Anhui Province's Fourteenth Five-Year Plan for National Economic and Social Development and 2035 The outline of long-term goals for 2035 was prepared based on the spirit of the Fifth Plenary Session of the 19th CPC Central Committee and the "Recommendations of the Anhui Provincial Committee of the Communist Party of China on Formulating the 14th Five-Year Plan for National Economic and Social Development and Long-term Goals for 2035". It mainly Clarifying the guiding ideology, development goals, main tasks and major measures for Anhui's economic and social development during the "14th Five-Year Plan" period, and looking forward to basically realizing the long - term goal of socialist modernization by 2035, is the behavioral guidance of market entities and is the legal fulfillment of governments at all levels. The important basis for the responsibilities is the grand blueprint for Anhui's economic and social development and the action plan for the common efforts of the people of the province.

first time Building a moderately

prosperous society in all respects
and starting a new stage of
modernization and a new journey
towards building a beautiful Anhui

**Chapter One Decisive success in building a moderately
prosperous society in all respects and decisive
achievements**

" 13th Five-Year Plan " period is the decisive stage for building a moderately prosperous society in an all-round way. Faced with the complex international situation, the arduous tasks of reform, development and stability, especially the severe impact of the new coronavirus epidemic, under the strong leadership of the Party Central Committee with Comrade Xi Jinping at the core, the provincial party committee and the provincial government united and led the vast number of party members, cadres and the masses across the province Stay true to our original aspiration, keep our mission in mind, forge ahead, pioneer and innovate, actively seize national strategic opportunities such as the integrated development of the Yangtze River Delta, implement the five major development action

plans with high quality, and do a solid job in stabilizing growth, promoting reform, adjusting structure, and benefiting the people. We must work hard and effectively in all aspects of health, risk prevention, and stability work.

In order to promote the development of various undertakings in the province, the leadership of the Communist Party of China and the advantages of our country's socialist system have been further demonstrated.

Economic strength achieved historic progress. The economy maintains sustained and rapid growth and development

The pattern has been upgraded from " total volume in the middle, per capita behind " to " total volume at the front, per capita in the middle " , and the economic structure has changed from " two, three, one " to " three, two , one " . Average annual growth of regional GDP 7.3% , the total amount reached 3.87 trillion yuan, ranking 14th in the country promoted to 11th Bit,

The per capita regional GDP reached 61,000 yuan, a significant jump in the country's ranking. " Three reductions, one reduction and one replenishment " have achieved remarkable results. Grain production achieved " seventeen consecutive harvests " , and grain output rose from sixth to fourth in the country . The high-quality development index of the manufacturing industry ranks

among the top in the country. The transformation and upgrading of traditional industries represented by the new "copper wall and iron wall" and the "integration of core, screen and equipment" Form a system for the emerging industries of identification, and provide modern services with "Integration and Guantong" as the main body. The industry is accelerating its development, and the digital economy driven by "big intelligence moving to the cloud" is booming, and strategic The output value of strategic emerging industries and the added value of high-tech industries grew at an average annual rate of 17.3% and 15.1% respectively. The output value of strategic emerging industries accounted for 40.3% of the proportion of industries above designated size.

Innovation and development achieve historic progress.

Anhui becomes the Ministry of National Strategic Science and Technology

platforms with international influence have been approved for implementation, a number of major innovation achievements with international leading levels have continued to emerge, and a number of major industrialization projects with international competitiveness have been completed and put into

production. The National Laboratory and the Hefei Comprehensive National Science Center were the first to be approved for layout. A large scientific equipment cluster was initially formed. Energy, artificial intelligence, big health, environment, and future technology research institutes were laid out and constructed. The "Government, Industry, University, and Research Funding" was integrated into six areas . The Anhui Innovation Center has started operations, and regional innovation capabilities have risen to

8th in the country Bit. It has successfully developed major scientific and technological achievements such as the " Nine Chapters " quantum computing prototype, flexible foldable glass, and compact superconducting cyclotron accelerator. Original innovation has gradually transformed from " following and running together " to " running and leading " . Dynamic memory chips are the first in the country to achieve mass production , the world's highest-generation LCD display line has been built and put into production, ceramic aluminum new materials are widely used in major countries and important equipment, smart wearable device shipments rank first in the world, and industrial development is gradually driven by factors to innovation Drive transformation.

Coordinated development achieves historic progress.

The basic regional development layout of " One Circle and Five Districts "

Formation, the construction of the national new urbanization pilot province has been fully completed, the construction of county-level characteristic industrial clusters (bases) has been launched, and the

modern infrastructure system that supports coordinated regional development has been significantly improved. The Hefei metropolitan area has expanded its capacity and improved its quality. The development of the Hefei – Wu-Beng National Independent Innovation Demonstration Zone has continued to deepen. The planning goals of the industrial transfer demonstration zone in the Wanjiang urban belt have been fully realized. The construction of the industrial transfer cluster in northern Anhui has been approved. The Dabie Mountain Revolutionary Old Area in western Anhui, The construction of the Wannan International Cultural Tourism Demonstration Zone has been steadily advanced. The urbanization rate of the permanent population has increased to 56.9% , and about 7 million agricultural migrant workers have settled in cities and towns. The rural revitalization strategy has been steadily advanced, and 8,290 provincial-level beautiful rural central villages have been built . A number of landmark infrastructure projects have been accelerated. The Shang-Hangzhou High-speed Railway, the Second Bridge of the Wuhu Yangtze River Highway, the Wuhu Xuanzhou Airport, and the Zhundong to Wannan ± 1100 kV UHV DC transmission project have been successfully completed.

The total operating mileage of the high-speed railway is 2,329 kilometers, ranking first in the country, realizing the "high-speed rail linking cities to cities"; the "five vertical and nine horizontal" highway network has been accelerated, and rural roads have been newly built and renovated.

127,000 kilometers; a large water transport channel running through the Yangtze and Huaihe Rivers and directly connecting to the Yangtze River Delta has been initially realized; the transportation airport has formed a "one hub and five branches" development pattern; the long-cherished wish of the century to divert the Yangtze River to the Huaihe River has been implemented, and the backbone flood control engineering system of the Huaihe River and the Yangtze River has further Perfect, water conservancy support

Support capabilities have been significantly improved; the construction of an “integrated and networked ” modern energy system has been accelerated .

Green development has achieved historic progress. The phased goals of the pollution prevention and control battle are on track

The ecological environment quality has been greatly improved, the proportion of days with good air quality has reached the best level in history since monitoring records were kept, and the water quality of the Yangtze River Basin has reached the best level since the national assessment . $PM_{2.5}$ in the province The average concentration dropped by 25% , the ratio of days with good air quality was 82.9% , black and stinky urban water bodies were basically eliminated, and the forest coverage rate was 30.22% . The graded management and control of the "1515" coastline along the river has been implemented in an orderly manner, and the construction of the Yangtze River (Anhui) Economic Belt with clear water, green banks, and beautiful industries has been further advanced, becoming a vivid practice of joint efforts to protect and avoid large-scale development. The

construction of the Huaihe (Anhui) Ecological Economic Zone, the Chaohu Lake Ecological Demonstration Zone, the Xin'an River - Qiandao Lake Ecological Compensation Experimental Zone, and the Hefei Luogang Ecological Park have been fully promoted, and the country's first forest chief reform demonstration zone has been successfully created. The river (lake) length The system is gradually improved. The energy supply structure has been greatly optimized, renewable energy has achieved leapfrog development, and the proportion of non-fossil energy consumption has reached 8.4% , an increase from 2015 4.2 percentage points . The province' s ecological environment satisfaction rate exceeded 90% for the first time.

Open development has achieved historic progress. The whole province is included in the integrated development of the Yangtze River Delta Within the scope of national strategy implementation, the China (Anhui) Free Trade Pilot Zone was approved for construction, the level of the open platform has jumped significantly, and its status in the national open development pattern has been significantly improved. The Anhui Action Plan, an outline of the

Yangtze River Delta Integrated Development Plan, has been formulated and implemented. Exchanges and cooperation in key areas have been fully carried out. The collaborative promotion mechanism has been continuously improved. Major cooperation projects such as the Yangtze River Delta Science and Technology Innovation Community have been successfully promoted. The construction of five "block links" has achieved substantial results . Effectiveness. The implementation of the strategy for the rise of the central region continues to deepen. Participate in the " Belt and Road Initiative"

Route " has achieved remarkable results, and Hefei's China-Europe freight train shipment volume ranks first in the country. Successfully held three World Manufacturing Conferences, 2019 In 2016, General Secretary Xi Jinping sent a congratulatory letter, and Hefei became the permanent venue. The influence of major economic and trade events such as the China International Anhui Business Conference and the World Display Industry Conference continues to increase. Added 4 new national-level development zones homes, total Up to 23 Home.

Shared development achieves historic progress.

The goals and tasks of poverty alleviation in the new era have been completed as scheduled, the per capita income level of rural permanent residents has jumped to the middle and upper reaches of the country, and the level of basic public services in education, health , culture and other fields has been rapidly improved. 484 All 10,000 registered poor people have been lifted out of poverty, and 3,000 All poverty-stricken villages were listed, 3 1 All poverty-stricken counties were removed , 8.5 The task of relocation and

resettlement of 10,000 registered poor people has been fully completed, and the drinking water safety problem of the poor has been comprehensively solved. People's livelihood projects have been vigorously promoted, and people's livelihood expenditures account for more than 80 % of the province's fiscal expenditures . Resident income has grown faster than economic growth, with the per capita disposable income of urban and rural permanent residents growing at an average annual rate of 7.9 % and 9 % respectively . New urban jobs 3 42.9 Thousands of people. The landscape of basic education has undergone structural changes. The gross enrollment rate of preschool education has increased to 90 % , and the basic balance of compulsory education in counties has been advanced by 3 years. Achieve full coverage by 2020 , and make important progress in the construction of " double first-class " higher education . Major strategic results have been achieved in the prevention and control of the COVID-19 epidemic . First-level response to major public health events was launched early across the country, and work, production, and schools were resumed in the shortest possible time. The basic medical and public health service system has been

further improved, the close-knit county medical community has achieved full coverage, the drug safety situation is stable and improving, and the people's health level has continued to improve. Complete affordable housing project 1 56.44 10,000 units, renovating dilapidated rural houses 47.37 Thousands of households. The basic medical insurance and critical illness insurance for urban and rural residents have been unified, and the basic medical insurance and basic pension insurance have been unified.

The insurance has achieved full coverage, and the average rural subsistence allowance standard has increased from 3,261 to 3,261 Yuan / year increased to 7670 Yuan / year. National security has been comprehensively strengthened, and the special campaign against gangs and evil has been carried out in depth, with 9 consecutive In 2016, it entered the ranks of the national leaders in safety construction, and the overall social situation remained harmonious and stable. culture

The cause and cultural industry have prospered and developed, and the total number of national civilized cities selected at the prefecture level has reached 12 , ranking second in the country 1,491 selected good people in China People, ranking first in the country Bit.

Comprehensively deepen reforms to achieve historic progress. The " decentralization, regulation and service " reform has formed Anhui characteristics . Reforms in many key areas and key links have been carried out first, and a number of reform brands have emerged that are well-known across the country. The " Four Deliveries and One Service " special campaign is carried out on a regular basis, the " Anhui Affairs Office " government affairs platform operates

efficiently, the Anhui model of the list of powers and responsibilities is replicated and promoted nationwide, the provincial administrative power matters remain the fewest in the country, and the "four best" business environment is accelerated. The private economy has accelerated its development, with the total volume exceeding 2 trillion yuan, accounting for more than 60% of the regional GDP . There are actually 587.8 market entities of various types in the province. 10,000 households, an increase of 113% . Systematically promoted comprehensive innovation and reform experiments with fruitful results, including the establishment of a turnover pool system , etc. 13 The reform experience was promoted across the country. The financial service system continues to improve, and the number of domestic first-time listed companies ranks 9th in the country. No. 1 in Central China position, an enterprise listed on the provincial regional equity market

Up to 7320 Home, ranked first in the country Bit. A regional and comprehensive public resources trading platform has been basically established. The reform of state-owned assets and state-owned enterprises continues to deepen, and Conch Group and Tongling Nonferrous

Metals have become among the top 500 companies in the world . Strong, Maanshan Iron and Steel Group and China Baowu have achieved strategic reorganization, and the integration of port and shipping resources has achieved integrated and rapid development. New breakthroughs have been made in the reform of key areas such as agriculture and rural areas, medicine and health, and ecological compensation, and the modernization of governance systems and governance capabilities has been accelerated.

The construction of democracy and the rule of law has achieved historic progress. The National People's Congress and its Standing Committee take the lead in legislation

The role has been fully demonstrated, and legislation has been used to consolidate and improve major practical exploration results, taking the lead in the country.

First, regulations to promote the agglomeration and development of strategic emerging industries will be introduced. The People's Political Consultative Conference (CPPCC) has given full play to its role as a specialized consultative body, holding monthly special consultation meetings on a regular basis to further improve its level of advising on government affairs and building consensus. The patriotic united front has consolidated and developed, and mass organizations such as trade unions, the Communist Youth League, and the Women's Federation have effectively played their role as bridges and links. Anhui has made new progress in the construction of rule of law. Reforms in the field of rule of law have been further advanced. Laws and regulations have become more complete. Rule of law implementation has become more efficient. Rule of law supervision has become more stringent. Rule of law guarantees have become more powerful. The transformation of government functions has further accelerated. The level of scientific and democratic decision-making in accordance with the law has continued to improve .

Comprehensively and strictly govern the party to achieve historic progress. "Don't forget your original intention and keep your mission in mind "

To consolidate and deepen the educational achievements on the topic , since the 10th Provincial Party Committee, we have successively carried out the study and discussion of " talking about alignment and seeing action " and " talking about politics, paying attention to rules and setting an example ", " paying attention to loyalty, strict discipline, and establishing political ethics " and " three cases " A series of warning education, the organizational strength of grassroots party organizations has been continuously improved, the construction of cadre teams has been solidly advanced, intra-party political supervision talks have been innovatively carried out, central inspections, central special inspections and inspection " look back " feedback issues have all been rectified, and inspections and inspections have been linked up and down. The construction of the supervision network has been accelerated , formalistic bureaucracy has been solidly rectified, the party's work style and clean government have achieved remarkable results, the construction of systems and mechanisms that dare not,

cannot, and do not want to be corrupt has been promoted, and a good political ecology of clean and upright conduct and entrepreneurship has been continuously improved.

The achievement of these achievements is the result of the scientific guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, the result of the strong leadership of the Party Central Committee with Comrade Xi Jinping as the core, and the result of the transformation and implementation of the spirit of General Secretary Xi Jinping's important speech during his inspection of Anhui. It is the result of the hard work of the vast number of party members, cadres and the masses across the province, and has laid a solid foundation for starting a new stage of building a modern and beautiful Anhui.

**Column 1 Completion status of main indicators of the
“Thirteenth Five-Year Plan”**

serial number	indicator	Planning objectives		Realization		
		2020 Year	Average annual growth (%)	2020 Year	Average annual growth (%)	
1. Economic development

Note 1 : Overall labor productivity is based on 2015 Annual price calculation.

Note 2 : Data marked with * are for 2019 .

Note 3 : [] represents 5 Cumulative annual changes.

Note 4 : The data used is the proportion of the output value of strategic emerging industries to the output value of industrial enterprises above designated size.

Chapter two Entering a new stage of development to accelerate the construction of a modern and beautiful Anhui

Currently, the world is undergoing major changes unseen in a century. The global pandemic of the COVID-19 epidemic has accelerated this major change. The international environment has become increasingly complex, unstable and uncertain factors have increased significantly, the world has entered a period of turbulent change, and economic globalization has encountered countercurrents . , unilateralism, protectionism, and hegemonism pose threats to world peace and development , strategic games between major powers have become normal, and geopolitical risks have increased significantly. The development of digitalization, networking, and intelligence has profoundly changed the comparative advantages and development trends between countries, and competition around the commanding heights of science and technology and industry has been unprecedentedly fierce. The global energy supply and demand landscape has undergone profound changes, and the game

surrounding energy supply, strategic channels, and energy markets has become more complex. Ecological and environmental protection has become a consensus among mankind, and green transformation is imminent. Facing more headwinds and headwinds in the external environment, we must be prepared to deal with a series of new risks and challenges.

" 14th Five-Year Plan " **period** is the first five years that after our country has built a moderately prosperous society in all respects and achieved the first centenary goal, it will take advantage of the situation to embark on a new journey of comprehensively building a modern socialist country and march towards the second centenary goal. As our country shifts to a stage of high-quality development, Anhui's development is facing new opportunities in many aspects. Facing new opportunities to serve the country in building a new development pattern, the country is accelerating the construction of a new development pattern with the domestic cycle as the main body and the domestic and international dual cycles promoting each other. This is conducive to giving full play to Anhui's regional transportation, market

hinterland, human resources, and ecological environment advantages, and seizes the opportunity. It occupies a huge domestic market space and forms a strong demand driving force to promote economic development. Facing the new opportunities of the concentrated release of major strategic overlay effects, the country vigorously promotes the integrated development of the Yangtze River Delta , the joint construction of the "One Belt and One Road " , the development of the Yangtze River Economic Belt, promote central

The accelerated rise of the region is conducive to giving full play to Anhui's dual advantages and improving its development position in a new round of regional restructuring; facing new opportunities for the in-depth development of a new round of scientific and technological revolution and industrial transformation, cutting-edge leading technologies and disruptive technological innovations are Shaping a new economic form is conducive to giving full play to the "key variable" role of Anhui's rich scientific and educational resources and concentration of major innovation platforms, and seizing new commanding heights in scientific and technological competition; facing new opportunities in the adjustment and reconstruction of global industrial and supply chains , global production The network relies more on supply chain bases and large-scale consumer market centers, which is conducive to Anhui's multi-level industrial transfer platform to attract domestic and foreign capital and emerging industry layout, expand effective investment in the transformation and upgrading of traditional advantageous industries, and accelerate the

construction of a modern industrial system; facing the system The advantages and governance effectiveness continue to show new opportunities. With the comprehensive deepening of reform and the deepening of institutional opening-up , Anhui will rely on major reform and opening-up platforms such as free trade pilot zones to accelerate the elimination of deep-seated institutional barriers and better utilize effective markets. and the " two hands " role of the government to better utilize the two resources of the domestic and international markets.

At the same time, we must be soberly aware that the problem of unbalanced and inadequate development in Anhui is still prominent, the reform tasks in key areas and key links are still arduous, the efficiency of transformation of scientific and technological achievements and the level of the " four bases " of industry do not meet the requirements of high-quality development, and the agricultural foundation is not yet solid. , the urban-rural regional development gap and income distribution gap are large, the overall competitiveness of central cities and urban agglomerations is not strong, the county economy and

the private economy are not fully developed, there is a long way to go for ecological and environmental protection, there are many shortcomings in people's livelihood security, and there is still a lot of social governance Weaknesses.

Overall, Anhui's development is still in a period of important strategic opportunities, but there are new developments and changes in opportunities and challenges. We must keep two overall situations in mind and have a deep understanding of new developments

The new direction and new opportunities brought by this stage, a deep understanding of the new characteristics and new requirements brought about by changes in the main contradictions in society, a deep understanding of the new contradictions and new challenges brought about by the complex international environment, a clear understanding of the country's greatness, and an enhanced awareness of opportunities and risks. , establish bottom-line thinking, maintain strategic focus, run Anhui's affairs well, understand and grasp the laws of development, accurately recognize changes, respond scientifically, actively seek changes, and be good at cultivating opportunities in crises and opening new games in changes.

third chapter guiding ideology

Hold high the great banner of socialism with Chinese characteristics, thoroughly implement the spirit of the 19th National Congress of the Communist Party of China and the Second, Third, Fourth and Fifth Plenary Sessions of the 19th Central Committee, and adhere to the important principles of Marxism-Leninism,

Mao Zedong Thought, Deng Xiaoping Theory and the "Three Represents" Guided by Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, we must conscientiously implement the spirit of General Secretary Xi Jinping's important speech during his inspection of Anhui, fully implement the Party's basic theory, basic line, and basic strategy, and coordinate the advancement of economic construction, The overall layout of political construction, cultural construction, social construction, and ecological civilization construction, and the strategic layout of coordinating and promoting the comprehensive construction of a modern socialist country, comprehensively deepening reforms, comprehensively governing the country according to law, and comprehensively and strictly governing the party, scientifically grasp the new development stage, and resolutely implement New development concepts, serving the construction of a new development pattern, adhering to the general tone of the work of seeking progress while maintaining stability, taking promoting high-quality development as the theme, taking deepening supply-side structural reform as the main line, and

taking reform and innovation as the fundamental driving force to meet the people's growing needs The fundamental purpose of a better life is to coordinate development and security, continue to implement the five major development actions, solidly promote the integrated development process of the Yangtze River Delta, and accelerate the creation of an important and influential city.

It is a source of scientific and technological innovation, a gathering place for emerging industries, a new highland for reform and opening up, and a comprehensive green transformation zone for economic and social development. It accelerates the construction of a modern economic system, promotes the modernization of the governance system and governance capabilities, and achieves long-term economic stability and social stability and harmony. In building a domestic Achieve greater achievements in the new development pattern in which the big cycle is the main body and domestic and international dual cycles promote each other, make new and greater progress in accelerating the construction of a better Anhui, and make a good start for Anhui's socialist modernization.

To implement the above guiding ideology, the following principles must be followed:

——**Uphold the party' s overall leadership.** Uphold and improve the system and mechanism of the party's leadership in economic and social development, uphold and improve the socialist system with Chinese characteristics, continuously improve the ability and

level of implementing new development concepts and building a new development pattern, and provide a fundamental guarantee for the construction of a modern and beautiful Anhui in the new stage.

——**Adhere to the people-centered approach.** Adhere to the dominant position of the people, adhere to the direction of common prosperity, always achieve development for the people, rely on the people for development, and share the fruits of development by the people, safeguard the fundamental interests of the people, stimulate the enthusiasm, initiative, and creativity of all people, promote social equity, and enhance people's livelihood and well-being. Continuously realize the people's yearning for a better life.

——**Adhere to the new development concept.** Insert the new development concept throughout the entire process and all fields of building a modern and beautiful Anhui in the new stage, serve the whole country to build a new development pattern, effectively transform the development mode, promote quality change, efficiency change, and power change, and achieve higher quality, more efficiency, and more fairness , more

sustainable and safer development.

——**Adhere to the core position of innovation.** Put the basis of development on innovation, accelerate the promotion of comprehensive innovation with scientific and technological innovation and industrial innovation as the core, and integrate the first priority,

The first resource and the first driving force, deepen the construction of innovative provinces, shape leading development that is more driven by innovation and give full play to first-mover advantages, and stand at the forefront of the national innovative development pattern.

——**Adhere to deepening reform and opening up.**

Vigorously carry forward the Xiaogang spirit and unswervingly promote

Carry out reforms and expand opening up, proactively serve and integrate into major national regional strategies, strengthen the modernization of governance systems and governance capabilities, remove institutional and institutional obstacles that restrict high-quality development and high-quality life, and strengthen efforts to improve the efficiency of resource allocation and mobilize the whole society. We have taken proactive major reform and opening up measures to continuously enhance development momentum and vitality.

——**Adhere to the system concept.** Strengthen forward-looking thinking, overall planning, and strategy

We will make a comprehensive layout and promote overall

development, coordinate both the domestic and international situations, handle the two major issues of development and security, adhere to the national chess game and the integration of the Yangtze River Delta, focus on consolidating the foundation, promoting advantages, making up for shortcomings, strengths and weaknesses, and focusing on preventing and resolving major issues. Risk challenges and achieve the unity of development quality, structure, scale, speed, efficiency and security.

Chapter Four main target

to 2035 The long-term goal of socialist modernization will be basically achieved by the year. In accordance with the two-stage strategic arrangement made by the 19th National Congress of the Communist Party of China to achieve the second centenary goal, and in accordance with the decision-making and deployment of "one construction and three synchronization" of the 6th Plenary Session of the 10th Provincial Party Committee, looking forward to 2035 In 2018, our province's economic strength, scientific and technological strength, and comprehensive strength reached a new

level.

The total economic volume and per capita income of urban and rural residents are compared with those in 2020 More than doubled every year, regional GDP per capita reached the national average, 8 The per capita GDP of each central city city reaches

To the average level of the Yangtze River Delta, key core technologies have achieved major breakthroughs and entered the innovative At the forefront of the province; basically realizing new industrialization, informatization, urbanization, and agricultural modernization Transform the "new four modernizations " and build a modern economic system; modernize the governance system and governance capabilities We have achieved new improvements in socialization, and the people' s rights to equal participation and equal development have been fully guaranteed. Anhui has basically established the rule of law, a government under the rule of law, and a society under the rule of law; the quality of its citizens and the social and cultural The level of civilization has reached a new height, and we have built a strong province with innovative culture, strong education, and strong talents. Province, strong sports province, healthy Anhui, cultural soft power has been significantly enhanced; comprehensive green transformation Set a new example, widely form a green production and lifestyle, and the ecological environment is basically good Transformation, the goal of building a

green Jianghuai beautiful homeland has been basically achieved; opening up to the outside world has formed a new pattern Bureau, with the efficient operation of the integrated development mechanism of Shanghai, Jiangsu and Zhejiang, infrastructure and public services Interconnectivity is fully realized, and the modern comprehensive transportation system and modern circulation system are basically Formation, new advantages in participating in international economic cooperation and competition have been significantly enhanced; coordinated development has been achieved New leaps have been made, the quality of urban development has been significantly improved, the urbanization rate of the permanent population has exceeded 70% , the gap between urban and rural regional development and the gap in residents' living standards has been significantly narrowed, and people' s basic livelihood has been improved. The level of living security is roughly the same as the average level in the Yangtze River Delta, and basic public services have achieved average levels. equalization, the middle-income group has expanded significantly; the construction of safe Anhui has reached a new level, and the construction of safe Anhui has

reached a new level. A social governance community in which everyone has responsibilities, fulfills his responsibilities, and is enjoyed by everyone; the people's beauty A good life has written a new chapter, and the all-round development of people and the common prosperity of the people of the province have achieved greater progress. significant substantial progress.

The main goals of our province' s economic and social development during the “ 14th Five-Year Plan ” period.

Anchored 2035 Years old

" two persistences " and achieving the " two greater " goals put forward by General Secretary Xi Jinping during his inspection of Anhui , and implement the "Recommendations" of the 12th Plenary Session of the 10th Provincial Party Committee,

We strive to create new advantages in scientific and technological innovation sources , create a new model for regional coordinated development, write a new chapter in comprehensive green transformation, build a new highland for high-level reform and opening up, and draw a new picture of the harmonious integration of mountains, rivers, people and cities, and firmly move towards a strong economy and people Anhui is entering a new stage of modernization, prosperity, and ecological beauty.

——**Economic strength has achieved a new and greater leap.** Significant improvement in quality and efficiency

On the basis of achieving sustained and healthy economic development, the growth potential is fully realized, high-quality development is at the forefront of the country, and the economic aggregate ranks first in the country, close to 6 trillion yuan, the gap between regional GDP per capita and the national level has been further narrowed, and significant progress has been made in the construction of a modern economic system. The economic structure is more optimized, the agricultural

foundation is more solid, the added value of the manufacturing industry accounts for about 30% of the regional GDP, the added value of the digital economy accounts for a significant increase in the proportion of the regional GDP, and more economies with important influence in the country have emerged. Strengthen cities and counties (districts and cities).

——**Construct a new development pattern and achieve new and greater achievements.** High-quality supply continues

expansion, income distribution becomes more fair and reasonable, a comprehensive three-dimensional transportation network is basically formed, the modern circulation system is increasingly improved, the scale of effective demand continues to expand, the industrial cycle, market cycle, and economic and social cycle become smoother, import and export, investment and trade, trade and industry The formation of coordinated development pattern is accelerated.

——**Scientific and technological innovation capabilities have been further enhanced.** Maintaining regional innovation capabilities

The nation's first phalanx strives to be the first.

Major innovation indicators such as the contribution

rate of scientific and technological progress, the intensity of R&D investment in the whole society, the number of high-tech enterprises, and the number of invention patents owned by 10,000 people have increased significantly. A number of forward-looking basic research and key core technologies have been realized . A major breakthrough, a talent-rich province has been basically established, the industrial base has been advanced, and the industrial chain has been modernized to a remarkable level.

improve.

——**The integrated development of the Yangtze River Delta has achieved new and greater progress.** Closely linked to the two keywords of integration and high quality, it is closely related to the ideas , systems and mechanisms, and policy environment of Shanghai, Jiangsu and Zhejiang .

etc., the integrated development level of the whole province and Shanghai, Jiangsu and Zhejiang has been significantly improved. The proportion of total economic output in the Yangtze River Delta has further increased , 8 **The per capita GDP of cities in each central district has basically reached the Yangtze River Delta average level, and the gap between the province's per capita GDP and the Yangtze River Delta average continues to narrow.**

——**Regional coordinated development achieves new and greater optimization.** "One circle and five districts " infrastructure
The level of integration of infrastructure, industrial systems, and public services has been improved, forming a rational division of labor and competitive development pattern. The Hefei metropolitan area's

contribution to the province's economic growth has further increased. The economic growth rate in northern Anhui is significantly higher than that of the entire province. The proportion of strategic emerging industries in the industrial transfer demonstration zone in the Anhui-Jiang urban belt has further increased in the province. Hefei and Wuhan have further increased their contribution to the province's economic growth. The R&D investment intensity of the Beng National Independent Innovation Demonstration Zone has further increased, the gap between the per capita income of urban and rural residents in the old revolutionary base of the Dabie Mountains in western Anhui and the provincial average has further narrowed, and the scale of the cultural tourism industry in the Southern Anhui International Cultural Tourism Demonstration Zone has further increased its proportion in the province.

——Reform and opening up have achieved new and greater breakthroughs. Socialist Market Economic System

The reform of the property rights system and the reform of the market-oriented allocation of factors have made

significant progress, and market entities have become more dynamic. A number of international open cooperation platforms, such as the China (Anhui) Pilot Free Trade Zone, have been established one after another. The total import and export volume has exceeded 100 billion US dollars, and a new higher-level open economic system has basically been formed.

——The level of social civilization has achieved new and greater improvements. socialist core values

The concept is deeply rooted in the hearts of the people, the people's ideological and moral quality, scientific and cultural quality, and physical and mental health quality have been significantly improved, the public cultural service system and cultural industry system have become more complete, the people's spiritual and cultural life has become increasingly enriched, and the construction of an innovative and culturally powerful province has taken greater steps.

——**The construction of ecological civilization has achieved new and greater progress.** Land space development and protection

The layout has been optimized, the green transformation of production and lifestyle has achieved remarkable results, the allocation of energy resources has been more reasonable, the utilization efficiency has been greatly improved, the total emission of major pollutants has continued to decrease, the atmosphere, water, soil, forest, and wetland environments have continued to improve, and the ecological security barrier has become stronger The urban and rural living environment has been significantly improved, and the ecological civilization

system has been further improved.

——**People's livelihood and well-being have achieved new and greater improvements.** Investment in people's livelihood continues to increase, Achieve more sufficient and higher-quality employment, residents' income growth is higher than economic growth, the proportion of middle-income groups exceeds 40%, the per capita disposable income of urban and rural residents basically reaches the national average, the implementation standards for urban and rural basic public services are further improved, and basic public services are The level of equalization has been significantly improved, the education level of the people in the province has been continuously improved, the multi-level social security system has been more complete, the health system has been improved, the results of poverty alleviation have been consolidated and expanded, the rural revitalization strategy has been comprehensively advanced, and the quality of people's lives has continued to improve.

——**Governance efficiency has achieved new and greater improvements.** Anhui under the rule of law, government under the rule of law, Positive progress has been made in building a society

governed by the rule of law, social fairness and justice have been further demonstrated, administrative efficiency and credibility have been significantly improved, social governance, especially grassroots governance, has been significantly improved, the construction of a safe Anhui has been continuously deepened, systems and mechanisms for preventing and resolving major risks have been continuously improved, and public emergencies have been continuously improved. Emergency response capabilities have been significantly enhanced, natural disaster prevention levels have been significantly improved, and overall development and security have become more effective.

Column 2 Main indicators of economic and social development during the “14th Five-Year Plan”

category	indicator	2020 Year (including estimated value)	2025 Year Target	Average annual growth (cumulative)	Propertie s
econ omic deve lopment	1.Regional GDP growth (%)	—	—	6.5 about	Anticipat ion
	2.Gross regional product per capita (yuan)	61000	90000	5.6 about	Anticipat ion
	3.Overall labor productivity growth (%)	—	—	> 6.5	Anticipat ion
	4.The proportion of manufacturing added value in regional GDP (%)	26.3	30 about	—	Anticipat ion
	5.Urbanization rate of permanent population (%)	56.9	>62	—	Anticipat ion
	6.Fixed asset investment growth (%)	5.1	—	7.5 about	Anticipat ion
	7.Total import and export volume (100 million U.S. dollars)	780.5	> 1000	> 5	Anticipat ion
	8.Total retail sales of consumer goods (100 million yuan)	18333.7	25000	7 about	Anticipat ion
Inno vati on driv en	9.Growth in R&D investment (%)	—	—	9 about	Anticipat ion
	10.The proportion of the output value of strategic emerging industries in the output value of industries above designated size (%)	40.3	43	—	Anticipat ion
	11.Number of high-value invention patents per 10,000 population (pieces)	4	Strive to reach the national average	—	Anticipat ion
	12.The added value of core industries of the digital economy accounts for the proportion of regional GDP (%)	5 about	Strive to reach the national average	—	Anticipat ion
	13.Number of high-tech enterprises (number)	8000	13000 about	—	Anticipat ion
14.Growth of per capita disposable income of residents (%)	6.4	—	7 about	Anticipat ion	

People's livelihood and welfare	15. Urban survey unemployment rate (%)	5.5 about	—	5.5 about	Anticipation
	16. Average years of education for the working-age population (years)	10.4	Reach the national average	—	Binding
	17. Number of practicing (assistant) physicians per 1,000 permanent residents (person)	2.44	3.2	—	Anticipation
	18. Number of participants in basic pension insurance (10,000 people)	4764	4900	—	Anticipation
	19. 3 per 1,000 permanent residents Number of nurseries for infants and young children under the age of 1 (number)	0.9	4.6	—	Anticipation
	20. Average life expectancy (years)	77.5	—	[1.3]	Anticipation
green ecology	21. Reduction in energy consumption per unit of regional GDP (%)	Work hard to achieve national goals	—	State issued	Binding
	22. Reduction in carbon dioxide emissions per unit of regional GDP (%)	Complete national goals	—	State issued	Binding
	23. Ratio of days with excellent air quality in cities at prefecture level and above (%)	82.9	State issued	—	Binding
	24. The proportion of surface water reaching or better than Class III water bodies (%)	87.7	State issued	—	Binding
	25. Forest coverage rate (%)	30.22	not lower than 31	—	Binding

category	indicator	2020 Year (including estimated value)	2025 Year Target	Average annual growth (cumulati ve)	Propertie s
Secu rity	26. Comprehensive grain production capacity (10,000 tons)	4019.2	Stable at 4000 above	—	Binding
—	27. Comprehensive energy production capacity (10,000 tons of standard coal)	9000 above	9400 about	—	Binding

Note 1 : The growth rates of regional GDP, per capita GDP, and total labor productivity are all calculated at constant prices, and the absolute value of per capita GDP is calculated at current prices; fixed asset investment, total import and export, and retail sales of consumer goods The total amount, R&D investment, the growth rate of per capita disposable income of residents, as well as the absolute value of total import and export, and total retail sales of consumer goods are all calculated at current prices. Note 2 : [] represents the cumulative change in 5 years.

Part 2 Resolutely play the first move in innovation Create an influential source of scientific and technological innovation

Adhere to the core position of innovation in the overall modernization drive, adhere to the "four orientations", regard scientific and technological self-reliance and self-reliance as the strategic support for Anhui's leap-forward development, and thoroughly implement the strategy of revitalizing Anhui through science and education, the strategy of strengthening the province with talents, and the strategy of innovation-driven development, so as to With the national laboratory as the core, Hefei Comprehensive National Science Center as the cornerstone, Hefei Binhu Science City as the carrier, Hewu Beng National Independent Innovation Demonstration Zone as the extension, and the comprehensive innovation reform experimental province construction as the network, we will accelerate the creation of "The

upgraded version of the " Five Ones " innovation main platform and the " One Room, One Center " sub-platform systematically builds a system of scientific and technological innovation to tackle key problems , build a strong science and technology province, and innovate Anhui.

chapter Five Strengthen national strategic scientific and technological strength

Based in China and looking at the world, we will build a national laboratory and a comprehensive national science center in Hefei, produce major original scientific and technological achievements, and create an international and regional scientific and technological innovation center with important influence.

Promote the construction of national laboratories at a high level. Implement special promotion for national laboratory construction

Carry out actions to innovate the management system and scientific research organization mechanism, establish a national laboratory service guarantee mechanism, plan to build a global high-end exchange platform for

quantum scientific research papers and scientific and technological information, enhance the systematic ability of scientific and technological innovation, and lay a solid foundation for improving the country's basic scientific and technological capabilities and building a

Build strategic scientific and technological strength and serve as a pioneer. Focusing on national strategic goals, based on our province's advantageous areas, relying on relevant scientific research institutions, we plan to create new national laboratories and actively participate in the construction of other national laboratories.

Build a comprehensive national science center in Hefei with global influence. speed up construction

Establish research institutes for energy, artificial intelligence, big health, environment, and future technology, and plan to build a cutting-edge technology collaborative innovation center to create a main position for scientific and technological breakthroughs, a new highland for the transformation of achievements, and a power source for industrial innovation. A number of cutting-edge cross-research platforms will be built around brain science, integrated circuits, network and data research, high-end measuring instruments, superconducting applications, new materials and other fields. Plan and build a number of large scientific facilities from a high starting point, promote the

clustered and coordinated development of major scientific and technological infrastructure, and create a national multidisciplinary innovation and development support platform. Give full play to the role of the Hefei synchrotron radiation light source, fully superconducting tokamak, and steady-state strong magnetic field experimental equipment to continue to produce major scientific and technological achievements. Carry out key technology research and preliminary construction work for the China Fusion Engineering Experimental Reactor. Deeply involved in the construction of major international scientific projects such as the International Thermonuclear Fusion Experimental Reactor. Give full play to the brand advantages of Hefei Comprehensive National Science Center and build a multi-level innovation system. Support cities to make full use of the various innovation platforms of the Hefei Comprehensive National Science Center to carry out scientific and technological research and undertake the transformation and implementation of major scientific and technological achievements.

专栏3 合肥综合性国家科学中心重大工程

大科学装置集群。加快建设聚变堆主机关键系统综合研究设施、未来网络试验设施（合肥分中心）、高精度地基授时系统（合肥一级核心站）、雷电防护与试验研究重大试验设施，积极争取合肥先进光源、大

Projects such as the atmospheric environment simulation system, the air-ground integrated quantum precision measurement experiment, and the strong optical and magnetic integration experimental facilities have been implemented. In accordance with the national unified planning and deployment, combined with the actual local innovation and development, a number of major scientific and technological infrastructures have been planned and laid out to form a multi-disciplinary frontier that supports Research facility cluster. Planning and construction of the G60 high-speed maglev channel Hefei - Wuhu test project.

Energy Research Institute. Focus on the development of magnetic confinement fusion energy and the development of green and clean renewable energy,

In the fields of storage, transmission and distribution of secondary energy, efficient and clean utilization of fossil energy, etc., the "1+4" research center will be laid out to create a national-level energy research platform.

Artificial Intelligence Research Institute. Focus on brain cognition, brain-like intelligence, computational intelligence, chips and systems,

In the fields of science and technology ethics and other directions, we will lay out the construction of "one hospital and multiple centers", strive to create a national artificial intelligence research platform, and build an artificial intelligence innovation highland with international influence.

Big Health Research Institute. Focus on major national battles

such as life sciences, population health, and disease prevention and control

In response to strategic needs, the "8+1+N" research platform has been deployed to form a national-level innovation platform covering the entire chain of integrated development including scientific discovery, technology research and development, clinical trials, and demonstration applications.

Environmental Research Institute. With environmental science, environmental monitoring and management technology, advanced environmental technology products

Taking the industry as the main line, we will realize the multi-faceted integrated development of the whole chain of " cognition of environmental issues - environmental technology research and development - environmental industry development " .

Cutting-edge cross-research platform. Build the Chinese Academy of Sciences' scientific and educational base for cutting-edge medical science and computational intelligence Infrastructure , newly built high-speed magnetic levitation and superconducting technology innovation center, high-end measuring instrument cross-research center, China Brain Project Hefei Center, Ceramic Aluminum New Materials Research Institute, etc. 50 A cross-cutting research platform for left and right frontiers .

Strengthen basic research and applied basic research.

Implementing the National Basic Research Ten-Year Plan

Action plan, formulate and implement Anhui action plan. Support the University of Science and Technology of China to take the lead in joining forces with powerful universities and colleges, relying on the " Hefei Science Island " and supporting the national laboratories and the Hefei Comprehensive National Science Center to strengthen mathematics, physics, chemistry and

We will build basic disciplines such as science, life sciences, and materials science, and establish a national basic discipline research center. Seize the opportunity of optimizing and reorganizing national key laboratories, integrate the provincial universities, institutions, enterprises and other superior forces to create more " national brand " innovation platforms. Focus on quantum science, magnetic confinement nuclear fusion science, brain science and brain-like science, life science, biological breeding, aerospace technology, materials science and other fields, and strive to achieve a number of " from 0 to 1" major original achievements. Increase investment in basic research, build a diversified investment mechanism for basic research and applied basic research, and increase the proportion of basic research funding to R&D funding to about 8% .

Chapter Six Fight the battle against key core technologies

Focus on the key areas where the industry is stuck ,gather forces from all aspects, implement a number of forward -looking and strategic major science and

technology projects, strive to break through a number of key core technologies, and improve the overall efficiency of the innovation chain.

Clarify the direction of key core technologies. Focus on artificial intelligence, quantum information, In key areas such as integrated circuits, biomedicine, new materials, high-end instruments, and new energy, we will target "stuck" and "broken" products and technologies, as well as industrial "four bases" bottleneck constraints, and expand and upgrade the technological innovation "top-down" plan. Implement plans for major provincial science and technology projects, major innovation project research, products that make up for shortcomings in key areas, and key technology research. Relying on major scientific and technological infrastructure, we will promote the transformation and engineering of derivative technologies such as superconducting, plasma propulsion, high-field nuclear magnetism, advanced lasers, and electromagnetic protection, enhance the spillover effect of major scientific and technological infrastructure construction, and lead the development of industrial innovation.

Strengthen the construction of platforms for key core technologies. Create a "one room, one center" upgrade

version, strengthen stable operation, capacity expansion and upgrades, and increase the supply of key common technologies, cutting-edge leading technologies, and disruptive technologies. Establish the Provincial Industrial Technology Innovation Research Institute to integrate the province's "multi-point and multi-source" innovation resources, strengthen technological innovation and achievement transformation, and promote the establishment of the province's scientific and technological breakthrough source, industrial technology transformation site and technology development strategic think tank. Build a number of provincial industrial innovation centers to support industry leading enterprises or universities and colleges to integrate upstream and downstream resources in the innovation chain to create a comprehensive service platform for disruptive technological innovation, application of key common technologies, R&D and supply of technical solutions, and enterprise investment and incubation. Actively create a national industrial innovation center, a national technology innovation center, and a national manufacturing innovation center.

Support development zones at or above the provincial level to layout and build a number of key core technology research platforms around leading and characteristic industries.

Innovate key core technology attack mechanisms.

Relying on national strategic scientific and technological strength and industry

It will serve as an industrial innovation platform and create a " test field " for a new national system to tackle key core technologies under the conditions of the socialist market economy . Improve the organization and management mechanism for technical research, adopt methods such as " directional entrustment ", " unveiling the list ", " competition horse racing " and " military orders " to select leaders and vanguard teams, and implement the technical chief responsibility system. Encourage enterprises to participate in major national or provincial science and technology projects and promote close cooperation among scientists, engineers, and entrepreneurs. Explore and establish a funding mechanism for disruptive technology discovery to form more " peak technologies " . Comprehensive use of various policies and measures such as R&D incentives

and subsidies , government procurement, technology finance, etc., to jointly support the development of the first sets of major technical equipment, the first batch of new materials, and the first version of software applications.

专栏4 科技重大专项

集成电路。重点开展先进工艺芯片制造技术、新型集成电路芯片、

Optical communication chips and high-end chip design technology, integrated circuit core equipment, new **MEMS** devices,

EDA Software and other research and development, and construction of system-level packaging platforms.

AI. Focus on basic theoretical research, research and development of intelligent human-computer interaction technology integrating multi-modal big data , key technologies of intelligent speech and natural language processing, and computing based on deep learning.

Research on new methods of computer vision. Layout **6G** Iterative development and research on terahertz components.

Newdisplay. Focus on developing large-size ultra-high-definition liquid crystal displays, micro-display devices, and flexible **AMOLED**

Panels, glass substrates, flexible glass covers, polarizers, organic light-emitting materials, optical films, masks, targets and other key materials and core products, exposure machines, ion implantation, evaporation sources, chemical vapor deposition, development , engraving Etching, laser annealing, laser lift-off and other key equipment, as well as the research and development of core chips and touch modules .

new material. Support high-performance metals for electronic information, new energy, and high-end equipment fields

Research on advanced structural materials such as new materials, organic and inorganic semiconductors, third-generation semiconductors, liquid crystals, organic light-emitting and electronic-grade chemical materials; focus on the development of ceramic aluminum, aluminum-magnesium alloys and high-performance composite materials, high-performance rare earth magnetic

materials, and new generation High-temperature superconducting materials, new silicon-based, carbon-based aerogels and other cutting-edge new materials; support the research and development of environmentally friendly and degradable bio-based new functional fibers and films.

new energy. Focus on the research and development of controllable nuclear fusion, hydrogen production, hydrogen storage and transportation, small molecule catalysis, Clean utilization of coal, smart power grid, distributed energy and other technologies. Accelerate breakthroughs in technology bottlenecks such as wind, solar, water and storage complementarity and advanced fuel cells. Improve the intelligence level of infrastructure networks such as advanced coal-fired power generation, nuclear energy, and unconventional oil and gas exploration and development.

New energy vehicles and intelligent connected vehicles. Develop high specific energy power batteries, hydrogen fuel cells, Solid-state batteries, high-power-density motor drive systems, millimeter-wave radar and lidar technologies, multi-sensor fusion systems, intelligent Internet of Vehicles and new energy vehicle lightweight technologies, L3/L4 smart driving vehicles and other products.

Smart manufacturing and robotics. Focus on developing high-end CNC machine tools and other intelligent manufacturing equipment, high-performance High-performance industrial robots, service robots, special robots, network collaborative manufacturing systems and

platforms, remote monitoring and operation maintenance, fault diagnosis technology, digital twin technology and systems, aviation complete machines

R&D and manufacturing of equipment and R&D of key technologies.

biomedicine. Focus on developing innovative drugs for major diseases such as anti-tumor and anti-infection.

Research and development of antibodies and vaccines for major infectious diseases such as pneumonia, new influenza, hepatitis, and tuberculosis. For major diseases, carry out the development of traditional Chinese medicine compounds, Chinese medicine components or single new drugs with the advantages of traditional Chinese medicine, and carry out high-end medical equipment and smart medical and telemedicine commonality Key technology research and development.

Public safety. Focus on efficient identification and confirmation of typical hazards in food, Risk identification, monitoring and early warning, safety prevention and control and emergency response of production accidents and coupled disasters; monitoring and early warning, risk prevention and emergency rescue of natural disasters such as earthquakes and floods; research and development of key technologies and related equipment for social security monitoring, early warning and comprehensive guarantee.

ecosystem. Focus on developing rapid and accurate monitoring equipment and equipment for atmosphere, water, soil and solid waste .

Traceability technology, industrial waste gas multi-pollutant collaborative control technology and equipment, safe treatment and resource utilization of high-concentration wastewater and solid waste, typical contaminated sites and contaminated soil

remediation technology and equipment, typical river basins such as the Yangtze River, Huaihe River, Xin'an River and Chaohu Lake Research and development and integrated demonstration of key technologies for comprehensive management .

biological seed industry. Focus on the selection and breeding of high-quality, stress-resistant and high-yielding grain crops, characteristic agricultural and forestry economics Economic crop variety selection, demonstration of cultivation techniques for improving variety quality and efficiency, and research and development of key technologies such as the selection and breeding of high-quality livestock and poultry, green vegetables, aquatic product varieties, and special economic animal varieties.

Modern agricultural machinery. Focus on precision agriculture, smart agricultural equipment, new crop plant protection equipment, Duplex multi-functional field operation equipment, variable fertilization and pesticide application intelligent machinery adapted to complex farmland environments, agricultural and forestry biomass green conversion and utilization equipment, agricultural and forestry waste or by-product comprehensive utilization equipment, suitable for facility horticulture crop production, healthy breeding and precision production Research and development of efficient and environmentally friendly facilities and equipment.

Chapter VII Improve corporate technological innovation capabilities

Improve the market-oriented mechanism for technological innovation and promote the integration of various innovation elements into enterprises

gather, encourage and guide enterprises to increase investment in research and development, and establish a technological innovation system that is enterprise-centered, market-oriented, and combines industry, academia, and research.

Strengthen the dominant position of enterprises in innovation. Vigorously promote the entrepreneurial spirit and make better use of it

The role of entrepreneurs is to protect the rights and interests of entrepreneurs in accordance with the law. The cultivation of entrepreneurial teams and the implementation of major innovation strategies will be planned and promoted simultaneously, and a sound mechanism for entrepreneurs to participate in enterprise-related innovation planning, standards and policy formulation will be established and improved. Support leading enterprises to take the lead in uniting upstream and downstream industry, industry, academia and research forces to form task-oriented innovation consortiums, innovation alliances, and R&D institutions to undertake major national and provincial science and technology projects. Vigorously promote the

construction of industrial common technology innovation platforms and R&D public service platforms, and further increase the coverage of innovation platforms for industrial enterprises above designated size . Implement preferential tax policies for enterprises to invest in basic research and applied technology development. Support central enterprises to continue to expand investment in Anhui, layout and build various innovation platforms, strengthen the connection with provincial and municipal science and technology plans, and implement key core technology and major scientific and technological achievement transformation projects. Support cities with good foundations to implement high-tech enterprise doubling plans.

Support the innovative development of small, medium and micro science and technology enterprises.

Implementing “100 Enterprises Leading ” and “1000 Enterprises Competing”

Development ” and other enterprise gradient cultivation programs to form a group of “ gazelle ” and “ unicorn ” enterprises. The scientific and technological achievements formed with the support of qualified financial funds will be licensed to small, medium and micro science and technology enterprises for use.

Improve large scientific equipment, scientific research instruments, Science and technology information openness system. Give full play to the role of the Provincial Specialty and New Development Fund, improve the cultivation and incubation function of the Science and Technology Innovation Board of the Provincial Equity Custody and Trading Center, and innovate science and technology credit products and services. Provide small and medium-sized enterprises in market access, approval and bidding, etc. Micro-tech enterprises create a level playing field .

chapter eight Accelerate the transformation of scientific and technological achievements

"first mile" and "last mile" problems in the transformation of scientific and technological achievements, and a six-in-one scientific and technological achievement transformation mechanism of "funding for government, industry, academia and research" will be established to accelerate the transformation of innovation advantages into industrial advantages.

Strengthen demand-oriented supply of scientific and technological achievements. Reform the establishment and organization of science and technology projects. The implementation method promotes enterprises and other technology demand parties to deeply participate in the entire process of project establishment, process management, acceptance evaluation, etc. of applied basic research and key core technology research, so as to produce high-value scientific and technological achievements suitable for transformation. Support universities and institutions to jointly implement innovative enterprises to jointly implement a number of

engineering research and development projects with major scientific and technological achievements.

Strengthen the construction of carriers for the transformation of scientific and technological achievements.

Relying on Anhui Innovation Center to build provinces, cities and counties

A province-wide unified science and technology market with three-level linkage and online and offline interaction . Improve the scientific and technological achievements transformation function of new R&D institutions and strengthen the construction of pilot bases for the transformation of scientific and technological achievements. Efforts will be made to develop a group of professional science and technology intermediary service agencies and cultivate a group of high-quality, comprehensive technical managers. Establish a high-level, comprehensive provincial scientific and technological achievements transformation and promotion center, and support qualified regions to build specialized scientific and technological achievements transformation and promotion centers. Support the creation of a national demonstration zone for the transfer and transformation of scientific and technological achievements in Wuhan.

Innovative scientific and technological achievements transformation support methods.

Focusing on the transformation of scientific and technological achievements in key areas,

Explore industry access mechanisms for new technologies, new products, and new models, take the lead in piloting application scenario demonstration projects in qualified areas and fields, and promote the widespread application of scientific and technological achievements in production and life. Improve the "four-integration model" of scientific and technological achievements transformation of "innovation achievements + park + fund + 'triple one innovation' ". Improve technology application demonstration projects and government procurement

Combining mechanisms to promote the development and large-scale application of innovative products. Establish a financial alliance system to support enterprise innovation, encourage banking financial institutions to set up science and technology branches, improve provincial science and technology credit risk compensation mechanisms, and guide provincial seed investment funds, venture capital funds, and scientific and technological achievements transformation guidance funds to focus on supporting the transformation of scientific and technological achievements.

Chapter nine Stimulate talent's innovation vitality

Deepen the reform of the talent development system and mechanism, formulate and implement JAC talent policies for the new stage, cultivate, introduce and make good use of talents in an all-round way, and accelerate the formation of a large-scale, innovative talent team that is innovative and dares to take risks.

Increase efforts to cultivate high-level talents.

Highlight the orientation of "high-quality, high-precision and sharp-edged shortages" and intensify

the war

Strengthen the training of scientific and technological talents, leading scientific and technological talents, and young scientific and technological talents. Support qualified universities to develop into high-level research universities and strengthen the training of basic research talents. Support the development of new joint training bases and innovate postgraduate training models. Increase efforts to cultivate local talents overseas and create a high-level talent team with an international perspective. Strengthen the training of innovative, applied and skilled talents, implement knowledge updating projects and skill improvement actions, strengthen the team of highly skilled talents, and cultivate a large number of "JAC Outstanding Craftsmen". Promote the combination of work and study and school-enterprise cooperation to train skilled workers. Make overall plans to build teams of party and government talents, business management talents, financial talents, rural practical talents, and social work talents. By 2025, the province's professional and technical talents will reach 540 Thousands of people, including more than 100,000 people with

senior professional titles 50 Ten thousand people; skilled talents reached 700 Thousands of people,

210 are highly skilled talents Thousands of people .

Improve the level of talent recruitment. Formulate and implement a new round of " JAC Talent Plan " to

We will strive to achieve advanced standards, improve the talent introduction working mechanism, and make greater efforts to introduce all types of talents to innovate and start businesses in Anhui. Introduce top talents on a " one-case-by-case " basis , build a discovery and promotion system for attracting talents , and gather a group of academicians and scientists. Give play to the guiding role of government investment and support enterprises, universities, scientific research institutes, social organizations, individuals, etc. to introduce talents through flexible introduction, project introduction, special funding introduction, etc. Research and formulate inclusive policies for the introduction of enterprise skilled talents, and establish a mechanism to attract and retain front-line engineers and high-quality young people . Implement the " Ten Thousands of Postdoctoral Fellows Gathering in Jianghuai " action plan and support enterprises in setting up academician workstations, postdoctoral research workstations and innovation practice bases by 2025 Year, The number of postdoctoral research mobile workstations in

the province reached 800. _

Motivate talents to perform better. Promote the reform of the talent evaluation mechanism, establish an evaluation mechanism that is consistent with the growth patterns and actual characteristics of different talents, and form a scientific and technological talent evaluation system oriented by innovation ability, quality, effectiveness, and contribution. Deepen the reform of the right to use, dispose, and benefit rights of scientific and technological achievements, carry out pilot projects to grant ownership or long-term use rights to scientific and technological achievements to scientific researchers , and improve systems such as the establishment of turnover pools, chief scientists, and equity option incentives. Explore the establishment of a talent management reform pilot zone and fully give talents the autonomy to " introduce, educate, retain and put them into effective use ". Break down the institutional barriers to talent flow and encourage the orderly and reasonable two-way flow of talents from universities , institutions and enterprises.

Optimize innovation, entrepreneurship and create

ecology. Focus on the industrial chain and innovation chain, build a talent chain and promote the integration of industry, innovation and talent . Strengthen the construction of talent innovation and entrepreneurship carriers, create a number of " mass entrepreneurship and innovation " demonstration bases, and form a " maker space + incubator + accelerator " technology entrepreneurship incubation chain. Establish a talent innovation and entrepreneurship fund, and implement innovation and entrepreneurship support plans for high-level scientific and technological talent teams and talents who have returned from studying abroad. Establish an Anhui talent database and talent services

Guarantee system, high-standard construction of a group of high-end talent centralized living service areas, support enterprises in building apartments for skilled talents, and provide convenience in aspects such as professional qualification recognition and recognition, children's education, and medical security. Strengthen the construction of academic style and adhere to academic integrity.

chapter Ten Improve the scientific and technological innovation system and mechanism

" two-wheel drive " of scientific and technological innovation and institutional mechanism innovation , deepen the comprehensive innovation reform experiment, expand innovation and open cooperation, and form a dynamic science and technology management system and operating mechanism.

We will further advance comprehensive innovation and reform experiments. In accordance with system integration, collaborative and efficient
In principle, we should work together with Shanghai, Jiangsu and Zhejiang to promote comprehensive innovation

reform experiments in the Yangtze River Delta region, strengthen joint research on key core technologies, improve the efficiency of transformation of scientific and technological achievements, promote the coordinated development of emerging industries, enhance the sharing and flow of innovation elements, and form a batch of innovations that highlight Anhui characteristics . Reform achievements and brands, and accelerate the construction of a long- term mechanism for integrated collaborative innovation in the Yangtze River Delta . Support the Hefei Comprehensive National Science Center to carry out reform pilots in scientific research management, achievement transformation, talent incentives, factor allocation, etc., and build an innovation ecosystem that conforms to the laws of innovation development, science and technology management, and talent growth.

Deepen the reform of the science and technology management system . Optimize and integrate

provincial science and technology innovation bases, promote

Actively implement the integrated allocation of projects, bases, talents and funds in key areas.

Improve the organization and management of scientific

and technological projects, improve the scientific and technological management mechanism based on trust, give leading innovative talents greater power to decide on technical routes and use funds, and pilot the "green channel" for scientific research management, the "contract system" for the use of scientific research funds, and the financial Notification of reimbursement liability and credit commitment system. Accelerate the reform of the classification of scientific research institutes and further expand the establishment management

innovation autonomy in management, personnel recruitment, professional title evaluation, performance incentives, etc. Improve incentive policies and mechanisms for colleges and universities to increase investment in scientific research. We will guide the entire society to increase investment in research and development, and improve the mechanism for government investment in basic and cutting-edge research and multi-channel investment from society. Promote the scientific spirit, strengthen science popularization work, and create a social atmosphere that advocates innovation. The proportion of citizens with scientific literacy in the province has stabilized above the national average.

Further expand innovation and open cooperation.

Actively introduce well-known universities and colleges at home and abroad

The college has set up branches in Anhui . Support universities, institutions and enterprises to actively participate in international major science plans and projects, lay out international scientific and technological cooperation networks, and establish

international R&D centers across borders. Optimize the development of a number of national-level international scientific and technological cooperation bases, and improve the layout of a number of provincial-level international scientific and technological cooperation bases. Strengthen scientific and technological innovation cooperation and exchanges with Beijing-Tianjin-Hebei, Guangdong-Hong Kong-Macao Greater Bay Area and other regions. Actively participate in the “ Belt and Road ” scientific and technological innovation action plan .

Chapter 11 Concentrate efforts to build Hefei Binhu Science City

Learn from the advanced concepts and construction models of world-renowned science cities, gather high-end innovation resources, optimize the comprehensive innovation environment, and actively create a national-level science city.

Create a core area with important influence as the source of scientific and technological innovation.

surround tightly

Accelerate the strategic goal of building an

influential source of scientific and technological innovation, rely on strategic scientific and technological forces such as national laboratories and Hefei Comprehensive National Science Center, adhere to high-level positioning, integrated innovation, open cooperation, ecological humanities, and promote science and technology, industry, talents and The organic coupling of space promotes systematic scientific and technological innovation, continues to produce fruitful forward-looking and original results, and cultivates more strategic and leading industries.

Enhance its influence and competitiveness in the global innovation system, and strive to build a world-class science city with concentrated scientific research elements, active innovation and entrepreneurship, beautiful ecological environment, and complete life services.

Comprehensively improve scientific and technological innovation support functions. Strengthen the ability to gather scientific and technological innovation resources and distribute

It will build major science and technology infrastructure clusters and a number of cutting-edge cross-research platforms, build high-level research universities, scientific research institutions and high-end technology industry consulting think tanks, and introduce and cultivate first-class talents and innovative teams. Strengthen the ability to transfer and transform scientific and technological innovation, vigorously develop technology transfer institutions and a team of technical managers, and build a service system for the maturation, incubation, and transformation of major scientific and technological achievements. Strengthen international exchanges and open innovation

capabilities, build a number of scientific and technological sharing exchanges and major achievement display carriers, and create a number of internationally renowned scientific brand activities and authoritative forums. Strengthen the service capabilities of a livable and workable city , and build a modern urban infrastructure system, a high-quality public service system , and a city-lake symbiotic ecological system.

Build an efficient spatial pattern with functional linkage.

Building with global impact

Quantum Center to create a quantum information industry development cluster. Build a Silicon Valley of USTC that links global innovation resources, and create an innovation and entrepreneurship highland with University of Science and Technology of China alumni as the main body and a gathering of world-class talents and young outstanding talents. Build the core area of the national laboratory and create the source of quantum information innovation achievements. Build a large scientific equipment concentration area and create a world-leading comprehensive scientific research base. Build a demonstration area for the transfer and transformation of scientific and

technological achievements and create an incubation base for emerging industries and future industries. Build an international science and technology exchange and cooperation zone and create an international science exchange center that serves the province and faces the world. Build Hefei Luogang Ecological Park to create an innovative space for green ecological humanities and wisdom. Build a home for innovative talents and create a group of high-quality international

community.

Column 5 Major Projects of Hefei Binhu Science City

Quantum Center. Based on the "Quantum Avenue " of the Hefei National High-tech Industrial Development Zone , we will gather global quantum technology and talent resources to build a platform integrating scientific research, technological research, and achievement transformation.

Integrate the quantum information industry innovation chain into one, and accelerate the construction of a quantum information industry development cluster. Fight until 2025 In 2016, a number of unicorn companies were cultivated, radiating and driving the development of the national quantum information industry.

HKUST Silicon Valley. Relying on the alumni resources of the University of Science and Technology of China to support the construction of alumni at home and abroad
The science and technology innovation base will introduce and retain more world-class talents and young outstanding talents, and gradually develop into a "science and technology innovation + industry " cluster with global influence .

National laboratory core area. Accelerate the construction of national laboratories and the University of Science and Technology of China' s high-tech
The park gathers world-class research and development

institutions, introduces and cultivates the world' s top

scientific research talents, implements a number of major scientific and technological projects, and creates the source of quantum information innovation achievements.

A large scientific equipment concentration area. Plan to build a university with " technology, safety, ecology, and internationalization "

The academic and installation concentration area is built around facility clusters and gathers innovative elements such as scientific research and development, achievement transformation, industrial incubation, scientific and technological services, and life services to create the most beautiful scientific research sanctuary in China.

Demonstration zone for the transfer and transformation of scientific and technological achievements. Give full play to the radiating and leading role of Anhui Innovation Museum and improve

Improve the achievement transformation capabilities of the Advanced Technology Research Institute of the University of Science and Technology of China, Hefei Institute of Technology Innovation Engineering of the Chinese Academy of Sciences, Intelligent Manufacturing Technology Research Institute of Hefei University of Technology, and Hefei Public Safety Research Institute of Tsinghua University to promote the aggregation, centralized trading, and efficient transformation of more scientific and technological achievements , to create a national hub and an important global node for the transaction and transformation of scientific and technological achievements.

International Science and Technology Exchange and Cooperation Zone. Strengthen Binhu International Science Exchange Center and International Convention and Exhibition Center

We will work together to organize world-class scientific events and world manufacturing conferences on a regular basis, focusing on science and technology sharing and exchanges, future network information exchange, and advanced manufacturing achievement display, to create an international science and technology event.

活动和权威论坛，打造集中展示安徽创新成果的窗口。

合肥骆岗生态公园。突出生态功能，打造蓝绿相间、水园共融的城市绿心、生态绿肺。突出“生态领航、人民园博”主题，打造“永远不落幕、永远有变化”的园博园。建设引领全省的科创 CBD 核心区，打造环境一流、业态高端的总部经济高地。

创新人才家园。加强城市规划设计，构建便捷、绿色、智能、安全的现代化基础设施体系，优质高效、保障多元、开放共享的公共服务体系。在创新要素集聚区域，建设一批科学家国际公寓、青年和外籍人才创新创业社区，形成以科创为特色，集工作、学习、休闲为一体的现代新型宜居宜业家园。

Part Three Accelerate the development of modern industrial systems and create an emerging industry gathering place with important influence

Adhere to the main direction of strengthening the real economy, vigorously implement the strategy of strengthening the province with manufacturing and quality, focus on the development and expansion of strategic emerging industries on the one hand, and the transformation and upgrading of traditional industries on the other, keep the proportion of manufacturing industry basically stable, and promote services To achieve high-quality development of the industry, we will lay a solid foundation for upgrading the industrial base and modernizing the industrial chain, and improve economic quality, efficiency and core competitiveness.

Chapter 12 Improve the stability and modernization level of industrial and supply chains

With the goal of being independent, controllable, safe and efficient, we will promote the reshaping of the industrial base, accelerate the transition of the industrial chain to the mid-to-high end, and comprehensively enhance its position in the national industrial chain, supply chain, and value chain.

Enhance industrial basic capabilities. Implement the foundation-strengthening project to support leading enterprises and universities

The institute has established an innovation consortium for industrial basic capabilities to systematically carry out core technology research and achieve breakthroughs in core basic components (components), key basic materials, advanced basic processes and software, and industrial technology foundations. Focusing on the supporting needs of major equipment and complete machines in key fields, we focus on the development of high-performance, high-reliability, long-life, and intelligent basic parts (components). Focusing on improving the ability to independently support key basic materials, focus on the development of high-performance new metal materials, new chemical materials, new inorganic non-metallic materials, advanced composite materials and new medical materials.

Focus on improving product quality

and production efficiency, focusing on the development of advanced manufacturing processes, green manufacturing processes, intelligent manufacturing processes and industrial manufacturing software. Focusing on common needs such as R&D and design, experimental verification, metrological testing, standard formulation, certification and accreditation, and intellectual property rights, support the province's major emerging industrial bases in building a number of basic public service platforms for industrial technology. Encourage and support enterprises to focus on "key small parts", accelerate the development of basic industrial technologies, and develop new products.

Optimize and improve the industrial chain and supply chain. Carry out actions to replenish and strengthen the industrial chain , chain strategic design and precise policy implementation by industry , and implement the industrial cluster leader system, the industrial chain supply chain leader system, and the industry alliance leader system. Based on the advantages of industrial characteristics, supporting advantages and first-mover advantages in some fields, we

will forge the long boards of industrial chain supply chains such as new displays, artificial intelligence, and industrial robots to create emerging industrial chains. Make up for the shortcomings of the industrial chain and supply chain in areas such as integrated circuits, major equipment, raw materials, and advanced integrated processes . Actively undertake the transfer layout of emerging industries at home and abroad, and implement a number of major projects in key links of the industrial chain . Optimize the resource allocation mechanism, strengthen collaboration and linkage, promote the diversification of sources of key equipment, parts and raw materials, and cultivate new models and new formats of shared manufacturing. Actively participate in international industrial security cooperation and collaboratively build safe and controllable industrial and supply chains .

Strengthen quality brand building. Carry out in-depth quality improvement actions to strengthen standards, Build systems and capabilities such as metrology and patents, improve quality infrastructure, and build quality improvement demonstration areas. Build the province' s highest metrology standards platform, as

well as a number of quality supervision and inspection centers and public service platforms for new energy vehicles, intelligent manufacturing, gas equipment safety, special equipment safety, and food safety. Strengthen the main responsibility of enterprises for quality, gradually upgrade the manufacturing standard system, and improve quality standards and mandatory safety standards. Establish

Improve product quality and safety assessment, risk monitoring, and classified supervision mechanisms. Carry out quality benchmarking and leading enterprise demonstration activities, support enterprises in participating in the construction of international standards, national standards, and industry standards, and promote comprehensive quality management. Implement the brand creation project, cultivate a number of independent brands with strong competitiveness, high added value and good reputation, declare a number of "Chinese time-honored brands", identify a number of "Anhui time-honored brands", and create a number of "Anhui new brands".

Chapter 13 Develop and expand strategic emerging industries

We will further advance the construction of "three majors and one innovation", promote the integration, clustering, and ecological development of strategic emerging industries, and build strategic advantages for the high-quality development of strategic emerging industries.

Build new pillars of the industrial system. Carry out high-quality development actions for ten emerging industries, the contribution of strategic emerging industries to the province's industrial development. Vigorously develop the ten emerging industries of new generation information technology, artificial intelligence, new materials, energy conservation and environmental protection, new energy vehicles and intelligent connected vehicles, high-end equipment manufacturing, smart home appliances, life and health, green food, and digital creativity . Improve the "special project - project - base - cluster " echelon promotion pattern of strategic emerging industries , establish a competition and elimination mechanism for major emerging industry bases in the province, and focus on cultivating new displays, integrated circuits, new energy vehicles and intelligent connected vehicles, artificial intelligence, smart 5 world-class strategic emerging industry clusters for home appliances , building advanced structural materials, new chemical materials , biomedicine, modern traditional Chinese medicine, robots, core basic components, high-end equipment manufacturing,

cloud computing, network and information security, etc. 30 to become major emerging industry bases with strong influence and competitiveness in the country , and strive to have more bases among them.

It is a national-level strategic emerging industry cluster.

Accelerate the cultivation of future industries. Implement the "3+N" future industry cultivation project and proactively deploy quantum technology, biomanufacturing, advanced nuclear energy and other industries. Give full play to the leading advantages in research and development of quantum computing, quantum communications, and quantum precision measurement, and support the accelerated growth of a number of "unicorn" companies in the quantum field. Accelerate the industrialization of new bio-based bionic materials, genetic engineering, regenerative medicine and other achievements, and promote the construction of key projects in bio-manufacturing fields such as polylactic acid, furan polyester, and bio-based nylon. Accelerate the engineering and industrialization of small mobile lead-based reactors and enhance the competitiveness of nuclear shielding materials and other related ancillary products. Cultivate a number of future industries in subdivided frontier fields such as distributed energy, brain-inspired science, and proton medical equipment.

专栏 6 十大新兴产业高质量发展行动

新一代信息技术产业。做强存储、驱动及射频、微机电系统等专用/通用芯片制造、封装测试、第三代半导体材料产业链，提升集成电路领域核心竞争力。积极布局微显示、量子点、全息、激光等显示技术，推动新型显示产业高质量发展。提升网络与信息安全技术保障水平，加快发展软件服务业。完善上游原材料和关键装备配套体系。

人工智能产业。布局类脑科学等前沿领域，加快突破自主无人系统、情感计算、智能计算芯片与系统等关键技术。建设基础前沿技术研发平台、开源和共性技术平台。拓展人工智能在农业、制造业、教育、医疗健康业、城市管理等领域应用的广度和深度。

新材料产业。实施铜基、铁基、铝基、镁基、硅基、生物基“六基”提升计划，重点发展先进基础材料、关键战略材料、前沿新材料三大新

materials field. Consolidate and enhance our advantageous positions in new ceramic-aluminum materials , new chemical materials, long products and high-quality special steel.

Energy saving and environmental protection industry. For environmental management of water, atmosphere, soil, heavy metals, urban waste, etc.

Address major needs and develop environmental protection technologies and equipment. Focus on the development and promotion of high-efficiency and energy-saving technologies and equipment in key areas such as industry, transportation, and construction. Accelerate the development of new energy industries such as solar photovoltaics, biomass energy, wind power, and energy storage, promote the research and development of key photovoltaic manufacturing technologies, and promote the application of high-efficiency and low-cost photovoltaic technologies . Vigorously develop new technologies such as source reduction, resource utilization, and remanufacturing, and improve the level of comprehensive utilization of resources and the level of remanufacturing industrialization.

New energy vehicles and intelligent connected vehicle industry.

In-depth implementation of new energy vehicles and intelligent network connection

The automobile innovation and development project focuses on the direction of " electrification, intelligence, and lightweight " and focuses on breakthroughs in vehicle integration, intelligent network connection, power batteries,

electric drive electronic control, hydrogen fuel cells and other products. Strengthen vehicle companies and cultivate and expand key component R&D, production and local supporting capabilities. Accelerate the construction of intelligent connected vehicle road network facilities and test pilot demonstration areas.

High-end equipment manufacturing industry. Develop major basic equipment and industries with independent intellectual property rights

Robots, new key basic components, advanced general equipment such as aerospace, shipbuilding and offshore engineering , as well as complete sets of technical equipment in the fields of agriculture, energy, mineral mining, rail transit, energy conservation and environmental protection, comprehensive utilization of resources, and large-scale engineering construction, and extend the development of high-end equipment product.

Smart home appliance industry. Drive the industry to improve quality and efficiency through quality brand upgrades, and promote traditional home appliances

Integrate deeply with the Internet, give full play to the role of intelligent platforms such as big data monitoring platform, APP remote control, and power loss supervision , and accelerate the digitalization and intelligent transformation and upgrading of the home appliance industry.

Life and health industry. Focus on the development of chemical pharmaceuticals, modern traditional Chinese medicine,

biopharmaceuticals, high-end medical
medical equipment and medical health services industry.
Accelerate the advancement of modern medical technology and
service innovation and clinical application such as
immunotherapy, regenerative medicine, and smart medicine.
Actively develop diagnostic and treatment technologies with
traditional Chinese medicine characteristics. Provide high-
level, high-quality products and services to continuously meet
the multi-level and diverse health needs of the people.

绿色食品产业。适应消费和营养健康需求，加速信息、生物、纳米、新材料技术与传统加工制造技术的融合，提高农产品精深加工和副产物综合利用比例。强化物联网技术实时动态产品追溯能力、全产业链的质量管控能力建设。

数字创意产业。推进数字技术应用，发挥数字技术对内容创作、产品研发、模式创新的深度渗透和核心支撑作用。促进游戏动漫产业健康发展。探索工业设计服务企业新模式。推动数字创意与生产制造、文化教育、旅游会展、生活健康等领域融合渗透。

Column 7 Strategic Emerging Industry Cluster Construction Project

Cultivate world-class clusters. Benchmark global benchmarks, support new display leading companies to accelerate the research and development of mass production technologies such as ultra-high definition and flexible panels, enhance independent innovation capabilities and localization levels in the high-end display field, improve the collaborative innovation system of the industrial chain, and further enhance the internationalization of new display industry clusters Competitiveness. Make leading companies such as Changxin and Jinghe bigger and stronger, rapidly increase the scale and level of integrated circuit manufacturing, actively participate in the construction of platforms such as the National Integrated Circuit Manufacturing Innovation Center, and create an efficient and collaborative integrated circuit industry cluster. Support

leading companies such as JAC, Chery, NIO, and Geely in accelerating their strategic layout in the fields of new energy vehicles and intelligent connected vehicles, strengthen the construction of key supporting capabilities such as power batteries and motors, and accelerate the cultivation of world-class new energy vehicles and intelligent connected vehicles. Automobile industry cluster. Adhere to the "three-in-one" promotion of R&D, product application and industry cultivation, and rely on clusters such as "China Voice Valley" and intelligent voice base to create a world-class artificial intelligence industry cluster. Relying on Hefei, Wuhu, Chuzhou, Ma'anshan and other places, we will further enhance our province's basic manufacturing capabilities and intelligence level in the field of smart home appliances, and enhance the global influence of the smart home appliance industry cluster.

Strive to create a national-level cluster. High-level planning and construction of major emerging industry bases in the province to create a national

An important strategic emerging industry cluster. Focusing on Hefei's new energy vehicles, biomedicine and high-end medical

疗器械、创意文化、网络与信息安全，淮北陶铝新材料和铝基高端金属材料、先进高分子结构材料，亳州现代中药，宿州云计算，蚌埠硅基新材料，阜阳现代医药，淮南大数据，滁州智能家电，六安高端装备基础零部件，马鞍山高端数控机床、先进轨道交通装备，芜湖机器人、新能源汽车、现代农业机械、通用航空，宣城核心基础零部件，铜陵铜基新材料，池州半导体，安庆化工新材料，黄山文化旅游等省重大新兴产业基地，以龙头企业为引领，以集聚发展为路径，进一步增强高质量发展支撑力，加快形成激励约束机制，全面提升产业基础能力和产业链现代化水平。

Chapter 14 Accelerate the transformation and upgrading of manufacturing industry

Adhere to manufacturing-based, enterprise-oriented, innovation-driven, digital empowerment, quality leadership, and integration and progress, enhance the adaptability of manufacturing supply to domestic and international demand, and accelerate the pace of high-quality development of manufacturing.

Promote the transformation, development, optimization and upgrading of the manufacturing industry. Implement new manufacturing projects and add Fast manufacturing industry is transforming into intelligent manufacturing, green manufacturing, high-quality manufacturing and service-oriented manufacturing.

Use technologies such as big data, cloud computing, Internet of Things, and artificial intelligence to promote the digitalization, networking, and intelligence of traditional industries such as coal, steel, nonferrous metals, chemicals, building materials, home appliances, automobiles and parts, textiles and clothing, medicine, and food. Carry out a new round of special actions for large-scale technological transformation, actions to improve energy conservation and environmental protection, and actions to improve design capabilities. Vigorously promote prefabricated buildings and create a modern construction industry cluster. Comprehensive use of market competition elimination, corporate mergers and reorganizations, production capacity reduction and replacement, etc. to resolve excess production capacity and improve the efficiency of traditional industrial resource utilization.

Consolidate the basic supporting position of the manufacturing industry. Implement the “One Ten, Hundred, Thousand ” project to make it bigger and bigger

Strengthen a number of large-scale industries such as new generation information technology, home appliances, automobiles, steel, nonferrous metals, chemicals, and medicine. Improve the systems and mechanisms that encourage and support large key enterprises to expand their scale and enhance their strength, cultivate a group of industry peak enterprises, accelerate the transformation and upgrading of small, medium and micro enterprises , improve the level of professional division of labor and collaboration, and comprehensively enhance the core competitiveness of enterprises . by 2025 Years, cultivated to form 1 A trillion-level industry, 10 A major industry worth over RMB 100 billion , 100 About 1,000 " group owners " and " chain leaders " companies There are about two " little giants " and " champion " companies specializing in new technologies .

Smart manufacturing. Promote the integrated innovation and engineering application of new generation information technology, key equipment, and core industrial software , and achieve breakthroughs in a number of high-end equipment and software. Establish an intelligent manufacturing standard system and train

Cultivate a public service platform for intelligent manufacturing and carry out the popularization of digital manufacturing, networked manufacturing demonstration and intelligent manufacturing exploration. Implement smart manufacturing pilot demonstration projects and promote the application of industrial robots 40,000

1,000 digital workshops and smart factories above Taiwan , and create a number of provincial smart manufacturing demonstration

zones.

Green manufacturing. Comply with the requirements of carbon peaking and carbon neutrality , and carry out in-depth the " Five Hundreds " of energy conservation and environmental protection

Special action to grow 100 Energy-saving and environmentally friendly production enterprises, recommended to 100 An advanced energy-saving and environmentally friendly technology

Technology, promotion 100 A variety of energy-saving and environmentally friendly equipment products, implemented 100 key energy conservation and environmental protection projects, training

Cultivate 100 energy-saving and environmental protection service companies. Build a " four-in-one " green manufacturing system of green factories, green designed products, green parks, and green

supply chains . Promote energy-saving technological transformation in metallurgy, chemical industry, building materials, food and other industries.

Quality manufacturing. Improve the supply capacity of high-quality manufacturing standards and cultivate “Anhui Industrial Quality” every year

品”100 个以上。实施新一轮技术改造、工业强基等工程，加快提高产品质量技术水平，每年认定省级新产品 500 项以上。持续开展“精品安徽”宣传活动，提升企业品牌影响力和美誉度。

服务型制造。引导和支持企业提升需求感知能力和客户服务能力，建立健全基于制造和产品的专用服务系统。培育一批国家级和省级工业设计中心、服务型制造示范企业和平台，鼓励制造业企业逐步突破生产和服务、企业和社会的组织边界，发展平台经济。鼓励企业由提供设备、产品向提供系统解决方案、总承包服务方向转变。

Chapter 15 Promote high-quality development of the service industry

Deepen the supply-side structural reform of the service industry, vigorously promote innovative development, integrated development, and clustered development, continuously improve service efficiency and service quality, and actively build a new service industry system with high quality, efficiency, optimized layout, and strong competitiveness.

Promote the extension of producer services to specialization and the high end of the value chain.

supported by

Guided by the transformation and upgrading of the manufacturing industry , we will accelerate the in-depth

integration of the modern service industry with advanced manufacturing and modern agriculture. We will solidly advance the pilot program for the in-depth integration of the country's advanced manufacturing industry and modern service industry, cultivate and build a number of provincial pilot enterprises and demonstration parks, and continuously improve the overall quality and competitiveness of the producer service industry. Steadily expand the opening of the financial industry to the outside world, actively and steadily promote innovation in financial products and service models, and develop a modern financial service industry that is efficient, safe, green and inclusive, open and innovative. Vigorously develop services such as research and development, industrial design, technology transfer and transformation, entrepreneurial incubation, and scientific and technological consulting, build an entrepreneurial innovation service system covering the entire chain of technological innovation, and the entire cycle of product production, and run the province's industry well

Industrial design competition. Further enhance the level of socialization and professionalization of logistics, promote the coordinated development of the logistics industry, manufacturing, and commerce, and build a modern logistics service system that is efficient, convenient, smooth, green, and safe. Support the development of engineering design, consulting and evaluation, legal, accounting and auditing, credit intermediary, inspection and testing certification, exhibition and other business services to improve the level of professionalism. Promote the coordinated development of e-commerce, tourism, automobiles, agriculture, etc. , and accelerate the development of e-commerce platforms such as tourism cloud merchants, automobile O2O, and specialty agricultural products e-commerce . Guide various professional markets to use new generation information technology to optimize supply chain management and create a number of commodity distribution centers and procurement centers with regional influence and nationwide exposure. Implement the high-quality development project of the human resources service

industry in the new era and encourage the development of human resources recruitment, human resources outsourcing and management consulting, and senior talent search and other industries.

Promote the upgrading of the lifestyle service industry to high quality and diversity. adapt to lifestyle and changes in consumption concepts, strengthen the supply of public welfare and basic service industries, continue to improve service experience, and comprehensively improve service quality and consumer satisfaction. Promote the integrated development and innovative development of cultural tourism, and promote the intensification of cultural tourism resource development, product diversification, and high-quality services. Vigorously develop medical rehabilitation, health management, psychological consultation, traditional Chinese medicine health care and other services, and promote the development of sports tourism, sports media, sports exhibitions, sports brokerage, etc. Comprehensively liberalize the elderly care and child care service market and establish a multi-level, standardized, professional and chain-based elderly care and child care service network.

Accelerate the establishment of a housekeeping property service system with sufficient supply, convenient services, standardized management, and benefit both urban and rural areas, encourage the branding and chain development of qualified enterprises, and promote the improvement and expansion of housekeeping services.

Vigorously cultivate new business formats and models in the service industry. Grasp digitalization, networking, and intelligence

We will adapt to the development trend of energy, accelerate the in-depth integration of digital technology and the service industry, and give birth to new business formats and new models . Promote the accelerated development of new business formats such as smart logistics, service outsourcing, integrated medical and nursing care, telemedicine, and distance education, and guide the orderly development of new models such as the platform economy, sharing economy, and experience economy. Actively promote service standardization and brand building, improve the service quality management system, and create a well-known Anhui service brand. We will continue to deepen the pilot comprehensive reform of the service industry and promote the opening up of the service industry to a larger scope, wider areas, and deeper levels.

Improve the level of agglomeration development of the service industry. Implement the service industry agglomeration development and improvement project, Focusing on the producer service industry and focusing on the development needs of local leading industries and strategic emerging industries , an additional 200 people will be

added . Home about provincial service industry clusters and 50 Demonstration areas are gathered around every home . Support the service industry agglomeration area to build a number of key common technology platforms for the service field, guide active exploration in the opening of the service industry, scene creation, element guarantee, statistical monitoring and agglomeration area management system, etc., and cultivate a group of nationally influential enterprises Service industry cluster brand.

专栏9 “融会观通”服务业重点工程

现代金融。鼓励发展科技金融、绿色金融，推动金融机构数字化转型，积极稳妥推进金融产品和服务模式创新。实施合肥滨湖金融小镇、蚌埠长安保险总部基地等项目。

会展经济。推动展览、交易、会议、节庆等融合发展，探索“会展+优势产业”“会展+文化旅游”等新发展模式。支持合肥、芜湖、蚌埠、安庆、黄山等市打造国际会展之都。

文旅观光。推动旅游服务向观光、休闲、度假并重转变，打造一批文化旅游重点项目。实施合柴 1972 文创园、新安江百里大画廊、滁州江淮分水岭国家风景道、芜湖荆山文旅城、马鞍山长江东岸文旅开发、大运河文化带通济渠（濉溪段）、蚌埠“湖上升明月”古民居博览园、大别山主峰度假区等项目。

商贸流通。引导流通企业加强供应链创新与应用，推动物流业降本增效提质，促进物流业与制造、商贸协同联动和跨界融合。实施芜湖（京东）航空货运枢纽港、黄淮海（宿州）智慧物流产业园、合肥派河国际综合物流园、阜阳北铁路物流基地、蚌埠智慧物流小镇等项目。

Chapter 4 Implementing the strategy of expanding domestic demand and demonstrating Anhui's responsibility in serving the country and building a new development pattern

We must adhere to the strategic fulcrum of expanding domestic demand, establish an effective system for expanding domestic demand, accelerate integration into the construction of a complete domestic demand system, promote the organic integration of supply-side structural reform and demand-side management, and give full play to the basic role of consumption in economic development and the role of investment in optimizing the supply structure. It plays a key role in leading and creating new demand with high-quality supply, forming a higher-level dynamic balance in which demand drives supply and supply creates demand.

Chapter 16 Create an important node in the domestic cycle

Adhere to the idea of a game of chess, give full play to the vast advantages of connecting the east and the west, and the hinterland, connect all links of production, distribution, circulation, and consumption, and actively serve the smooth domestic circulation.

Create nodes that support high-quality supply. Deepen supply-side structural reform and continue to promote "three reductions, one reduction and one supplement", thoroughly implement the "three products" strategy of increasing varieties, improving quality, and creating brands, optimizing the supply structure, improving supply quality, improving the adaptability and resilience of the supply system, and forming higher efficiency and better High-quality input-output relationship. We are committed to solving various "stuck" and pain point problems, promoting coordination among agriculture, manufacturing, service industry, energy resources and other industrial categories, and better integrating into the national industrial cycle. Guide enterprises to capture new demands, establish flexible production and flexible production conversion mechanisms, and expand the supply

of flexible, intelligent, sophisticated, personalized and high-quality products. Focus on links with high external dependence and high added value, cultivate a group of high-quality enterprises that are deeply involved in the subdivisions of the industrial chain to carry out import

substitute. Support enterprises to carry out quality classification, advocate high quality and low price, and improve product reliability, comfort and scalability.

Create nodes that support efficient circulation. Greater efforts will be made to promote transportation infrastructure,

The construction of logistics hubs, distribution centers, storage warehouses, and cold chain bases will transform and upgrade a number of traditional circulation industries. Break down institutional barriers that hinder the market-based allocation of production factors and the circulation of goods and services, open up blockages and breakpoints in the cross-regional circulation of goods and services, expand the depth of circulation space, promote the effective connection between upstream and downstream, production, supply and marketing, and reduce transaction costs in all fields and links.

Create nodes that support high-standard markets. Build a multi-level and diversified regional market, Promote the commodity market, production factor market, and general service market to connect with the strong

domestic market, develop simultaneously, and deeply integrate. Promote the coordinated development of terminal consumer goods and upstream raw material markets in the commodity market, and promote the fully coordinated development of urban and rural markets in the province. Improve the policy system for expanding domestic demand and establish a policy coordination mechanism based on promoting competition. Promote the balanced development of finance, real estate and the real economy, and improve the financial environment that is compatible with the domestic cycle.

Chapter 17 Establishing domestic and international dual circulation strategic links

Give full play to comparative advantages, coordinate the use of resources from both domestic and international markets, and actively promote the coordinated development of domestic demand and external demand, imports and exports, and the introduction of foreign investment and foreign investment .

Create links between domestic and international markets. Improve export quality and promote goods. Improve the quality and efficiency of trade, enhance the value of processing trade, and develop innovative

services trade to promote

Processing trade extends to both ends of the industrial chain, vigorously develops service outsourcing, and supports industries such as cultural tourism, Anhui cuisine, and traditional Chinese medicine to explore international markets. Efforts will be made to optimize the import structure, increase the import of high-tech, equipment and productive services, and expand the import of high-quality consumer goods and daily services. We will increase support for financing, patent applications, and trademark registrations for enterprises that export to domestic sales, implement the project of "same line, same standard, same quality" for domestic and foreign sales products, and promote domestic and foreign trade, as well as online and offline integration and mutual promotion.

Create links between domestic and international

resources. Relying on the domestic cycle to attract domestic

foreign resource elements, implement trade and investment integration projects, promote more high-quality enterprises to "go global", encourage enterprises to innovate overseas investment methods, and

optimize resource allocation through direct investment, securities investment, joint investment and other methods. We will adhere to equal emphasis on existing and incremental foreign investment and support the in-depth development of foreign-funded enterprises. Strengthen international logistics services such as customs clearance, freight forwarding, and warehousing, and establish an international logistics network system that matches the needs of international investment and trade.

Chapter 18 Comprehensively expand consumer demand

Comply with the trend of consumption upgrading, enhance traditional consumption, cultivate new consumption, appropriately increase public consumption, improve consumption levels, and promote the development of green, healthy and safe consumption .

Promote the upgrading of physical consumption. Create a multi-level consumption space and platform carrier, Meet residents' various consumption needs such as convenient and diverse food, clothing and clothing. Support Hefei's bid to build an international consumption center city, encourage qualified cities to build regional consumption centers, and build a number

of characteristic consumption cities. Support the construction of national model pedestrian streets, transform and upgrade a number of high-quality pedestrian streets, and build 60 A provincial-level characteristic commercial demonstration street. Promote traditional business

The innovative transformation of the complex promotes the construction and prosperity of smart business districts. Optimize community convenience service facilities, vigorously develop community businesses such as convenience stores and community vegetable stores, build community life comprehensive service centers, promote the clustered development of community life services, and create a "15 Minutes " convenient service circle. Break down the institutional barriers that restrict the expansion and upgrading of consumption, and orderly cancel some administrative restrictions on consumption and purchase regulations. Promote the optimization and upgrading of automobile consumption, cultivate a characteristic automobile consumer market, and promote the transformation of automobile consumption from purchase management to usage management. Accelerate the standardized development of the housing rental market, especially the long-term rental market, and reduce the tax burden on rental housing. Promote the application of smart products and promote the consumption of mid-to-high-end cutting-edge information products .

Promote the improvement and expansion of service consumption. Create a new platform for service

consumption and create a number of

A national-level pilot (demonstration) city for culture, tourism, and sports consumption, cultivate and develop a demonstration area for the integrated development of the cultural tourism industry, and build a number of new cultural tourism commercial consumption clusters. Promote the consumption of excellent cultural products and high-quality cultural services. Carry out activities to create regional tourism demonstration areas and promote the integrated development of rural tourism and leisure agriculture. Actively expand sports formats and promote the formation of a sports consumer market with rich connotations. Support and encourage online platforms and various cultural and sports venues, and college sports venues to be open to the public free of charge or at a discount. Supports special consumption such as self-driving cars, recreational vehicles, and general aviation. Efforts will be made to relax market access in the field of service consumption, support social forces in providing multi-level and diversified medical and health services, and promote

consumption of healthy elderly care and housekeeping. Develop educational service products such as study tours, practical camps, and special courses, and support the establishment of non-academic vocational education and training institutions. Strictly implement the paid leave system and expand holiday consumption .

Promote the upgrading of rural consumption.

Encourage and guide rural residents to increase transportation access

Information, culture, entertainment, automobiles and other consumption. Support the expansion of new consumption formats and models into rural markets, promote the extension of e-commerce coverage to rural areas, strengthen the construction of agricultural and commercial agricultural product supply chains, promote the integration of offline industry development platforms and online e-commerce trading platforms, and smooth two-way linked sales between urban and rural areas. channel. Promote qualified towns and villages to organically combine trade logistics with leisure agriculture, rural tourism, product processing, etc. We will improve the modern rural circulation network system and carry out special actions for efficient postal and express delivery in urban and rural areas. Continue to implement consumption assistance.

Optimize a safe and secure consumption environment.

Establish a post-consumer evaluation system for products and services,

Implement a seven-day no-reason return and exchange system for online purchases, and encourage large supermarkets to carry out offline no-reason return

commitments. We will continue to carry out special law enforcement actions against unfair competition in key areas and strengthen credit construction in the consumer sector. Jointly build a soft platform for consumer satisfaction in the Yangtze River Delta, carry out activities to create safe and satisfied consumption, improve consumer awareness and rights protection capabilities, combat counterfeiting and false advertising, give full play to the role of social organizations such as consumer associations, and improve 12315 Internet platform functions to strengthen the protection of consumer rights and interests. Encourage the establishment of duty-free shops and departure tax refund shops in the city to improve the tourism and shopping environment in Anhui. Formulate and implement systematic plans to promote consumption, strengthen domestic and foreign trade, cross-sector, and all-scenario linkage, and launch the "Come to Wanli" brand to promote consumption.

专栏 10 消费新业态新模式培育壮大工程

数字生活新消费。完善“互联网+”消费生态体系，创新无接触消费模式，加快培育在线办公、数字生活、智能配送等新业态，拓宽智能看护、智能物流、智能家居、智能安防等人工智能应用领域，推行智慧出行、

Digital services such as 3D teaching and facial recognition for medical treatment. Develop social e-commerce, live broadcast e-commerce and " home consumption " models such as " fresh food e-commerce + cold chain home delivery " and " central kitchen + cold chain delivery of food ingredients " . Promote online open courses, Internet diagnosis and treatment and other services. Promote the development of the " unmanned economy " , promote the operation of intelligent connected cars, and explore new retail such as smart supermarkets.

Integrated development of online and offline consumption.

Support physical businesses to develop online businesses and promote the Internet Platform companies are expanding offline. Encourage the construction of " smart stores ", " smart neighborhoods " and " smart business districts " to promote online and offline interaction, business, tourism, cultural and sports collaboration, and fitness tourism integration. Encourage the construction of a number of new consumer experience centers that integrate online and offline.

New business format of sharing economy. Encourage the sharing of experimental verification environments and public cloud resources to promote production Equipment, agricultural machinery, construction machinery and other production tools are shared. Carry out the sharing and utilization of idle resources such as machinery and equipment, workshops and buildings.

Night consumption. Improve and transform nighttime

consumption carriers, build high-quality night markets and nighttime consumption clusters

District, by 2025 year, each city will build at least 2 More than one high-quality nighttime consumption block and quality night market , as well as several community-based nighttime consumption nodes for residents, have formed a number of night market brands with national influence. Expand night consumption such as night shopping, night tours, night entertainment, night classes, and night fitness.

Chapter 19 Accurately expand effective investment

Maintain reasonable investment growth, continuously optimize the investment structure, comprehensively improve the accuracy and effectiveness of investment, use high-quality investment to gather innovation momentum and promote high-quality development.

Expand investment space. Focusing on major strategic deployments, key areas and weak links, Accelerate the filling of shortcomings in infrastructure, municipal engineering, agriculture and rural areas, public security, ecological environmental protection, public health, material reserves, disaster prevention and reduction, people's livelihood security and other fields, promote enterprise equipment updates and

technological transformation, and expand strategic emerging industries invest. Promote the construction of new infrastructure, new urbanization, transportation and water conservancy and other major projects,

Support the construction of major projects that are conducive to the coordinated development of urban and rural areas. Deepen the working mechanisms of projects such as "four supervisions and four guarantees", "three actions" and "concentrated start of construction", and vigorously promote major scientific research facilities, major ecosystem protection and restoration, public health emergency support, major water diversion, flood prevention and disaster reduction, west-to-east power. The construction of a number of major projects that strengthen the foundation, increase functions and benefit the long-term, such as transportation, riverside transportation and inter-provincial transportation. Support the issuance and use of local government special bonds for infrastructure and public service projects with certain returns. Put conservation and intensive use of land in a more prominent position, and increase the investment intensity, input-output ratio, and scientific and technological contribution rate per mu of projects.

Unleash the potential of private investment. Accelerate

the liberalization of private investment and promote “non-ban or Investment ” has been universally implemented. Give full play to the long-term mechanism for private capital to promote projects, publicly release projects with clear return mechanisms and high commercial potential on a regular basis to attract private capital participation. Innovate and standardize the promotion of the government and social capital cooperation (PPP) model, and improve project Demonstration and decision-making should be scientific. Support the listing and refinancing of private enterprises, and guide private enterprises to raise capital through capital increase and share expansion, bond issuance, etc. Steadily carry out the pilot project of real estate investment trust funds (REITs) in the infrastructure field, and support the development of real estate investment trust funds (REITs) in line with national policy guidance and social benefits . Projects with good quality, stable investment returns and good operation and management levels can effectively revitalize existing assets, expand private investment channels, and form a virtuous investment cycle.

Deepen the reform of the investment and financing

system. Persist in doing our best, act within our capabilities, and improve political the government's investment management system, strengthen in-process and ex-post supervision of investment projects, and concentrate our efforts on major, difficult and urgent matters. Continue to give full play to the guiding and leveraging role of government investment , stimulate the investment vitality of the whole society, and form a market-led investment endogenous growth mechanism. Further standardize administrative approval procedures, implement “ deficiency tolerance + commitment ” , and improve investment approval services

service efficiency. Give full play to the active role of policy and development financial institutions, and increase financial support for major projects and projects such as urban shantytown reconstruction, ecological environmental protection, urban and rural infrastructure, and scientific and technological innovation. Establish a joint review mechanism based on comprehensive consultation for investment decisions, encourage the development of full-process and comprehensive investment consulting institutions, and promote the transformation of investment intermediary service institutions from qualification management to industry self-discipline, market restraint, and credit supervision models. Strengthen the information management of investment projects and accelerate the realization of "one-stop service" for investment management.

Chapter 20 Coordinate and promote the construction of modern circulation system

Promote the transformation of modern circulation from single-point efficiency enhancement to system optimization, improve the function and efficiency of

the circulation system, and strengthen the supporting role of the circulation system in building a new development pattern.

Improve the circulation facility network. Strengthen high-speed rail freight and international air freight capacity building

It is designed to improve the accessibility of highways and ports and waterways, and form a modern logistics operation system of "channel + hub + network". Improve the city functions of national logistics hubs such as Hefei, Wuhu, Bengbu, Fuyang, and Anqing, make the Wuhu port-type national logistics hub bigger and stronger, and create several more national logistics hubs. Support the construction of Hefei International Air Cargo Distribution Center and Wuhu Air Cargo Hub, and create a national airport economic demonstration zone in Hefei. Enhance the functions of Hefei North, Bengbu East, Fuyang North and other railway freight hubs, and build Bengbu high-speed railway and Huangshan air-rail express logistics center. Build Wuhu Ma'anshan and Anqing river-sea intermodal transport hubs, build Hefei Jianghuai intermodal transport center and Bengbu and Huainan Huaihe River shipping hubs. Promote the interconnection

of logistics hubs in the Yangtze River Delta. Actively participate in the construction of the Beijing-Hong Kong High-speed Railway (Anhui) Economic Belt. Cultivate and build another 30 provincial-level demonstration logistics parks to strive to become a national model

Logistics Park. Promote the organic connection between trunk transportation and terminal distribution. Promote the integrated development of transportation and postal express delivery, and accelerate the establishment of a global delivery service system. Constructing “Anhui 123 Express Cargo Logistics Circle ” enables goods to be delivered within one day domestically and within two days to neighboring countries.

Day delivery, major cities around the world 3 Delivered within days.

Improve the commercial circulation system.

Implement the cold chain industry chain reinforcement and strengthening project, solidly promote the construction of Hefei’s national backbone cold chain logistics base, and support qualified cities in applying to build national backbone cold chain logistics bases. Implement the emergency logistics system construction project and create a number of emergency logistics bases that provide daily services and emergency support. Support the transformation and upgrading of commercial and trade circulation facilities related to residents’ daily life, introduce large-scale e-commerce platforms, develop vertical e-

commerce platforms, promote digitalization, intelligent transformation and cross-border integration of key circulation enterprises, and cultivate 20 There are more than 100 large-scale commercial and circulation enterprises with annual sales exceeding 10 billion. Promote the upgrading and expansion of county distribution and delivery facilities , the improvement of quality and efficiency of cold chain logistics facilities, and the renovation and upgrading of farmers' markets. Promote the project of express delivery into villages, accelerate the realization of express delivery in every village, and achieve full coverage of the postal express network in both urban and rural areas of the province.

Improve the circulation guarantee mechanism.

Relying on the social credit system, we will build an important product traceability system. Strengthen the construction of financial infrastructure such as payment and settlement, and vigorously develop supply chain finance. Strengthen research on key core technologies of logistics equipment, promote the development of new logistics technologies, new business formats and new models , and promote domestic

substitution. Deepen school-enterprise cooperation in the field of circulation and carry out internship training and job-ready training. Optimize the layout of logistics facilities and strengthen logistics land security. Promote standardization construction in the circulation field.

Chapter 5: Accelerate digital development and build digital Jianghuai

To embrace the digital era, we must unswervingly promote the construction of a strong network province and a digital Jianghuai River, activate the potential of data elements, vigorously develop the digital economy, accelerate the construction of a digital government and a digital society, and use digital transformation to drive changes in production methods, lifestyles, and governance methods in an all-round way. Improve the level of economic and social digitalization.

Chapter 21 Create a highland for digital economic development

Give full play to the advantages of massive data and rich application scenarios, continue to enhance digital technology and industrial innovation capabilities, promote the deep integration of the digital economy and the real economy, and strengthen the new engine of economic development.

Accelerate the promotion of digital industrialization.

Efforts to build a new generation of artificial intelligence in Hefei

In the innovative development pilot zone, we will implement the artificial intelligence industry innovation project and the "artificial intelligence +" application demonstration project to make the "China Sound Valley" **bigger and stronger**. Accelerate the construction of Anhui (Huainan) big data trading center and promote the innovative development of Huainan big data industry base and Suzhou cloud computing industry base. Accelerate the construction of a number of key parks such as Hefei Software Park, Wuhu Animation Industrial Park, and Ma'anshan Software Park, encourage cities to implement the "one city, multiple parks" construction plan, and actively strive to become a famous software park and a famous software city in China.

Consolidate and improve **5G Product advantages** such as radio frequency chips, filters, and test instruments accelerate the extension of the mobile communications industry chain. Actively deploy cutting-edge industries such as blockchain, quantum technology, future networks, Internet of Things, virtual reality,

and cyberspace security. Support the construction of innovative application test sites and scenario practice

laboratory.

Promote industrial digital transformation. Support the construction of industrial brains, create a number of digital workshops and smart factories, and cultivate a number of system solution providers with strong professionalism and obvious industry characteristics . Implement the " Anhui Enterprises Climbing into the Cloud " campaign to improve quality and expand coverage , promoting 30,000 More than 100 enterprises have in-depth connection with cloud resources . Accelerate the creation of digital enterprises and promote the digital transformation of core business links such as enterprise R&D and design, operation and management, production and processing, and logistics and after-sales. Actively build a digital industrial chain, unblock the data channels of upstream and downstream enterprises in the industrial chain, and promote all-channel and all-link supply and demand allocation and accurate docking.

Improve the development level of the digital economy. Gather superior innovation resources, focus on key areas such as high-end chips, operating systems,

basic software, and core algorithms to promote breakthroughs in key core technologies and enhance the support for the development of the digital economy. Actively introduce domestic and foreign digital economy hub and platform enterprise headquarters to settle in the city. Support a group of digital economy enterprises with good growth potential and strong driving ability to accelerate their development into industry leading enterprises with international competitiveness . Establish a big data venture capital fund to cultivate 2000 More than one big data company. Relying on the province's major emerging industry bases, we will create a digital technology innovation pioneer area and a digital economy industry cluster. Promote the construction of online economic innovation and development pilot zones and digital economy innovation and development pilot zones.

Chapter 22 Improve the level of digital government construction

Extensively apply digital technology to government service management, promote government governance process reengineering and model optimization, and

continuously improve the scientific nature of decision-making and service efficiency.

Promote the orderly sharing and opening of public data. Accelerate the construction of JAC big data center

The platform, industry sector sub-platforms and city sub-platforms promote cross-regional, cross-department and cross-level data sharing and business collaboration. Improve basic databases such as population, legal persons, electronic licenses, natural resources and geographical space, macroeconomics, and social credit, and promote the construction of various subject databases. Improve the provincial data sharing and exchange platform, gradually establish a data sharing mechanism of " on-demand sharing, unified circulation, and anytime call " to promote the sharing and exchange of data resources among various regions and departments . Coordinate and promote the construction of public data resource open platforms, promote various departments to formulate data open catalogs, open plans and open rules, clarify the scope and areas of openness, and open public data resources to the society in an orderly manner in accordance with the law.

Promote the joint construction and sharing of government informatization.

Accelerate the construction of integrated government affairs in Yunping across the province

Desk, layout 1 provincial government affairs cloud

platform, 16 municipal government cloud nodes, N An industry cloud creates a " one cloud " for the province's government affairs . Coordinate the construction of the province's e- government disaster preparedness system and enhance e- government disaster preparedness capabilities . Optimize and upgrade the provincial e- government extranet, build an e-government extranet backbone network for efficient transmission of data traffic and video traffic, promote the interconnection of the e-government extranet and the department's non-confidential business private network, and build an e- government extranet covering the entire province A net " .

Improve the efficiency of digital government services.

Focusing on " a government platform to promote services, groups

With the goal of "finding the government through one platform " , we will comprehensively upgrade and build the " Anhui Affairs Office " platform, integrate a number of public application supports, and provide undifferentiated, full coverage, high-quality, efficient and convenient government services and social services. Innovate government service methods , improve the government service map, and launch more service items

such as " online service, mobile service, self-service service, window service, and TV service ". **Promote the " cross-provincial service "** of high-frequency government service matters , and implement cross-department, cross-level, and cross-regional services. " One thing is done at a time " to promote the application of Health Code in more scenarios.

Deeply promote the widespread application of the five major systems of the provincial government, improve the functions of the "Internet + Supervision" system, and expand the scope of application.

Chapter 23 Accelerate the pace of building a digital society

Adapt to the new trend of fully integrating digital technology into social interactions and daily life, promote innovation in public services and social operation methods, and build a digital life that can be enjoyed by all .

Provide smart and convenient public services.

Strengthen the role of digital technology in accurately grasping public The application of service demand, accurate calculation of public service costs, and rational allocation of public service resources will continuously improve the quality and efficiency of supply. Accelerate the advancement of digital technology application innovation in the fields of culture and education, medical and health, transportation and tourism, elderly

care services, labor and employment, social security, community governance, radio and television, disaster reduction and relief, poverty alleviation and other fields, and promote the formation of digital livelihood services that are fair, inclusive, convenient and efficient system.

Build smart cities and digital villages. Accelerate the construction of new smart cities and smooth Urban data perception, analysis, decision-making and execution links promote innovation in urban management concepts, management methods and management models. Promote the construction of digital villages, accelerate the application of information technology in fields such as breeding and breeding, and build 300 A provincial agricultural Internet of Things demonstration site to improve the service level of Yinong Information Society and realize the "Internet +" project of agricultural products moving from villages to cities covering all counties (cities, districts).

Build a new picture of a beautiful digital life. Encourage shared travel, shared accommodation and other areas domain products and innovation of business models, developing new ways of life consumption, and

cultivating high-end online brands. Promote the construction of digital experience products in tourist attractions to enrich tourist experience content. Vigorously develop smart homes and accelerate the research and development of high perception and sensitive control

Sensing equipment and control systems improve the intelligent level of human-computer dialogue, behavioral interaction, device interconnection and collaborative control of home products.

Column 11 Digital application scenario engineering

Smart medical care. Accelerate the improvement of the province's coordinated regional national health information platform and telemedicine service platform, and accelerate the construction of electronic health cards . Promote the construction of smart hospitals and build a collection of smart medical treatment,

A smart hospital system that integrates smart diagnosis, smart treatment, smart wards, smart logistics and smart management .

Smart education. Support Bengbu and other qualified cities to establish national smart education demonstration zones to implement

Now the smart campus is fully covered. Build smart classrooms and popularize the application of mobile learning terminals and new teaching venues such as innovation laboratories and subject classrooms. Promote the construction of platforms such as the Provincial Continuing Education Online, the Provincial Online Course Learning Center, and the Jianghuai Smart Education Research Institute.

Smart cultural tourism. Build an Anhui Provincial Culture and

Tourism Big Data Center and strengthen data development and application.

Optimize and upgrade the functions of the " Anhui Culture Cloud " and " Visit Anhui " **public service platforms, provide public digital culture and smart tourism services, and realize " Visit Anhui with a mobile phone " .** Continue to carry out pilot projects for innovative applications of smart tourism and accelerate the construction of smart tourist attractions.

Smart retirement. Implement smart elderly care construction demonstration projects and promote the construction of smart elderly care institutions.

Develop smart home and community elderly care services. Build a provincial elderly care service data resource center and application service platform, enhance functions such as research , decision-making, and command, build a province-wide elderly care service information network and management system, and provide intelligent, personalized, diversified, and convenient elderly care products. and services.

Smart politics. Strengthen informatization construction in the political and legal fields and create Smart Court 4.0 version, advancing the " snow
"Light Project " , " Campus Safety Network **Outpost** " , and intelligent auxiliary criminal case handling system .

Smart People Society. Build a comprehensive service platform for human resources and social security across the province to achieve cross-level,

Cross-regional and cross-business interconnection. Carry out a campaign to innovate and improve the informatization of human resources and social security, and coordinate the improvement of "Internet + Human Resources and Social Security" convenient service capabilities.

Smart market regulation. Accelerate the application of technologies such as the Internet of Things, big data, blockchain, and artificial intelligence

Application in safety supervision, build a smart safety supervision information platform covering the entire chain of production, circulation, consumption, etc., and comprehensively enhance comprehensive supervision capabilities.

Smart radio and television. To deepen the integration and innovation of radio and television with new generation audio-visual technology and information technology

Focus on building smart radio and television media, developing smart radio and television networks, promoting the intelligent construction of radio and television production and broadcasting systems, operation and maintenance systems, monitoring and supervision systems, and service ecosystems, developing high-definition and ultra-high-definition TVs, and strengthening the construction and scenarios of radio and television 5G networks. application.

Smart weather. Accelerate the development of meteorological service demand perception mining technology and build user information awareness

Don't manage the system. Create an intelligent meteorological service front-end, promote the in-depth application of artificial intelligence technology in meteorological service scenarios, build a meteorological service brain, and support functions such as intelligent analysis, intelligent production, intelligent distribution, and intelligent evaluation.

Chapter 24 Create a good digital ecosystem

We must adhere to equal emphasis on decentralization and management, promote the unification of development and management norms, build a digital rule system, promote the efficient flow of data elements and optimal allocation of resources, and create an open, healthy and safe digital ecosystem.

Promote market-oriented allocation of data elements.

Promote agriculture, industry, transportation, education,

Standardize the development and utilization of data in security, urban management, public resource transactions, social security, health, finance and other fields. Explore the construction of statutory

institutions for the Digital Jianghuai Center and encourage government-enterprise cooperation to carry out data operations. Implement data element circulation projects and explore specifications

market-oriented data circulation and exchange mechanism to create a first-class data trading venue in the country. Explore and promote data circulation and data asset transformation, protect the rights and interests of transaction entities, and create an ecosystem of data integration, convenient transactions, and service coordination.

Create a standardized and orderly market environment.

Innovate supervision concepts and methods, implement package

Allow for prudent supervision. Implement the main responsibilities of Internet platforms, guide Internet platforms to strengthen self-discipline, and standardize management and operating behaviors. Resolutely crack down on illegal activities that infringe the legitimate rights and interests of others and violate the order of fair competition in accordance with the law. Accelerate the construction of a third-party collaborative governance system, encourage professional forces such as industry associations to participate in supervision, expand channels for public participation in governance, and form a shared and co-governance system for the whole

society.

Strengthen data security protection. Explore and advance digital transactions, big data and network security

Comply with local legislation and issue big data development regulations. Strengthen data security technical protection and improve the data privacy protection system and security review and evaluation system. Promote and improve the data classification and hierarchical security protection system suitable for big data environments, and establish a full-process management mechanism for data storage, transmission, and utilization. Strengthen the construction of network civilization and continue to carry out the "Jianghuai Clean Network" special campaign.

Chapter 6: Building a high-quality infrastructure system to provide strong support for economic and social development

Guided by overall optimization and collaborative integration, we will coordinate the development of existing and incremental, traditional and new infrastructure, and create a modern infrastructure system that is complete, efficient, practical, smart, green, safe and reliable.

Chapter 25 Strengthen the construction of new infrastructure

Implement the "New Infrastructure +" action, systematically lay out and accelerate the construction of new infrastructure, optimize and improve functional configuration, and consolidate the basic support capabilities for digital transformation.

Focus on improving network infrastructure. Accelerate the

promotion of the fifth generation mobile communication network (5G)

Plan layout and base station construction, deepen and expand application scenarios, and promote the long-term coordinated development of fifth-generation mobile communication networks and fourth-generation mobile communication networks (4G). Support the creation of smart dual-gigabit broadband demonstration cities and improve optical fiber network coverage in rural areas. Full deployment of Internet Protocol version 6 (IPv6). Promote the construction of dedicated international Internet data channels. Promote the deployment of ubiquitous sensing facilities and support IoT applications and intelligent transformation of urban public facilities, buildings, etc. Build a highly reliable, wide-coverage, large-bandwidth, customizable industrial Internet infrastructure and improve the multi-level industrial Internet platform system .

Accelerate the deployment of computing infrastructure .

Fully integrate and utilize existing resources to develop in an orderly manner. Develop moderate-scale, intensive and green data centers, and accelerate transformation and upgrading of data centers with poor efficiency and poor performance.

scattered data centers with high consumption . Support the construction of high-level cloud service platforms and encourage the provision of computing resources in the form of cloud services . Actively establish a national supercomputing center to enhance supercomputing and intelligent computing service capabilities. Actively participate in the coordinated layout of data centers and storage and computing resources in the Yangtze River Delta region , and build the Yangtze River Delta hub node of the national integrated big data center system .

Actively develop new technology infrastructure. Focus on areas such as artificial intelligence and improve the Provide high-level and popularizable technology development, open source code hosting, security protection and other service capabilities to the public service platform of the industrial chain. Accelerate the deployment of Blockchain Service Network (BSN) nodes, create high-quality, customized blockchain technology service platforms, and promote the construction of blockchain application service

platforms in areas such as industrial development, social governance, and public services.

专栏 12 “新基建+”行动

第五代移动通信网络（5G）。加快 5G 网络建设和商用步伐，率先在城市核心区、重要功能区、重点保卫单位、重点开发园区、人流密集区规模部署，在安徽创新馆、合肥骆岗生态公园等重大项目上打造一批网络样板工程。到 2025 年，力争 5G 网络覆盖能力进入全国前列。

工业互联网。鼓励工业企业升级改造工业互联网内网，推动工业无源光网络、工业以太网、工业无线网等新型工业网络部署。推进工业互联网标识解析体系建设，拓展网络化标识覆盖范围。支持汽车、电子信息、家电、纺织服装等重点行业建立工业互联网平台，到 2025 年建成工业互联网平台 200 个以上，形成 1—2 个达到国内先进水平的综合性工业互联网平台。

Big data center. Strengthen the classified guidance and hierarchical layout of data centers, and accelerate the advancement of national

Health and Medical Big Data (Central) Center, Yangtze River Delta (Hefei) Digital Technology Center, Hefei Huayun Xinchuang Cloud Data Center, China UnionPay Huangshan Big Data Center, China Telecom Anhui Company Headquarters Base and Big Data Industrial Park, Zhongke Shuguang (Anhui) Headquarters Base, Wuhu Yangtze River Delta Data Lake Industrial Park, Bozhou Inspur Big Data Center and Cloud Computing Industrial Park, Suzhou Cloud Computing Big Data Center, Huainan Yungu Big Data Industrial Park, Huaibei Big Data Center, Fuyang Big Data Center, Anqing Key projects include Cloud Valley, Ma'anshan Big Data Industrial Park, Lu'an Guodong 5G Big Data Industrial Park, Chizhou Jiangnan Big Data Center, Bengbu Big Data Center, Yuexi Big Data Center and other key projects.

Supercomputing center. Accelerate the construction of Hefei Supercomputing Center to create integrated computing services and cross-research

It is a major scientific and technological infrastructure and public service platform that integrates research and industrial innovation. It provides scientific researchers with services such as large-scale parallel computing simulation, intelligent processing and analysis of massive data, and realizes high-end computing services in quantum information, biological genes, new energy, Cross-integration and application innovation in new materials and other fields.

City brain. Promote cities to accelerate the construction of urban brains, build basic capability platforms, and consolidate

Infrastructure system, improve the comprehensive support system, create a coded life model, and develop smart application scenarios. Accelerate the construction of the provincial center of the city brain, initially form a cross-regional, cross-level, and cross-department integrated coordinated operation of the city brain system across the province , and promote " one network and unified management " of city operations .

Charging infrastructure. Vigorously promote residential areas, public parking lots, public transportation, rental, environmental protection

Special parking lots for public health facilities, offices of party and government agencies, enterprises and institutions, tourist attractions, high-speed service areas and other charging infrastructure construction, to build a charging infrastructure system with unified management, reasonable layout, efficient operation, and open sharing.

Chapter 26 Accelerate the creation of a strong transportation province

Efforts will be made to transform the mode of transportation development, accelerate the filling of shortcomings in development, comprehensively promote the optimization of facility networking, improve

service quality and upgrade, and promote the integrated development of various transportation modes.

Build a developed and efficient high-speed network, a complete and smooth trunk network, and an extensive and convenient basic network.

Build “Anhui on Track”. Improve the layout of high-speed railway corridors and speed up Forming a modern and efficient railway network with Hefei as the center and reaching major cities across the country will further enhance Anhui’s hub status in the national railway network. Build the Jianghuai intercity railway network and continue to expand the coverage of rapid rail transit. Support qualified cities to develop suburban railways and urban rail transit, and serve public transportation to facilitate commuting. Vigorously promote the construction of rail transit network in Hefei metropolitan area and build 1 hour commute circle. Renovate and upgrade general-speed railways and accelerate the construction of special railway lines. Promote the "four-network integration" of trunk railways, intercity railways, urban suburban railways and urban rail transit . Actively carry out the research and development and application of cutting-edge rail transit technologies,

and continuously improve the level of infrastructure technology and equipment. By 2025, 1,800 new railway operating miles will be added kilometers, the railway network covers more than 90 % of the counties, of which the high-speed railway network covers more than 80 % of the counties, forming a 1- hour connection between cities in the province and 2 -hour access to the Yangtze River Delta cities. 3 hours access to cities in the central region Accessible to Beijing within hours Tianjin-Hebei and Guangdong-Hong Kong-Macao Greater Bay Area and some western cities 4The high-speed rail travel circle is accessible within hours.

Build " Anhui on the highway ". Speed up the construction of national highways and important provincial highways within the country, intensify the construction of important urban development axes and highways to surrounding provinces, and expand and transform highways with outstanding road network functions and large traffic volumes. We will deepen the implementation of the campaign to "connect counties to counties " on highways, accelerate the project of "connecting counties to cities and towns, " and strive to realize highways connecting all counties and cities. By 2025, the " five vertical and nine horizontal " highway network will be basically completed , the traffic capacity of

congested and busy road sections will be significantly improved, and it will be interconnected with surrounding provinces. The highway mileage will reach more than 6,800 kilometers, with more than six lanes.

The highway mileage reaches 1100 kilometers, the highway density reaches 485 kilometer /10,000 square kilometers or more. Accelerate the upgrading of ordinary national and provincial trunk roads and network optimization , and basically achieve first-level highway connectivity from Hefei to districted cities, and from districted cities to counties. By 2025 , the total mileage of first-class highways will reach 8,000 kilometers, and the proportion of ordinary national highways with second-class or above will reach 93% , and the proportion of ordinary provincial highways with second-class or above will reach 93% . 60% .

Build “ Anhui on the waterway ”. Improve channel traffic capacity and optimize port functions Layout to connect rivers and connect them to the sea. Accelerate the improvement of the mainstream waterways of the Yangtze River and the Huaihe River, complete the diversion project to support the Huaihe River navigation, and connect the Yangtze and Huaihe River shipping; build the Shaying River, Xinbian River , Tuohui River, Chuhe River , Anhui River, Xin’an River and other major tributary waterways, and implement

navigation-impeding railway bridges and The ship lock reconstruction and expansion has basically formed the main skeleton of the inland waterway of " one vertical, two horizontal, five trunks and twenty lines " , and has been fully integrated into the high-level waterway network in the Yangtze River Delta region. Promote the intensive and professional development of ports, strengthen the integration of port resources, strengthen cooperation with ports along the river, upstream and downstream of the Huaihe River, and coastal ports, promote river-sea combined transport, trunk-branch combined transport, and build a modern port group . by 2025 In 2018, we strive to reach 2,300 high-level waterways of level 4 and above.

km, the port' s handling capacity exceeds 6 billion tons, the container design capacity reaches 200 10,000 standard boxes.

Build “ Anhui on Wings ” . Focusing on optimizing and upgrading the Hefei regional aviation hub function, we will improve the layout of transportation airports, enhance air transportation support capabilities, strengthen the construction of air cargo facilities, increase the number of international and domestic routes, cultivate the air transportation market, and promote the development of airport clusters . Implement

the renovation and expansion of Hefei Xinqiao, Fuyang and other airports, start the construction of Bozhou, Bengbu and other airports, and accelerate the construction of a " one hub and ten branches " transportation airport system.

a group of general airports in central Anhui, along the Yangtze River, in northern Anhui, in western Anhui and in southern Anhui . Strive to carry out pilot reform of low-altitude airspace management. by 2025 In 2019, there will be more than 7 general aviation transport airports and a number of general airports of A2 level and above will be built.

Develop smart transportation. Efficiently gather and integrate transportation innovation element resources to intelligently

Use informatization as a means to build a smart transportation system to achieve improvements in transportation service levels and innovation in management and organization models. Use new generation high-speed EMUs, smart EMUs, intercity and urban EMUs, and new tourist trains to replace and upgrade regular-speed passenger cars. Carry out technological innovation pilot projects for Internet of Vehicles and vehicle-road collaboration, and explore the construction of smart highways. Promote regional ship-shore-port information interconnection and promote intelligent ship management and services. Promote remote digital tower control and

management of airports and build smart airports. Develop shared transportation and create a travel service system based on mobile intelligent terminal technology. Improve logistics and transportation service capabilities and build a smart freight logistics service network.

Improve comprehensive hub functions. Optimize the hub space node layout and strengthen the hub. Integrate service functions and improve the efficiency of transportation combination. Strengthen the construction of a comprehensive transportation hub system with Hefei as the center, Wuhu, Bengbu, Fuyang, Anqing, and Huangshan as the supports, and other cities as the nodes, so as to realize the integrated connection between the hub cities and the trunk network. Promote the integrated construction of comprehensive transportation hubs, improve the efficiency of passenger transfers and cargo connections, focus on promoting the construction of comprehensive passenger transportation hubs centered on rail transit passenger stations and airports, and encourage airports to connect rail transit, important ports, logistics parks, and large-scale industries and mines Enterprises and others have introduced special railway lines to improve

the hub collection and distribution system. Efforts will be made to improve the radiation level of hub industry agglomeration, promote the integrated development of stations and cities, and vigorously develop the hub economy.

Improve passenger transport service capabilities.

Accelerate the construction of "Anhui 123 Travel traffic circle", promote

From Hefei to other districts and cities in the province, and from districts and cities to the counties under its jurisdiction 1 One hour of mastery, three hours of mastery Jiaocheng agglomeration, Hefei to the capital of neighboring provinces 2 Hours accessible to 3 major cities across the country Hours of coverage. Build an interregional and intercity rapid passenger transport service system with aviation and high-speed rail as the main body. Prioritize the development of urban public transportation, promote the construction of public transportation cities, build a multi-level and multi-mode urban public transportation system, and strengthen the comprehensive management of urban traffic congestion. Comprehensively improve the level of equalization of urban and rural passenger transport public services, orderly promote the extension of urban bus lines to surrounding key towns and public transportation transformation of rural passenger transport lines, and standardize rural passenger transport management and operation services. Accelerate the improvement of passenger interline transportation service facilities and improve service quality. Deepen the integrated development of transportation and tourism , enhance the

tourism service functions of transportation facilities such as passenger transport hubs and service areas , accelerate the construction of tourist highways, and promote the pilot integrated development of transportation and tourism in southern Anhui .

Improve green safety levels. Promote the harmonious development of transportation and ecological environment,

Insert ecological and environmental protection concepts throughout the entire life cycle of transportation infrastructure. Strengthen the ecological line selection and ecological environmental protection design of the project, and strengthen the conservation and intensive use of land, line locations, bridge locations, shorelines and other resources. Deepen the adjustment of transportation structure and promote the " road-to-rail " and " road-to-water " transportation of bulk goods . Promote the application of intelligent and environmentally friendly transportation equipment and standardized facilities and equipment for rapid change and transfer. Make full use of the space on the river and underwater, and strive to promote the construction of multi-functional river crossing channels. Improve

the monitoring and early warning capabilities of severe weather conditions on highways. Strengthen the maintenance and operation monitoring of transportation infrastructure, and strengthen the quality management of transportation vehicles. Explore and establish a transportation safety supervision and evaluation system, and improve the dual prevention mechanism of safety production risk prevention and control and hidden danger investigation. Establish and improve systems and mechanisms such as rapid response and coordinated command for comprehensive transportation of emergency supplies at the provincial, municipal and county levels.

Column 13 Major transportation projects

" Anhui on Track " construction project. Construction of Anqing - Jiujiang, Nanchang - Jingdezhen - Huangshan , Chizhou - Huangshan , Xuancheng - Jixi, Hefei - Xinyi, Hefei - Nanjing - Shanghai , Hefei - Wuhan

Han, Hangzhou - Lin'an - Jixi, Fuyang - Huanggang and other high-speed railways, Chuzhou - Nanjing, Chaohu - Ma'anshan, Huaibei - Suzhou - Bengbu, Fuyang - Mengcheng - Suzhou (Huaibei), Lu'an - Anqing, Nanjing - Tianchang - Huai'an, Ma'anshan - Zhenjiang (Yangzhou), Hefei - Xinqiao Airport - Lu'an, Hefei - Lujiang - Chizhou (Jiuhuashan) - Jinhua, Nanjing - Xuancheng and other intercity railways, Hefei Xinqiao Airport S1 line, Ma'anshan - Nanjing, Huangshan tourism Urban (suburban) railways such as the T1 line , special railway lines such as Tongling Port, Chizhou Port, Anqing Port, Fuyang Coal-based New Materials Industrial Park, Shitai Non-metallic Mine, etc. , implement capacity expansion and reconstruction projects of Ningwu and other railways, build Hefei , Wuhu and other urban rail transit.

Develop high-speed railways such as Hefei - Ankang, Yanhuai, Nanjing-Hangzhou Second Corridor, Huangshan - Quzhou (Jinhua) , Chizhou - Jiujiang, Bozhou - Mengcheng - Bengbu , Bengbu - Chuzhou - Nanjing, Susong - Wangjiang - Shitai

- Xuancheng and other intercity railways, Lu'an - Lujiang - Tongling - Nanling - Xuancheng, Tongling - Jiangbeigang and other general-speed railways, Jiuhuashan medium and low-speed maglev

tourist rail transit project preliminary work. Launch the Anhui North Yangtze River High-speed Railway, the Sanyang Railway, Chuzhou - Tianchang - Yangzhou, Hefei - Wuhu - Xuancheng, and Bozhou

—Xuchang, Wuhan — Huanggang — Yuexi, Anqing — Jingdezhen, Xuancheng — Zhenjiang, Mengcheng — Huainan, Xinqiao Airport — Huainan — Bengbu, Lujiang — Chaohu, Huaibei — Shangqiu (Yongcheng), Chizhou (Jiuhuashan) — Xuancheng and other intercity railways, Hefei - Chaohu, Hefei - Changfeng - Huainan, Hefei - Lujiang, Hefei - Lu'an - Jinzhai, Hefei - Shucheng (Wanfo Lake), Nanjing - Hexian, Nanjing - Tianchang, Tongling - Songyang - Anqing, Xiaoxian - Xuzhou, Chuzhou - Wuyi - Nanjing, Ma'anshan - Zhengpugang, Ma'anshan - Bowang and other urban (suburban) railways, Fuliu, Suhuai Railway, and the existing Shanghai-Hancheng Railway Donyitang Research and demonstrate the station reconstruction and expansion project and strive to include it in the national plan. Support Bengbu City in developing new rail transit that meets actual needs, is safe, green, economical and convenient.

" Anhui on the Expressway " construction project. Construction of Wuwei - Yuexi Section and Deshang of Shanghai-Wuhan Expressway

Expressway Hefei - Songyang section, Chizhou - Qimen section and Qimen - **Anhui**- Jiangxi border section, Lining Expressway Huangshan - Qiandaohu section, Bozhou - **Mengcheng** , Fuyang - Huaibin, Guzhen - **Bengbu** , Bengbu - Wuhe- Sihong, Mingguang - Chaohu, Chuzhou - Tianchang, Lai'an - Liuhe, Wuhu - Huangshan, Xuancheng - **Jingxian** , Ningguo - Anji, Hezhou Expressway Chuzhou - Hefei - Shouxian section, Shouxian - Yingshang section and **Yingshang**- Linqan (boundary of Anhui and Henan) section, Fuyang section, Bozhou section and Huaibei Suzhou section of Xuhuai-Fu Expressway, Suzhou - Guzhen, Wuhe - Mengcheng, Fengyang - Dingyuan, Mingguang - Xuyi, Nanjing - Hexian, Tongshang Expressway Wuwei (Taqiao) - **Hefei** section and Hefei - Huoshan - Wannan boundary section, Tongshang Expressway Tiantangzhai branch line, Chaohuang Expressway Hefei - Wuwei (Shijian) section, North Yanjiang Expressway Wuwei - Anqing section, Tiantian Expressway Anqing - Qian Shan section, Taihu - Qichun, Xuancheng-Dongzhi Expressway Jingxian - Qingyang section and Qingyang - Shitai - Dongzhi section, Yangji Expressway Huangshan District Connection Line and other expressways. Implement the Hefei-Dagudian section of Shanghai - Shaanxi Expressway, Xuancheng - **Wuhu** section and Wuhu - Lintou section of Wuhe Expressway, Wansujie-Wuhu hub section of Ningwu Expressway , Laian - Mingguang section and Mingguang - Bengbu section of Ningluo Expressway , the reconstruction and expansion of the Guangde - **Xuancheng** section of the Shanghai-Chongqing Expressway. Carry out the Langxi - **Guangde** section of the Hehang Expressway,

the Anqing-Jiujiang section of the North Yanjiang Expressway , Huaiyuan - Fengtai, Huainan - Hefei - Tongcheng, Jinhu - Tianchang - Yizheng, Nanjing - Bowang - Xuancheng, Huizhou District - Yi County, preliminary research on the reconstruction and expansion of the Hefei - Bengbu section of the Beijing-Taiwan Expressway, the Tongcheng - Anqing North section of the He'an Expressway, and the Zhongming Junction - Shangshuiqiao Junction section of the Shanghai-Chongqing Expressway.

" Anhui on the Waterway " construction project. Waterway:

Accelerate the construction of the shipping project to divert the Yangtze River to the Huaihe River and promote It enters the main stream of the Yangtze River from Anqing to Nanjing, the main stream of the Huaihe River and the Shaying River, Xinbian River , Guohe River, Huihe River , Tuohe River, Cihuaixin River, Chuhe River , Yaohe River, Fengle River, Shuiyang River, Guxi River, Renovation of waterways such as the Qiupu River , Wanhe River, and Xin'an River, implementation of the Huaihe River Bengbu three-line ship lock, Huaihe Linhuaigang, Shaying River Fuyang, diversion of the river to Huaipaihekou , Shushan and other double-line ship locks, diversion of the river to Huaidong Feihe , Heyu We will carry out preliminary research on the high-grade waterway of the Zhaoxi River in the Chaohu and other first-line ship lock reconstruction projects. Port: Construction of Maanshan Port Central Port Area Terminal, Wuhu Port Zhujiaqiao Foreign Trade Comprehensive Logistics Park Phase I Terminal, Tongling Port Jiangbei Port Area Phase I, Chizhou Port Meilong Port Area

Public Terminal, Anqing Port Changfeng Operation Area Phase II,
Hefei Paihe International Logistics Park Port Area, Fuyang
Port Nanzhao Operation Area Comprehensive Terminal Phase I,
Huainan Jianghuai

Hub Port Phase I, Bengbu Port Changhuaiwei Operation Area Comprehensive Terminal, Suzhou Qixian Operation Area Comprehensive Terminal, Lu'an Port Zhouji Operation Area, Chuzhou Port Bawangcheng Operation Area Public Terminal, Xuanzhou Port Area Comprehensive Terminal Phase II, Wuhu LNG inland river receiving (transfer) station terminals and other projects.

" Anhui on Wings " construction project. Expand Hefei Xinqiao, Fuyang, and Chizhou Jiuhuashan Airports, Start the construction of Bozhou and Bengbu airports, advance the preliminary work of Suzhou, Jinzhai, Chuzhou airports and the expansion of Wuhu Xuanzhou Airport, and strive to start construction. Carry out research and demonstration on the relocation of Huangshan Tunxi Airport and strive to incorporate it into the national plan. Promote Feidong Bailong, Feixi Guanting, Feixi Yandian, Chaohu, Lujiang, Suixi, Mengcheng, Dangshan, Si County, Guzhen, Jieshou, Yingshang, Xiejiaji District, Tianchang, Mingguang, Dingyuan , Jin'an District, Dangtu, Wuwei, Jingde, Ngee'an District, Qingyang, Tongcheng, Yuexi, Taihu, Huangshan District, Jixi, Xiuning, Yixian and other general airports are under construction.

Smart transportation. Promote the implementation of the comprehensive management information system for administrative law enforcement and the networked super management system

Key projects include system, smart transportation big data

center, comprehensive traffic operation monitoring and coordination command center, highway network traffic situation survey data collection and service system project, transportation construction market comprehensive management platform, smart highway pilot demonstration, smart port pilot demonstration and other key projects.

Integrated passenger transport hub. Construction of Hefei Xinqiao Airport Station, Wuhu Xuanzhou Airport Station, Hefei South, Xinhfei West, Bengbu South, Fuyang West, Wuhu North, Xin'anqing West, Huangshan North, Huaibei West, Suzhou West, Lu'an North, Chuzhou and other high-speed rail stations.

River crossing. Promote the implementation of Ma' anshan Cihu River Crossing Channel, Ma' anshan Yangtze River Highway and Railway Bridge, Wuhu Taishan Road Yangtze River Highway and Railway Bridge, Wuhu Beijing Road Cross-River Tunnel, Wuhu Chengnan Cross-River Tunnel, Tongling Development Zone River Crossing Channel, G3 Tongling Yangtze River Highway and Railway Bridge, Chi Yangtze River Highway and Railway Bridge, Anqing Haikou Yangtze River Highway Bridge, Wangjiang Yangtze River Highway Tiedaqiao, Susong - Pengze river crossing, etc.

Chapter 27 Building a modern energy system

Promote the energy revolution, optimize the energy structure, and improve the energy production, supply, storage and marketing system,

Expand the development and utilization of clean energy and provide safe and reliable energy security.

Improve power supply security capabilities.

Accelerate the construction of UHV transmission channels for "foreign power entering Anhui", strengthen the construction of important transmission projects in the province such as power transmission channels between the Huaihe River and Huaihe River, and cross-river channels, strengthen the backbone grid structure, and create a UHV power hub in the Yangtze River Delta. Accelerate the upgrade of the backbone network structure and build a strong regional ring network. Improve the level of intelligent development of distribution networks, promote equalization of urban and rural power supply services, implement rural power grid consolidation and upgrade projects, promote the renovation of power supply facilities in old communities, and improve power supply quality and reliability. Give full play to the basic and regulating role of coal power units, and rely on the Lianghuai coal base and the golden waterways along the river to build clean and efficient pithead power stations and riverside power plant reconstruction and expansion projects in an orderly manner.

Optimize the operation mode of the "Anhui-East Power Transmission" unit and enhance the Yangtze River Delta's ability to support and protect electricity.

Actively develop renewable energy. Adhere to the simultaneous development of centralized and distributed construction, and vigorously and orderly promote the development of wind power and photovoltaics. Improve the price formation mechanism of pumped storage power stations, give full play to the advantages of pumped storage resources, and promote the construction of tens of millions of kilowatt-level green energy storage bases in the Yangtze River Delta. Multiple and efficient utilization of biomass energy. Actively promote the application of solar energy, geothermal energy, air energy, etc. in the construction field. Improve power system regulation capabilities, explore and promote energy storage applications such as electrochemistry, improve new energy consumption and storage capabilities, and further expand the scale of renewable energy applications.

Accelerate the construction of oil and gas infrastructure. Accelerate the construction of natural gas trunk pipelines, contact lines, LNG receiving stations

and supporting pipelines, promote pipeline interconnection, and form the province's natural gas trunk network as soon as possible . Expand natural gas supply channels and improve gas source transportation capabilities. Optimize and improve refined oil storage and transportation capabilities. Increase investment in urban and rural gas infrastructure, implement rural gas supply projects for people's livelihood, and increase the gasification rate of urban and rural residents. Coordinate the promotion of gas storage and peak shaving

Construction of facilities and gas-fired peaking power plants. Encourage the construction of comprehensive energy service facilities for oil, gas, electricity and hydrogen . Increase the exploration and development of coal-measure natural gas and shale gas, expand the scale of coalbed methane mining in the Lianghuai mining area, and promote the construction of bio-natural gas projects. Steadily increase the proportion of natural gas consumption .

Promote intelligent and green coal mining. Accelerate the re-construction of coal mines and put them into production on schedule, and do a good job in receiving

Continue the preliminary work of the project, intensify the safety improvement of coal mines, and stabilize the production capacity of the two-Huai billion-ton coal base. Make full use of backfill mining, water conservation mining, coal and gas co-mining and other technologies to improve the level of safe, efficient and green coal mining. Actively apply intelligent mining, intelligent equipment, and intelligent management, strengthen the construction of coal mine risk early warning and prevention platforms and data

centers, and comprehensively promote the intelligent development of coal mines.

Improve the level of clean and efficient energy

utilization. Increase the hierarchical utilization of coal resources and improve

Plateau coal washing rate, strengthen commercial coal quality management. Promote energy-saving and emission-reduction upgrades of coal power units and energy-saving and consumption-reducing power grids, promote the application of high-efficiency energy-saving power equipment, further reduce coal consumption in power generation, reduce grid transmission losses, and improve power system operating efficiency. Actively promote the substitution of electric energy in transportation, commercial catering and other fields, and increase the proportion of electric energy in final energy consumption.

Promote innovation in key energy technologies. Focus on cutting-edge technology development and major national needs

Demands include strengthening basic research on magnetic confinement fusion, clean utilization of coal, renewable energy, and smart power grids. Accelerate

research on core technologies such as advanced energy storage and high-performance fuel cells, and promote the large-scale application of hydrogen energy and biomass energy. Promote the innovative development of equipment such as photovoltaic modules, fans, inverters, smart coal machines, and core components of gas turbines.

Column 14 Energy supply guarantee project

Pumped storage power station. Build the Jixi and Jinzhai pumped storage power stations, continue to build the Tongcheng pumped storage power station, promote the timely start of construction of Ningguo, Yuexi, Shitai, Huoshan and other pumped storage power stations, and strive to include a number of pumped storage power stations such as Taihu and Xiuning. A new round of national mid- and long-term planning.

Electricity infrastructure. Actively carry out power cooperation with Inner Mongolia, Shaanxi, Shanxi, Gansu and other provinces and regions

We are working together to strive to start the construction of a UHV transmission project for "foreign power entering Anhui".

Continue the construction of 500 kV power transmission and transformation projects such as Wuhu Chucheng Expansion and Hefei Zipeng, and start construction of Fuyang Fusi, Chuzhou Hengshan, and Anqing Fourth class 500 Qianfu, Huangshan Dabeibu, Bozhou Shangde, etc. 220 Power transmission and transformation projects of kilovolts and below. Continue the construction of Fuyang China Resources Power Plant Phase II and Huainan Panji Power Plant projects, and start the construction of Datang Chuzhou Power Plant, Bozhou Banji Power Plant Phase II, Fuyang Low Calorific Value Coal Power Plant and Chizhou Jiuhua Power Plant Phase II and other projects included in the national coal power construction scale. Promote the preliminary work of the Lianghuai pit entrance and riverside reconstruction and expansion projects.

Natural gas infrastructure. Continue to build the Wuhu Yangtze River LNG inland river receiving (transfer) station and Bengbu—

Hefei, Chaohu - Jiangbei concentrated area pipeline projects, construction of the Jiangsu-Anhui pipeline supporting the Binhai LNG receiving station, Huzhou - Xuancheng, Yangzhou - Chuzhou and other cross-provincial pipeline projects (Anhui section), and Yingshang - Jin'an, Lujiang - Guichi, Suzhou - Bengbu and other pipeline projects. Continue to promote the natural gas county-county connection project.

Coal infrastructure. Implement special railway lines and dock connection projects in mining areas and port areas, and build A group of modern coal logistics parks will be established to establish a Yangtze River Delta coal trading center and a coal logistics big data management system to build a modern coal logistics system in the Yangtze River Delta. Build 2-3 modern large-scale coal storage and distribution centers and build a Yangtze River Delta coal reserve base. Relying on equipment manufacturing enterprises such as Anhui Mining Machinery, we will carry out technological research, development and manufacturing of complete sets of intelligent coal machinery equipment and coal mine robots, and build a R&D and production base for intelligent equipment for coal mines in the Yangtze River Delta.

Smart energy. Promote the development of national intelligent demonstration coal mines and power grids such as Liuzhuang, Yangliu and Guqiao. accurate load control system, hazardous chemicals pipeline emergency management information system, smart energy information platform, etc.

Chapter 28 Promote the construction of Anhui water network project

Adhere to the priority of water conservation, spatial balance, systematic management, and joint efforts, strengthen the construction of water conservancy infrastructure, and comprehensively improve water security capabilities.

Improve flood prevention and security capabilities.

Construction interception, defense, storage and discharge are coordinated and linked with each other. A smooth flood control and security network system strives to make up for the shortcomings in flood control. Accelerate the systematic investigation and management of the Yangtze River, Huaihe River, and Xin'an River mainstreams and dangerous sections of embankments, continue the construction of flood storage and detention areas, promote the standard upgrading of mainstream embankments and urban circle embankments, and classify the bund polders and production polders. Accelerate the construction of control hubs such as Niuling Reservoir, the management of major tributaries such as Chu River and small and medium-sized river systems, promote smooth

flood drainage in the Chaohu Basin, continue to promote the improvement of drainage capacity in key flood-prone areas, remove and reinforce dangerous reservoir gates, and prevent and control flash flood disasters, etc.

Construction of flood control weak link projects.

Continuously strengthen the construction of urban flood control systems. By 2025, the main embankments and flood control standards of the Yangtze River, Huaihe River and Xin'an River will be

Reach 100 Once a year, major tributaries and small and medium-sized rivers reach the flood control standards determined by the plan

The drainage standard for key flood-prone areas in the Huaihe River Basin reaches 5-10 Once a year, Yangtze River Basin

The drainage standard for key flood-prone areas reaches 10 Once in a year.

Strengthen water supply safety. Promote the construction of the province's backbone, regional and terminal water resources allocation network, accelerate the establishment of a water supply security pattern that is diversion, storage and extraction, interconnection, and multi-source mutual assistance, and improve the balance between water resources conditions and population and economy. Implement the

strictest water resources management system, carry out the construction of a water-saving society in counties, and create provincial-level water-saving industrial parks and key water-saving enterprises. Implement the construction of key water source projects such as the diversion of rivers to the Huaihe River and the second phase of water diversion and the comprehensive utilization of Linhuaigang hub, and promote

The river and lake water systems will be connected, the construction of emergency backup water sources will be accelerated, and the water supply capacity of the Jianghuai watershed and northern Anhui will be improved. Accelerate the construction of large-scale irrigation areas such as Huaihongxinhe, carry out the extension and modernization of large-scale irrigation areas such as Pishihang, and the extension and water-saving transformation of medium-sized irrigation areas . Accelerate the integration of urban and rural water supply, continue to improve the level of rural water supply security, and establish and improve long-term management and protection mechanisms for rural water supply security projects.

Accelerate the construction of smart water conservancy. Strengthen departmental and regional linkage and information sharing, and strengthen of chemical water projects . Improve weather monitoring, forecasting and early warning capabilities. Improve the network of water resources and soil and water conservation monitoring stations, build an intelligent hydrological data processing center, enhance

hydrological information capabilities such as national basic hydrological stations, small and medium-sized rivers, and small and medium-sized reservoirs for hydrological monitoring and early warning, and build safe operation monitoring of reservoirs and sluices and video monitoring of water conservancy projects. System and "Digital Irrigation District", etc., gradually build a comprehensive monitoring and early warning dispatching system covering the province's river systems and water conservancy engineering systems, integrating information collection, early warning and pre-judgment, consultation and judgment, dispatching and command, water conservancy supervision and other functions. Improve the informatization, automation and intelligence level of water management.

专栏 15 水利重大工程

大江大河大湖治理。实施长江干流安徽段治理、华阳河蓄滞洪区建设工程，淮河干流王家坝至临淮岗段、正阳关至峡山口段、峡山口至涡河口、浮山以下段（淮河干流入洪泽湖治理）行洪区调整和建设工程，淮河重要、一般行蓄洪区建设工程，淮河行蓄洪区及淮干滩区居民迁建工程。实施新安江流域综合治理工程。推进长江安徽段堤防防洪能力提升、淮河中游综合治理、江心洲外滩圩迁建、巢湖流域排洪畅通、三江

(Shuiyang River, Qingyi River , Zhang River) watershed comprehensive improvement, Huaibei embankment hazard removal and reinforcement, flood control and management of key lakes in the Yangtze River and other projects. Collaboratively promote the second phase project of the Huaihe River into the sea.

Control hub construction. Completed the construction of Niuling Reservoir project and started construction of Fenghuangshan large-scale water reservoir

We will advance the Wuhu Gate and Dangtu Gate hub projects in an orderly and steady manner, as well as the preliminary work for new large and medium-sized reservoir projects such as Hongling, Tianhe Lake, Fenglin, Huainan Mining Area, Tangcun, etc. and the resettlement of existing reservoirs. project.

Weak links in flood control have been improved. Complete Dasha River, middle reaches of Shuiyang River, Chu River , Wan River, and Hangbu

We will carry out the management and construction tasks of important tributaries such as the Yangtze River, Baohui River, and Hongru River within the national plan, and promote the management of important tributary systems such as the Ying River, Qiupu River , and Quan River . Continue to implement small and medium-sized river management projects. Complete the

treatment of depressions in the Huaihong New River water system and the construction of other depressions treatment projects such as flood storage areas along the Huaihe River , and accelerate the advancement of projects to improve the drainage

capacity of key flood-prone areas in the Yangtze River and Huaihe River basins. Continue to implement the risk relief and reinforcement projects for dangerous reservoirs and large and medium-sized dangerous sluices, as well as key mountain torrent gully management and urban flood control-related projects.

Construction of major water diversion and key water source projects. Completed the

fourth-level diversion of the Yangtze River to the Huaihe River and the Simashan Chuhe River. The first phase of the Zhan Trunk Canal project, the second phase of diversion of the Yangtze River to the Huaihe River, and the comprehensive utilization project of the Linhuaigang hub will be implemented to promote the optimal allocation of water resources in the Jianghuai watershed area, the optimized allocation of water resources in the area north of the Huaihe River, the Jiesu Xinhe River, and the Xin'an River water diversion and storage in Huangshan City. Energy engineering, water system management in the Anhui section of the Grand Canal, etc. Carry out pilot work on reservoir desilting.

Irrigation area construction. Complete the construction of the Gangwan Reservoir Irrigation District, implement the Huaihong Xin River Irrigation District Project, and promote Jinjiangxiang Reservoir Irrigation Area and Xiahushan Reservoir Irrigation Area Projects. Implement the continuation and modernization projects of large-scale irrigation areas such as Pishihang and Simashan, as well as the continuation of supporting facilities and water-saving renovation projects of a number of medium-sized irrigation areas. Implement digital

irrigation projects such as Pishihang and others .

Chapter 7 Adhere to
comprehensively deepen reform
Accelerate the construction of a
high-level socialist market
economic system

Uphold and improve the basic socialist economic system, strengthen the systematic integration of reform measures, give full play to the decisive role of the market in resource allocation, better play the role of the government, promote a better combination of effective markets and promising governments, and provide more opportunities to achieve high-quality development. Complete, more dynamic and more efficient institutional guarantees.

Chapter 29 Fully stimulate the vitality of various
market entities

We will unswervingly consolidate and develop the public economy, unswervingly encourage, support, and guide the development of the non-public economy, and

cultivate more dynamic, creative and competitive market entities.

Deepen the reform of state-owned assets and state-owned enterprises. Comprehensively implement the three-year action implementation plan for state-owned enterprise reform,

Deepen reforms in key areas and key links, and make state-owned capital and state-owned enterprises stronger, better, and bigger. Accelerate the optimization and structural adjustment of the state-owned economic layout, promote the investment of more state-owned capital in public services, urban and rural infrastructure, new infrastructure, strategic emerging industries and advantageous industries, and support state-owned enterprises to lead or participate in the construction of major scientific and technological and industrial innovation projects. Accelerate the improvement of the modern enterprise system with Chinese characteristics, vigorously promote the mixed ownership reform and professional integration of state-owned enterprises, promote the asset securitization and equity diversification of state-owned enterprises, consolidate and deepen the strategic reorganization of Maanshan Iron and Steel Group and Baowu Group, and the

strategic cooperation between Jianghuai Automobile and Volkswagen Group Results, relying on the Provincial Port and Shipping Group to launch a new

shipping, port and shipping resources and encourage strategic reorganization and joint venture cooperation between provincial enterprises and first-class domestic and foreign enterprises. Improve the state-owned assets supervision system focusing on capital management, steadily promote the reform of the state-owned capital authorized operation system, and effectively bring into play the functions of state-owned capital investment and operating companies.

Steadily advance the reform of natural monopoly industries. Improve the price and cost of natural monopoly links

This supervision will accelerate the marketization of competitive links, break administrative monopolies, and prevent market monopolies. Further optimize the shareholding structure of the power trading center, promote the reform of incremental power distribution business, and encourage the development of incremental power distribution business in the form of mixed ownership. Support various enterprises to participate in the construction of natural gas pipeline networks, storage, transportation, and distribution facilities,

and promote the fair opening of natural gas infrastructure to market entities. Deepen the reform of railway investment, financing, construction, operation and management systems. Promote the separate operation of postal universal service business and competitive business. Further standardize franchise operations such as urban gas, tap water, sewage and garbage treatment, and medical waste disposal , and improve the price formation mechanism in public utilities and public services.

Support the high-quality development of the non-public economy. Comprehensively implement support for the private economy,

A series of policies and measures for the development of foreign-invested enterprises will further create a good environment that emphasizes business, is pro-business, loves business, and protects business. Enterprises of all types of ownership will be treated equally in accordance with the law in terms of factor acquisition, access licensing, business operations, government procurement, and bidding. Break down various barriers that restrict the development of private enterprises, improve the laws, regulations and

policy systems that promote the development of small, medium and micro enterprises and individual industrial and commercial households, and create a " through train " of policies that benefit enterprises . Implement regulations to protect the payment of small and medium-sized enterprises and establish a long-term mechanism to prevent arrears. We will thoroughly implement the action plan for the upgrading of the private economy, and continue to promote the transformation of individual enterprises into enterprises, small- scale upgrading ,

Regulatory reforms and stock listings will continue to expand the number and scale of private economic entities. We will improve the policy system that builds a pro-Qing government-business relationship, establish standardized and institutionalized government-enterprise communication channels, improve the mechanism for fully soliciting the opinions of enterprises and industry associations and chambers of commerce in formulating rules and policies, and carry out regular point-to-point contact with key private enterprises for leading cadres. Protect the legitimate rights and interests of private enterprises and entrepreneurs equally in accordance with the law, and promote the healthy development of the non-public economy and the healthy growth of people in the non-public economy . Carry forward the outstanding entrepreneurial spirit of the new era and promote the construction of "Wanzihao " world-class enterprises with high quality.

Chapter 30 Improve local fiscal, taxation and financial systems

We should better leverage the basic role of the

modern fiscal and taxation system in resource allocation, financial security and economic management, enhance the ability of finance to serve the development of the real economy, and improve local fiscal and taxation financial systems that meet the requirements of high-quality development.

Improve the fiscal system below the provincial level.

Promote the division of fiscal power and expenditure responsibilities below the provincial level. Reform in different areas, scientifically determine the revenue division of governments at all levels, gradually establish fiscal relations between provinces, cities and counties with clear powers and responsibilities, coordinated financial resources, and regional balance, and form a stable system in which the powers, expenditure responsibilities and financial resources of governments at all levels are compatible. Improve the transfer payment system and enhance grassroots public service guarantee capabilities. We will steadily advance the reform of the tax system, implement the modern tax system, improve the local tax and direct tax systems, deepen the reform of the tax collection and management system, and implement

various tax and fee reduction policies in a timely manner.

Deepen budget management reform. Strengthen the coordination of financial resources and continue to implement the medium-term financial political planning and management, focus on maintaining the basics and the bottom line, and enhance the financial support for major tasks, major projects, and major projects in the province. Promote full-scale budget management and improve government budget

We will improve the accounting system and strengthen the coordination of government fund budgets, state-owned capital operation budgets, social insurance fund budgets and general public budgets. Deepen budget information disclosure, promote the standardization of fiscal expenditures, strengthen budget constraints, comprehensively implement budget performance management, and improve the efficiency of fiscal resource allocation and fund use efficiency. Promote local financing platforms to accelerate market-oriented transformation and development.

Deepen financial reform and opening up. Adjust and optimize the local financial system and financing structure,

Build a multi-level financial support system such as local venture capital, bank credit, bond market, stock market, and insurance market to serve the real economy. Effectively give play to the leading and leveraging role of provincial equity investment funds , and encourage qualified cities and counties to initiate the establishment of government-funded industry investment funds. Support joint-stock bank branches to extend

their outlets to cities and counties, deepen the reform of the Provincial Rural Credit Cooperative Federation, and explore the establishment of commercial banks oriented to the industrial transfer agglomeration areas in northern Anhui. Support small and medium-sized banks to enhance their capital strength through multiple channels through the issuance of stocks, capital bonds, mergers and reorganizations, etc. Improve the mechanism for cultivating reserve resources for enterprise listings, policy incentives, rewards and subsidies, and coordinating service promotion mechanisms, promote the initial listing of classified enterprises in multi-level capital markets, and support refinancing, mergers, acquisitions and reorganizations of listed companies. Encourage banking financial institutions to steadily carry out investment-loan linkage business, and guide insurance institutions to increase direct investment of insurance funds. Vigorously develop inclusive finance and guide financial capital to focus on supporting manufacturing and small, medium and micro enterprises. Domestic and foreign financial institutions are encouraged to set up branches in Anhui and promote the interconnection of financial facilities in the Yangtze

River Delta region. Deepen the construction of policy financing guarantee system and improve the guarantee service mechanism. Establish a flexible flow mechanism for financial talents to attract high-end financial talents to start businesses and work in Anhui. Promote the establishment of a market-oriented and legalized resolution and exit mechanism for financial institutions.

Chapter 31 Build a high-standard market system

Guided by the implementation of high-standard market system construction actions, we will promote the construction of basic systems, factor allocation, market supervision and credit systems, and strive to build a market system that is unified and open, has orderly competition, complete systems and perfect governance.

Comprehensively implement the basic institutions of the market system. Deeply implement the negative list for market access system, further relax market access thresholds, and promote the universal implementation of "no ban or entry". Strengthen the rigid constraints of the fair competition review system, formulate and implement opinions on strengthening the implementation of competition policies, clean up policy documents that violate fair, open, and transparent market rules, and strengthen anti-monopoly and anti-unfair competition law enforcement. Establish and improve a third-party review and evaluation mechanism, and a fair competition review and report handling and response mechanism for various

market entities. Improve the property rights protection system based on the principle of fairness, improve the intellectual property rights protection system, and protect the property rights and independent management rights of state-owned, private, foreign-owned and other ownership enterprises in accordance with the law. We will seriously investigate and deal with all types of violations of the legitimate rights and interests of enterprises in accordance with the law, properly handle foreign-related commercial cases of enterprises, effectively implement the punitive compensation system for infringement, and strengthen the protection of enterprise trade secrets .

Deepen the reform of market-oriented allocation of factors. Focusing on establishing and improving the elements of unified and open market, and further promote the market-based allocation reform of land, labor, capital, technology, data and other factors. Accelerate the improvement of the land management system, make full use of market mechanisms to revitalize existing land and inefficient land, improve the industrial land market supply system such

as long-term leasing, lease first, and flexible term supply , explore increasing the supply of mixed industrial land, and optimize land use planning indicators Distribution method, make full use of the national construction land approval power entrustment

Pilot policies and improve the adjustment mechanism for supplementary cultivated land indicators within the province. Improve the social mobility system and mechanism of labor and talents, and innovate and improve the talent classification and evaluation system. Improve the technical skills evaluation system and formulate professional standards with professional abilities as the core. Support the provincial equity custody and trading center to enrich market sectors, expand the scale of listings, and encourage listed companies to implement joint-stock reform. Deepen the reform of the rights to use, dispose and benefit from scientific and technological achievements. Promote the market-oriented operation of independent intellectual property rights, improve the intellectual property incentive mechanism, and encourage technology development and transfer of integrated services. Cultivate and develop the data element trading market. Improve the market-determined factor price mechanism and improve the factor price monitoring and early warning mechanism. Expand the functions of public resource trading platforms and improve public resource trading supervision mechanisms

and institutional rules. Collaboratively promote the integration of factor markets in the Yangtze River Delta

Improve the modernization level of market supervision.

Promote systematic, functional, constructive, Open and scientific supervision, optimize supervision concepts and methods, and improve the comprehensive effectiveness of market supervision . We will improve a new regulatory mechanism that takes " double randomization and one disclosure " supervision as the basic means, supplements key supervision , and is based on credit supervision. Focusing on the safety of food, medicines and vaccines, we will establish a unified and authoritative supervision system for the entire process from production, circulation to consumption. Implement inclusive and prudent supervision of new industries, new business formats, and new models. Strengthen the construction of the law enforcement team, promote comprehensive market law enforcement, and strictly implement the " three systems " of administrative law enforcement announcements, records of the entire law enforcement process, and legal review of major law enforcement decisions . Improve the

Internet market regulation system and establish a normalized supervision mechanism.

We will further advance the construction of the social credit system. Accelerate local credit legislation and improve credit

Use the system of institutional standards to continue to promote the construction of government integrity, business integrity, social integrity and judicial credibility. Strengthen the hub role of the provincial public credit information sharing service platform,

Strengthen the accurate collection, on-demand sharing, full disclosure and widespread application of credit information in accordance with the law, and protect the security and privacy of credit information. Vigorously promote the credit commitment system, innovate and improve credit classification and classification supervision, establish and improve a supervision mechanism that runs through the entire life cycle of market entities and connects all supervision links before, during, and after the event, and build a credit supervision database for market entities and a credit information social application system. Further standardize and improve mechanisms for identification, recording, collection, disclosure, punishment and credit repair of untrustworthy conduct. Implement "Xinyi + " project, innovate and expand credit application scenarios, expand the scale of " Xinyidai " , cultivate and standardize the credit service market. Promote and implement party building to lead the construction of credit villages and urban credit construction, and support in-depth cooperation between Wanjiang and Wanbei Credit Unions . Strengthen the construction of a

culture of integrity and vigorously promote the concepts of " honesty, kindness, trustworthiness and responsibility ".

Chapter 32 Accelerate the transformation of government functions

Deepen the reform of “decentralization , regulation and service ”, standardize government decision-making behavior, build a government governance system with clear responsibilities and administration in accordance with the law, and create a market-oriented, legal and international business environment.

Optimize the government responsibility system.

Accelerate the establishment of an economy that reflects the requirements of high-quality development Operate the goal system, policy system, decision-making coordination system, supervision and evaluation system, and guarantee system, and optimize government functions such as economic regulation, market supervision, social management, public services, and ecological environment protection. Continue to deepen the " one order for the whole province " rights and responsibilities list system, improve the enterprise-related fee list,

public service list, and administrative power intermediary service list, and promote the standardization and standardization of the list system. Deepen the reform of public institutions, improve systems and mechanisms such as the registration and establishment of public institutions, strengthen the public welfare attribute, innovate service supply models, and improve governance efficiency. Deepen the reform of industry associations, chambers of commerce and intermediary agencies,

Further clarify the relationship between the government, market and society, and give full play to the unique advantages and positive role of industry associations and chambers of commerce.

Improve the quality of administrative decision-making.

Implement the provincial major administrative decision-making procedures and conscientiously fulfill legal procedures such as public participation, expert argumentation, risk assessment, legality review and collective discussion and decision-making, improve the pre-evaluation and post-evaluation system of major policies, control policy directions from the source, and prevent arbitrary decision-making. Strengthen the tracking and monitoring of policy implementation and make timely adjustments and improvements. Smooth channels for participation in policy formulation, strictly implement the government affairs disclosure system, effectively protect the rights of market entities and the public to know, participate, express and supervise in policy formulation, and improve government execution and credibility.

Continue to optimize the “ four best ” business environment. Strengthen the systematicness, integrity

and coordination of work

"four-in-one" chain of industry chain, innovation chain, capital chain, and talent chain, plus a high-quality and efficient government service development ecosystem, and build a market-oriented, legal, professional, open, service-oriented, and efficient government. Comprehensively implement the regulations on optimizing the business environment and the implementation measures of Anhui Province. Benchmark first-class, carry out actions to create a superior business environment and improve business environment, and strengthen business environment evaluation.

Further streamline administrative licensing matters, timely implement the cancellation of decentralized matters by the State Council, and fully implement the notification and commitment system for certification matters and enterprise-related business licensing matters. Promote the full coverage of the list management of enterprise-related business license items and the "separation of licenses from licenses" reform, and continue to promote the "reduction of licenses after licenses". Optimize the normalized working mechanism of "four free services and one

service " and improve the functions of the comprehensive service platform. Deepen the reform of " one network, one door, one time " in government services and improve 7×24 The open - hour " anytime service " service mechanism promotes the standardization, standardization and convenience of government services, and continues to enhance people's satisfaction.

Column 16 major reform actions

Actions to improve the private economy. Elevate the implementation of eight major projects, including cultivating market entities, strengthening leading enterprises, demonstrating dual growth of private enterprises, shaping innovation momentum, improving management capabilities, promoting integrated development, and building service systems, to promote the scale, strength, innovation capabilities, and comprehensive driving force of the province's private economy . At a new level, by 2025 , the private economy' s contribution to the province' s GDP growth will remain at around 60% .

Actions to build a high-standard market system.

Comprehensively implement the basic systems of the market system such as property rights protection, market access, and fair competition review, increase the protection of non-public economic property rights, unblock the feedback channels and response mechanisms for market entities on hidden barriers, and establish fair competition review and reporting processing and feedback mechanisms. Deepen the reform of market-based allocation of factors, promote the market-based allocation of commercial land factors, promote the orderly flow of labor factors, increase the proportion of direct financing, vigorously develop technology and data factor markets, and improve factor market transaction rules and service systems. Improve the modern market supervision mechanism, enhance comprehensive market

supervision capabilities, improve inclusive and prudent

supervision of new business formats, and continuously improve the scientific nature and effectiveness of market supervision.

Actions to improve the construction and improvement of the social credit system. Complete the second phase of the provincial public credit information sharing service platform, promote the "one-stop collection and full sharing" of credit information, and realize that credit information such as administrative licenses and administrative penalties should be "disclosed as much as possible" within 7 working days. We vigorously carry out trustworthy incentives, increase financing support for trustworthy entities, continuously expand the scale of "Xinyidai", and innovatively develop a series of credit applications such as "Xinyipi", "Xinyiyou", "Xinyiyi" and "Xinyixing" Scenes. We will implement punishments for breach of trust in accordance with laws and regulations, and carry out special treatment of prominent issues such as breach of trust in government affairs, non-implementation of court judgments, and breach of trust in ecological and environmental protection. Establish and improve credit repair collaborative linkage and "one-stop service" mechanism to improve credit repair efficiency. Integrate integrity education into the moral education system of schools at all levels and carry out a series of activities such as credit entering campuses, enterprises, communities, and rural areas to comprehensively enhance social integrity awareness. **Actions to create a superior business environment and improve the business environment.** Benchmark China's business environment evaluation index system and focus on enterprise Starting a business, applying for construction projects,

obtaining electricity, real estate registration, tax services,
cross-border

贸易、办理破产、获得信贷、保护中小投资者、执行合同、劳动力市场监管、政府采购、政务服务、知识产权保护、企业注销、行政审批制度改革等营商环境重点领域，组织开展专项提升行动，打造更加稳定、公平、透明、可预期的一流营商环境，推动营商环境走在全国前列。

Chapter 8 Prioritize the development of agriculture and rural areas Create an Anhui model for comprehensive rural revitalization

We should insist on solving the " three rural " issues as the top priority, comprehensively promote and implement the rural revitalization strategy in categories, strengthen the use of industry to supplement agriculture, use cities to lead rural areas, and promote the formation of a mutual promotion of industry and agriculture, complementation of urban and rural areas, coordinated development, and common prosperity. The new relationship between industry, agriculture, and urban and rural areas will accelerate the modernization of agriculture and rural areas and promote the transformation from a large agricultural province to a strong agricultural province.

Chapter 33 Improve agricultural quality, efficiency and competitiveness

Continue to strengthen the basic position of agriculture, deepen the structural reform of the agricultural supply side, promote variety cultivation, quality improvement, brand building and standardized production, and accelerate the construction of a modern agricultural industry system, production system and management system.

Enhance comprehensive agricultural production

capabilities. Improve the agricultural support and protection system and implement the “Anhui

“Grain ” high-standard farmland transformation and upgrading project, the grain sown area has stabilized at 1 More than 100 million acres,

The comprehensive production capacity is stable at 800 More than 100 million kilograms, consolidate and enhance the status of major grain-producing provinces, and resolutely shoulder the important task of food security. Accelerate the construction of a modern breeding system, establish and improve the animal epidemic prevention system, promote large-scale breeding and centralized slaughtering, make every effort to stabilize the production and supply of pigs, and gradually increase the cold chain transportation rate of livestock and

poultry products and the proportion of chilled products on the market. We will implement the strategy for safeguarding important agricultural products and strengthen green orientation, standard guidance and quality and safety supervision. Promote independent innovation in biological breeding, heavy agricultural machinery, smart agriculture, green inputs and other fields. Implement the modern seed industry to strengthen the province and promote the national germplasm resource bank project

Construction, strengthen the protection and utilization of germplasm resources, enhance the independent innovation capabilities of the seed industry, accelerate the breeding and promotion of improved seeds, and make a number of leading seed industry companies better, bigger and stronger . Strengthen the support of modern agricultural science and technology and material equipment, build a number of national and provincial agricultural industry science and technology innovation centers and innovation platform bases, and carry out the construction of full-scale mechanization demonstration counties for crop production, facility agriculture, and large-scale breeding. The contribution rate of agricultural science and technology progress will reach 67.5 % , and the comprehensive mechanization rate of crop cultivation and harvest reached 83% . Develop smart agriculture and create " digital farmers in Anhui " . Increase the research and development of green inputs such as biopesticides and organic fertilizers , improve the prevention and control system of crop diseases and

pests, strengthen the management of outstanding agricultural environmental problems such as agricultural non-point source pollution, and achieve input reduction , clean production, waste resource utilization , and industrialization The model is ecological, with the comprehensive utilization rate of crop straw reaching over 95 % and the comprehensive utilization rate of livestock and poultry manure maintaining over 85 % . Strengthen the construction of cold chain facilities for warehousing and preserving agricultural products , and create national and regional backbone cold chain logistics bases for agricultural products. Stabilize and expand the insurance coverage of important bulk crops, increase the insurance coverage rate of small farmers, and gradually increase the proportion of specialty insurance in agricultural insurance. Stabilize and strengthen subsidies for grain farmers, improve purchasing and storage control capabilities, and implement the minimum purchase price policy.

Optimize agricultural production structure and regional layout. Promote the adjustment and optimization of planting and breeding structures,

integrated rice and fishery planting and breeding in accordance with local conditions, and accelerate the development of tea, fruit, traditional Chinese medicine, etc. The development of agricultural products with advantageous characteristics such as raw materials. Scientifically utilize forest land resources to promote high-quality development of woody grain and oil and understory economies. Based on the regional resource endowment advantages, we will build a green agricultural product production, processing and supply base in the Yangtze River Delta from a high starting point to achieve a stable production base and processing

Upgrade files and smooth sales channels. Optimize the layout of agricultural productivity, promote the development of adaptive agriculture in flood storage areas, and create a "big granary" in northern Anhui, a pioneer agricultural modernization area in the Hefei metropolitan area, a modern and efficient agricultural demonstration area along the river, and a modern characteristic agricultural model area in the mountainous areas of southern Anhui and the Dabie mountainous area of western Anhui. Strengthen the construction of grain production functional areas, important agricultural product production protection areas, and characteristic agricultural product advantage areas, and strive to create a national agricultural modernization demonstration area.

Deepen and improve the agricultural product processing industry.

Implement the rural industry revitalization plan and strive to build Establish a major agricultural product processing industry province. Taking "grain first, food last" and "farmer first, worker last" as the starting point, we will coordinate the development of intensive processing, primary

processing, and comprehensive utilization of agricultural products to promote the adjustment and upgrading of rural industrial structure. Optimize the spatial layout and functional positioning of agricultural product processing parks, promote the mutual integration of agricultural production, processing, logistics, research and development, services, etc. and the development of the entire industry chain, and create an agricultural industrialization cluster with an output value of over 100 billion yuan. Promote leading enterprises in agricultural product processing to accelerate the transformation and upgrading of technological equipment, support leading enterprises in integrating resource elements, and establish industrial groups across regions and industries, so as to enhance the overall strength and competitiveness of leading enterprises. Strengthen the planning, reserve and promotion of major agricultural product processing projects. Deeply explore the cultural connotation of agricultural brands and cultivate a number of regional public brands, corporate brands and product brands of agricultural products that are well-known and influential across the country . by 2025 In 2017, the

ratio of the province's agricultural product processing output value to the total agricultural output value reached the national average level.

Enrich rural economic formats. Adapt to the consumption needs of urban and rural residents and base on local characteristics resources, expand multiple rural functions, promote the integration of primary, secondary and tertiary industries in rural areas to strengthen the chain , and achieve rural economic diversification and the development of the entire agricultural industry chain. In-depth implementation of quality leisure agriculture and rural tourism projects to enhance the brand connotation of Anhui leisure agriculture and rural tourism

and value, greatly increasing the number of receptions . Promote the connection between production and marketing of agricultural supermarkets, agricultural cooperatives, agricultural enterprises, agricultural schools, etc., encourage the development of high-tech agriculture such as factory-based and three-dimensional agriculture, develop farmland art landscape, balcony agronomy and other creative agriculture, encourage the development of agricultural production leasing business, and actively explore the individuality of agricultural products Customized services. Relying on platform carriers such as agricultural science and technology parks, agricultural product processing parks, and rural industry integrated development demonstration parks, we will actively develop new models of rural industry integrated development such as internal agricultural integration, industrial chain extension, functional expansion, industry-city integration, and multi-business compounding. We will implement a project to cultivate new agricultural business entities and improve the specialized agricultural social service system. The number of family farms will reach 200,000 and the number

of farmer cooperatives will reach 110,000. Develop various forms of moderate-scale operations, improve the interest linkage mechanism, realize the organic connection between small farmers and modern agriculture, and allow farmers to share more in the value-added benefits of the industry.

专栏 17 长三角绿色农产品生产加工供应基地建设重点工程

“158”行动计划。围绕粮油、畜禽、水产、果蔬、茶叶、中药材、油茶、土特产等优势特色产业，开展“一县一业（特）”全产业链创建，建设长三角绿色农产品生产加工供应基地。到 2025 年，每个县（市、区）至少重点培养 1 个优势主导产业，建设一批优势特色产业集群；建立 500 个长三角绿色农产品生产类、加工类、供应类示范基地；面向沪苏浙地区的农副产品和农产品加工品年销售额达到 8000 亿元。

“皖粮”高标准农田改造提升工程。以 5200 万亩粮食生产功能区、1900 万亩重要农产品生产保护区和粮食生产大县为重点，围绕田、土、水、路、林、电、技、管 8 个方面，加大土地平整、土壤改良、灌溉排水、田间道路、农田防护与生态环境保护、农田输配电、科技服务、建

After-care and other construction efforts. During the " 14th Five-Year Plan " period, 1,000 new high-standard farmlands were built in the province More than ten thousand acres,

Transform and upgrade high-standard farmland 1,000 With more than 10,000 acres, we can achieve guaranteed harvests, stable and high yields despite droughts and floods.

Quality grain engineering. Adhere to the principle of high-quality grain and good production , high-quality grain purchase, high-quality grain storage, high-quality grain addition, and high-quality grain sales , strengthen the construction of high-quality raw grain bases, and implement green grain storage upgrades, grain machine equipment upgrades, grain and oil product quality and brand improvements, grain A number of key actions including improving emergency response capabilities. We will further promote the construction of " Smart Anhui Grain " , strengthen the cultivation of the " Wanmei Grain and Oil " brand, and accelerate the construction of an Anhui Grain brand system of " provincial public brand + regional brand + corporate brand " .

Modern seed industry improvement project. Strengthen the construction of southern breeding bases and national and provincial-level breeding bases, deepen joint research on crops such as rice and wheat, livestock breeds such as pigs and broilers, and local high-quality breeds, implement livestock and poultry genetic improvement plans, and build, reconstruct and expand national germplasm resources National livestock and poultry gene bank and aquatic product germplasm resource bank. Establish and build the Anhui Provincial Breeding Research

Institute, and support qualified cities and counties in building strong cities and counties in the seed industry . Support leading seed companies to achieve higher levels of development, support large companies in entering the seed industry through mergers and acquisitions, equity participation, etc., support qualified seed companies in going public, and accelerate the construction of a commercial breeding system .

Agricultural product storage and preservation cold chain facility construction project. Support the construction of agricultural product storage and preservation cold chain facilities in villages and towns with advanced functions, safe operation, good benefits, and meeting the needs of high-quality agricultural development . By 2025 In 2016, it basically met the construction requirements for agricultural product storage and cold chain facilities for new agricultural business entities above the county level , and significantly improved the province’s fresh agricultural product storage and cold chain capabilities.

专栏 18 农产品加工业“五个一批”工程

优先发展一批农产品加工强县。加大对农产品加工强县的指导支持力度，引导农产品加工强县立足本地资源优势，集中力量建设产业规模大、创新能力强、示范带动好的农产品精深加工示范基地。到 2025 年，发展农产品加工主营业务收入超 300 亿元的强县 10 个以上，部分强县突破 500 亿元。

A number of agricultural product processing parks will be built together. Increase the integrated development of agricultural

industrial parks and rural industries

Demonstrate the integration efforts of model parks, modern agricultural demonstration areas, advantageous areas of specialty agricultural products, and strong agricultural industry towns, strengthen the construction of supporting capabilities such as infrastructure, public services, and supporting industries in the park, and attract various processing entities to the park for concentrated development .

by 2025 In the year, the main business income of construction agricultural product processing

Over 100 Billion dollar strong garden 10 More than 200 of them 3 billion More than one , some of them are strong and conflicting

Breaking 30 billion yuan.

Accelerate the creation of a number of leading agricultural product processing enterprises. Support leading enterprises to integrate resource elements through mergers, reorganizations, acquisitions, holdings, etc., encourage and guide growing enterprises with good operating performance, high technological content, strong expansion requirements, and meet the basic conditions for listing to go public and finance, and gradually

develop into overall competition A strong industry leader. By 2025 , build the main business of agricultural product processing

Income exceeds 50 15 billion-yuan enterprise More than 3 of them exceed 10 billion yuan .

Efforts will be made to introduce a number of major agricultural product processing projects. Give full play to the role of exhibition platforms such as the China Anhui Famous Agricultural Products and Agricultural Industrialization Fair, release information on major agricultural product processing investment projects to well-known enterprises in the world and the country, strengthen project tracking services, and ensure project implementation and construction start . by 2025 In 2018, the cumulative investment amount exceeded 100 100 million yuan agricultural product processing project
20 More than one .

Focus on cultivating a number of influential agricultural product brands. Formulate an agricultural product brand development strategy, establish a complete brand cultivation, development, and protection system, strengthen the protection of trademarks and geographical indications of agricultural products, further promote the “three products and one standard ” certification and the quality evaluation of specialty agricultural products, and accelerate the improvement of Anhui’s agricultural product brand awareness, reputation and credibility .
by 2025 In 2016, we cultivated agricultural products with the “Wan ” brand name.

Brand 50 **More than** 1,000 brands, among which the brand ranks among the top in terms of market share and influence in the national industry.

10 More than one .

Chapter 34 Implement rural construction actions

Put rural construction in an important position in the socialist modernization drive, optimize rural

Produce and live ecological space, continue to improve the appearance of the village and the living environment, and create a happy new countryside in the new era with strong industry, beautiful ecology, good rural customs, excellent governance, and wealthy people.

Strengthen the guidance of rural construction planning.

Efficiently utilize production space and optimize production layout

Living space, strictly protect ecological space, promote intensive and efficient rural production space, comfortable and livable living space, and natural and beautiful ecological space. Coordinate the planning and construction of towns and villages in counties, prepare "multiple plans into one" practical village plans, and achieve full coverage of village planning and management. Promote county-wide coordination of spatial layout, industrial development, infrastructure, etc., give counties more autonomy in integrating and using resources, strengthen county comprehensive service capabilities, and build towns and villages into regional centers that serve farmers. Comply with the laws of village development and evolution trends, and

in accordance with the ideas of agglomeration promotion, urban-suburban integration, characteristic protection, relocation and mergers, rationally determine the layout and scale of county villages, promote village planning and construction in a classified and orderly manner, and strictly define the standards and scope of relocated and merged villages , protect traditional villages and rural characteristics. Strengthen the planning and control of new rural housing and improve the quality of rural housing construction. Promote simplified approval of village construction projects and simplify the approval procedures and bidding procedures in accordance with the law.

Improve rural infrastructure and public service levels.

Continue to build public infrastructure the upgrading of rural water, electricity, roads, gas, communications, radio and television , logistics and other infrastructure, promoting the interconnection, co-construction and sharing of urban and rural infrastructure, and building a rationally laid out, fully functional, safe and efficient modern rural infrastructure system. Continue to promote the equalization of basic public services in urban and rural

areas, promote the allocation of public education, medical and health, public culture, social security, elderly care facilities and other resources to rural areas, focus on strengthening universal benefit, basic coverage, and basic people's livelihood construction, and establish and improve universal coverage, universal coverage, and other basic public services. A basic public service system that benefits shared benefits and integrates urban and rural areas. insist on

Focus on prevention, combine prevention and relief, integrate normal disaster reduction and extraordinary disaster relief, strengthen meteorological service capabilities for agriculture, and comprehensively improve comprehensive prevention capabilities against various disasters. Improve the management and maintenance mechanism of rural public infrastructure, implement the responsibilities of all parties, and encourage professional and market-oriented operation and maintenance.

Improve rural living environment. Continue to promote the improvement of rural living environment, Deepen and promote the "three major revolutions" of rural toilet renovation, domestic waste treatment and sewage treatment according to local conditions, continue to implement the "three major actions" of village cleaning, resource utilization of livestock and poultry waste, and village planning and construction improvement, and guide farmers to play their main role, and strive to improve the appearance of the village. Coordinate the construction of rural toilets and public health toilets, promote the renovation and upgrading of rural toilets, and

strengthen the harmless treatment and resource utilization of toilet feces. Promote on-site garbage classification and resource utilization methods suitable for rural characteristics, and encourage integrated treatment of urban and rural garbage. Promote the extension of urban sewage pipe networks to surrounding villages and optimize the layout of centralized sewage treatment facilities. Implement comprehensive improvement of rivers and lakes, strengthen dredging of rivers, ponds, ditches in front of houses and behind houses, and gradually eliminate black and smelly water bodies in rural areas. Carry out activities to create beautiful courtyards, accelerate the construction of roads into villages and households, implement rural greening actions in depth, and improve village public lighting and other service facilities. Overall planning and construction of famous tourist towns and villages will create an upgraded version of the beautiful countryside.

Strengthen rural governance. Accelerate the construction of a rural governance system led by party organizations and

Strengthen the construction of leaders and party

members of rural grassroots party organizations, and strengthen the responsibilities and guarantees for the construction of rural grassroots party organizations. We must adhere to the principle of increasing vitality through autonomy, strengthening security through the rule of law, promoting integrity through the rule of virtue, innovating rural governance methods, and improving the level of good rural governance. Give full play to the role of village regulations and folk contracts , fully implement the " four discussions and two disclosures " system, and accelerate the construction of autonomous villages.

Strengthen the publicity and education of laws and regulations, and accelerate the construction of rural areas ruled by law. We should guide farmers to be kind, filial to their elders, love their relatives, value righteousness and trustworthiness, and be diligent and thrifty in managing their families. We should give full play to the exemplary role of advanced models around the masses and accelerate the construction of rural areas governed by morality. Promote the extension of the social security prevention and control system to rural areas, thoroughly implement the rural " Snow and Bright Project ", and accelerate the construction of safe villages. Promote the change of customs in rural areas and promote the formation of civilized rural customs, good family traditions, and simple folk customs.

Column 19 Rural Construction Action

" Four Good Rural Roads " construction project. We will build, manage, protect and operate rural roads well, focus on hardening roads to connect larger natural villages, and accelerate rural road network formation and upgrading.

Improve the access depth and safety level of rural roads and

build a rural road network with extensive coverage. During the "14th Five-Year Plan" period, the province implemented 5,000 rural backbone road network upgrade projects Kilometers or more, rural roads

Road extension and connection project 10000 kilometers or more.

Rural water supply security project. Strengthen the construction and protection of stable water sources such as small and medium-sized reservoirs , implement large-scale water supply project construction and standardized transformation of small projects, and promote urban and rural water supply. Integration, accelerating the automated management of rural water supply, and further ensuring the safety of rural water supply. by 2025 In 2017, the penetration rate of tap water in rural areas of the province reached over 90% .

"441" project of beautiful rural construction . Focusing on the beauty of ecological and livable villages, the prosperity of industry and the beauty of people' s lives, To promote a civilized, harmonious and beautiful rural style, focusing on rural domestic waste and sewage treatment, toilet revolution, and village appearance improvement , we will organize and implement a five-year action to improve the rural living environment and build 4,000 A beautiful person Lai Village Center Village and 40000 A beautiful natural village in the countryside, increased by 1000 The construction level of the built-up area where each township government is located .

Rural revitalization talent cultivation project. Implement the " Hui Nong Star " rural talent training plan to cultivate Focusing on cultivating outstanding agricultural scientific and

technological talents, management talents and rural practical talents who serve the countryside, we will select **200 talents** every two years. name. Implement a high-quality farmer cultivation plan to cultivate high-quality farmers

质农民 15 万人。实施农村产业发展带头人培育计划，培育农村产业发展带头人 1.5 万人。实施农村实用人才带头人能力提升计划，培训学员 4000 人。实施农业技能人才技能等级提升计划，开展职业技能培训及技能等级认定 4 万人。实施社会人才投身乡村建设提升计划，引导和支持企业家、党政干部、专家学者、医生教师、规划师、建筑师、律师等人才，通过多种方式服务乡村振兴事业。

Chapter 35 Deepen rural reform

Promote equal exchange and two-way flow of urban and rural factors, promote more flow of factors to the countryside, enhance the vitality of rural development, and inject new momentum into the overall revitalization of the countryside.

Deepen the reform of the rural land system. The implementation of the second round of land contracting will be postponed after expiration. We will implement a 30-year policy to improve the "separation of three rights" system for rural contracted land, strengthen the application of the results of rights confirmation, registration and certification, strengthen the management of contracted land, and accelerate the release of land management rights. Deepen the reform of the rural land expropriation

system, implement relevant institutional regulations for public interest land expropriation, strictly define public interest land, narrow the scope of land expropriation, and improve the land acquisition compensation and resettlement mechanism. We will steadily and prudently advance the reform of the rural homestead system, deepen a new round of reform pilots, and actively explore the form of separation of ownership, qualification rights, and use rights of rural homesteads. Expand the scope of pilot projects for revitalizing idle rural homesteads and idle residential buildings. Make good use of the policy linking the increase and decrease of urban and rural construction land, and promote the reclamation and reclamation of idle, abandoned, and inefficiently used rural construction land.

Consolidate the results of the reform of the rural collective property rights system. Carry out rural collective asset regularization

Inventory, explore ways to empower farmers to share their collective assets, and improve rural collective economic organizations

Organize and manage the system and improve the village collective economic legal person governance mechanism. Deeply promote the " three changes " reform in rural areas, based on local characteristic resources, guide agricultural enterprises, farmers' cooperatives, family farms and other new agricultural business entities to actively participate, carry out cooperation through stock conversion, leasing, joint operations and other methods, and revitalize rural areas in multiple ways Resource elements can promote the development of village collective economy and increase farmers' income and become rich. Deeply implement the " Hundreds and Thousands " project to support and strengthen the village-level collective economy , explore the establishment of a market-oriented rural collective economic operating mechanism, and develop a new rural collective economy. Effectively reduce the burden on village-level organizations.

Strengthen the protection of agricultural and rural factors. Improve the system and mechanism for integrated urban and rural development and promote Enter into the construction of urban-rural integrated

development pilot zone. Implement the talent growth plan for rural revitalization, establish an incentive mechanism for urban talents to enter rural areas, encourage scientific researchers to work part-time in rural areas, leave their jobs to innovate and start businesses, and promote professional title evaluation, wages and benefits, and social security to favor rural teachers, doctors, and grassroots agricultural technicians. Support college graduates to find employment and start businesses in rural areas, and improve the benefits of rural grassroots cadres in a timely manner. Improve the unified urban and rural construction land market, promote the entry of rural collective commercial construction land into the market in an orderly manner, and establish a fair and reasonable mechanism for the distribution of value-added income from entering the market. In the annual land use plan, a certain proportion of land use indicators shall be allocated exclusively for rural industrial development and rural construction, and indicators linked to the increase or decrease in urban and rural construction land shall be used first for agriculture and rural areas. Steadily increase the

proportion of land transfer proceeds used in agriculture and rural areas, and encourage cities and counties to establish rural revitalization investment funds. Improve the rural financial service system, ensure that the total amount of agriculture-related loans continues to increase, continue to expand the coverage of agricultural credit guarantee business, and encourage the use of agricultural product futures markets. Support the development of rural enterprises and encourage social capital investment in agricultural fields suitable for industrialized, large-scale and intensive operations .

Chapter 36 Achieve effective connection between consolidating and expanding poverty alleviation achievements and rural revitalization

We will give top priority to consolidating and expanding the results of poverty alleviation, concentrate resources to support poverty alleviation, shift to consolidating and expanding the results of poverty alleviation and comprehensively promote rural revitalization, and be at the forefront of the country in consolidating the results of poverty alleviation.

Consolidate the results of poverty alleviation. For counties that have been lifted out of poverty, they will be established from the date they are lifted out of poverty. 5

During the transition period of 2018, we will effectively connect the leadership system, work system, development plan, policy measures, assessment mechanism, etc. during the transition period. During the transition period, the main assistance policies will be maintained generally stable, the "four no-picks" requirements will be implemented, and poverty alleviation policies will be coordinated and coordinated by category to ensure policy continuity.

During the transition period, on the premise of maintaining the overall stability of fiscal support policies, we will rationally arrange the scale of fiscal investment, optimize the expenditure structure, and adjust the focus of support based on the needs of the transition and the financial situation . We will improve the dynamic monitoring and assistance mechanism to prevent people from returning to poverty, carry out regular inspections and dynamic management, and focus on monitoring the income and expenditure status, " two no worries and three guarantees " and drinking water safety. Strengthen follow-up support for relocation of poverty alleviation, promote employment through multiple channels, improve supporting infrastructure and public services, and strengthen social management . Strengthen the asset management and supervision of poverty alleviation projects, and clarify the property rights of operating assets and the use of proceeds. Adhere to the combination of supporting people's will and wisdom, giving full play to the role of exemplary demonstration and leading role in getting rich through hard work, and encouraging low-income people with the ability to work to work hard and get rich.

Improve the overall development level of poverty-

stricken areas. Strengthen infrastructure construction and continue to increase

Increase support for infrastructure construction in poverty-stricken areas and continue to improve infrastructure conditions in poverty-stricken areas.

Strengthen industrial support, implement actions to improve characteristic planting and breeding industries, further promote the " four belts and one self " industrial poverty alleviation, and plan and develop rural characteristics based on poverty-stricken counties.

industries to promote the development and growth of rural characteristic industries in poverty-stricken areas. Strengthen and stabilize employment, increase the export of organized labor services for those who have been lifted out of poverty, and support the widespread use of work-for-relief methods in the construction, management and maintenance of agricultural-related projects in poverty-stricken areas. We will further improve the level of public services in poverty-stricken areas, continue to improve the conditions for running compulsory education in poverty-stricken areas, strengthen the basic capacity building of vocational colleges and technical colleges, and keep health assistance policies basically stable during the transition period. Improve the social security and assistance system in poverty-stricken areas, and improve the minimum living security system. Establish an assistance mechanism for rural low-income populations and underdeveloped areas, actively explore new paths for paired assistance and complementary advantages between economically strong counties and underdeveloped areas, and strengthen in-depth

cooperation in industrial co-construction, labor collaboration, and human resources support. We will deepen the "one grasp and two promotion" project, implement the work requirements of five-level secretaries in rural revitalization, and continue to strengthen the building of party organizations in poverty-stricken villages. We will build a rural revitalization leadership system with clear responsibilities, each responsible for their own responsibilities, and strong execution, solidly promote the connection between agencies and teams, and continue to dispatch first secretaries and work teams to villages that consolidate the results of poverty alleviation and have heavy rural revitalization tasks. We will adhere to and improve the mechanism for social forces to participate in assistance, and carry out the "Ten Thousand Enterprises Connect Thousands of Villages" action. Improve and optimize the rural revitalization performance evaluation indicator system.

专栏 20 分类梯次推进乡村振兴工程

先行示范区。 区位优势优越，县域经济发展质量高，农业农村发展基础好，基本没有巩固拓展脱贫攻坚成果任务。包括：肥东县、肥西县、瑶海区、²⁸⁰庐阳区、蜀山区、包河区，相山区、烈山区，龙子湖区、蚌山区、禹会区，大通区、谢家集区、八公山区，天长市、琅琊区、南谯区，霍山县，当涂县、花山区、雨山区、博望区，湾沚区、繁昌区、镜湖区、

Yijiang District, Jiujiang District, Guangde City, Ningguo City , Tongguan District, Yingjiang District, Dagan District, Tunxi District, Huizhou District, a total of 34 counties (cities, districts). The main task is to benchmark the advanced areas of the Yangtze River Delta, explore experience, take the lead in breakthroughs, and be at the forefront, promote rural revitalization from a high starting point and high standards, create an Anhui model for comprehensive rural revitalization, and set a good example for other counties. By 2025 , a group of villages with good resource conditions , favorable geographical location, prosperous industrial development, and strong collective economy will take the lead in basically realizing agricultural and rural modernization.

Normal advancement zone. The foundation for agricultural and rural development is good, and the task of consolidating and expanding the results of poverty alleviation is light. Including: Changfeng County, Lujiang County, Chaohu City, Suixi County, Duji District, Wuhe County, Guzhen County, Huaishang District, Fengtai County, Tianjia'an District, Panji District, Mingguang City, Quanjiao County, Lai An County, Fengyang County, Hanshan County, He County, Wuwei City, Nanling County, Langxi County, Jing County, Jixi County, Jingde County, Xuanzhou District, Songyang County, Ngee'an District, suburbs, east to the county, Qingyang County, Guichi District, Tongcheng City , Huaining County, Yixiu District, She County, Xiuning County, Yi County, Qimen County, and

Huangshan District, a total of 38 counties (cities and

districts). The main task is to make good use of existing policies, and on the basis of consolidating and expanding the results of poverty alleviation, continue to make efforts from easy to difficult, accelerate rural revitalization, and reach or exceed the national average level. to 20 2 5 In 2009, the agricultural and rural modernization system was initially established, and rural revitalization achieved phased results.

Continue to attack tough areas. The economic foundation, industrial foundation, rural infrastructure and public services are relatively Weak, the task of consolidating and expanding the results of poverty alleviation is heavy. Including: Mengcheng County, Woyang County, Lixin County, Qiaocheng District , Dangshan County, Xiao County, Lingbi County, Sixian County, Yongqiao District, Huaiyuan County, Yingshang County, Jieshou City, Linqan County, Fu Nan County, Taihe County, Yingzhou District, Yingquan District, Yingdong District, Shouxian County, Dingyuan County, Huoqiu County, Jinzhai County, Shucheng County, Jin'an District, Yu'an District, Yeji District, Shi Tai County, Qianshan City, Taihu County, Wangjiang County , Susong County and Yuexi County, a total of 32 counties (cities and districts). The main task is to fully utilize the policy and further increase support, shifting from concentrating resources to support poverty alleviation to consolidating and expanding the results of poverty alleviation and comprehensively promoting rural revitalization, consolidating and improving, striving to catch up, and keeping up with the national average . By 2025 , the results of poverty alleviation will be consolidated and

improved, and a system and mechanism that combines long-term and short-term measures and address both symptoms and root causes will be fully established.

Title 9 Optimize regional economic layout Promote the coordinated development of "one circle and five districts "

Comprehensively implement the national major regional strategies, regional coordinated development strategies, and main functional area strategies, improve provincial coordinated development systems and mechanisms, promote the reasonable flow and efficient aggregation of various factors, and build a provincial territorial spatial layout and support system for high-quality development.

Chapter 37 Build a new pattern of land and space development and protection

Based on the carrying capacity of resources and the environment, we should give full play to the comparative advantages of various regions and promote the formation of a new pattern of land and space development and protection with obvious main functions, complementary advantages and high-quality development .

Strengthen the orientation of the main functional area.

Vigorously promote efficient agglomeration economy in urbanized areas and population, protect basic farmland and ecological space, and enhance industrial supporting capabilities. Vigorously promote the main agricultural product-producing areas to enhance agricultural production capabilities, increase support for the construction of the country's main agricultural product-producing areas, and guide the concentrated development of agricultural product processing, circulation, storage and transportation enterprises. Promote ecological functional zones to focus on protecting the ecological environment, providing ecological products, and developing characteristic industries according to local conditions. Increase fiscal transfer payments to major agricultural product-producing areas and key ecological functional zones, prioritize investment in public services to major agricultural product-producing areas and key ecological functional zones with weak basic public service foundations, and support the gradual and orderly transfer of the population in ecological functional zones. . Strengthen the protection of

natural ecosystems in areas prohibited from development

and repair.

Optimize the spatial layout of the country. Compile and implement three-category land spatial planning at the provincial, municipal, county and township levels, and build a “ one map ” for the development and protection of provincial land space . Carry out resource and environmental carrying capacity and land space development suitability evaluations, coordinate the layout of ecological, agricultural, urban and other functional spaces, and coordinate the delineation and implementation of ecological protection red lines, permanent basic farmland, urban development boundaries and other spatial control boundaries. Implement the strategic orientation of the provincial development plan and optimize the layout of major infrastructure, major productivity and public resources. Implement the principles of space development and protection, make every effort to ensure the space needs for the implementation of national strategies such as the integrated development of the Yangtze River Delta, the development of the Yangtze River Economic Belt, and the rise of the central region, and build major regional

development platforms such as new functional zones in adjacent interprovincial areas and interprovincial industrial cooperation parks. Provide strong support.

Chapter 38 High-quality construction of "one circle and five districts "

Clarify the strategic positioning, strengthen the complementation of advantages, enhance the endogenous development power of each regional sector, and create a high-quality development power system with Anhui characteristics.

High-level construction of Hefei metropolitan area.

Steadily promote the expansion and quality improvement of the Hefei metropolitan area, Build the eastern and central science and technology innovation center, an important national modern industrial base, a new highland for inland reform and opening up, and create a core growth pole that supports the development of the province. Deeply implement the action plan for the integrated development of the Hefei metropolitan area, promote the coordinated development of industrial chain innovation chains, accelerate the interconnection of

public services and infrastructure, and build a one-hour commuting system, an integrated industrial system, and a one-card service system. Improve Hefei's radiation and driving capabilities, accelerate technological, industrial, and institutional innovation, and accelerate the Hefei-Liu Economic Corridor's electronic information and equipment

We will promote the development of advanced manufacturing and high-tech service industries such as manufacturing, energy conservation and environmental protection, promote the construction of the Hehuai Industrial Corridor, and plan to build the Hewuma , Hechu , and Copper industrial corridors. Support the coordinated development of Hefei Bengbu in new display, new generation information technology and other industries to create a sensor industry cluster. Strengthen coordinated development and regional linkage with the Nanjing metropolitan area to create a model for coordinated development in the eastern and central regions. Strengthen benchmarking and docking with the Shanghai metropolitan area, deepen interaction and complementation with the Hangzhou and Ningbo metropolitan areas, and jointly build a world-class city cluster in the Yangtze River Delta.

Deepen the construction of Hewubeng National Independent Innovation Demonstration Zone. Adhere to original innovation, technology

We will promote technological innovation, industrial innovation, and institutional innovation in an integrated

manner to create a full-chain innovation system to better lead and serve the innovation and development of the province. Bravely undertake the tasks of national science and technology plans and form more independent innovation achievements with international impact. Give full play to the role of the Yangtze River Delta Ocean Innovation Center and effectively activate the innovation, entrepreneurship, and creative momentum of overseas students. Actively participate in G60 The construction of science and technology innovation corridors will expand cooperation space in aspects such as industrial innovation, park development, factor supply, and mechanism coordination. Promote the development of "one zone with multiple parks" in national high-tech industrial development zones, continue to optimize and improve functions, focus on the innovation needs of leading industries, layout and build a number of industrial innovation centers, manufacturing innovation centers, technology innovation centers and public technical service platforms, and promote Strategic emerging industries will become bigger and stronger. Efforts will be made to cultivate and introduce high-level R&D talents and industrial talents, improve the

integrated and coordinated development mechanism of talents, and create a good environment for innovation and entrepreneurship of all types of talents. by 2025 In 2019, the demonstration zone strives to double its technology absorption contract turnover.

Improve and develop the Wanjiang urban belt to undertake industrial transfer demonstration zones.

Prominent in the Yangtze River Delta
Positioning the heart of the city, benchmarking it against Jiangsu Sunan and Zhejiang Hangjiahu, accelerating its construction into the "cabbage heart" of the Yangtze River Delta , and playing a leading role in the province's high-quality development. Actively accept

In line with the layout and transfer of emerging industries, we strive to make continuous breakthroughs in the development of strategic emerging industries, the transformation and upgrading of traditional industries, and the cultivation of future industries, form a number of world-class advanced manufacturing clusters, and build the Wanjiang Intelligent Manufacturing Corridor. Promote strategic coordination and thematic collaboration between cities in Anhui and Jiangsu and Shanghai, Jiangsu and Zhejiang in the transformation of scientific and technological achievements, and build a unique base for the transformation and application of scientific and technological achievements in the Yangtze River Delta. Continue to strengthen the "one axis, two cores and two wings" spatial pattern, further enhance the energy level of the central city, promote the coordinated development of cities across the river, and form a multi-center, multi-level, and multi-node network urban system. Build a modern infrastructure system, build a major hub for the Wanjiang River channel, and strive to keep the level of new infrastructure construction in

sync with that of Shanghai, Jiangsu and Zhejiang. Accelerate the construction of green ecological corridors along the river and take the lead in realizing the green transformation of economic and social development. Benchmarking national-level new districts, supporting the high-quality development of Jiangbei and Jiangnan emerging industry clusters, encouraging pilot trials, reform and innovation, and accelerating the creation of new urban districts . by 2025 In 2018, the regional GDP of Wanjiang Demonstration Zone will strive to reach 4 More than one trillion yuan .

Promote the revitalization and development of northern Anhui. To promote the Huaihe (Anhui) Ecological Economic Zone

Taking construction as the starting point, we will improve mechanisms, set up special classes, give full play to our advantages, make up for our shortcomings, create a new source of high-quality development, and achieve economic growth that is significantly higher than that of the entire province. Relying on the construction of major emerging industry bases, we will implement a number of major scientific and technological projects and major projects to create a number of

strategic emerging industry clusters with important influence. Actively strive to create a national-level advantageous area for characteristic agricultural products, and accelerate the formation of a characteristic agricultural industry cluster with the production, processing, circulation, and consumption of characteristic agricultural products as the main body, and the integrated development of technological innovation, leisure tourism, and supporting agricultural input production. Strengthen the construction of transportation infrastructure in northern Anhui and build a network with high-speed railways, intercity railways and expressways as the backbone and national and provincial trunk lines as the context.

It is a modern comprehensive transportation network with reasonable layout of civil transportation airports and general airports , and the connection of the shipping trunks and branches of the Huaihe River. Relying on the east-route project of diverting the Yangtze River to the Huaihe River and the South-to-North Water Diversion Project, we will promote the communication of rivers and lakes, establish a mechanism for effective protection and rational allocation of water resources, and accelerate the construction of a modern water network system with mutual support from multiple sources, orderly utilization, and strong protection . We will promote joint prevention and control of the environment in the Huaihe River Basin with high standards, and increase ecological protection and management of the Huaihe River coastline. Accelerate the improvement of the energy level of central cities, enhance the economic and population carrying capacity, strengthen interconnected development, and promote ecological co-protection, industrial linkage, channel connection, urban and rural coordination, and service sharing.

Strengthen financial services in northern Anhui and increase support for the introduction of financial talents, the establishment of financial institutions, and the development of financial services for the private economy.

Deeply promote the revitalization and development of the old revolutionary base area of Dabie Mountain in western Anhui. Increase a new round of policies

Strengthen support, consolidate and expand the results of poverty alleviation, and strive to further narrow the gap between the per capita income of urban and rural residents in old areas and the provincial average.

Enlarge and strengthen adaptive industries and characteristic economies, accelerate the development of new chemical materials, new energy vehicles and parts, textiles and clothing, biomedicine, hydrogen energy and other characteristic advantageous industries and supporting industries, promote the development of advantageous mineral resources such as iron ore, and enhance The construction level of characteristic industrial parks. Vigorously promote the production and intensive processing of specialty agricultural products such as tea, Chinese medicinal materials, fruits,

vegetables, and woody oils, and create an important national supply base for characteristic and advantageous agricultural products. Accelerate the development of red tourism, leisure vacation, and health care industries, and build a high-quality red tourism demonstration base and tourism health care base in the Yangtze River Delta. Implement the construction project of external communication channels in the old revolutionary base of Dabie Mountain, improve water conservancy facilities, and consolidate and upgrade the power grid in the hydropower supply area. Build a comprehensive protection system for soil and water conservation in the Dabie Mountains and build important ecological security barriers in the middle and lower reaches of the Yangtze River and Huaihe River .

Accelerate the construction of the Wannan International Cultural Tourism Demonstration Zone.

Accelerate the development of regional tourism development, build a pioneering area for the construction of a beautiful China, a world-class tourist destination, and an innovation area for the inheritance of excellent Chinese traditional culture, and further increase the proportion of the cultural tourism industry in the province. Promote the integrated development of ecology, culture, and tourism, improve technological level, cultural connotation, and green content, increase creative products, experiential products, and customized products, focus on the development of emerging business formats such as study tours, and wellness tourism, and create integrated development of culture and tourism industries Demonstration Area. Accelerate the construction of world-class natural ecological and cultural tourism corridors in Hangzhou and Huangshan, and support Huangshan, Chizhou, Anqing, etc. in establishing national full-region tourism demonstration zones. Strengthen the construction of public service facilities across the region, promote the construction of smart scenic spots,

strengthen the construction of tourism and leisure facilities , and improve the supporting facilities of high-quality tourist routes. Strengthen the protection and inheritance of traditional cultural resources and implement projects to protect and utilize ancient villages and buildings. Promote the construction of a national historical and cultural city, continuously improve the cultural ecological protection mechanism, and improve the intangible cultural heritage protection system.

Chapter 39 Promote the revitalization and development of special types of areas

Adhere to ecological priority and green development, vigorously improve the sustainable development capabilities of resource-based areas, and accelerate the overall economic transformation of old industrial cities.

Support the transformation and development of resource-based regions. Take resource-depleted cities, coal mining subsidence areas, Focusing on independent industrial and mining areas, we will promote the conversion of old and new driving forces, strengthen environmental protection and

ecological governance, and cultivate and expand alternative industries in accordance with local conditions. Improve policies to support the transformation and development of resource-based areas, and increase support for park construction, fund allocation, and land use guarantees. Coordinate the transformation and upgrading of traditional industries and the cultivation and growth of successor industries, and promote the extension of resource industries downstream in an orderly manner . Increase the intensity of mineral resource exploration and standardize the order of resource development

In order to promote the construction of mineral resources exploration bases and development and utilization bases. Accelerate the implementation of the comprehensive management project of coal mining subsidence areas in the Lianghuai Mining Area, promote the transformation and upgrading of independent industrial and mining areas such as Suzhou Yongqiao , Tongling Lion Mountain, and Guangde Xinhang , and support the construction of industrial transformation and upgrading demonstration zones such as Tongling. We will increase efforts to renovate old residential areas in resource-based cities and strengthen the construction of public services and social security service facilities. Support the construction of new energy projects such as water surface photovoltaics in the coal mining subsidence areas of the Huaihe River Basin.

Accelerate the renewal and transformation of old industrial cities. Support old industrial cities to strengthen their innovation drive, Give full play to the advantages of production capacity scale and market share, accelerate the reconstruction of the competitive advantage of the manufacturing

industry, refine and strengthen pillar industries, vigorously develop the daily service industry, and promote the transformation of " old industrial cities " into " famous industrial cities ". Pay attention to the protection of historical culture and urban style, carry out the protection and utilization of industrial heritage through industrial museums, industrial tourism, creative cultural industrial parks, etc., explore the cultural connotation of industrial heritage, and create a series of urban memories, knowledge dissemination, cultural creativity, and leisure experiences. " Life Show Belt " .

Chapter 40 Vigorously develop county economy

Implement the main functional positioning of counties, strengthen factor support, accelerate economic characteristics and industrial clustering, and promote county economic development in categories.

Cultivate county-specific industries . Deeply implement county characteristic industrial clusters (bases) The construction project highlights characteristic resources, characteristic products, characteristic platforms, and characteristic business formats. In

accordance with "one county , one industry, one county, one cluster (base) ", we will enhance and expand leading industries, and continue to create large-scale, highly specialized, and extended A county-specific industrial cluster (base) with good supporting facilities and strong support and driving force . Strengthen and improve key central towns

color industry, strengthen interaction and collaboration with industries in central cities, and deeply integrate into the industrial division of labor system . Continue to implement county economic classification assessment. by 2025 In 2016, the province strived to cultivate into 25 companies with an annual output value of 10 billion yuan and 5 companies with an annual output value of 10 billion yuan. 30 billion yuan , 2 50 billion yuan county characteristic industrial cluster (base).

Strengthen the protection of county elements. Innovate talent training and introduce policies and measures to increase support for The attractiveness of various professional and technical talents. Revitalize existing construction land and increase land support for county agricultural product processing, agricultural product cold chain, logistics and warehousing, origin wholesale markets, small and micro business parks, leisure agriculture, rural tourism and other projects. Support the construction of county logistics systems and accelerate the improvement of the three-level logistics node

network in counties and villages. Encourage banking financial institutions to moderately delegate loan approval authority to county branches. Guide counties (cities) to establish credit risk compensation funds for small and micro enterprises and support the listing of county-level enterprises.

Chapter 41 Establish and improve a new mechanism for coordinated regional development

We will improve mechanisms such as regional strategic coordination, regional cooperation and mutual assistance, and inter-regional interest links, and promote the coordinated and joint development of regional sectors.

Deepen regional cooperation and mutual assistance.

Strengthen north-south pairing cooperation and joint construction of parks, and increase financial, taxation, financial, land and other support will be provided to promote the development of jointly built parks in Fuhe , Bowu , Suma , Bengtong , Huoxin, etc., and promote industrial division of labor, infrastructure, public services, environmental governance, opening up to the outside world, reform and

innovation, etc. Coordinate and link up to build a cooperation platform for industry, technology, innovation, talent and other areas. Actively explore the establishment of cross-regional coordinated governance models and encourage the establishment of various forms of city alliances. Strengthen cooperation between the upstream and downstream regions of key river basins , innovate and improve unified planning, unified management, cooperation and joint construction, and benefit

A new cooperation mechanism for benefit sharing.

Coordinate and promote counterpart assistance to Tibet, Xinjiang and the Three Gorges Reservoir Area to achieve win-win cooperation and development.

Strengthen regional policy guarantees. Implement differentiated regional policies and improve regional boards

Block imbalance status. Support cities, counties (districts) in formulating relevant policies to attract domestic and foreign talents. Based on the basic conditions of various places, the assessment of districts and cities will be classified. Increase the intensity of balanced transfer payments, fully consider inter-regional expenditure cost factors, effectively enhance the self-development capabilities of underdeveloped areas, and support Lu'an City in the forefront of high-quality development in old revolutionary areas such as Dabie Mountain. Focusing on key areas such as narrowing regional development gaps, regional integration, and resource and environmental coordination, we will establish an evaluation index system for regional coordinated development to

scientifically and objectively evaluate the coordination of regional development.

Innovate the market-oriented coordination model.

Establish a collaborative linkage mechanism for various market entities,

Encourage industry organizations, chambers of commerce, industry-university-research alliances, etc. to carry out cross-regional cooperation in multiple fields, eliminate discriminatory and hidden regional market access restrictions, and promote the orderly and free flow of inter-regional production factors and efficient allocation of resources. Innovate diversified financing and operating mechanisms, encourage the establishment of regional development funds, build market-oriented cost sharing and benefit sharing mechanisms for cross-regional industrial transfer and park cooperation and joint construction, and form a new model of inter-regional interest linkage.

Chapter 10: Promote the new type of urbanization with people at the core and comprehensively improve the quality of urbanization development

Coordinate and promote human urbanization and urban modernization, promote the integration of more agricultural migrant populations into cities, accelerate the construction of modern metropolitan areas and urban agglomerations, build an urbanization spatial layout with central cities as the guide and county towns as the important carrier, and create high-quality cities suitable for living, working and traveling, fully unleashing the huge momentum of new urbanization to stimulate domestic demand .

Chapter 42 Accelerate the urbanization of agricultural transfer population

Adhere to prioritizing the existing population and driving the increase, coordinate the reform of the

household registration system and the full coverage of urban basic public services for the permanent population, and enhance the convenience, sense of belonging and gain for the agricultural migrant population to settle in cities and towns.

Deepen the reform of the household registration system. Strengthen the willingness of agricultural migrant workers to settle in cities and encourage We encourage cities and towns to simplify household registration transfer procedures and improve the convenience of settling in. Increase the enthusiasm of cities and towns to absorb the agricultural migrant population to settle down, strengthen the financial support for the urbanization of the agricultural migrant population, and increase the linkage between the new construction land plan indicators and the number of urban residents. Maintain the rural rights and interests of farmers who have settled in cities, fully respect their wishes, allow farmers who have settled in cities to continue to retain their legally obtained rural land contract management rights, homestead use rights, and collective income distribution rights, and improve the coverage of rights confirmation and registration,

benefit compensation and standardized transfer a package of policy systems. Improve the residence permit system. Based on the main function positioning, guide

The agricultural population migrates to cities and towns in an orderly manner according to regions and priorities.

Promote full coverage of basic public services in cities and towns. Effectively improve farmers' employment and entrepreneurial capabilities, conduct extensive vocational skills training for farmers, and promote the transformation of agricultural migrant workers into modern industrial workers. Improve the level of housing security for the agricultural migrant population, and include more qualified newly employed workers without housing, migrant workers, etc. into the scope of security. We will increase the educational security for the children of the agricultural migrant population, and improve the enrollment policy for the children of the migrant population who are mainly based on their residence certificates. Improve the localized management system of medical and health care, and include the agricultural migrant population and their accompanying family members into the community health service system. Use information technology to build a convenient and efficient public service platform, and vigorously improve the efficiency of cross-system and cross-regional transfer and continuation of social

security. Optimize the layout of basic public service facilities in the city, focusing on strengthening the construction of public kindergartens, primary and secondary schools, and community health service institutions in new urban areas, county towns and other areas. Rely on community service centers, group organizations, social organizations, etc. to help agricultural migrant workers and their accompanying family members quickly integrate into urban production and life.

Chapter 43 Improve the spatial layout of urbanization

Adhere to overall planning, optimized layout, division of labor and cooperation, and leading the small ones with the big ones, promote the healthy development of metropolitan areas and urban agglomerations, and build an urbanization spatial pattern for the coordinated development of large, medium and small cities and small towns.

Promote the construction of metropolitan areas and urban agglomerations. Accelerate the improvement of the Hefei Metropolitan Area Normalization Agreement

The same mechanism will guide the cities in the circle to adjust and optimize their functional positioning, and form an integrated development pattern of complementary advantages, division of labor and collaboration. Combined with the construction of the Yangtze River diversion project to feed the Huaihe River , support the development of Hefei along the Yangtze River and closely interact with the Wanjiang River urban belt; strengthen the Hefei metropolitan area

It will radiate and drive the areas along the Huaihe River and promote the accelerated development of cities in northern Anhui. Encourage cities with close spatial distance in the province to accelerate the development of clusters, promote the integration of Heliu, Hehuai, Wuma , Wuxuan , Tongchi, Huai (south) Beng, and Huai (north) Su, and coordinate urban planning and Substantial progress has been made in the co-construction and sharing of infrastructure, win-win cooperation in industrial development, collaborative management of public affairs, and joint prevention and control of the ecological environment. We will steadily promote the adjustment of administrative divisions in accordance with the law and advance " county to district " and " county to city " in an orderly manner .

Accelerate the construction of a multi-center urban development pattern. Support Hefei' s move towards becoming a national central city

City development, accelerate the construction of " five highlands and one demonstration ", promote the construction of Binhu New District with high standards, comprehensively enhance the sub-center function of the

world-class urban agglomeration in the Yangtze River Delta, and accelerate the construction of an international emerging megacity. Support Wuhu in building a provincial sub-central city, accelerate the construction of "Four Famous Cities ", promote the construction of Jiangbei New District and Aviation New City with high standards, strive to become a national industrial innovation center, improve the city's energy level, and accelerate the construction of a modern city with important influence in the Yangtze River Delta City. Promote the construction of a modern regional central city, support Anqing in building a key city in the Yangtze River Delta region and an important modern, green and safe comprehensive chemical industry base in the country; support Fuyang in building a key city in the Yangtze River Delta region and a central city in the Central Plains urban agglomeration region; support Bengbu in building the Huaihe River Eco-economic belt and central city in northern Anhui, world-class silicon-based bio-based manufacturing base; support Huangshan in building a cultural tourism city with international influence and a model city for the construction of Beautiful China. Promote the

construction of a modern city in the central area of the Yangtze River Delta, support Ma'anshan in creating a national ecological civilization construction demonstration city, and build an influential smart manufacturing city in the Yangtze River Delta; support Tongling in building a national resource-based city demonstration city and a highland for the development of international copper industry clusters; support Chuzhou in building a An important national industrial base for smart home appliances, new materials and new energy; supporting Chizhou' s modernization construction

Binjiang Industrial New City will build an important landscape ecological city in the Yangtze River Delta; support Xuancheng in building a new processing and manufacturing base to undertake the transfer of industries and capital from the east, and a production, processing and supply base for high-quality agricultural products in the Yangtze River Delta. Build an interprovincial adjacent regional central city, support Bozhou in building an important modern traditional Chinese medicine industry base and a health cultural tourism base in the country; support Suzhou in building an important digital economic base and modern logistics base in the Yangtze River Delta region; support Lu'an in building a collaborative innovation industry base in the Hefei metropolitan area , a nationally renowned red tourism demonstration base and health care base. Build a demonstration city for green transformation and development, support Huaibei in building a national aviation materials production base, energy security base, and agricultural and sideline products deep processing industry base; support Huainan in building an important national energy base, a coal-

based industrial ecological demonstration base, and an important advanced manufacturing base in the province . Formulate a new round of new urbanization development plans and a high-quality urban development policy system to support cities in improving planning and construction according to functional positioning. Support cities with strong resource and environmental carrying capacity and good industry-urban integration to plan and establish provincial new districts and suburban new cities.

Accelerate the development of small and medium-sized cities. Implement the modern small and medium-sized city cultivation project and guide

Industries and populations are deployed in counties and small towns with strong resource and environmental carrying capacity and great development potential. We must insist on building the county seat into the main carrier to undertake the urbanization of the agricultural transfer population, and accelerate the urbanization of the county seat to make up for the shortcomings and weaknesses. Focus on raising the standards and expanding the scope of public service facilities , optimizing county medical and health,

education, elderly care, culture, tourism and sports , social welfare and community comprehensive service facilities. Focus on upgrading and expanding the capacity of environmental sanitation facilities, and improve the harmless resource treatment facilities of garbage, centralized sewage treatment facilities and county public toilets. Focusing on the upgrading of municipal public facilities , we will promote municipal transportation facilities, municipal pipe network facilities, distribution and delivery facilities, the renovation of old communities and the smartization of counties.

Transformation. Focusing on improving the quality and efficiency of industrial cultivation facilities, we will improve the supporting facilities of the county industrial platform, cold chain logistics facilities and farmers' markets. Guide labor-intensive industries, county-specific economies and rural secondary and tertiary industries to cluster and develop in counties. Support counties with good conditions to establish national and provincial new urbanization model counties, and carry out pilot reform of setting up streets in counties with larger populations in accordance with the law. Build high-quality characteristic towns and further promote the reform of the administrative system of economically developed towns.

Chapter 44 Comprehensively improve urban quality

Adhere to the people's city built by the people and the people's city for the people, accelerate the construction of new cities , improve the quality of urban development, and better meet the economic needs, living needs, ecological needs and security needs of citizens.

Improve the city's comprehensive functions. Optimize the layout of urban transportation hubs and accelerate the construction of integrated About a low-carbon, multi-party linkage urban modern comprehensive transportation system. Accelerate the construction of urban trunk roads, increase the density of urban road networks, and improve the urban slow-traffic system. Increase the construction of public parking lots, three-dimensional garages, charging piles and other facilities, focusing on solving the problem of parking difficulties in old cities and old communities. Improve the construction level of urban community infrastructure and public service facilities and fill in functional shortcomings. Support the construction of leisure resort cities, large-scale tourism complexes, and central recreation areas , develop urban greenways, cycling parks, and slow-traffic systems, and expand urban sports and leisure spaces. Implement urban renewal actions, strengthen the transformation of old urban communities, blocks, and factory areas, and basically complete the transformation of urban shantytowns. Strengthen the two-way adjustment of supply and demand in the real

estate market, support reasonable housing consumption demand, promote both rental and purchase, and implement city-specific policies to promote the stable and healthy development of the real estate market. Accelerate the establishment of affordable rental housing and

A housing security system with shared property rights housing as the main body can effectively increase the supply of affordable housing , and focus on the development of policy rental housing in large cities with net population inflow and high housing prices. Explore and support the use of collective construction land to build rental housing in accordance with plans. Improve the long-term rental policy, develop a professional housing rental market, guide enterprises to rent dispersed housing, carry out leasing operations after centralized renovation, and support real estate enterprises to adjust asset allocation and hold housing for leasing operations.

Build safe and resilient cities. Implement urban flood control system construction projects and urban waterlogging control, we will continue to carry out the construction of urban drainage facilities and the management of water accumulation points to reduce the risk of waterlogging and strive to solve the problem of " city looking at the sea " . Improve the sponge city construction standard system, systematically promote the construction of sponge cities across the region,

and improve the rainwater storage and drainage capacity of urban roads, parks, green spaces, and residential areas. Accelerate the comprehensive management of water systems in cities and surrounding rivers and lakes. Strengthen the construction of urban lifeline projects, improve the urban pipeline network system, and steadily promote the construction of underground comprehensive pipeline corridors. Improve the disaster prevention standards of existing urban buildings, improve defense facilities, improve the construction of basic disaster prevention and reduction projects, and rationally plan and layout emergency shelters. Improve urban public health prevention, control and treatment capabilities, and comprehensively manage urban public health and the environment.

Build a green humanistic city. Efforts should be made to optimize the urban ecological spatial pattern and increase urban

The construction of urban ecological corridors will improve the quality of urban landscaping, connect and expand urban greenways , and overall improve the urban ecological environment. Implement the three-year action to improve the quality and efficiency of urban

sewage treatment, strengthen the construction of sewage treatment capacity, achieve full coverage of centralized urban domestic sewage treatment facilities, and accelerate the elimination of blank areas in the collection pipe network. Consolidate the effectiveness of urban black and odorous water bodies , improve the long-term management mechanism, and basically eliminate black and odorous water bodies in built-up areas of counties (cities) .

Improve the garbage classification and processing system, comprehensively promote the construction of classified placement, collection, and transportation facilities for municipal domestic waste, and enhance the capacity for municipal domestic waste incineration and food waste processing. Comprehensively improve the level of urban design, strengthen the construction guidance of urban form, urban outline, architectural landscape and color, sign system and other elements, avoid " one-size-fits-all cities " and shape the urban style. Protect and perpetuate the city' s historical context and enrich the city' s cultural heritage.

Improve the level of urban governance. The people' s sense of happiness, gain, and security
As an important criterion for measuring the level of urban management and service quality, we should establish an urban physical examination and evaluation mechanism and improve the urban full life cycle development model covering planning, design, construction, operation, maintenance, renewal and other links. Strengthen smart operation and maintenance, monitoring and early warning, command and dispatch of

urban public facilities, and improve the level of urban informatization and intelligence. Accelerate the resolution of stubborn urban governance problems such as traffic congestion. Improve urban "micro-governance" and enhance the community's ability to coordinate and allocate resources.

专栏 21 新型城镇化质量提升工程

现代化中小城市培育工程。对标对表沪苏浙，选择 10 个左右县（市）开展试点，加强政策支持和要素保障，分类培育大城市周边的卫星城市、县域中心城市和特色小城市。

县城建设补短板强弱项工程。积极争取中央预算内投资、地方政府专项债券和专项企业债券，健全政银企对接机制，支持县城城镇化补短板强弱项项目，完成当涂、庐江、蒙城、灵璧、天长等 5 个国家级县城补短板强弱项示范任务，选择 10 个左右县及县级市开展省级县城新型城

Demonstration work of townization construction.

Characteristic town improvement project. Cultivate and develop characteristic small businesses using micro-industry clusters as spatial units

The town focuses on relying on the province's major emerging industry bases, provincial industrial cluster specialized towns, modern service industry clusters, national rural industry integrated development demonstration parks and other platforms to develop advanced manufacturing, modern service and agricultural pastoral characteristic towns in a dislocated manner. . Establish a list of characteristic towns, establish and improve a dynamic adjustment mechanism, further improve the benchmark, and create a number of high-quality characteristic towns.

Urban renewal projects. arrive 2025 year, basically completed 2000 A city that needs to be renovated before the end of the year

The task of transforming old residential areas in the town. Strengthen the protection and utilization of old factory areas and old neighborhoods. Implement urban ecological restoration, focusing on repairing damaged mountains, water bodies, wetlands, green spaces, vegetation, etc. Implement the repair of urban functions and promote the repair of functional facilities, public spaces, urban landscape, old urban areas, etc.

Urban parking lot construction project. Focus on newly

constructed parking spaces and revitalize existing parking

spaces

The parking spaces are auxiliary, and the temporary parking spaces on the road are supplementary. Public parking spaces are increased by using new construction land, public building construction, and new three-dimensional parking lots. During the " 14th Five-Year Plan " period, 200,000 new urban public parking spaces were added to the province's districts and cities .

Urban waterlogging control project. Implement comprehensive remediation of waterlogging points, renovation and upgrading of drainage pipes and canal pumping stations, Five major projects including discharge regulation and storage, source emission reduction, and information construction, establish and improve the urban drainage and waterlogging prevention system of " source emission reduction, pipe network discharge, storage and peak peak reduction, and emergency response for exceeding standards " , and promote the informatization of urban drainage and waterlogging prevention in the province and Emergency response, construction of major projects such as Hefei urban rainwater pipes and drains.

Urban water environment management project. Basically completed the renovation of municipal rainwater and sewage diversion and the repair of dilapidated pipe networks Transformation, basically completed the reconstruction and expansion of the domestic sewage treatment plant at full capacity, basically achieved full coverage of the sewage pipe network and full collection and treatment of domestic sewage . Strengthen the utilization of sludge resources.

Municipal domestic waste classification and treatment project.

Accelerate the establishment of classified delivery, classified collection, and classification

Domestic waste treatment system for transportation and classification. Advocate the use of clean incineration as the main method to deal with domestic waste, and accelerate the construction of food waste treatment facilities. by 2025 In 2016, all capital construction projects in districts and cities were

成城市生活垃圾分类处理系统，基本实现城市原生垃圾“零填埋”和县城生活垃圾无害化处理。

现代社区培育工程。建设联通政务服务平台、社区感知设施和家庭终端的社区云平台，精准对接社区居民需求，有效提供养老托育、医疗卫生、公共安全、纠纷调处、心理援助等服务，推广人脸识别、智能车库等智慧物业应用。培育壮大社区专业人才和社区工作者队伍，探索配置社区医师、社区律师、社区心理咨询师、社区矛盾调解师。推进智慧社区建设，每年选取 10-20 个社区进行智慧社区试点。

Chapter 11: Solidly promote the integrated development of the Yangtze River Delta and jointly create a strong and active growth pole for national development

Adhere to the leading role of Shanghai and join hands with the directors of Jiangsu, Zhejiang, Yang and Anhui to fully implement the national planning outline and the Anhui action plan, deeply implement the special action to solidly promote the integrated development of the Yangtze River Delta, actively promote key collaborative matters, and build a new development pattern in the Yangtze River Delta. Anhui will better demonstrate its role by bravely pioneering technological and industrial innovation and accelerating the creation of a new highland for reform and opening up.

Chapter 45 Comprehensively promote collaborative cooperation with Shanghai, Jiangsu and Zhejiang

With integrated ideas and measures, we will promote innovative co-construction, coordinated progress, green co-protection, openness and win-win, and people's livelihood sharing, and collaboratively promote high-quality development in the Yangtze River Delta.

Accelerate the construction of an integrated collaborative innovation system. Promote joint scientific and technological innovation in the Yangtze River Delta

"two-center" co-creation of the Hefei and Shanghai Zhangjiang Comprehensive National Science Centers, focus on key areas and key links such as integrated circuits, artificial intelligence, and biomedicine, strengthen the forward-looking layout of scientific and technological innovation, and jointly build a number of high-level innovation highlands. and major science and technology infrastructure clusters to enhance high-level science and technology supply capabilities. Promote the implementation of the Yangtze River Delta National Technology Innovation Center, open up key links for the industrialization of major basic research results, and enhance the technological innovation capability that will lead future industrial development. Promote joint research on scientific and technological innovation in

the Yangtze River Delta and jointly undertake major national strategic projects and major national science and technology projects. Promote the co-construction, sharing and sharing of scientific and technological innovation resources and platforms, and explore regional innovation revenue

We will establish a benefit-sharing mechanism and gradually expand the scope of use of innovation coupons in the Yangtze River Delta .

Accelerate the optimization of integrated industrial division of labor and collaboration. Promote the action of replenishing, strengthening, strengthening and expanding the Yangtze River Delta industrial chain to improve the stable supply level of important raw materials, key components, core components and industrial software. Give play to the leading role of leading enterprises, promote the construction of **the G60** Industrial Alliance and the Shanghai-Nanjing Industrial Innovation Belt, plan the construction of the Ninghuai-Xuanhuang Economic Growth Belt, and promote the upgrading and transfer of traditional industries in the central area to cities outside the central area. Promote the construction of the digital Yangtze River Delta, coordinate the layout of new generation information infrastructure, accelerate the implementation of major strategic projects such as the Yangtze River Delta's " sensor-storage-computing " integrated super pilot center, and jointly build the Yangtze River Delta Industrial Internet Integrated Development

Demonstration Zone. Give full play to the role of the Yangtze River Delta Green Agricultural Products Production, Processing and Supply Alliance, build a docking platform for production, supply and marketing, and promote agricultural transformation and upgrading. Rely on entrepreneur alliances, industry associations, chambers of commerce and other social organizations to vigorously promote industrial collaboration, technology docking and market integration.

Accelerate and consolidate the foundation for integrated green development. We will work together to build the Yangtze River and Huaihe River ecological corridors and the Dabie Mountains in western Anhui and the southern Anhui - southwestern Zhejiang ecological barriers to build a solid foundation for green development. Joint implementation of PM_{2.5} and "double control and double reduction" of ozone concentration, and in-depth implementation of the comprehensive control of air pollution in the Yangtze River Delta in autumn and winter and the joint prevention and control of heavy pollution weather. Strengthen the special joint protection and management of key cross-border water bodies such as the Yangtze River, Huaihe River, Xin'an

River - Qiandao Lake, etc. , and promote the joint protection and joint management of key cross-border water bodies such as the Tuo Lake and Hongze Lake basins. Improve and implement the long-term mechanism for the prevention and control of solid waste pollution, promote the construction of an information-based supervision system for solid waste in the Yangtze River Delta, severely crack down on illegal cross-border transfer and dumping of hazardous waste and other illegal and criminal activities, and create a "waste-free urban agglomeration ". Explore the establishment of an equal ecological and environmental protection evaluation system for adjacent areas , promote the integration of ecological and environmental supervision and law enforcement and the unified benchmark for administrative penalty discretion.

Integration and joint efforts to build an ecological environment monitoring system. We will coordinate the implementation of a number of major green development projects, jointly build the Xin'an River - Qiandao Lake ecological compensation pilot zone, and promote the construction of Hangzhou's yellow-green industrial belt.

Accelerate the improvement of the level of integrated open cooperation. Docking services for high-level reforms in Pudong

Open up, support the construction of Shanghai as an international financial center, and promote technological innovation enterprises to be listed on the Shanghai Stock Exchange's Science and Technology Innovation Board . Actively participate in the China International Import Expo, further strengthen the connectivity and functional docking with Hongqiao International Open Hub facilities, and strengthen the coordination and linkage of various brand exhibitions and related trade and investment activities. Promote the joint development with the Shanghai -Jiangsu-Zhejiang Pilot Free Trade Zone and jointly build a high-level open platform. Promote the high-quality integrated reform

of customs, jointly improve the efficiency of bonded goods circulation in the Yangtze River Delta Customs special supervision area, and actively promote the implementation of the 144-hour visa-free transit policy for foreigners at the airport ports in the Yangtze River Delta region to open airport ports in the province . Accelerate the construction of an integrated infrastructure system and open channels and platforms, vigorously promote the construction of inter-provincial roads and waterways to be connected, jointly build the Yangtze River Delta, world-class port clusters, and world-class airport clusters on track, and build emergency energy supply guarantees in the Yangtze River Delta base and integrated flood protection system.

Accelerate the construction of an integrated market system. Strengthen integration with the human resources market in Shanghai, Jiangsu and Zhejiang In line with the standards, promote the unification of talent qualification certification standards and promote the establishment of a mutually recognized and shared talent evaluation and training mechanism. We will vigorously support qualified financial institutions to set up branches in each other, promote

the establishment of a regional equity market in the Yangtze River Delta, jointly establish the Yangtze River Delta Integrated Development Investment Fund, and enhance the development of Hefei's international financial back-end service base. Support the construction of the Yangtze River Delta Public Resource Trading Alliance, strengthen interconnection and sharing with the Shanghai-Jiangsu-Zhejiang Public Resource Trading Platform, and build a common market for property rights trading in the Yangtze River Delta. In-depth development of "satisfied consumption"

"Yangtze River Delta " action to promote the integration of market supervision. Jointly build a regional cooperation demonstration zone for the construction of a national social credit system in the Yangtze River Delta . Comprehensively align with the international high-standard market rule system, jointly strengthen intellectual property protection, and create a world-class market environment.

Accelerate the improvement of integrated people's livelihood service capabilities.

Promote epidemic communication in the Yangtze River Delta on a regular basis

"7+5" working mechanism and coordination matters of joint prevention and control , building an emergency response system for major emergencies such as public health in the Yangtze River Delta, and strengthening the connection between emergency plans and disposal plans. Strengthen the construction of the regional education standard system, deepen the exchange and cooperation mechanism between principals and teachers, and promote the coordinated development of vocational education in the Yangtze River Delta region. Jointly create high-quality boutique routes and special products such as

the " big " conference site in Shanghai - Nanhu Lake in Jiaxing, Zhejiang - Zhou Enlai's hometown in Huai'an - red tourism in the Dabie Mountains in western Anhui , and jointly organize cultural brand activities such as the Yangtze River Delta International Cultural Industry Expo. Promote the integrated development of the motor sports industry and create a national first-class self-driving camp cluster. Cooperate to build a number of national regional medical centers and promote the construction of regional hospital alliances and specialty alliances. Formulate and implement a unified basic medical insurance policy plan, gradually realize the unification of the drug catalog, diagnosis and treatment catalog, and medical service facility catalog, and establish and improve the joint review and mutual inspection mechanism of expenses in different places in the Yangtze River Delta. Carry out regional integrated elderly care pilot projects and accelerate the creation of a health and wellness base in the Yangtze River Delta. Explore the establishment of a " all-in-one card " for resident services using social security cards as a carrier , and take the lead in realizing " same-city treatment " in terms of transportation,

tourism, and cultural experiences . Realize remote file checking and online issuance of certificates by the National Comprehensive Archives in the Yangtze River Delta region.

Accelerate the innovation of integrated development systems and mechanisms. Establish local legislation and enforcement efforts

Establish a normalized mechanism for collaborative collaboration to carry out collaboration on NPC law enforcement inspections in areas such as ecological environmental protection and food safety supervision. Deepen exchanges and cooperation among the three provinces and one city CPPCC, and often

We will carry out joint investigations and joint democratic supervision in a state-of-the-art manner . Improve the coordination mechanism for major cooperation matters at the provincial level and strengthen planning, policy and project coordination. Explore the establishment of a " Yangtze River Delta One List " of rights and responsibilities , and accelerate the interconnection of the " one-stop service " platform. Improve unified, efficient, coordinated and powerful standardization work systems and mechanisms, and promote the formulation of regional unified standards in infrastructure construction, joint environmental prevention and control, basic public services, and credit systems. Collaborate to improve statistical cooperation and exchange mechanisms, and strengthen cooperation in economic census, statistical services, statistical infrastructure and other aspects. Explore and establish a cadre training and exchange mechanism that is compatible with integrated development, and promote the establishment of a regular mechanism for exchanging cadres for temporary posts, follow-up studies and practical training.

Chapter 46 Vigorously promote five "block links "

Focus on enhancing high-quality development momentum, work together to create five "block links ", accelerate the formation of important strategic pivots, and drive the entire province to deeply integrate into the integrated development of the Yangtze River Delta.

Make in-depth plans to jointly build a " six counties in one place " ecological priority green development industry cluster in the Yangtze River Delta

Construction of China Cooperation Zone. Advance the construction of the Jiangsu-Anhui Cooperation Demonstration Zone first and conduct a comprehensive review and evaluation

Implementation results, planning and construction covering the green development base of Shanghai Guangming Group and the " six counties in one place " Yangtze River Delta ecological priority green development industry concentrated cooperation zone in six adjacent counties (cities) of Jiangsu, Zhejiang and Anhui, replicating and promoting the Yangtze River Delta ecological green integrated development demonstration District system innovation experience,

unified planning and management, overall planning of land management, promoting the free flow of factors, innovating fiscal and tax sharing mechanisms, coordinating public service policies, accelerating the layout and construction of a number of major projects in infrastructure, ecological environmental protection, public services, and industrial cooperation, and actively exploring and creating An important and influential model area for practicing the " Two Mountains " concept in the Yangtze River Delta region, a new

industrial concentrated development zones, ecological industry-city integration pioneer zones, integrated cooperative development system and mechanism experimental zones, and cultural, tourism, leisure and health care bases.

Create “3+N” new functional zones in interprovincial adjacent areas with high standards. Copy promotion length

The system innovation experience of the Triangular Ecological Green Integrated Development Demonstration Zone adheres to the principle of key breakthroughs and step-by-step implementation ,and accelerates the construction of Dingshan - Chahe, Pukou-Nanqiao, Jiangning - Bowang , Hangzhou - Huangshan , Xuancheng - Huzhou, and County - Pukou, Tianchang - Liuhe, Xuzhou - Suzhou - Huaibei, Cihu High-tech Industrial Development Zone - Binjiang Development Zone and other "3+N" inter-provincial adjacent areas new functional zones, strengthen the connection between cross-regional land and space planning preparation, and promote basic Facilities, ecological environmental protection, industrial collaboration, public services, and social governance

are developed in an integrated manner, and efforts are made to create a new urban area integrating industry and city with coordinated development across administrative regions .

High-energy construction of various inter-provincial industrial cooperation parks. Adhere to classified policies and echelons

Promote, increase policy support, comprehensively improve the infrastructure conditions, supporting service functions and industrial carrying capacity of the park, improve the cost sharing and benefit sharing mechanism of cross-regional industrial transfer and park cooperation, promote the docking of elements and systems, and promote the leading industrial clusters Aggregate development.

Promote high-quality joint construction and cooperation between districted cities and relevant cities (districts) in Shanghai, Jiangsu and Zhejiang.

branch

Hold Hefei, Huangshan and Hangzhou, Huaibei, Suzhou and Xuzhou, Bozhou and Quzhou, Bengbu and Suzhou, Fuyang and Shanghai Xuhui, Huainan and Shanghai Minhang, Chuzhou, Wuhu and Nanjing, Lu'an and Shanghai Songjiang, Chizhou and Shanghai Changning, Tongling and Changzhou

and others will further deepen strategic cooperation, support Ma'anshan and Nanjing to accelerate the docking, promote the construction of cross-border demonstration zones, promote the in-depth integration of various districts and cities into the Yangtze River Delta urban agglomeration and the Shanghai, Nanjing, Hangzhou, Ningbo, and Hefei metropolitan areas, and jointly enhance the Yangtze River Delta cities Development quality.

cooperation between cities and districts and relevant cities and districts in Shanghai, Jiangsu and Zhejiang .

continued

Deepen Hefei Baohe District and Hangzhou Yuhang District, Huaibei Xiangshan District and Shanghai Jiading Jiangqiao Town, Suzhou Yongqiao District and Xuzhou Tongshan District, Fuyang Yingquan District , Yingzhou District and Shanghai Songjiang Shihudang Town, Fuyang Yingdong District and Shanghai Songjiang Chedun Town, Huainan Tianjia'an District and Changzhou Tianning District, Xuancheng Xuanzhou District and Nanjing Gaochun District, Huangshan Huizhou District, Huangshan District and Hangzhou Xiaoshan District and Fuyang District cooperate with each other to support cities and districts through a variety of flexible methods , carry out comprehensive cooperation with relevant cities and districts in Shanghai, Jiangsu and Zhejiang to form an all-round and multi-level cooperation and joint construction pattern.

Column 22 Solidly promote the special action for the integrated development of the Yangtze River Delta

Five " Block Links ". Make in-depth discussions and plans

for the construction of the Yangtze River Delta ecological priority green development industry centralized cooperation zone of " six counties in one place " , jointly carry out special planning research on land and space planning and transportation, and layout and build a number of infrastructure, ecological environmental protection, public services and supporting facilities projects . Yidianshan

-Chahé , Pukou - Nanqiao , Jiangning - Bowang as the driving force, further improve the planning policy system for new functional zones in inter-provincial adjacent areas, and form a batch of institutional innovation experiences to be replicated and promoted throughout the province . Improve the development, construction and management level of the first batch of inter-provincial industrial cooperation parks, support various localities in cultivating more inter-provincial cooperation parks based on existing provincial-level and above development zones, and promote high-quality development. Actively rely on regional cooperation platforms such as the Yangtze River Delta Urban Economic Coordination Committee to promote 16 Each districted city cooperates with the relevant cities (districts) of Shanghai, Jiangsu and Zhejiang, and each city district cooperates with the relevant cities (districts) of Shanghai, Jiangsu and Zhejiang.

Build a science and technology innovation community in the Yangtze River Delta. Give full play to the leading role of Shanghai Science and Technology Innovation Center role, strengthen the innovation advantages of Jiangsu, Zhejiang and Anhui, promote original innovation with the " two- heart " co

-creation of Hefei and Shanghai Zhangjiang Comprehensive National Science Center , promote technological innovation with the " four-city co-creation " of Shanghai, Nanjing, Hangzhou and Hefei, and promote Shanghai-Shanghai Stock Connect , Ningsu and Xi, Hangzhou and Ningbo, and Hewu and Beng promote industrial innovation through " multi-group joint creation " , jointly build a number of high-level innovation bases such as the Yangtze River Delta National Technology Innovation Center, and jointly carry out major scientific and technological

tackle key problems and jointly build an open and integrated innovative ecological environment. By 2025, a modern and international scientific and technological innovation community will be formed .

Actively promote the G60 Construction of science and technology innovation corridor . Focus on " Science and Technology + Industry " and support Hefei, Wuhu, cross-regional coordinated development with relevant cities in Shanghai, Jiangsu and Zhejiang , supports Bengbu, Huainan, Ma'anshan, Tongling and other qualified cities to participate in the construction of **the G60 Science and Technology Innovation Corridor** , accelerates the construction of industrial alliances and cooperation parks , and builds an advanced corridor for industrial development , a pilot corridor for reform and innovation, and a pioneer corridor for industry-city integration .

Upgrade and construct the Xin'anjiang - Qiandao Lake Ecological Compensation Experimental Zone. Deeply promote a new round of Xin'anjiang

Reform the ecological compensation mechanism, prepare and implement a construction plan for the Xin'anjiang - Qiandao Lake ecological compensation pilot zone, and actively explore new models of mechanism co-creation, ecological co-protection, environmental co-governance, cost sharing, industry co-prosperity, infrastructure co-connection, and development sharing , create a new model of joint protection and joint governance of the ecological environment, a new model of regional high-quality

coordinated development, and a new model of realizing the value of ecological products, and provide a demonstration model for ecological compensation and ecological civilization construction in the river basin.

“ all-in-one card ” for resident services using social security cards as the carrier . Strengthen cooperation with the two provinces of the Yangtze River Delta

One-city docking aims to achieve cross-provincial universality and uses transportation, tourism, and cultural experience applications as touch points to achieve one-card universality and same-city treatment in the Yangtze River Delta region. Establish a " one card " service management model to realize application in government services, subsidy distribution to benefit people and farmers, medical treatment and drug purchase, financial services, smart cities, credit services and other fields.

Chapter 47 Create a high-level industrial transfer cluster in northern Anhui

Comprehensively implement several national policies and measures to promote the construction of industrial transfer clusters in northern Anhui, actively undertake industrial transfers, and create a new growth pole for high-quality regional economic development.

Create a “6+2+N” industry undertaking platform . Make full use of the land, ensure the use of land, and

cultivate talents.

major policies such as the introduction of education and
market-oriented reform of electricity and natural gas
prices to improve the park

Power supply, heating, water supply and drainage, gas, sewage treatment and other infrastructure, accelerate the layout of new information infrastructure, improve public service capabilities, promote the undertaking platform to increase spatial agglomeration, accelerate industrial clustering, enhance scientific and technological innovation, and build the Yangtze River Delta into a It is a preferred location for undertaking high-quality industrial transfers, a model area for industrial agglomeration development in the central and western regions, a pilot area for industry-city integration development in the Huaihe Ecological Economic Zone, an important energy and green agricultural product production and processing supply, and an advanced manufacturing base.

Innovative industry undertaking model. Improve the linkage mechanism of agglomeration areas and promote agglomeration

The district adopts the park-within-a-park, entrusted management, investment cooperation and other models to jointly build cooperative parks with Shanghai, Jiangsu, Zhejiang, Hewuma and other places, and explores the

establishment of factor input sharing and fiscal and tax benefit sharing mechanisms. Establish and improve information communication and docking mechanisms, accelerate the undertaking of industrial transfers in the central area of the Yangtze River Delta, vigorously develop strategic emerging industry clusters such as advanced functional materials, advanced structural materials, and biomedicine, transform and upgrade energy raw materials, strengthen and improve the equipment manufacturing industry, and improve quality. Upgrade the consumer goods industry, cultivate and expand the modern service industry, develop and improve efficient ecological agriculture, and guide the agglomeration of industrial clusters and the integrated development of industry and city. Adhere to ecological priority, strict industrial access, focus on environmental protection, strengthen the connection with dual energy control goals and tasks, promote the conservation and intensive use of energy resources, and improve the resource and environmental carrying capacity of agglomeration areas.

Chapter 12 Prosperity and development of cultural undertakings and cultural industries Accelerate the construction of an innovative and culturally strong province

Adhere to the guiding position of Marxism in the ideological field, strengthen cultural self-confidence, insist on leading cultural construction with socialist core values, vigorously stimulate the vitality of cultural innovation and creativity, promote the unity of meeting the people's cultural needs and enhancing the people's spiritual strength, and comprehensively demonstrate the "Hui style " "Anhui Rhyme " and the characteristics of the times, embodying the strong positive energy of building a modern and beautiful Anhui in the new stage.

Chapter 48 Comprehensively improve social civilization

We will carry out in-depth study and education of

Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, and accelerate the formation of ideological concepts, spiritual outlook, civilized customs, and behavioral norms that adapt to the requirements of the new era.

Strengthen the education of ideals and beliefs. Expand the construction of civilized practice centers in the new era and build

A wide range of services with complete functions. Build and use the "Learning to Strengthen the Country" Anhui platform, Anhui Pioneer Network, etc. to create an online theory dissemination matrix. Promote the normalization and institutionalization of education on ideals and beliefs, extensively carry out education on the history of the Party, the history of New China, the history of reform and opening up, and the history of socialist development, make good use of Anhui's characteristic party history resources, and carry forward the great spirit formed by the Party and the people in the struggle of various historical periods. . Implement the patriotic education base exhibition and improvement project to stimulate the patriotic enthusiasm of the whole society to remember history,

honor the martyrs, and serve the country.

Continue to improve citizens' civilized literacy.

Promote the construction of citizen morals and continue to build good

Anhui brand. Implement the civilization creation project, carry out spiritual civilization construction actions, and cultivate a number of national civilized cities, civilized villages and towns, civilized units, civilized families, and civilized campuses. We will vigorously advocate reading for all, promote urban reading spaces, improve the service and management level of farm bookstores, and build a scholarly Anhui. We should advocate hard work, diligence and frugality, vigorously promote the spirit of model workers, the spirit of labor, and the spirit of craftsman, and carry out publicity and education with the theme of labor creating happiness. Improve the volunteer service system and carry out extensive volunteer service and caring actions.

Chapter 49 Improve the level of public cultural services

Comprehensively prosper the press and publishing,

radio, film and television, literature and art, philosophy and social sciences, inherit and carry forward excellent traditional culture, and improve the public cultural service system.

Improve public cultural supply capabilities. Implement quality publishing and improve the quality of literary and artistic works as upgrading, revitalizing local operas, and cultivating cultural celebrities will strengthen the creation and production of realistic themes , establish an Anhui literary and artistic creation theme library, and focus on the 100th anniversary of the founding of the Communist Party of China. At important time points such as the anniversary and the 20th National Congress of the Communist Party of China, a batch of key works of the " Four Acuras " will be launched. Accelerate the in-depth integrated development of media, implement an all-media communication project, create new mainstream media, build 1 provincial technology platform, 3 mainstream new media groups , 3 provincial, city and county level propagation matrix. Support provincial media to integrate resources across regions and industries, encourage the development of municipal media groups,

and promote county-level integrated media centers to improve quality and efficiency. Deepen the reform of the corporate governance structure of public cultural institutions, encourage and guide social forces to participate in public cultural services, cultivate and standardize cultural social organizations, and enrich public culture

supply of products and services. Strengthen the construction of cultural centers, museums, libraries, and science and technology centers, and promote the healthy and sustainable development of non-state-owned museums. Support the free opening of public cultural facilities and promote the opening of university museums, art galleries and other cultural facilities to the public. Accelerate the development of the archives industry, promote the strategic transformation of archives informatization, and implement archives public services to benefit the people. Support the development of the arts and crafts industry.

Improve the coverage of public culture. Coordinate the layout and services of urban and rural public cultural facilities supply, team building, and fund allocation, promote the integrated construction of urban and rural public cultural services, and continue to create a national public cultural service system demonstration area. Innovate and implement cultural projects to benefit the people, enhance the overall functions of grassroots comprehensive cultural service centers, and expand the

coverage of " Culture Enters Ten Thousand Households " and " Rural Spring Festival Gala " . Cultivate local cultural talents, carry out extensive mass cultural activities, enhance the influence of the Chinese Farmers Song Festival, the Chinese Huangmei Opera Festival, the Chinese Li Bai Poetry Festival, and the Four Treasures of the Study Cultural Tourism Festival, and create a rural cultural brand with core competitiveness. Strengthen the construction of major cultural facilities and cultural projects, accelerate the digital construction of public cultural services, and establish and improve a five-level public cultural service network. Promote the construction of workers' cultural palaces at all levels.

Promote the innovative development of philosophy and social sciences. Strengthen planning and management of philosophy and social sciences,

Improve research levels, give full play to the demonstration and leading role of national and provincial projects and social science awards, and continue to promote research on major theoretical and practical issues. Promote the construction of new distinctive think tanks , strengthen cooperation and

exchanges with high-end think tanks in Shanghai, Jiangsu and Zhejiang , cultivate and build a number of provincial key think tanks, and enhance functions such as theoretical innovation, political advice, public opinion guidance, and social services. Plan to build a number of key research bases, build a social science academic community, and build Anhui philosophy and social sciences advantageous subject clusters. Strengthen talents in philosophy and social sciences

Team building. Build a high-end academic exchange platform and create a good academic environment.

Inherit and carry forward excellent traditional culture.

Promote the construction of key projects and bases for the inheritance of China's excellent traditional culture, protect and carry forward Hui culture (Xin'an River culture), Yangtze River culture, Huaihe culture, Grand Canal culture, and red culture, build a systematic local cultural system, and promote the integration of Jiangnan culture. Promote the Chinese Civilization Discovery Project and the study of the history of the Xia Dynasty, support the construction of the National Archaeological Site Park, strengthen archaeological excavations and subject research, and attach importance to the collection, compilation and utilization of documents. Strengthen the protection and utilization of cultural relics, accelerate the construction of national cultural parks and national-level Huizhou cultural and ecological reserves, increase the protection of famous historical and cultural cities, towns and villages, and create a national demonstration area for the protection and utilization of cultural relics. Promulgate and

implement provincial regulations on the protection of revolutionary cultural relics, and promote the protection and utilization of revolutionary cultural relics and martyrs' memorial facilities. Deeply explore the connotation of cultural heritage and innovate the way of dissemination of cultural heritage. Promote the reasonable and appropriate utilization of excellent agricultural cultural heritage, and refine classic local cultural elements into urban and rural planning and design and beautiful rural construction. Strengthen the protection of intangible cultural heritage, promote the recording and training of intangible cultural heritage inheritors, launch the construction project of intangible cultural heritage database, and establish a number of intangible cultural heritage research bases. Promote the popularization of excellent traditional culture, integrate ideological and moral education, cultural knowledge, arts, sports, social practice and other educational links to build an excellent traditional culture curriculum system. Use modern means such as new media to accelerate the innovative development and promotion of traditional culture. Support Huangshan City in building the National Anhui

Studies Research Institute.

Chapter 50 Improve the modern cultural industry system

Adhere to putting social benefits first and unify social benefits and economic benefits, deepen the reform of the cultural system, accelerate the construction of a modern cultural industry system, and promote cultural tourism

The integrated development of tourism will enhance the status of the cultural tourism industry as a strategic pillar industry in the national economy .

Enhance the competitiveness of cultural industries.

Improve cultural industry planning and policies, improve

The system and mechanism of high-quality products, talents and benefits will create a vibrant cultural industry innovation ecosystem. Implement cultural industry optimization and upgrading projects, strengthen cultural brand building, implement cultural industry digital strategies, and accelerate the development of new cultural enterprises, cultural business formats, and cultural consumption models. Develop and expand cultural market entities, deepen the reform of provincial cultural enterprises, support the reform and development of state-owned literary and art troupes, support the development of small, medium and micro cultural enterprises, and cultivate a number of innovative cultural and creative leading enterprises. Improve the modern cultural market system, build and make good use of cultural and tourism property rights product trading

platforms, cultivate and expand cultural intermediary agencies such as copyright protection, evaluation and appraisal, and information consultation, and strengthen cultural market supervision. Promote the in-depth integration of culture and science and technology, improve the cultural and scientific and technological innovation system, and accelerate the transformation and promotion of cultural and scientific and technological achievements. Promote the penetration of cultural creativity and design services into the entire manufacturing process. Establish a cultural industry investment fund, improve the cultural investment and financing system, and strive to create a national cultural and financial cooperation demonstration zone.

Make the tourism industry bigger and stronger.

Strengthen the construction of major tourism infrastructure and increase the

A -level tourist attractions and national-level tourist resorts, strive to create national-level tourist and leisure cities and neighborhoods with distinctive cultural characteristics , and cultivate a number of world-class tourist destinations. Accelerate the construction of tourism and leisure facilities,

focus on creating new business formats such as mountain summer vacation, hot spring health care, and ecological vacation, and promote the transformation of scenic spot tourism into all-region tourism. Accelerate the connotative development of red tourism and improve the province's classic red tourism scenic spot system. Promote the upgrading of rural tourism and create a number of rural villages with historical characteristics and regional characteristics.

Rural tourism brand, develop a number of rural tourism products with outstanding features and distinctive themes. Accelerate the development of homestays and cultivate diversified accommodation formats. We will build tourism corridors around the Yangtze River, Huaihe River, Jianghuai watershed, Jianghuai Canal and other resources, and continue to launch high-quality themed tourism routes such as self-driving, study , photography, and hiking . Accelerate the improvement of tourism public service facilities and enhance service functions.

Promote the integrated development of cultural

tourism. Optimize the spatial layout of cultural tourism industry, high

Horizontally build the Wannan International Cultural Tourism Demonstration Zone, the Hefei Metropolitan Area Cultural Development Core Area, the Dabie Mountains and other old revolutionary areas red tourism development demonstration zones, the Wanjiang River Cultural Development Cluster Belt, and the Huaihe River Cultural Development Cluster Belt. Create a cultural tourism innovation demonstration zone and

promote the " five batches " high-quality creation project of tourist attractions, routes, business formats, commodities, and enterprises . Support the creation of a number of high-quality cultural tourism characteristic towns, characteristic parks (bases) , characteristic neighborhoods, characteristic villages, and tourism performing arts and other characteristic products. Accelerate the implementation of the " Internet + Cultural Tourism " plan and promote online and offline interactive marketing and integrated marketing. Implement tourism product quality improvement projects, strengthen the portability, symbolization, and branding of cultural tourism products, and enhance cultural connotation. Strengthen external cultural tourism promotion, expand cultural tourism exchange projects, successfully organize Anhui International Cultural Tourism Festival, Anhui International Travel Agents Conference, Anhui International Cultural Tourism Industry Expo, China International Animation and Creative Industry Fair and other activities, and promote Huangshan International Cultural Tourism Forum Landed. Tell the Anhui version of the Chinese story well in an all-round way , spread the Anhui version of

the Chinese voice well, and continuously enhance the cultural influence of Anhui.

专栏 23 文化发展重大工程

文艺作品质量提升工程。重点反映习近平新时代中国特色社会主义思想

Thoughts are vividly practiced in the land of Jianghuai, deeply exploring major realities, major revolutions, major history and characteristic themes, and creating a number of masterpieces that highlight the " Hui style and Anhui charm " and the characteristics of the times. Establish a literary and artistic creation fund, improve the full -process artistic creation quality system, and implement a support plan for key selected scripts.

Local opera revitalization project. Taking the development of Huangmei Opera as the leader, promote Hui Opera, Lu Opera, Sizhou Opera

We will promote the innovative development of local operas such as opera and flower drum opera, carry out research on the exploration of local opera resources, and promote the construction of provincial cultural and ecological protection zones such as Anqing opera. With major theme creation, high-quality creation and participation in important national literary and art awards as the main directions, the drama creation incubation plan will be implemented to promote and lead the province's drama creation and production. Implement the opera film project, integrate theater resources across the province, and cultivate the opera performance market and young consumer groups.

Public cultural service facilities improvement project.

Construction of the new Provincial Cultural Center Binhu and the Provincial Intangible Cultural Center

A number of provincial public cultural facilities such as the

Cultural Heritage Exhibition Hall and the Provincial Library Binhu New Library. Improve the five-level network of public cultural facilities in provinces, cities, counties, and villages, build a cultural big data system, improve the level of informatization, promote interconnection, co-construction and sharing, and achieve effective coverage.

Red resource protection and utilization project. Formulate a national revolutionary cultural relics protection area plan and implement a batch of conservation and utilization projects. Focusing on the themes of the New Fourth Army (Iron Army) and Liu and Deng' s armies' thousands-mile leap into the Dabie Mountains, the Battle of Huaihai , and the Battle of Crossing the River, we will focus on building a number of 3A and 4A -level red tourist attractions in old revolutionary areas such as the Dabie Mountains, and build a centralized red education display belt in the Yangtze River Delta region , striving to create a national red tourism route boutique scenic spot and cultural tourism in-depth integrated development demonstration zone.

Patriotism education base exhibition and improvement project. Selection and naming 100 Provincial patriotic leader at home or above Free education demonstration base. Strengthen the management of patriotic education bases, enrich exhibition content, improve exhibition methods, and strive to create high-quality displays with prominent themes, clear guidance, and rich connotations.

Build an online exhibition hall of a patriotic education demonstration base and sing the main theme of Internet patriotism.

Cultural heritage protection project. Comprehensively launch the construction of the Provincial Grand Canal National Cultural Park, complete the Yangming Zhongdu and Hanshan Lingjiatan National Archaeological Site Parks, and promote the construction of Bengbu Shuangdun, Bengbu Yuhui Village, and Shouchun City National Archaeological Site Parks in Shouxian County. Do a good job in the Warring States Period, the Chu King's Mausoleum, the Wuwang Dun Site, and the bronze

陵汤家墩遗址、皖南先秦矿冶遗址、东至华龙洞古人类遗址等考古发掘和肥西三官庙遗址研究工作。支持引江济淮工程博物馆建设。支持桐城、黟县等创建国家历史文化名城。推进徽州古建筑保护利用，开展国家传统村落集中连片保护利用示范市试点。

Column 24 Tourism development quality improvement and upgrading project

National 5A A high-quality tourist attraction construction project. According to national 5A Level scenic spot brand standards and promote the existing 5A Improve the quality and expand the capacity of top-level scenic spots. Increase 5A Intensify efforts to create first-class scenic spots and create a number of well-known

Tourist attractions. Focus on supporting the creation of national 5A- level tourist attractions such as Langya Mountain Scenic Area, Qiyun Mountain Scenic Area, Huating Lake Scenic Area, and Xiaogang Village Tourist Area. Accelerate the development of 5A -level potential scenic spots such as Jinzhai " Two Sources and Two Places " Scenic Spot, Shouzhou Ancient City Scenic Spot, Guniujiang Scenic Spot, Fanchang Maren Qifeng Scenic Spot, and Xin'anjiang Landscape Gallery Scenic Spot .

National tourist resort cultivation and creation project. Make full use of the rich mountain resources and hot spring endowment

Combining advantages, we strive to create a number of national-level tourist resorts. Focus on supporting Huangshan Taiping

Lake Tourist Resort, Lujiang Tangchi Hot Spring Tourist Resort, Dabie Mountain Youran Nanshan Tourist Resort, Huoshan Doushahe Hot Spring Tourist Resort, Yixian Ancient Huizhou Rural Tourist Resort, Tongling Yongquan Tourist Resort, Fanchangman Gu tourist resort , Hexian Xiangquan tourist resort, Jingxian Taohuatan tourist resort and other national-level tourist resorts have been established.

High-quality cultural tourism route creation project. Explore the advantages of cultural and tourism resources and create a series of high-quality products

Cultural tourism routes have formed a diverse cultural tourism route system such as international leading routes, regional quality routes, characteristic theme routes, and ecological tourism routes . Focus on creating Hangzhou-Huangzhou international tourist routes, Wanli Tea Ceremony international tourist routes, world heritage tourist routes, ancient Huizhou cultural experience tourist routes, Jiangnan cultural experience routes, Grand Canal cultural tracing routes, and Huaihe style experience routes.

Key B&B quality improvement and upgrading projects. Improve the star rating standards for B&Bs and improve the quality of B&B accommodations

平和服务质量，完善民宿消防、食品等安全等级，以标准化、星级化、专业化为目标，打造一批具有度假休闲功能的高水平民宿，带动传统民宿提质升级。

乡村旅游融合发展工程。推动乡村旅游业态培育和品质提升，重点支持乡村旅游文旅融合提升项目，加大乡村旅游风景道、乡村旅游驿站、旅游停车场、旅游厕所、自驾车设施和其他公共服务设施建设力度，提升乡村旅游服务能力。

Chapter 13: Implementing the “Two Mountains ” Concept to Create a Comprehensive Green Transformation Zone for Economic and Social Development with Important Influence

Follow the laws of nature and objective laws, adhere to the priority of conservation, protection and natural restoration, thoroughly implement the sustainable development strategy, build an ecological civilization system, promote the construction of an ecological province, strictly observe the ecological protection red line, the bottom line of environmental quality, and the upper limit of resource utilization, and optimize Produce and live ecological space, and build a beautiful green Jianghuai home where man and nature coexist harmoniously.

Chapter 51 Comprehensively build a new stage of modern and beautiful Yangtze River (Anhui) Economic Belt

Create a new version of the Beautiful Yangtze River

(Anhui) Economic Belt and build a new comprehensive management system to make Anhui a strategic node in the Yangtze River Economic Belt's ecological priority and green development battlefield, a strategic link that smoothes the domestic and international dual-circulation aorta, and the main force in promoting high-quality economic development. military strategic strength.

Strengthen source management. We insist on giving an overwhelming priority to restoring the ecological environment of the Yangtze River, Improve the "1515" graded management and control measures for the coastline, and further promote the "7+1" actions of banning new construction, reducing stocks, closing pollution sources , entering parks, building new green areas, accepting unified management, strengthening mechanisms , and protecting biodiversity . Deepen the " Three Major and One Strong " special campaign, vigorously promote the rectification of outstanding ecological and environmental issues reported by the Yangtze River Economic Belt ecological environment warning film, central ecological and environmental protection inspections, etc., and comprehensively investigate and rectify related and derivative issues. Continue to

promote urban sewage and garbage treatment, chemical pollution control, agricultural non-point source pollution control, and ship pollution

"4+1" projects for ecological and environmental pollution control such as pollution control and tailings pond pollution control . Carry out special rectification actions such as sewage outfalls and domestic garbage leachate in the entire Yangtze River Basin, consolidate the effectiveness of crackdowns on illegal docks and illegal sand mining, and strengthen the control of " three phosphorus " pollution.

Strengthen system governance. Coordinate the integrated protection and restoration of mountains, rivers, forests, fields, lakes and grasslands, and strengthen

Quickly build a natural protected area system with national parks as the main body. Vigorously promote the ecological corridor improvement projects of the Yangtze River, Huaihe River, Jianghuai Canal, and Xin'an River, and the construction of ecological barriers in the Dabie Mountains in western Anhui and the mountainous areas in southern Anhui. Continue to promote natural forest protection, afforestation and greening on both sides of the Yangtze River, return farmland to forests and grasslands, complete the ecological restoration of abandoned open-pit mines on both sides of the river, and

fully build a green belt along the river. Strengthen the protection of rare and endangered animal and plant resources such as alligator , Anhui musk deer, Dabie Mountain five-needled pine, and grevillea, and continue to implement the rescue action plan for rare and endangered species such as the Yangtze finless porpoise, Chinese sturgeon, and Yangtze sturgeon.

Strengthen collaborative governance. Vigorously promote the upstream and downstream, rivers, lakes, left and right banks, dry The tributaries will be managed collaboratively to restore the scenic scene of "a river of clear water flowing eastward " at an early date . Improve the Yangtze River environmental pollution joint prevention and control mechanism and early warning emergency response system, promote environmental information sharing, establish and improve cross- department, cross-region, and cross-basin emergency response mechanisms for environmental emergencies, strengthen regional linkage, and coordinate to crack down on cross-regional illegal activities. Strictly implement the negative list management system for the development of the Yangtze River Economic Belt, and establish and improve a sound

ecological and environmental hard constraint mechanism focusing on river coastlines, river sections, regions, and industries.

Comprehensively implement the " ten-year fishing ban " in the Yangtze River . Consolidate the results of banning and phasing out fishing in the Yangtze River and carry out

Prohibited fishing management order and special rectification of prominent fishing-related issues. Strengthen the resettlement guarantee for fishermen who have retired from fishing, fully implement the pension insurance policy, appropriately extend the period of living allowance payment during the transitional period, and include qualified fishermen in difficulty into the bottom-up support and social assistance system. powerful

We will provide employment tracking assistance, guide enterprises, social organizations, poverty alleviation workshops and employment bases to resettle fishermen who have retired from fishing , and develop and set up public welfare positions. Support fishermen to switch from fishing to farming , vigorously develop integrated rice and fish farming, pond farming, aquatic product processing, recreational fisheries and other fish-related industries to increase employment opportunities. Improve law enforcement capabilities, accelerate the realization of full video surveillance coverage in the Yangtze River waters, establish a law enforcement and supervision system that " pays equal attention to water and land " , strengthen the construction of law enforcement teams, and severely crack down on illegal and criminal activities in all aspects of fishing, transportation, sales, consumption, etc. Adjust and improve the aquatic life protection and management system, promote resource conservation and rational utilization to promote mutual promotion and win-win results, and build a long-term management and control mechanism for banning and retiring fishing in the Yangtze River.

Chapter 52 Accelerate the promotion of green and low-carbon development

Strengthen the drive for green technology innovation, improve the green development institutional system, explore new paths for low-carbon development, and promote a comprehensive green transformation of production and lifestyle.

Promote green development of industries. Integrate the "ecological +" concept into the entire process of industrial development, Promote the greening of all aspects of production, circulation and consumption in all fields. Build a green industrial chain and supply chain, focusing on high-energy-consuming industries, and promote the greening of the entire process of product design, production technology, product distribution, operation and maintenance, and recycling and disposal. Accelerate the construction of a green technology innovation system with enterprises as the main body and market-oriented, and use energy-saving, low-carbon and environmentally friendly technologies to transform traditional industries. Cultivate and expand new green

industries and new formats such as energy conservation and environmental protection, circular economy, clean production, and clean energy, guide the use of pesticides and fertilizers with low ammonia and low volatile organic pollutant emissions, and enhance the level of green development of the modern service industry.

Promote a green lifestyle. Transform traditional consumption patterns and cultivate ecological consumption,

Green consumption concept. Vigorously promote energy-saving home appliances, efficient lighting products, water-saving appliances, green building materials, bio-based degradable polyester and other green products. Promote environmental labeling products and encourage the use of coatings and dry cleaning agents with low volatile organic content. Coordinate the creation of conservation-oriented institutions, green families, green schools, green communities, green travel, green shopping malls , green buildings, etc. Extensively publicize and promote simple, moderate, green, low-carbon, civilized and healthy life concepts and lifestyles to form a social atmosphere advocating green life .

Improve the green development policy system. Promote the establishment of unified green product standards, Certification and labeling systems, and improve market access and traceability systems for green products. Implement pricing, fiscal and taxation, investment and other policies that are conducive to promoting green development, improve the green financial system, and create a business environment conducive to the development of green industries. Improve the policy

mechanism for promoting green design, further standardize cleaner production audit behavior, and accelerate the implementation of the extended producer responsibility system. Promote state-owned enterprises to take the lead in implementing corporate green procurement guidelines and implement a government procurement system for green products.

Accelerate the promotion of low-carbon development.

Actively respond to climate change and reach the peak of carbon emissions and energy high-quality development requirements, formulate and implement the province's 2030 Action plan for carbon emissions to peak before the year to achieve synergistic effects of pollution reduction and carbon reduction. Strictly control coal consumption, promote coal reduction in key areas, strictly control new coal-consuming projects, and implement coal consumption reduction and substitution for new, renovated, and expanded projects in key areas for air pollution prevention and control. Accelerate the adjustment of energy structure, increase the proportion of non-fossil energy consumption, and win the initiative to reach the peak of carbon emissions.

Control greenhouse gas emissions in the industrial sector and develop low-carbon agriculture. Strengthen low-carbon management in urban and rural areas, build a low-carbon transportation system, and strengthen low-carbon waste disposal. Development of Bengbu
Copper Indium Gallium

Selenium thin film solar power generation and other technical scenario applications and industrialization demonstrations. Launch carbon neutrality pilots in public institutions.

Chapter 53 Continuously improve environmental quality

Implement an upgraded version of air, water, and soil pollution prevention and control, strengthen coordinated control of multiple pollutants and regional coordinated governance, make the sky bluer, the ground greener, the water clearer, and the environment better, and continue to meet the people's growing needs for a beautiful ecological environment.

Carry out comprehensive prevention and control of air pollution in depth. Implement air quality improvement actions to comprehensively

We will jointly implement coal control, gas control, vehicle control, dust control, and combustion control, and implement "one policy for one season" and "one policy for one city" to promote the continuous reduction of the total emissions of major atmospheric pollutants. Continue to

adjust and optimize the industrial, energy, and transportation structures, accelerate the upgrading and transformation of cement, steel, glass, ceramics and other industries, and carry out special rectification actions for industrial VOCs. Implement urban air quality compliance planning and promote urban $PM_{2.5}$ in stages Concentration drops. Strengthen the grid management of dust in large-scale urban construction areas. Strengthen regional cooperation on air pollution prevention and control, and deepen performance classification and differentiated control measures for key industries with heavy pollution weather. Formulate and implement a number of local emission standards to strengthen coordinated control of fine particulate matter and ozone. Continue to promote the phase-out management of ozone-depleting substances .

Strengthen water environment management in key rivers and lakes.

Take overall consideration of water resources, water ecology, water The organic connection between environment, water security, water culture and shorelines promotes comprehensive management of key rivers and lakes. Continue to improve the water quality of the Yangtze

River, Huaihe River and Chaohu basins, and stably maintain the water environment quality of the Xin'an River. Implement important water source protection projects, give priority to protecting drinking water sources, promote ecological management of water sources, and focus on the source of rivers

The area and current water quality are better than Class III rivers and lakes to protect the integrity of the aquatic ecosystem. Strengthen the management and control of water-related space uses, and improve the ability and level of space supervision in rivers and lakes. Improve water volume dispatching plans for key rivers and lakes and implement ecological flow management goals.

Strengthen the management of key water and soil erosion areas, promote the construction of ecologically clean small watersheds, and accelerate the implementation of water ecological restoration and comprehensive management projects in key rivers and lakes such as Chaohu, Xin'an River, and Guohe River. Strictly protect and rationally utilize groundwater, strengthen the development and utilization management of groundwater resources, orderly promote comprehensive management of groundwater overexploitation, and strengthen the management of groundwater drop funnels in northern Anhui. Support Hefei in striving to become an international wetland city, vigorously build an ecological demonstration zone around Chaohu Lake, and build a high-level wetland park around Chaohu Lake.

Improve the prevention and control of soil pollution, solid waste and hazardous waste . Focus on key regions and industries

and pollutants, strengthen soil pollution control and restoration, and prevent soil pollution risks. Prioritize the protection of cultivated land soil environment, promote the reduction of chemical fertilizers and pesticides and soil pollution control, highlight the treatment and restoration of industrial contaminated sites, and strengthen the control of "white pollution" . Accelerate the establishment of a long-term mechanism for waste classification that is based on the rule of law, promoted by the government, participated by all people, coordinated between urban and rural areas, and adapted to local conditions, and encourages all localities to create "waste-free cities" . Strengthen the collection and treatment of hazardous waste and medical waste, improve the collection, transfer and disposal system of medical waste, realize the full collection and treatment of medical waste at the county level and above, and gradually cover it in organized towns. Attach great importance to the control of new pollutants.

Strictly enforce the responsibility system for ecological and environmental protection.

Improve the environmental governance leadership responsibility system,

Improve the provincial ecological and environmental protection inspection system. We will improve the corporate responsibility system for environmental management and comprehensively strengthen the management of emission permits in accordance with the law. Improve the environmental governance supervision system, improve the supervision system, and enhance monitoring capabilities. Improve the national action system for environmental governance and give full play to the

The role of social groups is to improve citizens' environmental literacy. Improve the environmental governance market system, innovate environmental governance models, and launch pilot projects for third-party environmental pollution governance. Improve the environmental governance legal system and improve local laws and regulations and environmental protection standards. Strengthen the management of binding indicators for environmental protection, energy conservation and emission reduction, and carry out effectiveness assessment of pollution prevention and control . Implement the ecological environment public interest litigation system and the ecological environment damage compensation system, and implement a lifelong accountability system for ecological environment damage liability.

Column 25 major ecological and environmental protection projects

Blue Sky Project. Implementation of intermodal transport trunk line connectivity, elimination of old operating diesel trucks and pollution control, urban clean energy infrastructure construction, ultra-low emission renovation of nitrogen oxides,

and key industries

Volatile organic compounds control, volatile organic compound source substitution demonstration, volatile organic compound monitoring and control capacity building, comprehensive control of non-road mobile sources , demonstration of comprehensive control of unorganized emissions, ammonia emission control in key industries and other projects. By 2025 , heavy pollution will be basically eliminated.

Clear water project. Implement urban sewage treatment and pipe network construction, and urban sewage sludge treatment and disposal

Facility construction and standard improvement, sewage resource utilization, drinking water source protection, surface water stability and compliance with standards and elimination of deterioration, three phosphorus remediation , sewage outlet cleaning , investigation and remediation, comprehensive investigation and remediation of black and odorous water bodies at the county and township levels, key areas and key areas Industrial groundwater pollution prevention and control, groundwater environmental status investigation and assessment, eutrophication prevention and control of key lakes and reservoirs, etc. by 2025 year, comprehensive elimination of inferior V Similar water bodies and black and smelly water bodies in urban built-up areas.

Pure Land Project. Implement soil pollution risk management, control and restoration of construction land and contaminated agricultural land

Safe utilization, demonstration of comprehensive prevention and control of soil pollution, comprehensive utilization of bulk industrial solid waste, construction of domestic waste classification collection and processing capabilities, co-processing of industrial solid waste, improvement of medical waste and hazardous waste disposal capabilities, and comprehensive control of "white pollution" .

温室气体减排工程。实施近零能耗建筑示范、近零碳排放区示范、碳捕集利用与封存示范、非二氧化碳温室气体减排示范、传统产业低碳改造示范、农业低碳示范园区、大型展会碳中和示范、公共建筑分布式能源推广应用示范、碳排放监测监控能力建设等工程。

环保基础能力建设提升工程。加快组建省生态环境大数据平台，推进“智慧环保”建设。实施“数字江淮—生态环境”信息化平台建设、环境健康调查、环境应急能力与应急物资储备库建设，生态环境监测网建设提升、环境应急监测能力建设、生态环境监测机构能力建设、生态环境执法监管能力建设、生态环境基础能力建设、重大科技专项、基层生态环境监管能力标准化建设等工程。

Chapter 54 Improve ecosystem quality and stability

Adhere to respecting nature, complying with nature, protecting nature, guarding the boundaries of natural ecological security, and constantly improving the quality and stability of the ecosystem.

Strictly protect ecological space. Prepare provincial land space ecological restoration plan and implement. Implement ecosystem restoration projects in key ecological functional areas, promote major biodiversity conservation projects, and strengthen the management and control of alien species. Strengthen the overall protection of ecological space, pay attention to the

maintenance of mountain topography, vegetation restoration and conservation, and water system shoreline protection, repair and improve the natural ecological environment, and enhance ecological functions and service values. Implement a use control system in all natural ecological spaces, and implement carrying capacity control on ecological spaces protected in accordance with the law to ensure the continued stability of the ecosystem.

Improve the system for protecting important ecosystems.

Improve the property rights system of natural resource assets,

Strengthen natural resource investigation, evaluation, monitoring and rights confirmation and registration.

Promote government-led, enterprise

Collaborate with all sectors of society, market-oriented operation, sustainable ecological product value realization path and multiple compensation mechanisms, and actively promote the pilot of ecological product value realization mechanism. We will fully implement the negative list system for industrial access and formulate a catalog of prohibited and restricted industries by category. We will improve the ecosystem recuperation system and reasonably implement fallow farming, breeding, fishing, logging, and mining bans.

We will deepen and implement the river and lake chief system. Establish and improve the general river chief's order, supervision, assessment, questioning Responsibility and other systems. We will improve the joint prevention, control and management mechanism for cross-border rivers and lakes , implement the joint river and lake chief system, and strengthen the management, management and protection of cross-border rivers and lakes. Continue to promote special actions to improve rivers and lakes, and improve the "river (lake) length +" collaboration mechanism. Implement the daily

management and cleaning system, increase investment in management and protection, and open up the "last mile" of river and lake management and protection. Accelerate the application of video surveillance, remote sensing telemetry, drones and other technologies to improve river and lake monitoring capabilities. Carry out river and lake health assessments, improve one river (lake) one policy, and implement comprehensive management and protection.

Improve the ecological protection compensation mechanism. In the Yangtze River, Huaihe River, Chaohu and other waters of the province promote the "ecological beauty supermarket" in other ecological fields such as forests, wetlands, cultivated land, and air. Establish a long-term mechanism for horizontal ecological compensation in the Xin'an River Basin and improve the ecological compensation mechanism for the water environment in the Dabie Mountains. Comprehensively implement the horizontal ecological compensation mechanism in the upper and lower reaches of the river basin, and implement a surface water cross-section ecological compensation mechanism that is mainly horizontal

compensation at the municipal level and supplemented by vertical compensation at the provincial and central levels . Improve the incentive and restraint mechanism that links ecological protection results with fund allocation, promote market-based trading of emission rights, energy rights, water rights, and carbon emission rights , and support the creation of a national-level trading center. Further promote the national comprehensive ecological compensation pilot projects in Jinzhai, Shitai, Yuexi, Shexian, and Xiuning.

Chapter 55 Deepen a new round of reform of the forest chief system

the system and mechanism for coordinated promotion of green protection, green enhancement, green management, green utilization, and green activation , build a national forest chief system reform demonstration zone, and promote the modernization of the forestry governance system and governance capabilities.

Improve the collaborative promotion mechanism.

Strengthen the green protection mechanism and implement the pine wood nematode in Huangshan Mountain

We will strengthen the construction of comprehensive prevention and control of diseases, strengthen the development of prevention and control technologies and joint prevention and control of major forest pests , and carry out cross-regional joint prevention and patrols. Improve the greening mechanism, thoroughly implement the " four sides and four sides " land greening improvement action, and enhance the carbon sink capacity of the ecosystem . Strictly manage the green management

mechanism, strengthen the construction of the forestry law enforcement system, and strictly enforce forestry ecological damage compensation and accountability.

Improve the green utilization mechanism, make new forestry management entities bigger and stronger, cultivate forestry industry clusters, and promote the industrialization and ecologicalization of forestry ecology. We will deepen the active green mechanism , deepen the reform of the collective forest rights system, improve the forestry property rights system, improve the separation system of the " three rights " of contracted forest land, promote the reform of the " three changes " in forestry , and build a national forest rights trading center.

Consolidate and improve the results of the reform of state-owned forest farms and strengthen infrastructure construction in forest areas.

Improve the forest chief organizational system.

Establish a provincial forest chief system for key ecological functional areas,

Improve the grassroots forest chief's duty performance mechanism and form an organizational system in which " provincial-level chief forest chiefs bear overall responsibility, city and county-level chief forest

chiefs take charge of supervision, regional forest chiefs take charge of dispatching, functional zone chiefs take charge of characteristics, and rural forest chiefs take charge of implementation ", to achieve full coverage of the forest chief's scope of responsibility . Improve the " Five Ones " **service platform of the forest chief system** , and comprehensively establish the " one forest, one file " information management system, the " one forest, one policy " target planning system, the " one forest, one technology " science and technology service system, and the " one forest, one police " system. Law enforcement guarantee system and " one forest, one member " safety patrol system.

Chapter 56 Comprehensively improve resource utilization efficiency

Improve the comprehensive conservation and efficient utilization system of energy resources, strengthen the entire process conservation management, significantly reduce the intensity of resource consumption, and comprehensively improve utilization efficiency and effectiveness.

control system of total energy consumption and intensity. Strictly control energy consumption intensity,

Effectively control the increase in energy consumption and ensure rational use of energy for economic and social development and improvement of people's livelihood. Give full play to the role of the market in allocating resources and guide the rational flow and efficient allocation of energy factors. Improve the energy-saving assessment and review system for fixed asset investment projects, strengthen source control, strictly control the scale of high energy-consuming industries and the number of projects, and eliminate inefficient, high energy-consuming, and high-coal-

consuming projects. Strengthen energy conservation management in key areas and key energy-consuming units, carry out energy-saving diagnosis and energy-saving transformation, strengthen energy-saving supervision, promote the construction of online energy consumption monitoring systems and strengthen data utilization.

control system for the total amount and intensity of water resources consumption.

Improve the three-level banking system of provinces, cities and counties. A dual-control indicator system for the total amount and intensity of water use in the administrative region has been established to scientifically formulate water quotas and adjust them dynamically. Strictly manage the entire process of water use and improve the water resource demonstration system for planning and construction projects. Implement water-saving actions, vigorously promote water-saving work in agricultural water-saving and efficiency-increasing, industrial water-saving and emission reduction, urban water-saving and loss-reducing, water-saving and resource-saving in key areas, and comprehensively improve water resource utilization efficiency. We will deepen the comprehensive reform of agricultural water prices,

build supporting measurement facilities, and improve the incentive mechanism for agricultural water conservation. Establish and improve the urban water supply price formation mechanism and dynamic adjustment mechanism, and continuously improve measures such as the ladder water price for residential water and the price increase system for non-residential water exceeding the quota. by 2025 In 2017, water consumption per 10,000 yuan of regional GDP dropped by 16% .

Implement the strictest land conservation and farmland protection system. To strengthen

construction projects

Local standard control. Improve the evaluation and assessment system for economical and intensive land use, promote land-saving models and technologies, and promote the redevelopment of inefficient urban land. Strengthen the protection of cultivated land, consolidate the results of permanent basic farmland delineation, carry out quality improvement of permanent basic farmland, and ensure that the quantity and quality of permanent basic farmland are not reduced.

Improve the efficient utilization system of mineral

resources. Increase the investigation and evaluation of strategic mineral resources

Focus on advantageous mineral resources and mineral resources in short supply, and improve the level of mineral resource exploration, development and utilization. Strengthen the protection of mineral resources, optimize the mining rights transfer process, and insist on moderate development. Strengthen the construction of green mines and implement the mineral resources royalty system . Actively promote the

ecological restoration of mines, improve the incentive mechanism for the restoration of abandoned mines, improve the ecological restoration and fund annual reporting system of production mines under construction, support the comprehensive management of the ecological environment in coal mining subsidence areas such as Lianghuai and Ma'anshan and other mining areas, and create ecological restoration and management model projects.

Vigorously develop circular economy. Deeply implement circular development leading actions, improve capital Resource conservation and intensive recycling policy system. Accelerate the implementation of production methods of source reduction, environmental friendliness, resource recycling, and end-of-pipe management, realize circular production of enterprises, circular development of parks, and circular combination of industries, and establish a circular industrial system. Guided by multifunctional large-cycle agriculture, we will promote the comprehensive utilization of agricultural products and forest product processing waste, expand the multifunctionality of agriculture and forestry, and build an ecological circular agriculture system. Accelerate the construction of a waste material

recycling system, strengthen the resource utilization of typical urban waste, promote the "two-network integration" of the domestic waste collection and transportation system and the renewable resource recovery system, and establish a symbiotic system of circular links between the production system and the living system. Build a national bulk solid waste comprehensive utilization base with high standards.

Chapter 14 Implement high-level opening up to the outside world Create a new highland for reform and opening up with important influence

Adhere to the implementation of a wider, wider and deeper opening to the outside world, rely on the strong domestic market and regional market, promote the joint construction of the " Belt and Road " at a high level, accelerate the cultivation of new advantages in international economic cooperation and competition, and open up a new situation of win-win cooperation.

Chapter 57 High-quality construction of China (Anhui) Free Trade Pilot Zone

Benchmark international advanced rules, make full use of greater reform autonomy, build a new higher-level open economic system, and create a new highland for reform and opening up in the new era.

Support the innovative development of pilot free trade

zones. Further strengthen innovation leadership and Efforts will be made to implement special promotion actions for the free trade pilot zone, promote scientific and technological innovation, industrial innovation, enterprise innovation, product innovation, and market innovation, promote the deep integration of scientific and technological innovation and the development of the real economy, and strive to build a city with convenient trade and investment, active and strong innovation, and agglomeration of high-end industries. A high-standard and high-quality free trade park with complete financial services, safe and efficient supervision, and outstanding radiating and driving effects. Support the Hefei area to build a comprehensive national science center and industrial innovation center leading area with global influence; support the Wuhu area to build an open industrial cluster, a strategic emerging industry pilot area, and an international logistics hub for river-sea intermodal transport; support the Bengbu area to build a world A first-class silicon-based and bio-based manufacturing center and a leading area for scientific and technological innovation and open development in

northern Anhui.

Strengthen institutional innovation and exploration.

Learn from the development experience of domestic advanced free trade pilot zones

We will further promote systematic reform and integrated innovation, establish a special list of free trade pilot zones, and build a basic institutional system and regulatory model that is connected with the prevailing rules of international investment and trade. Support each region to carry out differentiated exploration and form more internationally competitive institutional innovation results in the fields of business environment, investment and trade, financial opening, technological innovation, and industrial development. Comprehensively enhance open platform functions such as comprehensive bonded zones, designated customs entry supervision sites, cross-border e-commerce comprehensive pilot zones, public overseas warehouses for export products, and national digital service export bases.

Comprehensively amplify the radiation-driven effect.

Strengthen the coordination and linkage of the three areas and accelerate the
The experience of reform pilots in the pilot trade zones will be replicated and promoted to form an overall synergy for reform and innovation. Promote the

coordinated cooperation between the free trade pilot zone and the provincial economic development zones and high-tech zones, support the Hefei area to drive the Jianghuai River and radiate the whole province, the Wuhu area to drive the Wanjiang River and radiate the southern Anhui, and the Bengbu area to drive the Yangtze River and the Huaihe River and radiate the northern Anhui . In accordance with the principle of " mature batch, construction batch ", support the coordinated development of Ma'anshan Zhengpugang New Area , Economic and Technological Development Zone and Free Trade Pilot Zone, and support the construction of joint innovation zones in cities with conditions.

专栏 26 自由贸易试验区“9+3+N”专项推进行动

实施 9 个专项推进行动计划。实施营商环境、深化投资领域改革、贸易高质量发展、金融领域开放创新、创新驱动发展、产业优化升级、服务国家重大战略、法治保障、片区联动和复制推广 9 个专项行动计划。

支持 3 个片区建设。合肥片区 64.95 平方公里（含合肥经济技术开发区综合保税区 1.4 平方公里），重点发展高端制造、集成电路、人工智能、新型显示、量子信息、科技金融、跨境电商、节能环保、服务贸

易、生命健康等产业。芜湖片区 35 平方公里（含芜湖综合保税区 2.17 平方公里），重点发展智能网联汽车、智慧家电、航空、机器人、国际航空货运、航运服务、跨境电商等产业。蚌埠片区 19.91 平方公里，重点发展硅基新材料、生物基新材料、新能源、跨境电商以及上下游相关产业。

谋划 N 个专项推进行动计划。根据自由贸易试验区建设需要，适时调整增加专项推进行动计划，组织专项研究、争取专项突破。

Chapter 58 Deeply participate in the construction of “One Belt, One Road ”

Adhere to the principle of extensive consultation, joint contribution and shared benefits, uphold the concepts of green, openness and integrity, deepen practical cooperation, strengthen safety and security, and promote common development.

Optimize and improve open channels. Build a multi-dimensional, smooth and efficient opening to the outside world

A large channel to create a strategic fulcrum for the multi-channel integration of the “Belt and Road Initiative ” with the Yangtze River Economic Belt, Huaihe Ecological Economic Belt, and the Yangtze River Delta . We will expand connections with the Silk Road

Economic Belt and accelerate the construction of rail transit and highway networks that radiate to the central and western regions and reach the southeastern coast . Improve the functions and coverage of China-Europe trains in Hefei and other places, connect Wuhu, Bengbu and other places, create a China-Europe train assembly center demonstration project, and enhance domestic and overseas cargo distribution capabilities. Expand connection 21 The Century Maritime Silk Road integrates the shoreline resources of the Yangtze River and Huaihe River, improves the land port connection system, deepens cooperation with coastal ports, and opens up maritime routes along the coast and in East Asia and Southeast Asia. Expand the connection with the Air Silk Road, increase the number of flights along the “Belt and Road ”, and build an aviation system covering important cities in the world.

Deepen international production capacity cooperation.

With enterprises as the main body and market as the guide, we encourage enterprises to

Enterprises with good strength and reputation should go abroad and expand two-way trade and investment. Guide advantageous enterprises in industries such as building materials, automobiles, home appliances, engineering machinery, agriculture, non-ferrous metals, resources and energy to expand foreign investment cooperation, and accelerate the construction of a cross-border industrial chain system integrating design and research and development, processing and manufacturing, marketing and promotion, logistics distribution, and after-sales services . Accelerate the transformation and upgrading of foreign contracting projects, guide powerful road and bridge, housing construction, hydropower and other enterprises to participate in the construction of major infrastructure in countries along the “Belt and Road ”, and drive equipment, technology, brands, services, and standards to go global. Encourage enterprises to establish or acquire technology research and development platforms overseas . Deepen trade cooperation with countries co-building the “Belt and Road ”, continue to delve into traditional markets

such as developed economies, vigorously expand emerging markets, and promote third-party market cooperation . Implement the Regional Comprehensive Economic Partnership Agreement (**RCEP**) and the China-EU Investment Agreement, and increase market development in the member countries of the agreement. Encourage financial institutions to enhance their overseas business capabilities and promote financial capital and industrial capital to jointly go global. Relying on major production capacity cooperation projects and Hefei's China-Europe freight trains arriving overseas, we will create an overseas economic and trade cooperation zone with clear industrial positioning, prominent location advantages, advanced operation and management, and obvious ecological effects.

Promote innovative development of foreign trade.

Support the construction of cross-border e-commerce platforms and overseas warehouses, and develop cross-border logistics and build a cross-border e-commerce industry chain. Accelerate the construction of national cross-border e-commerce comprehensive pilot zones such as Hefei, Wuhu, and Anqing, and support qualified cities such as Bengbu and Xuancheng in

striving to create national cross-border e-commerce retail import pilots and national cross-border e-commerce comprehensive pilot zones. Deepen the construction of foreign trade transformation and upgrading bases and support the construction of national digital service export bases. We will support the pilot projects for the innovative development of service trade in Hefei and the construction of innovative demonstration zones for import trade promotion, and promote the pilot construction of Bengbu market procurement trade methods. Implement the project to cultivate and strengthen foreign trade entities , accelerate the cultivation and introduction of a number of large export-oriented projects, and create a

A batch of foreign trade industry clusters with global influence.

Close people-to-people and cultural exchanges and cooperation. Vigorously promote international cooperation in the fields of public health, digital economy, green development, science and technology, education, cultural tourism, sports and health, media think tanks, etc. , strengthen exchanges with women, youth, disabled people and other groups, carry out solid foreign aid work, promote people-to-people bonds, build consensus and strength. Strengthen cooperation with Russia, especially the Federal District along the Volga River, and promote economic, trade and cultural exchanges with Germany. Deepen the construction of international sister cities and strive to create a number of high-quality sister cities. Strengthen friendly exchanges with foreign government agencies, international organizations, civil society, etc. Promote the building of international communication capabilities and create an environment conducive to international public opinion and external development.

Promote trade and investment liberalization and facilitation. Implement the foreign investment law and

supporting regulations, align with international high-standard market rules, fully implement the pre-establishment national treatment plus negative list management system for foreign investment, and promote institutional openness such as rules, regulations, management, and standards. Protect the legitimate rights and interests of foreign-invested enterprises in accordance with the law. Improve the convenience for foreign business personnel to come to Anhui and improve the foreign investment promotion, protection and service system. Accelerate the construction of an internationally advanced trade " single window " , promote customs clearance data exchange, port logistics information docking, mutual recognition of corporate credit information, and supervision and law enforcement information sharing, improve the efficiency of comprehensive port logistics services, and consolidate the effectiveness of shortening the overall customs clearance time of goods.

Strengthen opening security. Improve the open supervision system, implement foreign investment security review methods, and improve the policy and service system for “ Belt and Road ” investment cooperation.

Guide the healthy development of overseas investment, strengthen safety risk assessment, monitoring and early warning, and emergency response, improve overseas security and risk response capabilities, and safeguard the legitimate rights and interests of enterprises overseas . Strengthen the construction of public service platforms for overseas investment and support foreign-related legal, accounting,

The development of intermediary agencies such as taxation, investment consulting, asset assessment, and risk assessment, and expansion of export credit insurance coverage. Standardize the overseas business behavior of enterprises, establish China's investment image, and achieve mutual benefit, win-win, and common development with investment destination countries.

Chapter 59 Collaboratively promote the rise of the central region

the strategic positioning of "one center and four regions" in the central region, we will coordinately promote the implementation of the national regional development strategy and strive to be at the forefront of the rise of the central region.

Innovation promotes coordinated development of the manufacturing industry. Strengthen industrial division of labor and cooperation with central provinces, Give full play to the advantages of innovative resources, expand cooperation space with central provinces in key core technologies, cutting-edge leading technology research and other aspects, and form a batch of

application results. Collaboratively promote the development of advantageous traditional industries such as steel, chemicals, nonferrous metals, and building materials into high-end, intelligent, green, and brand-oriented industries. Jointly build a technology trading market alliance in the central region to promote interconnection of technology trading markets. Encourage the adoption of "enclave economy", factor cooperation and other models to jointly build industrial transfer cooperation parks with other provinces in central China.

Promote coordinated development across provinces.

Strengthen cooperation with the Central Plains urban agglomeration, Wuhan urban circle, Changsha-Zhuzhou-Xiangtan urban agglomeration, Poyang Lake Ecological Economic Zone, and Huaihai Economic Zone requires comprehensive cooperation in the fields of strategic planning, industrial collaboration, factor allocation, ecological environmental protection, and port customs clearance. Focusing on infrastructure interconnection, public service sharing, and ecotourism, we will actively participate in inter-city cooperation within the middle reaches of the Yangtze River urban agglomeration and the Central Plains urban

agglomeration. With Hefei, Wuhan, Changsha, and Nanchang as the main bodies, we will improve the consultation mechanism for provincial capital cities in the urban agglomeration in the middle reaches of the Yangtze River. Deepen the cooperative development of Anqing - Jiujiang - Huanggang, Suzhou - Xuzhou, Huangshan - Quzhou - **Shangrao**. Promote the interconnection and sharing of basic medical insurance information and resources,

Realize the direct settlement of hospitalization expenses in the central region. Strengthen cooperation in the Dabie Mountains of Hubei, Henan, and Anhui and the ecological tourism circles of Fujian, Zhejiang , Anhui, and Jiangxi. Actively participate in the construction of the equity trading market in the central region. Support Wuhu, Ma'anshan, Tongling and other cities in actively participating in the coordinated development of key river basins.

Continue to amplify policy effects. We will continue to implement comparative measures in underdeveloped counties (cities and districts).

We will implement policies related to the development of the western region, and cities with old industrial bases will continue to implement policies related to the revitalization of old industrial bases such as the Northeast region, and comprehensively implement the comprehensive reward and subsidy policy for technological transformation of industrial enterprises . Increase the free flow of talents, implement flexible and diverse talent flow policies such as two-way temporary employment, short-term work, and project

cooperation, and promote the organic connection between human resource sharing and service policies.

Chapter 60 Create a high-level open platform

Deepen international cooperation, create a number of open platforms with strong inclusiveness, carrying capacity, and influence, and promote the high-quality development of the open economy.

Comprehensively enhance the level of the exhibition.

Focusing on national strategy, industrial innovation, and humanistic ecology, Plan to build a number of brand exhibitions, international summits, high-end forums, major events and international exchange and cooperation bases with two-way openness . Focusing on RCEP , we plan to build a new platform for international cooperation with important influence around key countries (regions) such as Central and Eastern Europe and Germany. Support cities in organizing economic and trade, consumer, and people's livelihood exhibitions. Promote innovation in exhibition models, make full use of modern information technology, and explore new exhibition models that integrate online and offline synchronization and

organic integration. Promote exhibition institutions to establish cooperation mechanisms with internationally renowned exhibition industry organizations, industry associations, exhibition companies, etc. to improve the quality and efficiency of exhibitions. Taking into account public welfare and market principles, improve the carrying capacity and

Usage rate.

Cultivate and develop international cooperation industrial parks. Adhere to international characteristics and global positioning, and accelerate the development of international cooperation industrial parks such as China–Germany and China–South Korea. Accurately connect the cutting-edge technologies, emerging business formats, high-end equipment and advanced manufacturing of cooperative countries (regions) to promote the industry to quickly enter the international industrial chain and high-end value chain. Pay attention to the combination of attracting investment, intelligence and technology, and strengthen cooperation with partner countries (regions) in scientific and technological innovation, talent training and other aspects. Support foreign institutions, enterprises, and capital to participate in the operation of international cooperation industrial parks in accordance with laws and regulations .

Cultivate a number of new international cooperation industrial parks around the main sources of foreign investment, major foreign investment projects and international sister city resources. By 2025, build

around 15 high-quality national

The International Cooperation Industrial Park gathers a group of representative foreign-funded enterprises such as the Fortune Global 500, global industry leaders, and hidden champions .

Accelerate the construction of special customs supervision areas and ports. Promote comprehensive bonded zones, bonded

Improve the quality and efficiency of special customs supervision areas (places) such as tax logistics centers, integrate and optimize bonded processing, bonded logistics and bonded display trading businesses in special customs supervision areas, promote the innovative development of processing trade, and explore the development of bonded research and development, domestic and overseas maintenance and other high-tech value-added industries. Support qualified cities such as Bengbu and Xuancheng in applying to build comprehensive bonded zones, bonded logistics centers, and express delivery customs supervision sites. Further improve the level of port opening, actively apply for the construction of national first-class ports, promote the opening of Fuyang, Jiuhuashan, Wuhu Xuanzhou and other airport

ports, and encourage the first port of entry to apply for the construction of designated entry supervision sites that are highly related to the development of local industries.

Improve the level of investment promotion. Support local governments to promote innovation in investment promotion policies in accordance with the law.

Deepen the “docking of six hundred projects ” and make full use of professional investment promotion, entrusted investment promotion, “fund +

Industry " investment promotion, business-based investment promotion, online investment promotion and other models, implement more flexible incentive measures, and vigorously introduce internationally renowned enterprises and high-end elements. Increase overseas investment promotion efforts and guide more foreign investment to invest in advanced manufacturing and modern service industries. and other fields. Actively and effectively borrow foreign preferential loans. Strengthen cooperation and exchanges with Hong Kong, Macao and Taiwan, promote cooperation with Hong Kong in finance and trade, basic research, talent training, achievement transformation, etc., and promote cooperation with Macao in exhibitions, finance, traditional Chinese medicine, culture, etc. Cooperate in all aspects to promote the construction of industrial cooperation parks such as the Cross-Strait Integrated Circuit Industry Cooperation Pilot Zone and the Cross-Strait Industrial Transformation and Transfer Demonstration Base. Promote the use of foreign funds to improve quality and efficiency, promote the "return of Huizhou merchants ", and encourage Anhui residents at

home and abroad Return to your hometown to invest and start a business. Build the Anhui (Hefei) Overseas Chinese Dream Garden at a high level and create an innovation and entrepreneurship gathering area for overseas Chinese.

专栏 27 高能级对外开放平台工程

重点展会。将世界制造业大会打造成为享誉中外的全球制造业盛会。办好世界显示产业大会、世界声博会、中国国际徽商大会、中国（安徽）科技创新成果转化交易会、中国安徽名优农产品暨农业产业化交易会、中国华药会、中国（合肥）国际园林博览会、中国（芜湖）科普产品博览交易会、国际（亳州）中医药博览会、中国（铜陵）青铜文化博览会、海峡两岸（马鞍山）电子信息博览会等展会，持续增强吸引力和国际影响力。围绕长三角一体化、“一带一路”国际合作、科技创新、产业发展、贸易促进、文化旅游培育产业特色鲜明、区域特点显著的品牌展会。积极稳妥引进国际知名品牌展会。

国际合作产业园。大力推进中德（合肥）智能制造国际创业园、中德（芜湖）中小企业合作区、安徽中德（合肥）国际合作智慧产业园、

Anhui Sino-German (Wuhu) International Cooperation Intelligent Manufacturing Ecological Industrial Park, Anhui Sino-Korean (Chizhou) International Cooperation Semiconductor Industrial Park, Anhui Sino-German (Ningguo) International Cooperation Intelligent Manufacturing Industrial Park, Anhui Sino-German (Suixi) International Cooperation Aluminum-based Industry Park, Anhui Sino-British (Dangtu) International Cooperation Life and Health Industrial Park, Anhui Zhongxi (Xinwu) International Cooperation Auto Parts Industrial Park, Anhui Sino-Japanese

The construction of international cooperation industrial parks such as the (Changfeng Shuangfeng) International Cooperation Advanced Manufacturing Industrial Park, Anhui Sino-Singapore (Shucheng) International Cooperation Food Industrial Park, and Anhui China-India (Taihe) International Pharmaceutical Cooperation Pilot Demonstration Industrial Park has created a cluster of foreign investment projects Local and characteristic industry formation areas.

Special customs supervision areas (places). Promote Hefei Comprehensive Bonded Zone, Hefei Economic and Technology The industries in the Development Zone Comprehensive Bonded Zone, Wuhu Comprehensive Bonded Zone, Ma'anshan Comprehensive Bonded Zone, and Anqing Comprehensive Bonded Zone develop towards the high end of the industrial chain such as R&D, logistics, sales, maintenance, and remanufacturing, accelerate the integration of factors and industrial supporting facilities,

and promote the agglomeration development of export-oriented industries. Promote Bengbu Wanbei Bonded Logistics Center (Type B), Hefei Airport Bonded Logistics Center (Type B), Southeast Anhui Bonded Logistics Center (Type B), Southwest Anhui Bonded Logistics Center (Type B), Tongling Bonded Logistics Center (Type B) Optimize and improve, and support eligible various types of special customs supervision areas (sites) to apply for the establishment of comprehensive bonded zones.

port. Relying on Ma'anshan Port Water Transport Port, Wuhu Port Water Transport Port, Tongling Port Water Transport Port, Chizhou Port Water Transport Port, Anqing Port Water Transport Port, Hefei Air Port, and Huangshan Air Port vigorously promote the construction of platform carriers such as special customs supervision areas, cross-border e-commerce industrial parks, and modern logistics parks to create integrated processing, trade circulation, modern logistics, Cultural tourism is an integrated port economic growth pole.

Chapter 61 Promote reform and innovation in development zones

Deepen the reform of systems and mechanisms, vigorously promote technological innovation, management innovation, and institutional innovation, and create an upgraded version of the development zone with strong

endogenous power.

Promote the improvement of development zone functions. In-depth implementation of innovative capabilities to enhance characteristic industries. Special actions will be taken to cultivate leading enterprises and support the development zone in building a major emerging industry base in the province around the first industry. Benchmark development zones in Shanghai, Jiangsu and Zhejiang, optimize and improve the undertaking capacity, promote the organic connection of infrastructure and public service facilities between the development zone and the central city, and improve service functions such as living areas, business areas, and office areas. Steadily promote the REITs pilot in development zones **and strive** to create a national-level industry-city integration demonstration zone and industrial transformation demonstration zone. Support the expansion and upgrading of development zones at or above the provincial level in accordance with laws and regulations, and strive to create national-level high-tech industrial development zones and economic and technological development zones. Support Hefei High-tech Industrial Development Zone in building a first-

class high-tech park. Support qualified development zones to build characteristic industrial parks in a " park within a park " manner. to 2 0 2 5 In 2016, a number of development zones worth hundreds of billions of yuan were formed.

Build an innovative smart park. Accelerate the construction of 5G, industrial Internet, and Big data centers, etc., continue to improve the park's technology and industrial innovation infrastructure. Relying on Hefei Economic and Technological Development Zone, Wuhu High-tech Industrial Development Zone, Suzhou High-tech Industrial Development Zone, Huainan High-tech Industrial Development Zone and other development zones with digital economic foundations, implement provincial-level digital economic park cultivation projects. Accelerate the integration and application of blockchain with the real economy and smart parks, and build provincial-level blockchain professional parks. Open up cross-regional industrial chains, supply chains, and innovation chains to promote the agglomeration development of online economic industries. By 2025, the construction of innovative smart parks will be fully covered.

Increase reform and innovation efforts. Accelerate the revision of development zone regulations and continue to promote

Integration and improvement of development zones. We will advance the empowerment of development zones in an orderly manner in accordance with the law, simplify administrative review and approval powers, and increase the duplication and promotion of negative lists. We will steadily carry out the reform of statutory institutions, promote the legislative authorization of pilot parks, and realize the statutory rights and responsibilities of management agencies. guide and support

Support social capital to participate in the construction of development zones and explore diversified operating models. Accelerate the promotion of regional assessment, comprehensively implement the "standard land" reform, adhere to the principle of "heroes are judged on average per mu", and carry out comprehensive evaluation of the benefits of industrial enterprises per mu. Implement a full-staff appointment system and a performance-based salary system. Improve the annual comprehensive assessment and evaluation, and increase the funding and land index rewards for commended development zones.

Column 28 Three major special actions in the development zone

Special actions to improve innovation capabilities. Efforts will be made to improve the scientific and technological innovation capabilities of the development zone, and the public innovation platform coverage project, the deep integration of industry, academia and research projects, and the scientific and technological innovation service project will be implemented to achieve every one national-level innovation platform has been established in each national-level development zone and municipal-administered provincial-level development zone, and the provincial-level

innovation platform has achieved "full coverage . "

Special actions to strengthen characteristic industries. Focus on strengthening the characteristic industries of the development zone and implement the undertaking of industries. The transfer agglomeration project, the first industry enhancement project, the characteristic park forging project, and the characteristic town integration project will realize no less than 5 characteristic industrial clusters with an output value of 100 billion yuan, 50 billion yuan, and 10 billion yuan respectively. 20 __ , 80 _ , the province has formed a system of innovative and characteristic industrial parks with unique characteristics.

Special actions to cultivate leading enterprises. Focus on cultivating leading enterprises in development zones and implementing high and new technologies. The enterprise foundation project, the manufacturing " single champion " improvement project, and the leading enterprise strengthening project were implemented to achieve a main business income of 500 billion, 100 billion, 50 billion, 10 billion. There are 5 , 50 , 80 , and more than 100 enterprises worth 100 million yuan respectively .

Chapter 15 Improve education and health levels to promote all-round development of people

We must insist on placing the development of education and ensuring people's health in a strategic position of priority development, comprehensively improve the education level of the population, continuously enhance health security capabilities, solve the problem of "one old and one young", and provide the people with a happy life throughout their life cycle. Excellent service.

Chapter 62 Build a high-quality education system

"five educations simultaneously" action of moral education to build soul, intellectual education to improve quality, physical education integration, aesthetic education to influence, and labor promotion to cultivate socialist construction with comprehensive development of moral, intellectual, physical, artistic and labor successors and successors.

Consolidate and improve the quality of basic education.

Adhere to the principle of public welfare of education and deepen education

Reform, promote educational equity, and run every school at home. Improve the guarantee mechanism for inclusive preschool education, implement the universal preschool education project, strengthen the construction and management of supporting kindergartens in urban communities, increase the supply of preschool education resources, and increase the coverage of inclusive kindergartens . By 2025 , the gross enrollment rate of preschool education will exceed 92% . Strengthen the basic status of compulsory education , accelerate the integration and high-quality balanced development of urban and rural compulsory education , implement compulsory education quality improvement projects, coordinate the planning and layout of compulsory education schools, improve school running conditions, and enhance teaching quality. Promote school-running forms such as group-based school running, branch schools run by famous schools, entrusted management, school district system management, school alliances, etc., and promote high-quality

Educational resource sharing. Accelerate the diversified and distinctive development of ordinary high schools, implement the expansion project of urban ordinary high schools, promote the reform of education methods in ordinary high schools, build a course selection and class teaching management mechanism, and improve the popularity of high school education. Improve special education and specialized education guarantee mechanisms, build a special education system with reasonable layout, connection between school stages, integration of general and vocational education, and integration of medicine and education, promote the overall and coordinated development of education for special groups, and ensure equal rights to education. Comprehensively strengthen and improve school physical education, aesthetic education and labor education in the new era, enhance students' civilized literacy, social responsibility awareness, and practical skills, and pay attention to young people's physical fitness and mental health education.

Improve vocational education service development capabilities. Implement the quality improvement of

modern vocational education

Plan to promote the construction of a pilot zone for innovative development of vocational education, continue to optimize the layout and structure of vocational education, promote quality improvement in vocational colleges , and focus on building a number of high-level vocational colleges. Support qualified high-level vocational schools in striving to become undergraduate-level vocational schools . Vigorously develop technical education, promote the construction of provincial-level high-level and high-quality technician colleges, and create a number of nationally renowned brand technician colleges. Strengthen the teaching staff of vocational education, and accelerate the cultivation of a number of provincial-level " dual-qualified " teacher training bases, provincial-level teacher teaching innovation teams, and backbone specialty majors (groups) . Improve the training system for secondary and higher vocational education, accurately meet the actual needs of industry and regional development, and improve the quality of skilled talent training in vocational colleges. Establish and improve the apprenticeship system with

Chinese characteristics that promotes coordinated promotion by multiple entities and alternates work and study, improves mechanisms such as dual-owner education in schools and enterprises , integration of recruitment and enrollment, and guarantee of funding investment, and promotes the construction of cities, industries, and enterprises that integrate industry and education. Support the development of vocational education group schools and vocational education parks.

Improve the quality level of higher education.

Accelerate the promotion of connotative development of higher education,

Adjust investment methods and promote structural optimization of higher education. Continue to promote the construction of "double first-class", support the University of Science and Technology of China in becoming a world-class university with Chinese characteristics, support universities such as Hefei University of Technology and Anhui University in building a number of world-class disciplines, and actively introduce "double first-class" construction universities in Anhui has set up branches to expand the enrollment scale of "double first-class" construction universities. Accelerate the transformation and development of local universities, improve the construction standards of high-level universities with local characteristics, application-oriented high-level universities, and skill-based high-level universities. Relying on the joint construction of provinces and ministries and provinces and cities, we will build a group of universities in a classified manner that are distinctive among similar universities across the country. and competitive colleges and universities, and promote the renaming of colleges that meet the

standards into universities. Build a new high-level international university and create a gathering platform and training base for high-end innovative talents. Comprehensively promote the construction of new engineering, new medical, new agricultural, and new liberal arts, and implement the five-year plan for the construction of peak disciplines in colleges and universities. Improve the classified training system for higher education talents and accelerate the cultivation of talents in urgent need of science, engineering, agriculture and medicine . Optimize the structure of graduate education, improve the level of graduate education, and vigorously develop professional degree graduate education. Support the development of university scientific research platforms and scientific and technological achievement transformation institutions, and deepen the construction of collaborative innovation alliances among Anhui universities .

Strengthen the construction of teachers in the new era.

Improve the long-term mechanism for the construction of teachers' ethics and ethics,
It advocates that the whole society respects teachers

and values education, and encourages teachers to strive to become good teachers with the " four qualities " . Promote the establishment of a staff turnover pool system for colleges and universities, primary and secondary schools, improve the " county-governed school recruitment " management system for primary and secondary school teachers, and implement the rural primary and secondary school chief teacher position plan, the targeted training rural teacher plan and the " special post plan . " Improve the teacher training system and talent introduction mechanism, improve the recruitment policy for normal students, and appropriately increase the per-student funding standard for teacher majors in colleges and universities . Strengthen the construction of early childhood education teams. Efforts should be made to improve the information technology application of primary and secondary school teachers

Use ability. Strengthen teacher remuneration protection.

Deepen education reform and opening up. Improve the education management system, innovate the school running system, and improve the quality evaluation and examination enrollment system. Support and standardize the development of private education, cultivate new forms of education services, and standardize off-campus training institutions. Expand the autonomy of colleges and universities in setting up disciplines and majors, and improve the evaluation mechanism for the professional titles of college teachers. Use information technology to update educational concepts, develop online education, and strengthen comprehensive education that integrates science, technology, engineering, mathematics, and art. Deepen the reform of education evaluation in the new era, establish and improve a scientific education evaluation system, and highlight quality education evaluation. Streamline review, evaluation and inspection items. Deepen the reform and innovation of ideological and political courses , coordinate the integrated construction of ideological and political courses in universities,

middle schools and primary schools , and promote the connotative development of ideological and political course construction. Promote the construction of a pilot province for the comprehensive reform of " Three Holistic Education " and select a group of universities that take the lead in ideological and political construction of courses . Improve the lifelong learning system, build Anhui qualifications framework, promote the construction of credit banks, and build a learning society. We will expand the opening up of education and encourage the introduction of high-quality educational resources at home and abroad to cooperate in running schools. We will successfully run exchange programs with Taiwan and promote “ study in Anhui ” . Strengthen educational exchanges and cooperation with “ Belt and Road ” countries and regions and sister provinces and states, and promote the construction of Sino-German educational cooperation demonstration bases.

专栏 29 教育提质扩容重大工程

学前教育普及普惠工程。扩大普惠性学前教育资源，新建、改扩建幼儿园项目 1000 个左右。到 2025 年，普惠性幼儿园覆盖率超过 82.5%，不断提高公办园在园幼儿占比。

义务教育质量提升工程。积极推动优质均衡发展，到 2025 年，全省

The number of counties (cities, districts) that have achieved high-quality and balanced development has reached 25%. Optimize the spatial layout of infrastructure and build, renovate and expand approximately 10 million square meters of compulsory education teaching facilities .

Urban high school expansion project. Promote the popularization of ordinary high schools, build, renovate and expand ordinary high schools

Pass high school 200 Around. By 2025 , the gross enrollment rate of high school education in the province will stabilize at 92% above.

Vocational education industry-education integration construction project. Promote the in-depth integration of industry and education, and collaborative education between schools and enterprises, and build 100 talents in areas where technical skills are in short supply such as advanced manufacturing. About a high-level professional

Chemical industry-education integrated training base to cultivate 500 About 20 industry-education integrated enterprises have been built about _

Provincial model vocational education group, focusing on building 50 It has a number of high-level technical secondary and higher

vocational schools and a number of majors that are closely connected with the industry.

" Double first-class " and high-level university construction projects. Support the International College of University of Science and Technology of China

Construction, planning and construction of the International Campus of the University of Science and Technology of China. Accelerate the construction of the Intelligent Manufacturing Technology Research Institute of Hefei University of Technology . Build the Future College of Anhui University and the New Medical Center of Anhui Medical University. Focus on building 8 distinctive high-level universities and a number of advantageous and distinctive disciplines and majors, 10 application-oriented high-level universities and a number of brand application majors, establish a number of independent colleges, and build a number of major scientific research innovation platforms and experimental training centers . Anhui University and Stony Brook College in New York will be well run.

Construction project of peak disciplines in colleges and universities. Aiming at major national and provincial development strategies, supporting Gaofeng School Science construction, serving Anhui's economic and social development. to 2025 In 2018, the Class I peak subjects strive to reach the world - class level; the Class II peak subjects strive to reach the top 20 % of the domestic discipline rankings , some Class II peak subjects reach the top 10 % of the domestic discipline rankings , and several Class II peak subjects reach the top 20% of the domestic discipline rankings. About 5 % ; Category III peak disciplines have reached the domestic advanced level.

Chapter 63 Comprehensively promote the construction of a healthy Anhui

Adhere to the prevention-oriented approach,
thoroughly implement the Healthy Anhui Action, and
integrate health into

Integrate all policies, accelerate the construction of a strong public health system, and comprehensively intervene in factors affecting health .

Strengthen the construction of public health system.

Reform and improve the disease prevention and control system,

Complete public health emergency management system, build a "1+5+N" infectious disease medical treatment system, improve major epidemic prevention and control systems and mechanisms, and enhance public health service capabilities and levels. Optimize the functional settings of disease control agencies, build "major disease control ", and coordinate the prevention and control of infectious diseases, major diseases, endemic diseases, and occupational diseases. Innovate the medical and prevention coordination mechanism, strengthen the coordination and linkage between disease control agencies and medical institutions, and implement the public health responsibilities of medical institutions. Strengthen early monitoring and early warning of unexplained diseases and abnormal health events, build a comprehensive monitoring and early

warning platform, and improve the intelligent early warning multi-point triggering mechanism. Comprehensively strengthen the construction of infectious disease treatment capabilities in public hospitals and improve the emergency response capabilities for local clusters of epidemics. Strengthen strategic reserves of emergency supplies and establish a hierarchical reserve system for medical emergency supplies. Establish a stable public health investment mechanism, strengthen the construction of emergency medical rescue bases and public health emergency response teams, layout and build public health science and technology support platforms, strengthen scientific research on drugs and vaccines, accelerate the training of general medical talents who combine prevention and treatment, and optimize Medical talent training structure. Strengthen early screening and early detection of chronic diseases, and continue to strengthen health management. Pay attention to mental health and mental health management, and promote the construction of mental health professional institutions.

Accelerate the improvement and expansion of medical and health resources. Construction of the Clinical

Research Hospital of the Chinese Academy of Sciences (An
Anhui Clinical Research Hospital) to enhance basic
clinical research and scientific research capabilities.
Actively introduce high-quality medical resources,
comprehensively promote the pilot construction of
national regional medical centers, and strive to become
a national medical center. Accelerate the balanced
regional distribution of medical resources and
implement provincial

High-quality medical resources expansion and sinking projects, construction of provincial and regional specialized medical centers, and improvement of provincial and municipal hospitals' ability to diagnose and treat difficult and severe diseases. Expand the total number of tertiary hospitals and increase the supply of high-level medical resources through renovation and upgrading. Continue to improve the comprehensive service capabilities of county-level hospitals, promote the capacity building of township health centers by category, strengthen the standardization of urban community medical and health institutions and village clinics, and improve the service quality of primary medical institutions. Steadily promote the construction of Sino-foreign joint venture medical institutions. Implement the " Jianghuai Famous Doctors " and " Huixiang Famous Doctors " selection and training projects, and the " Hundreds and Thousands " project to improve rural medical and health service capabilities , and strengthen the construction of the village medical team. Promote the construction of an " Internet + Medical Health "

demonstration province and establish a national health and medical big data (central) center and a unified telemedicine service platform for the province.

专栏 30 健康安徽行动

公共卫生体系建设工程。完善省市县三级疾病预防控制机构网络，省疾控中心提升生物安全三级实验室能力；县级以上疾控中心建设符合生物安全二级标准的实验室。二级及以上综合医院（含中医院）、传染病专科医院建设标准化核酸检测实验室，并具备新冠肺炎等重大传染病检测能力。构建“1+5+N”传染病医疗救治体系，建设省级传染病救治基地以及合肥、芜湖、蚌埠、阜阳、安庆等区域性传染病救治基地，各市建设或完善 1 所高水平传染病专科医院或三级综合医院传染病独立院区，二级及以上综合医院建设相对独立的传染病院区和可转换病区。建设省级中西医结合传染病救治基地和 2 个区域性救治基地。推动公共设施平战结合改造升级。

区域医疗中心建设工程。加快建设复旦大学附属儿科医院安徽医院，

The National Children's Regional Medical Center has been basically completed. In the fields of oncology, cardiovascular, trauma, neurological, respiratory, and traditional Chinese medicine, we will strengthen cooperation with domestic high-level hospitals and actively apply for jointly building a number of national and regional medical center pilot projects.

Implemented 4 provincial high-quality medical resource expansion and sinking projects, laid out

Set 10-15 Provincial regional specialized medical center.

County-level hospital comprehensive service capacity improvement project. Strengthen the capacity of county-level hospitals (including traditional Chinese medicine hospitals) We will build talent, technology, key disciplines, and informatization, improve management levels, improve medical services, comprehensively enhance comprehensive service capabilities, and add a new batch of county-level hospitals to

meet the service capability requirements of third-level hospitals (third-level traditional Chinese medicine hospitals).

Standardized construction projects of urban community

medical and health institutions and village clinics. Strengthen infrastructure

Construction and medical equipment are updated and supplemented to make up 15,000 This affects the shortcomings in the infrastructure construction of urban community medical and health institutions and village clinics.

" Hundreds and Thousands " project to improve rural medical

and health service capabilities . Strengthen the work management of " hundred doctors stationed in villages " To ensure the continued training of local village doctors in the " hundred doctors stationed in villages " site, ensure that there will be successors to the village doctor position. Carry out the " Thousands of Doctors to the Rural Areas " program for city and county-level hospitals , arranging 3,000 doctors in batches medical staff to provide services to township health centers Show hematopoietic assistance. Carry out the " Ten Thousand Doctors Rotation Training " for rural doctors and train 30,000 rural doctors at the second level person times .

Promote the inheritance, innovation and development of traditional Chinese medicine. Implement and promote the inheritance, innovation and development of traditional Chinese medicine Special actions will be taken to promote the creative transformation and innovative development of " North Huatuo and South Xin'an " , accelerate the integrated development of traditional Chinese medicine industry, and build a strong province of traditional Chinese medicine. Improve the TCM service network, ensure full coverage of municipal and county public TCM hospitals, and enhance grassroots TCM service capabilities. Support the coordinated development of medical , teaching and research in

provincial TCM hospitals , carry out coordinated research on major and difficult diseases with TCM and Western medicine, and improve the mechanism for TCM to participate in the prevention and treatment of sudden infectious diseases and the emergency response to public health incidents. Strive to create a national comprehensive reform demonstration zone for traditional Chinese medicine and build

Establish a provincial-level demonstration zone for comprehensive reform of traditional Chinese medicine. Strengthen the advantageous specialties and specialties of traditional Chinese medicine Construction and promotion of the inheritance and development of folk characteristic technical therapies. Strengthen the inheritance and innovation of traditional Chinese medicine Build new platforms and mechanisms, accelerate the training and introduction of high-quality talents in traditional Chinese medicine, and create Create a national TCM clinical medical research center (base) and a national TCM inheritance and innovation base. Improve and strengthen the modern traditional Chinese medicine industry, cultivate the "Top Ten Anhui Medicine " brands, and build a large Industrial clusters such as the " Xishan Medicine Library " in Bieshan . Support Bozhou in building a " World Capital of Traditional Chinese Medicine ", holding the World Traditional Chinese Medicine Forum, and building a core area for the innovative development of the traditional Chinese medicine industry and a green Chinese herbal medicine planting and tourism economic zone, and future Chinese medicine industry expansion

center. branch Hold Huangshan to give full play to the advantages of "Xin'an Medicine " and build a traditional Chinese medicine inheritance and innovation center in southern Anhui, China Focus on accelerating collaborative innovation in the health industry and piloting it. Promote the dissemination of traditional Chinese medicine culture and Open development promotes Anhui traditional Chinese medicine to go global.

专栏 31 促进中医药传承创新发展专项行动

中医药优质资源提质扩容工程。争创国家中医药传承创新中心、中医疫病防治基地、中西医协同旗舰医院，建设一批中医特色重点医院；争创 2 个以上国家中医医学中心和国家区域中医医疗中心；引进 1 所高水平的国家中医医学中心合作办院；建设 10 个省级中医医疗中心。

中医药特色优势培育工程。创建一批国家中医优势专科和特色专科；支持三级中医医院建设 30 个省级优势专科，支持二级中医医院建设 70 个省级特色专科；建设 1 个国家中医康复中心和 1 个省治未病健康管理中心、8 个省级区域中医康复中心；对肿瘤、糖尿病、脑病、慢阻肺、风湿类疾病和传染病等重大疑难疾病，开展中西医协同攻关。

中药产业发展工程。以亳州、大别山等中药产业集聚发展为基础，

Build several provincial-level demonstration zones for comprehensive reform of traditional Chinese medicine; build 5 A modern traditional Chinese medicine industry cluster developed Exhibition base (park); construction 10 An authentic traditional Chinese medicinal material breeding base and 50 " Top Ten Anhui Medicines " Industrial demonstration base; cultivate 10 More than 100 major varieties of traditional Chinese medicine with an output value of over 100 million yuan; 2 new Provincial and ministerial key laboratories and engineering (technology) research centers in the field of traditional Chinese medicine; support the research and development of new food raw materials and drugs based on authentic Chinese medicinal materials produced in Anhui; support the National Chinese Medicinal Materials Product Quality Supervision and Inspection Center to set up sites in authentic medicinal material production areas .

High-quality traditional Chinese medicine talent team

construction project. Construction 10 A master of traditional Chinese medicine and a nationally famous doctor of traditional Chinese medicine

Heqihuang Scholars Heritage Studio, building 20 Provincial level traditional Chinese medicine academic school inheritance studio, opening 10 More than one " Yangtze River Delta Famous Traditional Chinese Medicine Studio " ; set up 1-2 Support national level, 10 Support provincial TCM epidemic prevention and emergency treatment teams; train 30 provincial TCM leading talents, 30 high-level inheritance talents, 300 Famous provincial TCM doctors and 3,000 key TCM talents; train 10,000 TCM health

service technical talents. Strive to establish the Bozhou branch of Anhui University of Traditional Chinese Medicine.

" North Huatuo, South Xin'an " inheritance, innovation and transformation project. Established the Provincial Xin'an Medical Research Institute and Huatuo Traditional Chinese Medicine Research Institute and Dabieshan Traditional Chinese Medicine Research Institute; carry out the excavation, compilation, digitalization and imaging recording of Xin'an and Huatuo medical literature and the experience of famous TCM teachers; support the physical construction of the Provincial Academy of Traditional Chinese Medicine and create innovations in hospital - enterprise cooperation Conversion platform, conversion application30 Traditional Chinese medicine above Pharmaceutical technology or products ; construction 1 Provincial Museum of Traditional Chinese Medicine and 10 A provincial-level traditional Chinese medicine cultural publicity and education base; creating " North Huatuo, South Xin'an " traditional Chinese medicine cultural masterpieces.

Deepen the comprehensive reform of the medical and health care system. Strengthen the construction of comprehensive medical reform pilot provinces, Deeply promote the linkage of medical care, medical insurance and medicine. Accelerate the construction of hierarchical diagnosis and treatment systems, improve

close-knit county medical communities and urban medical consortiums, and promote linkage and division of labor among medical institutions. Strengthen the performance assessment of public hospitals, improve the compensation mechanism and operating mechanism of public hospitals , continue to carry out actions to improve medical services, and improve the modern hospital management system

We will deepen the construction of the turnover pool system for public hospitals and township health centers . Deepen the reform of the medical security system, improve the total budget method for medical insurance funds, promote the reform of diversified and composite medical insurance payment methods, and implement pilot payment based on disease diagnosis-related group payment and disease type scores (points). Deepen the reform of the centralized and volume-based procurement system for drugs and medical consumables, improve the price formation mechanism for medical services, and ensure the supply and stable price of drugs in short supply. Support social forces to establish non-profit medical institutions in areas with weak medical resources and in shortage specialized fields such as rehabilitation, nursing, and mental health.

Deepen and expand the patriotic health campaign.

Enrich the connotation of patriotic health work and promote

Transform environmental health management into comprehensive social health management, explore more

effective ways of social mobilization, and improve comprehensive social health management capabilities. Strengthen the construction of public health and environmental infrastructure and promote comprehensive improvement of urban and rural environmental sanitation. Vigorously promote the creation of sanitary towns and achieve full coverage of provincial sanitary cities. Comprehensively carry out the construction of healthy cities. Strengthen health education and the popularization of scientific knowledge, and improve the public health literacy of the people. Accelerate the development of the health industry and promote the integrated development of health and elderly care, tourism, fitness, food, etc.

Build a strong sports province. Make overall plans to promote the high-quality development of sports and strive to make sports

The comprehensive strength of education is consistent with the economic and social development level of our province. Implement a national fitness facility project to make up for shortcomings, revitalize existing resources, build a number of sports venues and community sports facilities that are convenient and beneficial to the

people, and strive to achieve a per capita sports venue area of no less than 2.5 square meters, achieving full coverage of the “15- minute fitness circle ” in urban communities . Implement the national fitness popularization project, vigorously promote home fitness and national fitness online events, and actively create national sports and fitness model cities and counties (cities, districts) . Deepen the integration of sports and education and comprehensively popularize youth

Years of physical activity promote the development of lifelong exercise habits. Improve the competitive sports management system and operating mechanism, promote the integration of the provincial system and the market mechanism, innovate the provincial excellent sports team formation model, the excellent athlete training model and the dynamic adjustment mechanism for the development of competitive sports projects, and promote competitive sports projects to "Olympic excellence, "National Games Strengths" transformation, and its comprehensive strength ranks among the first in the country. Actively bid to host the National Games and create a number of attractive international and regional event brands and sports exhibition brands. Carry forward the spirit of Chinese sports and inherit and promote excellent traditional sports such as Wuqinxi. Innovate sports talent introduction, training, selection, incentive and guarantee mechanisms, and establish a global green channel for the introduction of sports professionals. Optimize the layout of the sports industry and create a sports industry growth pole in the Hefei metropolitan area, an urban sports

equipment manufacturing industry belt in Wanjiang, a sports tourism demonstration zone in southern Anhui, and a sporting goods manufacturing cluster in northern Anhui.

专栏 32 全民健身提升行动

全民健身设施补短板工程。重点建设贴近社区、方便可达的全民健身场地设施。到 2025 年，县（市）建有小型体育馆、小型体育场、游泳设施、全民健身活动中心、体育公园；市辖区建有全民健身活动中心、体育公园；乡镇（街道）建有小型室内健身中心（活动中心）、全民健身广场、多功能球类运动场或笼式足球场；行政村（社区）建有公共体育设施。

全民健身普及工程。建设科学健身指导体系，实现省市县三级全覆盖；体育类社会组织超过 4000 个，社会体育指导员超过 20 万名；广泛开展全民健身赛事活动，经常参加体育锻炼人数比例超过 40%。

青少年体育活动促进工程。推进体教深度融合，到 2025 年，省级体

育传统特色学校超过 300 所，省级青少年体育俱乐部超过 300 个，市、县（市）体校实现全覆盖。

“三大球”和冰雪运动发展工程。支持社会力量发展足球、篮球、排球运动，年平均举办赛事活动 600 场以上；积极发展职业体育，培育 1-2 个职业体育俱乐部。建设省滑冰馆，因地制宜推动开展群众性冰雪体育活动，推进冰雪项目进校园，实现 1000 万人次上冰雪。

体育产业建设工程。推动体育产业高质量发展，创建一批国家级体育产业示范基地、国家授牌汽车自驾运动营地、国家体育旅游精品项目，培育一批在全国有竞争力的体育企业，体育产业总规模突破 2000 亿元。

Chapter 64 Implement an active population development strategy

Accurately grasp the population development trends and aging laws of our province, implement fertility policies, actively respond to population aging, improve the service system that provides education for young children and care for the elderly, and promote long-term balanced development of the population.

Promote the realization of moderate fertility. Enhance the inclusiveness of fertility policies and guide fertility levels

Moderately improved and stabilized within a reasonable range. Strengthen the capacity building of women's and children's health services and accelerate the improvement

of the infrastructure conditions of maternal and child health care institutions. Popularize knowledge on eugenics and eugenics and improve eugenics and eugenics service levels. Strengthen the comprehensive prevention and control of birth defects and improve the quality of the birth population. Improve supporting policies such as fertility support, child care, and employment, and reduce the costs of childbirth, child care, and education.

Improve the infant care system. Develop and implement 3

Infant and child care services

Reward and subsidy policies promote the improvement and expansion of service capabilities and balanced regional layout, and build infant and child care with diverse subjects, diverse forms, complete policies, all the enjoyment and protection of all.

nursing service system. Actively promote the integrated construction of daycare, carry out various forms of infant care service pilots according to local conditions, create demonstration models, and promote the innovative development of infant care services. Accelerate the development of exemplary childcare service institutions with guidance functions, encourage the construction of embedded, distributed, chained, and professional community childcare service facilities, and ensure that new communities and supporting childcare service facilities are planned, constructed, and accepted simultaneously , synchronous delivery. Carry out special actions to support social forces in developing inclusive childcare services , and vigorously develop inclusive childcare services that are affordable, convenient and accessible . Promote the professionalization and standardization of infant care services, strengthen support and guidance for family infant care, and enhance family care capabilities.

Improve the elderly care service system. Formulate provincial regulations on elderly care services and improve basic elderly care

Service list, strengthen comprehensive supervision of elderly care services, and build an elderly care service system that coordinates home and community institutions and combines medical and health care. Establish a multi-level long-term care security system, improve the ability assessment and long-term care needs assessment system of the elderly, and strengthen the care of disabled and semi-disabled elderly people. Improve the demand-side subsidy policy for elderly care services and gradually enhance the ability of the elderly to purchase elderly care services. We will deepen the reform of public elderly care institutions and advance socialized operations in an orderly manner. Coordinate the development of rural elderly care services, carry out provincial-level rural elderly care service reform pilots, and explore models such as mutual-help elderly care services. We will support families in assuming the function of elderly care and launch a pilot program of “home care beds”. Increase the proportion of supporting facilities for elderly care services in newly built urban areas and newly built communities, and promote supporting facilities for elderly care services in old communities to meet

standards. Cultivate home and community elderly care service enterprises and social organizations, increase the supply of nursing beds in community-embedded small and micro elderly care institutions, and improve service systems such as meal assistance for the elderly. Deeply promote the special action of linkage between inclusive elderly care cities and enterprises to support the brand chain of elderly care institutions

development. Develop elderly care service consortiums to support the elderly in continuing care at home, in communities, and in institutions based on their health conditions. Promote the coordinated development of senior care and senior care industries , cultivate new models and new business formats for senior care, and build a number of senior care service industry development parks (base) .

Build an age-friendly society. Carry out elderly health promotion actions, implement elderly health and medical service construction projects, and strengthen elderly health management. Support the elderly to learn and improve the type and quality of education for the elderly. Reasonably allocate venues and facilities for cultural and sports activities for the elderly, carry out cultural, sports and entertainment activities suitable for the elderly, strengthen spiritual care for the elderly and enrich their spiritual life. Actively develop elderly human resources, establish an information database for elderly talents, encourage professional and technical talents to extend their working years, and

support the elderly to continue to contribute valuable experience and knowledge to society. Promote the improvement and expansion of the elderly product market, accelerate the research and development and application of products and technologies suitable for the elderly, effectively solve the difficulties of the elderly in using intelligent technology, build a number of home-based elderly care informatization demonstration projects, and develop the silver economy. We will popularize the barrier-free construction of public infrastructure and promote aging -friendly renovation of the homes of the elderly. We will improve the social preferential treatment system for the elderly and create a social environment of caring for, filial piety and respect for the elderly.

专栏 33 “一老一小”服务工程

城乡养老服务中心运营提升工程。分类明确县、乡镇（街道）、社区（村）养老服务服务（指导）中心功能定位和运营模式，制定社区居家养老服务设施管理、设备配置、服务质量等标准，提高城乡养老服务中心服务能力。

老旧小区养老服务用房配置工程。充分考虑区域内老年人分布情况，

Properly set up elderly care service facilities, promote the allocation of elderly care service housing in old communities through the transformation, purchase, replacement, and leasing of state-owned idle resources, and create a "15-minute " elderly care service circle.

Home care function support project. Implement the family' s responsibility for providing care for the elderly and promote the government' s purchase of "breathing suits" "Service " . Implement a training program for home caregivers of the elderly, learn from the experience of service brands in Shanghai and other places, and popularize home care knowledge and skills. Implement aging-friendly home modifications for no less than 5,000 needy elderly households every year.

Renovation and upgrading project of special poverty-stricken support service facilities. Strengthen support service facilities for the extremely poor (nursing homes) Renovation and upgrading, construction of 1 in each county All county-level disability care service agencies.

Elderly medical services project. Build a provincial geriatric medical center, 3 regional geriatric medical centers and 9 regional geriatric medical sub - centers.

care facility construction project. Each city builds 2-3 A model childcare service institution, each Counties (cities, districts) build at least 1 An inclusive childcare service institution. Guide social forces to rise Establish inclusive childcare service institutions. by 2025 By 2020, the province' s urban and rural community childcare institutions

have basically been fully integrated.

coverage, the number of care institutions in the province reached 30 About ten thousand.

Action to build child-friendly cities. Strengthen the construction of a livable environment for children, guide the creation of a growth environment for children, especially infants, and promote the formation of a number of dynamic development cities with exemplary significance and community. Improve maternal and infant facilities and set up special seats and green passages in public places where conditions are met .

Chapter 16 Improve people's quality of life and enhance people's sense of gain and happiness

Adhere to the realization, maintenance and development of the fundamental interests of the overwhelming majority of the people as the starting point and goal of development, focus on key areas and key groups, do our best and within our capabilities, improve the accuracy of people's livelihood projects, and improve co-construction, co-governance and sharing. A social governance system will solidly promote common prosperity and enable development results to benefit all people more and more equitably .

Chapter 65 Increase people's income levels

In line with the new expectations of the people, we should establish a more effective mechanism for sustained income growth, focus on increasing the income of low-income groups, promote the expansion and increase of income of middle-income groups , promote

the continuous narrowing of the gap between the per capita income of urban and rural residents , and further reflect the significant advantages of the socialist system with Chinese characteristics.

Implement the income distribution system. Adhere to the principle of more rewards for more work and focus on protecting labor income, Increase the labor remuneration of workers, especially front-line workers, increase the proportion of employee wages in regional GDP and corporate income, achieve simultaneous growth in residents' income while economic growth, and achieve simultaneous increase in labor remuneration while improving labor productivity. Improve the wage determination mechanism that reflects market supply and demand and economic benefits, deepen the reform of the wage system in government agencies and public institutions , encourage enterprises and institutions to implement flexible and diverse distribution forms, expand the scope of " same-city benefits ", and improve the reasonable wage growth mechanism and payment guarantee mechanism.

Implement the enterprise wage guideline system and implement a three-year action plan for collective consultation. Improve the enterprise salary survey and information release system, and improve the minimum wage standard adjustment mechanism. Establish and improve the income distribution mechanism of state-owned capital and public resources, and improve the mechanism in which production factors such as labor, capital, land, knowledge, technology, management, and data are evaluated by the market and remuneration is determined based on contribution. Improve the salary incentive mechanism of universities and scientific research institutes, and expand the autonomy of salary distribution. Promote the reform of the remuneration system and wage determination mechanism for heads of state-owned enterprises, and promote the implementation of technology-based equity dividend incentives for qualified state-owned enterprises. Increase the intensity and precision of adjustments in taxes, social security, transfer payments, etc., and rationally adjust the distribution relationships between urban and rural areas, regions, and different groups. Establish a

personal income and property information system, implement special additional deduction policies for personal income tax, and improve the modern payment and income monitoring system.

Promote income growth for low-income groups.

Encourage and guide low-income groups to improve their human capital, Take the initiative to carry out production and management, actively participate in production labor, and increase income and become rich through your own efforts. Establish an employment support mechanism to guide low-income groups in urban and rural areas to actively find employment, strive to eradicate the problem of wage arrears to migrant workers, and increase the wage income of low-income groups in urban and rural areas. Promote industrial support projects, carry out the "one village, one product" industrial cultivation action, strengthen the interest connection mechanism between farmers' cooperatives, leading enterprises and farmers, increase support for the promotion and marketing of agricultural products, guide and support low-income farmers to develop e-commerce, and increase farmers' operational capabilities income.

We will improve the special assistance system, focus on ensuring basic needs such as medical care, education, and housing, and increase the transfer income of low-income groups in urban and rural areas. Ensure farmers' reasonable sharing of land value-added income and increase farmers' property income. Improve the third distribution mechanism, develop public welfare and charity, and cultivate JAC charity projects and brands.

Promote the doubling of the middle-income group.

Innovatively implement the project to double the middle-income group,

Stimulate the vitality of key groups such as skilled talents, new professional farmers, and small and micro entrepreneurs, and drive the expansion of urban and rural middle-income groups to increase their income . Cultivate a team of high-level craftsmen, improve the salary incentive mechanism for skilled workers, and establish certification channels for professional qualifications and academic qualifications to drive an increase in the income of industrial workers. Build a long-term mechanism for farmers to continue to increase their income and accelerate the process of professionalization. Reduce the cost of entrepreneurship, remove barriers to entrepreneurship, increase the participation and success rate of entrepreneurship , and guide and support small and micro entrepreneurs to create income and become rich through "mass entrepreneurship and innovation ". Deepen the reform of the salary system in public hospitals. Actively support the growth and development

of graduates from various colleges and universities, and guide them to increase income through high-quality employment, entrepreneurship and innovation. Continue to improve taxation, housing, social security and other supporting support systems to reduce the living costs of middle-income groups.

Chapter 66 Strengthen employment priority policy

Adhere to the employment orientation of economic development, expand employment capacity, improve employment quality, promote full employment, protect workers' treatment and rights, and promote the long-term stability of the employment situation .

Do everything possible to stabilize and expand employment. Strengthen supporting economic and employment policies

Cohesion, adhere to the joint promotion of industrial upgrading, expansion of employment scale, and adjustment of employment structure. Continue to carry out the " four advancements and one promotion " special activities to stabilize employment , implement the employment promotion plan for college graduates and the grassroots growth plan, promote the youth traineeship

plan and the employment start-up plan, establish a high-quality employment and entrepreneurship service system for veterans, and create more suitable We will transfer employment opportunities to migrant workers and disaster-stricken people locally and nearby, coordinate the promotion of employment for key groups such as college graduates, veterans , migrant workers, disaster-stricken people, and fishermen who have retired from fishing, and provide assistance to the poor.

Provide employment to the disadvantaged population and registered unemployed persons. We will increase efforts to assist enterprises to stabilize jobs , standardize corporate layoffs, and support enterprises to stabilize jobs. We will improve employment demand surveys and unemployment risk monitoring and early warning mechanisms, and make every effort to prevent and resolve large-scale unemployment risks. Give full play to the role of small and medium-sized enterprises as the main channel for attracting employment, and guide people with different knowledge structures and employment skills to find suitable jobs. Support and standardize the development of new employment forms, and encourage workers to obtain employment through flexible and diverse forms such as temporary, part-time, seasonal, and flexible work. Focusing on filling the shortcomings in people's livelihood, we will expand public welfare positions, strengthen support arrangements, and ensure that zero-employment households are dynamically cleared. During the " 14th Five-Year Plan " period, the number of new urban jobs in the province reached more than 3 million.

Stimulate entrepreneurship and create employment.

Implement a new round of " Jianghuai Entrepreneurship " action plan and increase

Strengthen the construction of entrepreneurial incubation platforms and fully support key groups to start their own businesses. Create a entrepreneurship park for overseas students jointly built by the province and the ministry, and promote the establishment of provincial-level entrepreneurship parks for overseas students covering all districts and cities. Promote the high-quality development of return-to-township entrepreneurship, build a number of pilot demonstration counties for return-to-township entrepreneurship, and provincial-level demonstration parks for return-to-township entrepreneurship, and evaluate a number of provincial-level return-to-township entrepreneurship demonstration projects and provincial-level return-to-township entrepreneurship demonstration projects.

Excellent rural entrepreneurs. Support professional and technical personnel from universities, scientific research institutes and other public institutions to start their own businesses on the job and off the job.

Strengthen entrepreneurial guidance and assistance , and

establish a guarantee mechanism to encourage entrepreneurship and tolerate failure.

Improve the lifelong vocational skills training system.

Establish and improve the vocational skills training market

We should establish a socialized development mechanism, promote the close connection between training and employment, and the positive interaction between skill upgrading and work improvement, strive to solve structural employment conflicts, and promote the transformation of a province with a large number of skilled workers into a province with strong skilled workers. Improve the basic capabilities of vocational skills training, and build a number of provincial, municipal and county-level shared public training bases, industry-education integration training bases, rural labor force

Employment and entrepreneurship training base. Implement the "Skills Anhui" and vocational skills improvement action, carry out skills improvement training and job transfer training for enterprise employees, organize key groups to participate in skills training and entrepreneurship training, and organize urban and rural middle school and high school graduates who have not continued their education, and unemployed people under the age of 20 to participate in Labor preparation training. Carry out online vocational skills training and work-for-work training to improve accessibility and benefits. Pay attention to the education and training of skilled workers and strive to solve the shortage of skilled workers in enterprises. Improve the quality assessment and supervision mechanism for vocational skills training to improve the quality of training and the effectiveness of the use of subsidy funds.

Improve the public service system for employment and entrepreneurship. Deepen the reform of the human resources market system,

Implement the separation of public services and

commercial services, improve the human resources market supervision system, and focus on serving the employment of market entities. Promote the construction of a national-level human resources service industry cluster, create a number of regional human resources allocation centers, cultivate a number of well-known human resources service brands in the province, and introduce a number of well-known domestic and foreign human resources service companies . By 2025 , 2-3 provincial human resources service industrial parks will be formed, with about **15 leading companies in the human resources industry** that have a national demonstration and leading role, and **120 A key enterprise in human resources services**. Establish a unified public employment and entrepreneurship standard service system across the province, promote " Internet +" employment services, and promote the project, catalog, and standardization of grassroots public employment services. Establish and improve the sharing system of employment and unemployment statistical indicators. Standardize enterprise labor and employment management, improve workers' rights and interests protection, labor relations coordination and conflict mediation mechanisms, achieve full coverage of labor

relations public service centers in development zones at the provincial level and above, and full coverage of standardized labor and personnel dispute arbitration courts at the city and county levels, and promote electronic labor moving contract.

Column 34 Key projects for employment, entrepreneurship and skills training

A new round of " Entrepreneurship Jianghuai " action plan.

Implement the Entrepreneurship Pilot Project, build the "Ladder Entrepreneurship Training" brand with the " Malanhua Plan " as the main body , and hold the " Entrepreneurship Jianghuai · Future New Huizhou Businessmen " special training

camp. Implement the entrepreneurship nesting project and build a number of Anhui Youth Entrepreneurship Parks and provincial college student entrepreneurship and innovation demonstration bases. Implement smooth financing project by 2025 In the year, we strive to issue new entrepreneurial loans

250 billion. Implement the Youth Entrepreneurship Project, create a demonstration base for a group of college students to return home to start their own businesses, and conduct the selection of the " Anhui Youth Entrepreneurship Award " .

Implement high-end talent entrepreneurship projects, select and support a number of outstanding projects and entrepreneurial enterprises, and build provincial-level entrepreneurship parks for overseas students. Implement the entrepreneurship project for returning migrant workers and support returning migrant workers to establish various business entities. Implement the Anhui Kitchen Entrepreneurship Project, support the establishment of Anhui specialty food stores, chain stores, and farmhouses, and provide support in terms of training, funds, venues, etc.

Implement the retired military entrepreneurship project, build public service platforms, incubators, and maker spaces to support retired military entrepreneurship. Create an entrepreneurial service cloud platform, promote the localized application of the cloud platform, issue electronic entrepreneurial coupons , and explore the establishment of a regional public entrepreneurial service alliance. Create an entrepreneurship and innovation competition platform, conduct entrepreneurship and innovation project competitions, select a group of outstanding entrepreneurship and innovation projects, and promote a group of typical entrepreneurial figures and cases.

Construction projects to strengthen the province through skilled workers. Implement the high-skilled talent revitalization plan and build a group of national-level, Provincial level high-skilled talent training base and skill master studio. Establish and improve a lifelong vocational skills training mechanism, with a total of 350 training programs for all types of urban and rural workers. Vocational skills training for more than 10,000 people .

Implement vocational training capacity improvement project and build 5 There are provincial-level demonstration public training bases and a number of municipal-level public training bases, production safety training bases, etc. Create a high-level technician college and build 8 There are provincial-level high-level technician colleges and a number of high-level professional (type of work) clusters around the country, with

five

Annual planned enrollment 30 More than 10,000 people, the number of enrolled students is stable at more than 200,000 , and no less than 10,000 students are sent every year

50,000 new skilled workers.

Chapter 67 Improve the multi-level social security system

We will expand the coverage of social security objects, increase the level and intensity of security, and accelerate the improvement of a multi-level social security system that covers the entire population, coordinates urban and rural areas, is fair, unified, and sustainable.

Improve the social insurance system. Comprehensively implement provincial-level basic pension insurance for enterprise employees

Coordinate and coordinate the national coordination of basic pension insurance in an orderly manner. Improve the normal adjustment mechanism for the basic pension of urban and rural residents' pension insurance. Improve pension insurance policies and occupational annuity operating systems for government agencies and institutions, and build a multi-level and multi-pillar pension insurance system that connects basic pension insurance, occupational (enterprise) annuities, personal savings pension insurance, and commercial insurance. Accelerate the promotion of provincial co-

ordination of basic medical insurance, implement the dynamic adjustment mechanism of the medical insurance catalog, gradually include outpatient medical expenses into the scope of co-ordination of basic medical insurance, reform the personal accounts of employees' basic medical insurance, and establish and improve the employee outpatient mutual aid security mechanism . We will improve the medical insurance and assistance system for serious and serious diseases, actively develop commercial medical insurance, and steadily establish a long-term care insurance system. Implement the real-time settlement system for medical treatment in different places and medical insurance in different places, further optimize the direct settlement of hospitalization expenses in different places, and realize the connection with the preferential medical insurance settlement platform. Promote and improve the provincial coordination of unemployment insurance and work-related injury insurance. Expand the coverage and benefits of unemployment insurance policies. Explore the establishment of a multi-level work-related injury insurance system and improve the " trinity " work-related injury insurance system of prevention,

compensation and rehabilitation. Implement social insurance processing in other places.

Promote full coverage of social security. Fully implement the universal insurance plan by 2025 Year,

The number of participants in basic pension insurance, unemployment insurance, and work-related injury insurance for urban and rural residents in the province

The number of people reached 49 million, 6.2 million, and 8 million respectively. Basic medical insurance has been insured in accordance with the law and covers all people. Relax the insurance conditions for people with flexible employment, establish an occupational injury protection system for employees in new industries, and take effective measures to promote key groups such as small, medium and micro enterprises and migrant workers, people with flexible employment, employees in new industries, and uninsured residents to actively participate in and continue to participate in insurance. Pay the fees. Improve social security policies for landless farmers. We will improve the assistance system with hierarchical classifications of "whole household insurance" and "single-person household insurance" and coordinate urban and rural areas, build a comprehensive assistance pattern, form a "fund + material + service" social assistance model, and promote "Internet + social assistance". Improve the active discovery mechanism to achieve precise rescue. We will improve the linkage mechanism between social assistance and security standards and price increases, and issue temporary price

subsidies in full and in a timely manner to people in need. Improve the level of relief services and placement and care capabilities for homeless and beggars. We will increase temporary relief and assistance to urban workers to overcome poverty, improve the level of financial support, and improve the living standards of needy groups and residents in economically weak areas. Consolidate the achievements of funeral and burial reforms and improve the level of basic public service capabilities for funerals and burials. Fully issue social security cards and strengthen the “one card ” function. By 2025 , the number of cardholders will reach 6100 Thousands of people.

Enhance social security sustainability. Steady progress will be made in transferring part of state-owned capital to replenish social security funds. Expand investment channels for social security funds, promote marketization, diversification, and professional investment operations of basic pension insurance funds in an orderly manner , strive to maintain and increase the value of funds, and enhance fund support capabilities. Actively respond to the trend of accelerating population aging, implement a

gradual delay in the statutory retirement age, and establish a financial self-balancing mechanism to resist the risks of population aging .

Improve the work system and security system for retired military personnel. Promote the reform and creation of special care services

New development ensures that recipients of preferential treatment can enjoy universal preferential treatment and pension benefits. Properly accept and place stranded retired military cadres, retired non-commissioned officers, sick and disabled junior non-commissioned officers and conscripts. Strengthen the standardization construction of military supply stations and improve emergency support capabilities for military supply work. Improve the governance capabilities and service levels of retired military service centers (stations). Improve the care and assistance mechanism for veterans in need and other recipients of special care. Implement the quality improvement project of martyrs' memorial facilities and start the planning and construction of military cemeteries.

Chapter 68 Protect the legitimate rights and interests of women, minors and persons with disabilities

Adhere to the basic national policy of equality between men and women, strengthen the protection and

care for women, minors, and disabled people, ensure equal rights and share more development results.

Promote the all-round development of women. Improve the system that promotes gender equality and the all-round development of women

Institutional mechanisms, implement the women's development program, and promote the simultaneous development of women and the economy and society. Coordinate and consider women's rights and interests in all aspects of political, economic, cultural, social and family life , eliminate obstacles that are not conducive to women's development, and significantly improve women's health, education, economic status, political participation, and social welfare levels. Increase care and assistance for special groups of women such as disabled and left-behind women, and severely crack down on crimes such as violence against women and abduction and trafficking of women.

Care and protect minors. Improve the working mechanism for the protection of minors and protect them in accordance with the law

Protect minors' rights to survival, development, protection and participation, protect minors' physical and mental health, protect minors' legitimate rights and interests, and effectively prevent juvenile crimes.

Implement the Outline for Children's Development, improve the guardianship system for minors, eliminate discrimination against girls, and severely crack down on child trafficking, abandoned babies, and all types of activities that infringe upon the legitimate rights and interests of minors.

criminal behavior. Improve the child care service system, improve the child rescue and protection mechanism, implement the care and protection project for children in need, strengthen the classified protection of children in need, and increase the care for left-behind children and children in need in rural areas. Promote the transformation and upgrading of child welfare institutions and minors' rescue and protection institutions.

Strengthen family construction. Carry forward the family virtues of the Chinese nation and establish a new era family

Focus on family, family education, and family tradition, and promote the formation of a new trend of family civilization that is patriotic, loving family, loving each other, doing good, and co-building and sharing. Build harmonious family relationships, advocate joint participation in family affairs, thoroughly implement the project of happiness and health for every family, increase incentives for building safe families, and carry out actions to investigate and resolve marriage and family conflicts and disputes. Improve the family support system, implement actions to create family civilization, support actions for family education, and improve family

services, and encourage social resources to provide service support for families.

Improve the development capabilities of disabled people. Comprehensively implement policies to protect persons with disabilities and Special assistance for disabled people and effective protection of the legitimate rights and interests of disabled people. Accelerate the development of education for persons with disabilities and establish a provincial special education vocational college. Carry out large-scale vocational skills training for disabled people to promote their employment. Improve the rehabilitation and care service system for disabled people, improve the rehabilitation and assistance system for disabled children, strengthen the construction of service agencies and service facilities, cultivate social service organizations for disabled people, and accelerate the development of care services for severely disabled people. Implement the rehabilitation assistive device industry improvement project and build a characteristic industrial park for rehabilitation assistive devices. Enhance the awareness of the whole society to help the disabled and create a strong atmosphere of care and concern for the disabled.

Chapter 69 Strengthen and innovate grassroots social governance

Improve the urban and rural grassroots governance system that combines autonomy, rule of law, and rule of virtue under the leadership of party organizations , improve the grassroots democratic consultation system, enhance the people's awareness of the rule of law, and build people's

A social governance community where everyone has responsibilities, everyone performs their duties, and everyone enjoys it.

Improve the grassroots social governance system.

Efforts should be made to promote party building to lead urban and rural grassroots governance, unblock democratic channels, improve grassroots election, deliberation, disclosure, reporting, accountability and other mechanisms, and promote the masses to self-manage, self-service and self-education in accordance with the law in urban and rural community governance, grassroots public affairs and public welfare undertakings. , self-monitoring. Give full play to the role of mass organizations and social organizations in social governance, and unblock and standardize the ways for market entities, new social classes, social workers and volunteers to participate in social governance. Implement social organization cultivation projects, focus on cultivating and developing industry associations and chambers of commerce, urban and rural community social organizations and public welfare and charity social organizations, and guide social organizations to improve construction quality and service capabilities. Give full play to the role of

grassroots mass autonomous organizations, improve village rules and regulations and residents' covenants, and protect residents' democratic rights.

Innovate grassroots social governance methods.

Promote the reform of grassroots township and street administrative management systems and service management innovation, and promote the focus of urban and rural governance and supporting resources to townships and towns

(Street streets) and villages (communities) are moved downwards to delegate power and empowerment to the grassroots. Strengthen the construction of grassroots social governance teams, build a grassroots management service platform with grid management, refined services, information support, and open sharing, and create an upgraded version of "network + grid" grassroots social governance. We will deepen pilot projects for modernizing municipal social governance. Implement the community modernization management project, establish and improve the "three-community linkage" mechanism, and steadily promote the construction of township (street) social work service stations.

Chapter 70 Improve the quality and efficiency of public services

Improve the basic public service system, enhance non-basic public service capabilities, innovate methods and methods, strengthen policy guarantees, and provide high-quality public service products to the people.

Improve the level of equalization of basic public

services. Establish and improve basic public service standards

standardize the system, promote the implementation of national basic public service standardization pilot projects, and promote the unification of basic public service systems in urban and rural areas. Increase support for areas with weak basic public services, promote basic public service resources to be tilted towards rural areas, grassroots, old revolutionary areas and northern Anhui, narrow the gap between regions, strive to make up for shortcomings and weaknesses, and effectively secure the bottom line of basic people's livelihood protection network . According to the trend of population flow and agglomeration, we should adapt measures to local conditions, make overall plans, and scientifically lay out and construct basic public service facilities.

Innovate public service delivery methods. Learn from domestic and foreign public service experience to promote

The public service supply system has diversified development. Give full play to the role of the market

and social organizations such as industry associations and chambers of commerce, encourage and guide the participation of social forces, expand the effective supply of public services, and promote the marketization of non-basic public services. Adhere to the integration of resources, joint construction and sharing, encourage the use of existing facilities and idle resources to improve and improve, and integrate and build service facilities with similar functions. Strengthen the in-depth integration of public services and the Internet, promote informatization applications and " one-stop " processing, and promote convenient access by the masses.

Improve the public service policy guarantee system.

Scientifically and rationally divide public service areas power and expenditure responsibilities, continue to increase investment in basic public services, improve the financing mechanism, and ensure that service projects and standards are implemented in place. Strengthen the construction of talent teams in the public service field and increase incentives and support for grassroots public service personnel. Coordinate the layout of urban

and rural public service facilities and give priority to ensuring land for public service construction.

Strengthen the operation and management of public service facilities and continue to maximize their use efficiency. Strengthen self-discipline and social supervision in the public service industry .

Chapter 17: Coordinate development and safety to build a higher level of safe Anhui

Practice the overall national security concept, implement the national security strategy, safeguard national security, coordinate traditional security and non-traditional security, integrate security development into all fields and the entire process of economic and social development, and continuously improve the level of security decision-making and execution efficiency.

Chapter 71 Strengthen national security system and capacity building

Accelerate the modernization of national security systems and capabilities, improve the ability to use science and technology to safeguard national security, and consolidate national security and stability.

Improve national security systems and mechanisms.

In-depth implementation of the Provincial Party Committee to prevent and resolve major risks

Plan system, improve risk monitoring and early warning indicators in different fields, and comprehensively prevent and control major risks in various fields. Improve the national security leadership system and working mechanism, and strengthen safety precautions for key personnel and key locations in Anhui universities, colleges, institutes, large facilities, and large enterprises. Improve the system of national security laws and regulations, improve the national security review system, and strengthen national security law enforcement. Carry out national security publicity and education, enhance the national security awareness of the entire people, and consolidate the national security people's defense line. We will resolutely safeguard the security of national power, system, and ideology. Strictly guard against and severely crack down on infiltration, sabotage, subversion and separatist activities by hostile forces.

Promote the coordinated development of economic construction and national defense construction.

Promote key areas and key areas
Coordinated development of fields and emerging fields.
Coordinate and promote infrastructure construction to implement national defense requirements

To meet the requirements, strengthen the protection of military facilities, deepen the sharing of resource elements, establish and improve an orderly and controllable military-civilian data resource sharing mechanism, and promote the sharing of basic data such as geology, surveying and mapping, meteorology, spectrum, and space environment. Strengthen the collaborative innovation of military and civilian science and technology, accelerate the improvement of the innovation platform system, and coordinate the implementation of "civilian-to-military" **major scientific and technological potential**. Improve the level of national defense science and technology industry capabilities, implement a number of major projects in the national defense field, and cultivate a number of industrial clusters and key regions. Improve the national defense mobilization system, promote the construction of provincial-level national defense mobilization infrastructure, consolidate the foundation of grass-roots armed forces, deepen the transformation of reserve force construction, and establish and improve military-civilian emergency

command coordination, normal business coordination, disaster dynamic notification and joint survey, and emergency resource coordination and support mechanisms. Strengthen the construction of modern civil air defense, insist on equal emphasis on the protection of cities and important economic targets, and accelerate the formation of a contiguous network, supporting functions, combination of communication and specialization, and efficient command. Strengthen national defense education for all , build the Anhui Revolutionary Military Museum, improve dual support work and the military-civilian co-construction mechanism, and consolidate and develop the excellent situation of military-government, military-civilian unity. Improve the military ration supply system and non-staple food supply channels.

Chapter 72 ensure economic security

Strengthen economic security risk early warning, prevention and control mechanisms and capacity building, implement industrial competitiveness survey and evaluation projects, enhance the ability of the industrial system to withstand shocks, and achieve

safety and controllability in key areas such as important industries, infrastructure, strategic mineral resources, and major science and technology.

Ensure food security. Deeply implement the strategy of storing food in the land and storing food in technology , and improve Benefit compensation mechanism for major grain-producing areas, strict adherence to cultivated land red lines and permanent basic farmland control

line, stabilize the sown area, yield and quality of grain, solve the problems of seeds and cultivated land, and ensure the absolute safety of grain rations. Carry out actions to save food, reduce losses and stop waste. Strengthen grain macro-control, increase the scale of reserves, and promote appropriate centralized management. Accelerate the construction of high-standard grain circulation infrastructure and plan to build a number of grain and material reserve support bases. Promote high-quality grain projects, establish and improve a scientific, reasonable, safe and efficient collaborative guarantee mechanism for "production, purchase, storage and sales" of grain and oil to ensure overall stable market supply and prices. Promote international cooperation on food and important agricultural products. We will improve laws and regulations on food security and strengthen food administrative law enforcement. Strengthen the responsibility system of city and county heads under the provincial governor responsibility system for food security, and consolidate the main responsibilities of city and county governments.

Ensure energy security. Strengthen the construction of

energy security reserve system and promote the construction of energy security reserve system in southwestern Anhui

The construction of energy reserve projects such as coal storage and distribution centers will enhance the sustainable and stable supply of energy, reasonable demand regulation, risk warning and management capabilities, and ensure the reliable supply of coal, electricity and oil and gas for people's livelihood. Actively develop advanced bio-liquid fuels, promote the construction of coal-to-natural gas projects in Huainan, and promote oil and gas substitution in an orderly manner. We will ensure the safety of important power transmission channels and oil and gas pipelines in accordance with laws and regulations. Strengthen the main responsibilities of energy companies and improve their ability to respond to emergencies such as extreme weather and geological disasters.

Maintain local financial security. Coordinate financial development and financial security, strengthen capital

Supervision to prevent disorderly expansion. We must maintain the bottom line of preventing systemic financial risks, steadily and orderly resolve the risks

of local corporate financial institutions, resolutely prevent and crack down on illegal financial activities such as illegal fund-raising, and prevent the accumulation and intertwined transmission of risks in the real estate market, bond market, and capital market. Improve local government debt financing mechanisms to prevent and resolve local government debt risks. Properly deal with " zombie companies " , accelerate market clearing, and actively

Prevent and resolve debt risks of key enterprises.
Strengthen the construction of important financial infrastructure and accelerate the localization of core technologies and core equipment for the informatization of the financial industry.

Chapter 73 Protect people's lives and safety

We must put people and life first, put the protection of people's lives first, and comprehensively improve public security capabilities.

Improve the level of production safety. Improve and implement the production safety responsibility system, Carry out safety risk assessments on planning, industrial planning, major projects, and key projects, and implement "one-vote veto" for major safety production accidents . Strengthen risk awareness, strengthen source management , continue to deepen the " Building Safety " action and the construction of " Six Mechanisms " , continue to carry out the "1+11+N" three-year special rectification campaign for safe production, and effectively curb hazardous chemicals, coal mines and non- Major safety accidents in coal mines, construction,

transportation, etc. Strictly implement the main responsibility of enterprises for safety production and implement an enterprise safety commitment system based on credit supervision. Actively create a national security development model city.

Improve the level of food and drug safety supervision.

Promote the construction of the "Food Safe Anhui" brand,
Strengthen the construction of food and drug safety technical support capabilities, promote the "Internet + food and drug" supervision model, and comprehensively improve food and drug safety risk management and control capabilities. We will carry out a solid campaign to build food safety and assurance projects, severely crack down on food and drug violations, and improve the quality and safety assurance level of the entire food and drug chain. Strictly implement the party and government's shared responsibility for food and drug safety, and improve the food and drug safety responsibility system. Strengthen the construction of drug inspection and testing capabilities, actively promote the construction of high-end medical device testing laboratories, Chinese herbal medicines and

decoction pieces quality control laboratories, and continue to promote the construction of batch release capabilities for biological products.

by 2025 In 2019, the food and drug safety supervision system based on risk analysis and supply chain management was further improved, and the overall pass rate of quality and safety monitoring of major agricultural products stabilized at More than 97% , and the food sampling pass rate has remained stable at more than 98% .

Improve the emergency management system. Improve the emergency plan system and strengthen emergency plan management management and carry out regular emergency drills. Establish and improve a modern emergency command system, accelerate the construction of emergency command centers at all levels, and clarify response standards and emergency responsibilities at the provincial, municipal, county, and township levels . Accelerate the construction of the "three major systems " of monitoring and early warning, command and dispatch, and emergency rescue , promote the construction of "6+N" emergency systems in key areas such as hazardous chemicals, road traffic, geological disasters, forest fire prevention, flood control and drought relief, and

earthquakes , and comprehensively build a radio emergency system system and improve the meteorological monitoring, forecasting and early warning system. Promote the implementation of natural disaster prevention and control capacity improvement projects and improve disaster prevention, reduction, disaster resistance and disaster relief capabilities. Implement a project to improve emergency rescue capabilities and establish an emergency rescue team with the national comprehensive fire rescue team as the main force, the military's non-war military action force as the assault force, professional rescue teams as the backbone, and social forces as the supplement. Establish and improve a unified emergency material reserve and support system, scientifically determine the types and scale of material reserves, implement hierarchical reserve responsibilities, and accelerate the construction of reserve infrastructure, " intelligent storage " informatization, and emergency material overall coordination capabilities. Improve the disaster accident insurance system and develop catastrophe insurance.

Chapter 74 Maintain social stability and security

Correctly handle the contradictions among the people under the new situation, adhere to and develop the "Maple Bridge Experience" in the new era, maintain social harmony and stability, and make the people's sense of security more substantial, more sustainable, and more secure.

Improve the multi-dimensional prevention, mediation and resolution mechanism for social conflicts and disputes. Consolidate and expand petitions

We will highlight the results of the special action of " deep supervision, resolving issues, and promoting implementation " , improve the petition system, and smooth and standardize channels for people to express their demands, coordinate interests, and protect rights and interests. Strengthen the standardized construction of comprehensive management centers at all levels, improve the mediation and linkage work system, improve working mechanisms such as litigation and investigation docking, police-civilian joint investigation, give full play to the role of non-litigation dispute resolution mechanisms, and build a system of source prevention and control, investigation and sorting, dispute resolution, and emergency response Comprehensive management mechanism for social conflicts. Actively prevent and properly resolve mass incidents. Improve the social psychological service system and crisis intervention mechanism, and launch pilot projects for the construction of social psychological services.

Accelerate the construction of a social security prevention and control system.

Improve the integration of point, line and surface, online and offline

A social security prevention and control system that combines civil and physical defense with technology and prevention, as well as prevention and control , improves the control over social security in a dynamic environment. Implement the social stability risk assessment system for major decisions, build a monitoring and early warning platform for stability maintenance, improve the safety construction system and mechanism, and strengthen the grassroots organization, basic work, and basic capacity building of Safe Anhui. We will in-depth carry out the " Guarding Safety " **campaign**, carry out regular and institutionalized campaigns against organized crime, and resolutely prevent and combat violent terrorism, organized crime, new cyber crimes, and transnational crimes . Strengthen criminal early warning work, strictly prevent and crack down on various illegal and criminal activities in accordance with the law. Improve the joint governance mechanism for prison safety and promote the reform of the prison management system.

Strengthen service management for the floating population and special groups, promote the construction of community correction sites, and promote professional extension and guidance assistance for community drug treatment and community rehabilitation. Strengthen community police construction and improve the "police-civilian joint investigation" and "one village, one auxiliary police" mechanisms. Promote the construction of Anhui Police Vocational College and Anhui Public Security College. Carry forward the spirit of courage, strengthen publicity and popularize safety knowledge.

Chapter 18 Strengthen democratic political construction and create a fair, just and legal environment

Carry forward socialist democracy, comprehensively promote the construction of Anhui under the rule of law, better reflect the people's will, protect the people's rights and interests, stimulate people's creativity, pay more attention to maintaining social fairness and justice, and promote the construction of a new stage of modernization and beautiful Anhui on the track of the rule of law.

Chapter 75 promote socialist democracy

We must adhere to the organic unity of the party's leadership, the people's ownership of the country, and the rule of law, and promote the self-improvement and development of the socialist political system with Chinese characteristics.

Uphold and improve the People's Congress system.

Ensure that the National People's Congress and its

Standing Committee comply with the law
Exercise its powers and strengthen the supervision of
"one government, one committee and two houses".
Ensure that people's congresses at all levels are
elected in accordance with the law, are accountable to
the people, and are subject to people's supervision.
Improve the organizational system, working mechanism,
and rules of procedure of the People's Congress system,
and improve the argumentation, evaluation, review, and
hearing systems. We will broaden the channels for
deputies to the National People's Congress to
communicate with the people, improve the mechanism
for assigning, handling and supervising deputies'
proposals and suggestions, better play the role of
deputies to the National People's Congress, and ensure
that the people manage state affairs, manage economic
and cultural undertakings, and manage social affairs
through various channels and forms in accordance with
the law. Enhance the quality and effectiveness of local
legislation and improve correct and effective
supervision mechanisms. Strengthen the construction of
city and county people's congresses and their standing
committees and township and street people's congresses.

Uphold and improve the multi-party cooperation and political consultation system under the leadership of the Communist Party of China.

Give full play to the unique advantages of socialist consultative democracy and promote political consultation, democratic supervision,

Participate in political discussions. Strengthen the construction of specialized consultation bodies of the People's Political Consultative Conference, make good use of special consultation methods such as standing committee meetings and special consultations, give full play to the role of democratic parties, federations of industry and commerce, non-party personages and all walks of life, improve the level of providing advice and building consensus, and fully Discuss politics, make suggestions, serve the overall situation, and promote scientific and democratic decision-making .

Consolidate the broadest patriotic united front.

Comprehensively implement the party's ethnic policy and cast

Strengthen the awareness of the Chinese nation's community, carry out in-depth and sustained efforts to create ethnic unity and progress, strengthen exchanges and integration of all ethnic groups, protect the legitimate rights and interests of ethnic minorities, do a good job in publicity and education on ethnic unity, continue to implement actions to improve the "common development" of ethnic minorities and areas

inhabited by ethnic groups , and promote All ethnic groups work together in unity and prosperity. Comprehensively implement the Party's basic policy on religious work, adhere to the direction of sinicizing religion in my country, improve the level of legalization of religious work, actively guide religion to adapt to socialist society, and give full play to the active role of religious figures and religious believers in promoting economic and social development. Promote harmonious relations between political parties, ethnic groups, religions, classes, and compatriots at home and abroad, strengthen work on Taiwan, Hong Kong, Macao, foreign affairs, and overseas Chinese affairs, strengthen the united front work of the private economy in the new era, strengthen the work of non-party intellectuals, and do a good job in the new society People from all walks of life work to consolidate and develop the situation of great unity and alliance.

Deepen the reform of mass organizations. Give full play to the role of trade unions, Communist Youth League, Women's Federation and other mass organizations,

Improve the mass and group work system, enhance the political, advanced and mass nature, and closely unite

the respective masses around the party. We will further improve the work system in which trade unions at all levels have extensive connections and serve employees, actively serve the overall development situation, and strive to build a high-quality workforce . Adhere to the principle of the party's management of youth , and provide young people with employment, entrepreneurship, marriage, dating, and social development.

Provide services for social integration and mental health, improve the youth development policy system, and promote the all-round development of youth. Promote the organizational reform of women's federations with high quality, mobilize women to start businesses, innovate and make contributions, better represent and safeguard women's legitimate rights and interests, connect more closely with women, and serve women more effectively.

Chapter 76 Comprehensively promote the construction of rule of law in Anhui

Adhere to Xi Jinping's Thought on the Rule of Law, further promote the integration of rule of law, law-based government, and rule-of-law society in Anhui, improve the level of governing the province, governing by law, and administering by law, and promote scientific legislation, strict law enforcement, fair justice, and law-abiding by all people.

Improve local legislative mechanisms. Improve the institutional mechanisms to ensure the full implementation of the Constitution and laws

system. Uphold the party's leadership over legislative work, strengthen local legislative work, strengthen the leading role of the National People's Congress in legislation, and focus on giving full play to the important role of the government in legislative work. We will improve the systems for project establishment, argumentation, evaluation, and hearings, expand open legislative channels, and conduct in-depth consultation on legislation. Strengthen legislation in key areas and emerging areas. Strengthen the legislative work of districted cities. Deepen legislative coordination with the Yangtze River Delta region. Explore and advance legislation for pilot free trade zones. Adhere to the simultaneous implementation of legislation, reform, abolition and interpretation , and focus on highlighting local characteristics.

Promote the establishment of a law-based government.

Improve the scientific and democratic decision-making mechanism in accordance with the law. Deepen the line Reform the administrative law enforcement system, promote the downward shift of the focus of law enforcement, promote comprehensive administrative law enforcement at the county level, basically realize one team in

townships to manage law enforcement, and explore cross-domain and cross-department comprehensive law enforcement. Implement the reform of the administrative review system and strengthen the construction of venues for administrative review cases. Strictly standardize fair and civilized law enforcement, further standardize law enforcement discretion, and fully implement the benchmark system for administrative discretion. Strengthen and innovate interim and ex-post supervision, establish and improve administrative enforcement

Legal risk prevention and control mechanism. Carry out in-depth activities to demonstrate the establishment of a rule of law government.

Establish a fair, efficient and authoritative judiciary.

Continue to advance reforms in the field of the rule of law, deepen the comprehensive and supporting reform of the judicial accountability system, strengthen the reform and construction of the judicial restriction and supervision system for law enforcement , and improve the legal guarantee system for social fairness and justice. We will improve the system and mechanism in which public security, procuratorial, trial, and judicial administrative organs each perform their respective duties, and investigation, procuratorial, trial, and execution powers are divided, responsible, and constrained by each other. Deepen the reform of the criminal procedure system centered on trial, and implement a leniency system for guilty pleas and punishments. Improve the relevant systems for civil litigation and promote the pilot reform of separating complex and simplified civil litigation procedures. Deepen the reform of the enforcement system and strengthen the comprehensive management and source

management of "implementation difficulties ".Expand the scope of public interest litigation cases.

We will further promote law-abiding by all people.

Vigorously promote the spirit of socialist rule of law and promote the whole society to respect the law, learn the law, abide by the law and use it. Actively implement the " Eighth Five- Year Plan " for legal popularization, strengthen publicity and education on the rule of law, and fully implement the legal popularization responsibility system of " whoever enforces the law will popularize the law. " Enhance the pertinence and effectiveness of legal popularization work. Strengthen the construction of rule of law culture and carry out mass rule of law cultural activities. Implement the Civil Code. Strengthen the construction of rule of law villages and carry out activities to create democratic and rule of law demonstration villages (communities). Integrate legal service resources such as lawyers, notarization, judicial appraisal, arbitration, and people's mediation to establish a public legal service system that is inclusive, convenient, efficient, intelligent and accurate. Increase penalties for breach of trust in

public ethics and illegal acts involving lack of integrity .

Chapter 19 Strengthen planning implementation guarantees to ensure smooth realization of planning goals and tasks

Uphold the Party's overall leadership, uphold and improve the system and mechanism for the Party's leadership in economic and social development, implement the Party's leadership in all areas and the entire process of plan implementation, establish and improve the plan implementation mechanism, strengthen overall coordination and institutional guarantees, and fully mobilize all active factors, forming a strong joint force to promote the construction of a new stage of modernization and beautiful Anhui.

Chapter 77 Uphold and strengthen the party's overall leadership

Deeply implement the general requirements for party building in the new era, take the party's political construction as the guide, comprehensively strengthen

the party's centralized and unified leadership, implement the main responsibilities and supervisory responsibilities of comprehensively and strictly governing the party, and improve the party's direction, overall situation, policy formulation, and promotion. The ability and determination to reform.

Strengthen the party's political construction. Enhance political awareness, improve political stance, and do economic work with a political perspective, and be good at observing and analyzing economic and social issues from a political perspective. Promote the majority of party members and cadres in the province to strengthen the "four consciousnesses", strengthen the "four self-confidences", achieve "two safeguards", and consciously maintain a high degree of consistency with the Party Central Committee with Comrade Xi Jinping as the core in terms of ideology, politics and actions. We must adhere to and improve the system and mechanism for the leadership team to study General Secretary Xi Jinping's important speeches and related important expositions before making decisions, resolutely implement the political requirements of General Secretary Xi Jinping's important instructions,

and thoroughly promote

Carry out " three checks and three questions " to ensure the effective implementation of the Party Central Committee's decisions and arrangements. Strictly abide by political disciplines and rules, and continuously improve political judgment, political understanding, and political execution. Consolidate and deepen the educational achievements on the theme of " never forget the original intention and keep the mission in mind " , learn and apply the valuable experience of the Communist Party of China over a century, educate and guide the majority of party members and cadres across the province to adhere to the lofty ideals of communism and the common ideals of socialism with Chinese characteristics, and serve the party and the people Work tirelessly in your career.

Strengthen the party's organizational building.

Comprehensively implement the party's organizational line in the new era to improve Focus on improving organizational capabilities, strengthen the political functions of grassroots party organizations, give full play to the role of grassroots party organizations as a fighting fortress and the

vanguard and exemplary role of party members, and better lead the people to start a new journey of building a modern and beautiful Anhui in a new stage. Strengthen the construction of the cadre team, implement the cadre standards, strictly follow the " six selection and six non-selection " recruitment requirements, further promote the precise management of " three cases " , and enhance the political capabilities, investigation and research capabilities, scientific decision-making capabilities, and reform capabilities of leadership groups and cadres at all levels. The ability to tackle difficulties, deal with emergencies, work with the masses, and implement the situation, strengthen the incentives and protection for cadres who dare to take on responsibilities and perform good deeds, improve the error-tolerance and correction mechanism, and guide the entrepreneurial orientation of officers with the correct employment orientation. We will improve the entire chain of selection, training and effectiveness, vigorously identify, train and select outstanding young cadres, coordinate the use of cadres of all ages, and rationally allocate female cadres, minority cadres and non-party cadres .

Strengthen the party's work style. Persevere in implementing the spirit of the eight central regulations and the provincial

We will implement the implementation details of the committee, thoroughly implement the "three stricts and three realities", deepen the "three cases" warning education, continue to correct formalism and bureaucracy, and put an end to unrealistic "image projects" and "performance projects" that waste people and money, Effectively reduce the burden on the grassroots. Adhere to the theory and practice,

Oppose copying and bookism, and vigorously strengthen investigation and research work. Closely contact the people, safeguard the people's economic, political and cultural rights and interests, and do practical things for the people wholeheartedly. Promote the construction of a culture of integrity . We will intensify the investigation, accountability, reporting and exposure of hedonism and extravagance, and resolutely prevent a resurgence.

Uphold and improve the supervision system . Strengthen political supervision and integrate supervision into the "14th Five-Year Plan "

During construction, a full coverage responsibility system and supervision system will be established. Taking inner-party supervision as the leading role, we will improve the systems of people's congress supervision, democratic supervision, administrative supervision, judicial supervision, mass supervision, and public opinion supervision, give full play to the functions of audit supervision and statistical supervision, promote the coordination and integration of various types of supervision, and form a normal and

long-term joint supervision force. . We must adhere to the main tone of strictness for a long time, continue to deepen political inspections and inspections, promote the standardization and normalization of intra-party political supervision talks, and strive to solve the problem of supervision of " top leaders " and supervision at the same level. Strengthen restrictions and supervision on the operation of public power. Adhere to no restricted areas, full coverage, and zero tolerance, promote the construction of systems and mechanisms that dare not, cannot, and do not want to be corrupt , give full play to the role of supervision in grassroots governance, and promote comprehensive and strict party governance to extend to the grassroots front lines and to the masses. Create a clean and healthy political environment.

Chapter 78 Improve planning implementation mechanism

Straighten planning relationships, unify planning systems, improve planning management, strengthen policy coordination, improve implementation mechanisms, and accelerate the establishment of scientific,

standardized, and effective planning preparation and implementation mechanisms.

Establish and improve a unified planning system. Build a provincial-level development plan guided by the provincial development plan

Based on the national land and spatial planning, supported by provincial special planning and regional planning, it is composed of provincial and

provincial planning system with accurate positioning, clear boundaries, complementary functions, and unified connection . Strengthen the connection with national planning and implement relevant requirements of national planning legislation. The provincial development plan clarifies the province's spatial strategic pattern, spatial structure optimization direction and major productivity layout arrangements. Provincial land and space planning focuses on the management and control of spatial development intensity and the implementation of main control lines, providing spatial guarantee for the implementation of major strategic tasks and major engineering projects determined by national and provincial development plans. Provincial special plans specifically guide the development of specific fields and the layout of major engineering projects. Provincial regional planning guides strategic tasks for the development of key areas, contiguous regions across administrative regions and closely linked with economic and social activities.

Strengthen macro-policy coordination and cooperation. Detailed breakdown of the development

identified in the provincial development plan goals and main tasks, clarify the leading unit and work responsibilities, strengthen departmental linkage, and coordinate to solve difficulties and problems in the implementation of the plan. Decompose the main indicators determined by the provincial development plan into the annual indicator system for national economic and social development, set annual goals and achieve a comprehensive balance between years. Strengthen the connection and coordination between fiscal budget and plan implementation, coordinate financial resources and reasonably arrange the scale and structure of fiscal expenditures, and give priority to investing fiscal funds in major tasks and projects determined in the provincial development plan. Strengthen statistical monitoring of the main target indicators of the plan, improve the supervision and assessment mechanism for plan implementation, improve the planning evaluation system of annual monitoring analysis, mid-term evaluation, and summary evaluation, and strengthen the application of monitoring and evaluation results. Promote coordination among fiscal, financial, employment, and industrial policies.

Strengthen the implementation of major engineering projects. Further improve the progress of major

engineering projects

working mechanism and hierarchical dispatching

mechanism, forming a work pattern in which provinces,

cities and counties work together to coordinate and

advance. Strengthening the guarantee of factors such as

project land and energy use will have a positive impact

on the overall situation and long-term

Green channels will be opened for the development of landmark projects. Increase capital investment, actively strive for national financial support, fully mobilize social capital to expand investment, and strengthen the attraction of overseas capital from outside the province. Improve the "double recruitment and double introduction" promotion mechanism, and be good at using market logic and capital power to promote project work. We will do a thorough job in the preliminary work of the project, accelerate the implementation of the project, and realize the economic and social benefits as soon as possible.

Fully mobilize the enthusiasm of the whole society.

Build an endogenous incentive mechanism and improve the market environment environment and the rule of law, give full play to the enthusiasm, initiative and creativity of governments at all levels and all sectors of society, respect the initiative of the grassroots, gather the strength and wisdom of the people, and form a vivid situation in which the people of the province work together, build and share together. Strengthen the publicity of the plan,

strive to promote the disclosure of plan implementation information, unify the strengthening of top-level design and the insistence on asking the people for advice, improve the information communication and exchange mechanism between the government, enterprises, and society, promote the effective implementation of the plan, and actively accept the supervision of the whole society.
