurement* permits the entire combined contract (asset or liability) to be designated as at FVTPL

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any dividend or interest earned on the financial asset and is included in the other gains and losses line item in the separate statement of comprehensive income.

3) Held-to-maturity investments

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Company has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are measured at amortized cost using the effective interest method, less any impairment, with revenue recognized on an effective yield basis.

4) Financial assets AFS

Non-derivative financial assets that are not classified as held to maturity, held for trading, designated as at FVTPL or loans and receivables are classified as financial assets AFS. Financial assets can be designated as sale on initial recognition. Financial assets AFS are initially recognized at fair value, plus directly related transaction costs. They are subsequently measured at fair value. Unquoted equity investments whose fair value cannot be measured reliably are carried at cost. Gains and losses arising from changes in fair value are recognized in other comprehensive income and accumulated in the investments revaluation reserve, with the exception of impairment losses; interest calculated using the effective interest method; and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. Where the investment is disposed of or determined to be impaired, the cumulative gain or loss previously accumulated in the investment revaluation reserve is reclassified to profit or loss. Dividends on AFS equity instruments are recognized in profit or loss when the Company's right to receive the dividends is established.

The fair value of AFS monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the spot rate at the end of the reporting period. The foreign exchange gains and losses that are recognized in profit or loss are determined based on the amortized cost of the monetary asset. Other foreign exchange gains and losses are recognized in other comprehensive income.

AFS that are not not traded in an active market and for which the fair value cannot be reliably measured, derivatives linked to non-trade equity instruments and should be settled by transferring them, are measured by the amount of acquisition cost deducting identified impairment.

5) Loans and receivables

Trade receivables, loans and other receivables that have fixed or determinable payments that are not quoted in an active market are classified as 'loans and receivables.' Loans and receivables are measured at amortized cost using the effective interest method, less any impairment. Interest income is recognized by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

6) Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For listed and unlisted equity investments classified as AFS, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, including redeemable notes classified as AFS and finance lease receivables, objective evidence of impairment could include:

- Significant financial difficulty of the issuer or counterparty
- Default or delinquency in interest or principal payments
- It becoming probable that the borrower will enter bankruptcy or financial reorganization
- Extinguishing of activated market due to financial difficulties

For certain categories of financial asset, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Company's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortized cost, the amount of the impairment loss recognized is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognized in other comprehensive income are reclassified to profit or loss in that period.

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortized cost would have been had the impairment not been recognized.

In respect of AFS equity securities, impairment losses previously recognized in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognized in other comprehensive income.

7) Derecognition of financial assets

The Company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the Company retains substantially all the risks and rewards of ownership of a transferred financial asset, the Company continues to recognize the financial asset and also recognize a collateralized borrowing for the proceeds received.

In case of derecognizing the whole financial assets, the difference between the total of disposal amount received and accumulated gain or loss recognized as other comprehensive income and book value is recognized as current gain or loss in the separate statement of comprehensive income.

(5) Inventories

Inventories are stated at the lower of cost or net realizable value. Cost of inventories, except for merchandise and in transit (specific identification method), is measured under the gross average method. It consists of the purchase price, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Net realizable value represents the estimated selling price for inventories, less all estimated costs of completion and costs necessary to make the sale.

The carrying amount of inventories sold in the period and the amount of any write-down of inventories to net realizable value and all losses of inventories in the period, less the amount of any reversal in the period of any write-down of the inventories arising from an increase in net realizable value, are recognized as expense during the period.

(6) Subsidiaries and investments in associates

The separate financial statements are the financial statements in accordance with K-IFRS 1027, which are presented by a parent, an investor or an associate in which the investments are accounted for on the basis of the direct equity interest rather than on the basis of the reported results and the net assets of the investees. In accordance with K-IFRS 1027, the investments in subsidiaries and associates are recorded at cost. Dividends on the investments in subsidiaries, joint ventures and associates are recognized in profit or loss when the Company's right to receive the dividend is established.

(7) Property, plant and equipment

Property, plant and equipment are stated at cost, less subsequent accumulated depreciation and accumulated impairment losses. The cost of an item of property, plant and equipment is directly attributable to their purchase or construction, which includes any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management. It also includes the initial estimate of the costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent costs are recognized in carrying amount of an asset or as an asset if it is probable that future economic benefits associated with the assets will flow to the Company and the cost of an asset can be measured reliably. Routine maintenance and repairs are expensed as incurred.

The Company does not depreciate land. Depreciation expense is computed using the straight-line method based on the estimated useful lives of the assets as follows:

| | Estimated useful lives | | |
|------------|------------------------|----------|---------|
| Accounts | (years) | Accounts | (years) |
| Buildings | 20–40 | Vehicles | 4–10 |
| Structures | 20-40 | Tools | 4–10 |
| Machinery | 4–10 | | |

The Company reviews the depreciation method; the estimated useful lives; and residual values of property, plant and equipment at the end of each annual reporting period. If expectations differ from previous estimates, the changes are accounted for as a change in an accounting estimate.

The Company derecognizes property, plant and equipment from the separate statement of financial position at the time of disposal and when the economic benefits are not probable through their disposal or use. Gain or loss from the disposal of property, plant and equipment is determined by the difference between disposal amount and its book value, and it is recognized as current gain or loss in the separate statement of comprehensive income at the time of derecognition.

(8) Intangible assets

Intangible assets with finite useful lives that are acquired separately are carried at cost, less accumulated amortization and accumulated impairment losses. Amortization is recognized on the straight-line basis over their estimated useful lives. The estimated useful life and amortization method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost, less accumulated impairment losses.

Intangible assets are stated at cost, less accumulated amortization, as described below:

Research and Development Costs

Expenditure on research activities, undertaken with the prospects of gaining new scientific or technical knowledge and understanding, is recognized as expense as incurred.

When the future economic benefits from disposition or use of intangible assets are not foreseeable, the relating intangible assets are eliminated from the separate statement of financial position. Such gain or loss incurred from the elimination is the difference between the net sale price and book value that is recognized as gain or loss for that period.

(9) Impairment of tangible and intangible assets

At the end of each reporting period, the Company reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Company estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value, less costs to sell, or value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or the cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognized immediately in profit or loss, unless the relevant asset is carried at a revalued amount; in which case, the impairment loss is treated as a revaluation decrease.

(10) Equity instruments and financial liabilities

1) Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangement.

2) Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Company are recognized as the proceeds are received, net of direct issue costs.

When the Company repurchases its equity instruments (treasury stock), the incremental costs, net of tax effect, are deducted from the shareholders' equity and recognized as other capital item deducted from the total equity in the separate statements of financial position. In addition, profits or losses from purchase, sale or retirement of treasury stocks are directly recognized in shareholders' equity and not in current profit or loss.

3) Financial liabilities

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

(1) Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is either held for trading or designated as FVTPL.

A financial liability is classified as held for trading if:

- It has been acquired principally for the purpose of repurchasing in the near term
- On initial recognition, it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking
- It is a derivative that is not designated and effective as a hedging instrument

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- Such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise
- The financial liability forms part of Company's financial assets or financial liabilities, or both, which is managed, and its performance is evaluated on a fair value basis in accordance with the Company's documented risk management or investment strategy, and information about the Companying is provided internally on that basis
- It forms part of a contract containing one or more embedded derivatives, and K-IFRS 1039 permits the entire combined contract (asset or liability) to be designated as at FVTPL

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in profit or loss. The net gain or loss recognized in profit or loss incorporates any interest paid on the financial liability and is included in the 'other gains and losses' line item in the separate statement of comprehensive income.

(2) Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method, with interest expense recognized on an effective yield basis.

The effective interest method is a method of calculating the amortized cost of a financial liability and allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

3 Financial guarantee contract liabilities

Financial guarantee contract liabilities are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of:

- the amount of the obligation under the contract, as determined in accordance with K-IFRS 1037 *Provisions*, *Contingent Liabilities and Contingent Assets* and
- the amount initially recognized, less cumulative amortization recognized in accordance with the K-IFRS 1018 Revenue

4 Derecognition of financial liabilities

The Company derecognizes financial liabilities when, and only when, the Company's obligations are discharged, canceled or they expire.

(11) Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in profit or loss in the period in which they are incurred.

(12) Derivative financial instruments

The Company manages foreign exchange risk by using currency forward

Derivatives are initially recognized at fair value at the date the derivative contract is entered into and are subsequently remeasured to their fair value at the end of each reporting period. The resulting gain or loss is recognized in profit or loss immediately, unless the derivative is designated and effective as a hedging instrument; in such case, the timing of the recognition in profit or loss depends on the nature of the hedge relationship.

A derivative with a positive fair value is recognized as a financial asset and a derivative with a negative fair value is recognized as a financial liability.

The Company designates certain derivatives as hedging instruments to hedge the risk of changes in fair value of a recognized asset or liability or an unrecognized firm commitment (fair value hedge) and the risk of changes in cash flow of a highly probable forecast transaction and the risk of changes in foreign currency exchange rates of firm commitment (cash flow hedge).

At the inception of the hedge relationship, the entity documents the relationship between the hedging instrument and the hedged item, along with its risk management objectives and its strategy for undertaking various hedge transactions. Furthermore, at the inception of the hedge and on an ongoing basis, the Company documents whether the hedging instrument is highly effective in offsetting changes in fair values or cash flows of the hedged item.

Derivatives are measured at fair value

Derivatives are measured at fair value after the initial recognition, and the profit or loss from fair value change is recognized as follows:

1) Hedge accounting

Changes in the fair value of derivatives that are designated and qualify as fair value hedges are recognized in profit or loss immediately, together with any changes in the fair value of the hedged asset or liability that are attributable to the hedged risk. The change in the fair value of the hedging instrument and the change in the hedged item attributable to the hedged risk are recognized in the line of the separate statement of comprehensive income relating to the hedged item.

Hedge accounting is discontinued when the Company revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

2) Cash flow hedges

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in other comprehensive income. The gain or loss relating to the ineffective portion is recognized immediately in profit or loss, and is included in the 'other gains and losses' line item.

Amounts previously recognized in other comprehensive income and accumulated in equity are reclassified to profit or loss in the periods when the hedged item is recognized in profit or loss in the same line of the separate statement of comprehensive income as the recognized hedged item. However, when the forecast transaction that is hedged results in the recognition of a non-financial asset or a non-financial liability, the gains and losses previously accumulated in equity are transferred from equity and included in the initial measurement of the cost of the non-financial asset or non-financial liability.

Hedge accounting is discontinued when the Company revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or it no longer qualifies for hedge accounting. Any gain or loss accumulated in equity at that time remains in equity and is recognized when the forecast transaction is ultimately recognized in profit or loss. When a forecast transaction is no longer expected to occur, the gain or loss accumulated in equity is recognized immediately in profit or loss.

Hedge accounting is discontinued when the Company revokes the hedging relationship; when the hedging instrument expires or is sold, terminated or exercised; or when it no longer qualifies for hedge accounting. The fair value adjustment to the carrying amount of the hedged item arising from the hedged risk is amortized to profit or loss from that date.

The gain or loss relating to the ineffective portion is recognized immediately in profit or loss, and is included in the 'other gains and losses' line item.

(13) Retirement benefit costs

Contributions to defined contribution retirement benefit plans are recognized as an expense when employees have rendered service entitling them to the contributions.

The retirement benefit obligation recognized in the separate statements of financial position represents the present value of the defined benefit obligation, less fair value of plan assets and adjustment for unrecognized past service cost. Defined benefit obligations are calculated by an independent actuary using the projected unit credit method. The present value of the defined benefit obligation is presented in currency to be paid and measured by discounting estimated future cash outflows by the interest rate of high-quality corporate bonds with similar maturity as the expected postemployment benefit payment date. Actuarial gain or loss from changes in actuarial assumptions or differences between actuarial assumptions and actual results is recognized in other comprehensive income in the separate statements of comprehensive income. Past service cost is recognized immediately to the extent that the benefits are already vested and, otherwise, is amortized on the straight-line basis over the average period until the benefits become vested.

The retirement benefit obligation recognized in the separate statement of financial position represents the present value of the defined benefit obligation, as adjusted for unrecognized actuarial gains and losses and unrecognized past service cost and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

(14) Provisions and contingent liability

Provisions are recognized when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that the Company will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during that period.

(15) Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances. The Company recognizes revenue when the amount of revenue can be measured reliably and it is probable that the economic benefits associated with the transaction will flow to the Company. Revenue is recognized when all the following conditions are satisfied for each of the Company's operating activities:

1) Sale of goods

The Company recognizes revenue from sale of goods when significant risks and rewards from ownership of goods have been transferred, and retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods.

2) Dividend and interest income

Dividends are recognized as revenue when the right to dividends is determined.

Interest income is recognized if it is probable that future economic benefits will flow to the Company and the amount can be measured reliably. Interest income is recognized through passage of time by effective interest rate method and when unpaid interest has accrued before the acquisition of an interest-bearing investment. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument to the net carrying amount of the financial asset.

(16) Income tax

Income tax consists of current tax and deferred tax.

1) Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the separate statement of comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

2) Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the separate financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when they relate to income tax levied by the same taxation authority. Also, they are offset when different taxable entities that intend either to settle current tax liabilities and assets on a net basis or realize the assets and settle the liabilities simultaneously in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

3) Current tax and deferred tax for the year

Current tax and deferred tax are recognized in profit or loss, except when they relate to items that are recognized in other comprehensive income or directly in equity; in which case, the current tax and deferred tax are also recognized in other comprehensive income or directly in equity. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

3. TRANSITION TO K-IFRS:

Transition adjustments from previous accounting principles generally accepted in the Republic of Korea ("Korean GAAP") to K-IFRSs that affected the Company's financial position, financial performance and cash flows are as follows.

(1) K-IFRS 1101 – Optional exemptions

K-IFRS 1101 provides for a number of optional exemptions from the general principle of full retrospective applications. The optional exemptions for first-time adoption of K-IFRSs of the Company are as follows:

1) Business combination

Business combinations that occurred before the date of transition to K-IFRS are not to be retrospectively restated.

2) Borrowing costs

Borrowing costs relating to all qualifying assets are capitalized when the commencement date for capitalization is on or after the date of past special days (January 1, 2003).

3) Investments in subsidiaries, joint ventures and associates

For the investments in subsidiaries, joint ventures and associates on the separate statement of financial position as of the transition date, the Company uses the book value under previous Korean GAAP as deemed cost.

(2) The effect of the transition from Korean GAAP to K-IFRS on the Company's financial status.

1) The principal effects on the separate statement of financial position at January 1, 2010 (date of transition)

| | Korean won | | | | | | | | | |

| U.S. dollars (Note 2) (In thousands) | \$ | 344,147 | \$ | 264,748 | \$ | 79,399 | | | | | |

- (*1) Under previous Korean GAAP, when the Company transferred a financial asset to financial institutions and it was considered that control over the financial asset was transferred, the Company derecognized the financial asset. Under K-IFRS, if the transfer does not satisfy the criteria of derecognition, the financial asset is not derecognized and the related cash proceeds are recognized as financial liabilities.
- (*2) The Company uses the carrying amount of investments in subsidiaries and associates under previous Korean GAAP as deemed cost at the date of transition.
- (*3) The Company recognizes the defined benefit obligation by using actuarial assumptions.
- (3) The principal effects on the separate statement of comprehensive income.
- 1) The principal effects on the results of operations at December 31, 2010

| | | | | | | tion into |
|---|-----|--------|-------|-------------|------------------|------------------|
| | | Korea | n wo | on | U.S. dolla | rs (Note 2) |
| | | | Cor | mprehensive | | Comprehensive |
| Description | Net | income | | income | Net income | income |
| | | (In mi | llior | ns) | (In the | ousands) |
| Korean GAAP | ₩ | 18,358 | ₩ | 19,396 | <u>\$ 15,918</u> | \$ 16,818 |
| Adjustment: | | | | | | |
| Canceled equity method (*1) | | (977) | | (2,433) | (847) | (2,110) |
| Present value of defined benefit obligation | | | | | 290 | 44 |

- (*1) Associates were accounted for using the equity method under previous Korean GAAP. However, under K-IFRSs, those were accounted for at cost.
- (*2) The Company recognizes the defined benefit obligation by using actuarial assumptions.
- (4) Explanation of the effects of K-IFRS transition adjustments in the separate statement of cash flows Under K-IFRS, dividends received, interest received, interest paid and income tax paid, which were not presented separately under Korean GAAP, are now separately presented and the related income (expense) and assets (liabilities) have been adjusted accordingly.

Also, under K-IFRS, foreign currency translation amounts are presented gross as part of the related transactions and deducted against the effects of foreign exchange rate changes on the balance of cash held in foreign currencies. No others significant differences between the separate statement of cash flows prepared under Korean GAAP compared to K-IFRS have been noted. Also, under K-IFRS, gain (loss) on foreign currency translation is presented gross and against which the gain (loss) on foreign currency translation on the cash and cash equivalent was deducted. No other significant differences between the separate statement of cash flows prepared under Korean GAAP compared to K-IFRS have been noted.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS:

In the application of the Company's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

5. <u>SEGMENT INFORMATION:</u>

- (1) The Company adopted 'K-IFRS 1108 Segment Information' since January 1, 2010. K-IFRS 1108 requires that the Company should recognize its operating segments based on the internal report on the Company's constituent units that are reviewed regularly by chief executive officer to allocate resources and evaluate the performance of each unit.
- (2) The Company's segments are as follows:

| Description | Business |
|----------------------|--|
| Industrial resources | Ferrous, non-ferrousmetals, cement, coal, mechanical plant |
| Import-distribution | Custody, maintenance and checkup of imported vehicles and |
| | rent of warehouse |

(3) Sales and income before income tax by operating segments as of December 31, 2011 and 2010, are as follows:

(5) Fair value of financial instrument

Fair value measurements are those that are derived from quoted prices (unadjusted) in active markets for identical assets or liabilities and fair value measurements are those that are derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).

Fair value measurements are those that are derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The management regards that the book values of financial assets (liabilities) recognized in amortized cost as of December 31, 2011 and 2010, are similar to the fair values.

7. <u>DERIVATIVES:</u>

(1) The Company's derivative instrument contracts, including forwards to hedge the exposure to changes in foreign exchange rate and price of goods as of December 31, 2011, are as follows:

| Total | ₩ | 566 ₩ | 283 | \$ | 491 \$ | 245 | | |

(6) Actuarial assumptions used as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | December 31, | December 31, | January 1, |
|----------------------------------|--------------|--------------|------------|
| Description | 2011 | 2010 | 2010 |
| Discount rate | 4.95% | 5.73% | 7.11% |
| Expected return on plan assets | 4.96 | 3.80 | 6.00 |
| Expected rate of salary increase | 4.94 | 5.00 | 5.00 |

20. SHAREHOLDERS' EQUITY:

(1) Capital stock as of December 31, 2011, December 31, 2010 and January 1, 2010, consist of the following:

| Description | | December 31, 2011 | | December 31, 2010 | | January 1, 2010 | | | |
|---|----|----------------------|------|---------------------|------------------------------|--------------------|--|--|--|
| * | | (In millio | ns o | f Korean won, excep | orean won, except par value) | | | | |
| Authorized | | 400,000,000 shares | | 400,000,000 shares | | 400,000,000 shares | | | |
| Issued | | 22,533,764 shares | | 11,266,882 shares | | 11,266,882 shares | | | |
| Par value | ₩ | 2,500 | ₩ | 2,500 | ₩ | 2,500 | | | |
| Capital stock | | 56,334 | | 28,167 | | 28,167 | | | |
| Translation into U.S. dollars (Note 2) (In thousands) | \$ | 48,846 | \$ | 24,423 | \$ | 24,423 | | | |

- (*) Since there was a paid-in capital increase in the current year, the number of shares issued and capital stock have increased by 11,266,882 shares and \(\pi 28,167\) million (\\$ 24,423\) thousand), respectively, as of December 31, 2011.
- (2) Details of other shareholders' equity as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | | | | | | | | 1 | Traı | nslation into | | |
|---------------------------------------|-----|-----------|-----|------------|----|----------|----|-------------|------|---------------|-----------|---------|
| | | | Ko | orean won | | | | U. | S. d | ollars (Note | 2) | |
| | Dec | ember 31, | De | cember 31, | Ja | nuary 1, | De | ecember 31, | De | cember 31, | Janu | ary 1, |
| | | 2011 | | 2010 | | 2010 | | 2011 | | 2010 | 20 | 010 |
| | | | (Ir | millions) | | | | | (In | thousands) | | |
| Paid-in capital in excess | | | | | | | | | | | | |
| of par value (*1) | ₩ | 126,855 | ₩ | 16,424 | ₩ | 16,425 | \$ | 109,993 | \$ | 14,241 | \$ | 14,241 |
| Treasury stock (*2) | | (709) | | (709) | | (709) | | (615) | | (615) | | (615) |
| Loss on disposition of treasury stock | | - | | - | | (1,531) | | - | | - | | (1,327) |
| Other capital adjustments | | _ | | | | (3,547) | | | | | | (3,076) |
| | ₩ | 126,146 | ₩ | 15,715 | ₩ | 10,638 | \$ | 109,378 | \$ | 13,626 | <u>\$</u> | 9,223 |

- (*1) Since there was an increase in the paid-in capital in the current year, paid-in capital in excess of par value is increased by ₩110,430 million (\$95,751 thousand) as of December 31, 2011.
- (*2) The Company has purchased 38,562 shares of treasury stock for \$709 million (\$614 thousand) for the purpose of stock price stability, which is accounted for as capital adjustments. Treasury shares will be liquidated, if necessary, depending on future market trends.

21. COMPONENTS OF OTHER CAPITAL:

Details of components of other capital as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | | | K | orean won | | | | U. | | anslation into | | |
|---|----|------------|-----|------------|----|----------|----|-------------|----|----------------|----|-----------|
| | De | cember 31, | Dec | cember 31, | Ja | nuary 1, | De | ecember 31, | D | ecember 31, | J | anuary 1, |
| | | 2011 | | 2010 | | 2010 | | 2011 | | 2010 | | 2010 |
| | | | (In | millions) | | | | | (I | n thousands) | | |
| Loss on valuation of AFS financial assets | ₩ | (1,093) | ₩ | (50) | ₩ | (50) | \$ | (948) | \$ | (44) | \$ | (44) |
| Overseas operations translation gain | | 27 | | 45 | | 12 | | 24 | | 39 | | 11 |

| Other seven litigations | NASCO | GS Global | KRW | 382 |
| | | | USD | 598 |
| Total | | | USD | 7,632 |
| | | | KRW | 382 |

32. RISK MANAGEMENT:

(1) Capital risk management

The Company performs capital management to maintain its ability to continuously provide profits to shareholders and parties in interest and to maintain optimum capital structure. The overall capital risk management policy is consistent with that of the prior year.

Debt-to-equity ratio is calculated as total liabilities divided by equity and is used as an index to manage the Company's capital. Debt-to-equity ratios as of December 31, 2011, December 31, 2010 and January 1, 2010, are as follows:

| | | | K | orean won | | | | Translatio | n int | o U.S. dolla | ars (| Note 2) |
|---------------------------|-----|-----------|-----|-----------|----|-----------|----|-------------|-------|--------------|-------|-----------|

| Liabilities ratio | | 127.5% | | 308.0% | | 116.1% | | | | | | |

(2) Financial risk management

The Company is exposed to various financial risks, such as market risk (foreign exchange risk, interest rate risk and price risk), credit risk and liquidity risk related to financial instruments. The purpose of risk management of the Company is to identify potential risks related to financial performance and reduce, eliminate and evade those risks to a degree acceptable to the Company. Overall financial risk management policy of the Company is the same as the prior period.

1) Foreign exchange risk management

The Company is exposed to various foreign currencies' risk in which it makes transactions. The Company is mainly exposed to USD, EUR, AUD and JPY risk.

The Company manages foreign exchange risk by matching the inflow and outflow of foreign currencies according to each currency and maturity, and by adjusting the foreign currency settlement day according to the exchange rate forecast. The Company uses foreign currency derivatives, such as currency forward, currency swap and currency option, as hedging instruments; however, speculative foreign exchange trade on derivative financial instruments is basically prohibited.

Assets and liabilities denominated in foreign currencies as of December 31, 2011, December 31, 2010 and January 1, 2010, are summarized as follows:

| | | I | Foreign currencie | es | | Ko | rean won equiv | alent | |
|-------------|----------|--------------|-------------------|------------|-----|-----------|----------------|-------|-----------|
| | | December 31, | December 31, | January 1, | Dec | ember 31, | December 31, | Ja | anuary 1, |

| | ₩ | (5,155) ₩ | 5,155 \$ | (4,470) \$ | 4,470 | | | | |

2) Market interest rate variable risk

The Company is exposed to financial risks arising from the interest rates. Risk-aversion activity is evaluated regularly with adjusting conditions and natures of its interest rates.

3) Credit risk

Credit risk refers to risk of financial losses to the Company if the counterpart defaults on the obligations of the contract. The Company operates a policy to transact only with counterparties that have more than a certain level of credit rating, based on the counterparty's financial conditions, default history and other factors. The credit risk on liquid funds and derivative financial instruments is limited as the Company transacts only with financial institutions with high credit ratings assigned by international credit-rating agencies.

Except for below, the book value of financial assets in the separate financial statements represents the maximum amount of exposure to credit risk.

| | | Korean won | |
|--|-------------------|-------------------|-----------------|
| Description | December 31, 2011 | December 31, 2010 | January 1, 2010 |
| | | (In millions) | |
| Total amount that the Company has guaranteed | ₩ 285,174 | ₩ 215,795 | ₩ 94,363 |
| Translation into U.S. dollars (In thousands) | \$ 247,268 | \$ 187,111 | \$ 81,820 |

(*) This is the total amount that the Company has guaranteed, and as of December 31, 2011, December 31, 2010 and January 1, 2010, the used commitments are \W53,709 million (\\$46,570 thousand), \W14,323 million (\\$12,576 thousand) and \W61,900 million (\\$53,015 thousand), respectively.

4) Liquidity risk

The Company establishes short-term and long-term fund management plans. The Company analyzes and reviews actual cash outflow and its budget to correspond the maturity of financial liabilities to that of financial assets. Management believes that with proper financial liabilities, it will be able to easily access cash when necessary for its operating activities and financial assets.

The Company's maturity analysis of its financial liabilities according to their remaining contract expiration as of December 31, 2011, is as follows:

| | | | | Korean won | | | | | | |

(3) The fair value of financial instruments

The Company estimates the fair value and book value of financial assets and liabilities to be close.

Financial instruments that are measured subsequent to initial recognition at fair value are grouped into Level 1 to Level 3, based on the degree to which the fair value is observable as described below:

- Level 1: Fair value measurements are those that are derived from quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Fair value measurements are those that are derived from inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: Fair value measurements are those that are derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

Fair value measurements of financial instruments by fair value hierarchy levels as of December 31, 2011, are as follows:

| | | | | | | | | | - | Franslation into |
|-------------------------|----|--------|----|---------|----------|--------|---|-------|------------|---------------------|

| Total | ₩ | 3,625 | \$ 3,142 | | | | |

Independent Accountants' Review Report on Internal Accounting Control System ("IACS")

English Translation of a Report Originally Issued in Korean

To the Representative Director of GS Global Corporation:

We have reviewed the accompanying Report on the Management's Assessment of IACS (the "Management's Report") of GS Global Corporation (the "Company") as of December 31, 2011. The Management's Report and the design and operation of IACS are the responsibility of the Company's management. Our responsibility is to review the Management's Report and issue a review report based on our procedures. The Company's management stated in the accompanying Management's Report that "based on the assessment of the IACS as of December 31, 2011, the Company's IACS has been appropriately designed and is operating effectively as of December 31, 2011, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association."

We conducted our review in accordance with the IACS Review Standards established by the Korean Institute of Certified Public Accountants. Those standards require that we plan and perform a review, the objective of which is to obtain a lower level of assurance than an audit of the Management's Report, in all material respects. A review includes obtaining an understanding of a company's IACS and making inquiries regarding the Management's Report and, when deemed necessary, performing a limited inspection of underlying documents and other limited procedures.

The Company's IACS represents internal accounting policies and a system to manage and operate such policies to provide reasonable assurance regarding the reliability of separate financial statements prepared, in accordance with accounting principles generally accepted in the Republic of Korea, for the purpose of preparing and disclosing reliable accounting information. Because of its inherent limitations, IACS may not prevent or detect a material misstatement of the separate financial statements. Also, projections of any evaluation of effectiveness of IACS to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Based on our review, nothing has come to our attention that causes us to believe that the Management's Report referred to above is not fairly stated, in all material respects, in accordance with the IACS Framework established by the Korea Listed Companies Association.

Our review is based on the Company's IACS as of December 31, 2011, and we did not review its IACS subsequent to December 31, 2011. This report has been prepared pursuant to the Acts on External Audit for Stock Companies in the Republic of Korea and may not be appropriate for other purposes or for other users.
