Anti-Dumping Review Panel

Customs Act 1901

Notice under section 269ZZI

Certain Wire Rope exported to Australia from the Republic of South Africa

The Anti-Dumping Review Panel (ADRP) received an application from Scaw South Africa (Pty) Ltd and Haggie Reid Pty Limited for a review of a decision by the former Assistant Minister for Industry, Innovation and Science/Parliamentary Secretary to the Minister for Industry, Innovation and Science to publish a dumping duty notice ([ADN 2017/172](#)) in respect of Certain Wire Rope exported from the Republic of South Africa (the Reviewable Decision).

The decision of the former Assistant Minister for Industry, Innovation and Science/Parliamentary Secretary to the Minister for Industry, Innovation and Science was published on the Anti-Dumping Commission (ADC) website on 18 December 2017.

The ADRP is satisfied that the following grounds are reasonable grounds for the reviewable decision not being the correct or preferable decision:

- (a) The evidence did not establish, and it was unreasonable to conclude, that material injury was caused by exports from South Africa;
- (b) The Minister failed to establish corresponding normal values for comparison with the export prices of the goods;
- (c) Adjustments were not made to the normal value so as to not affect the comparison, and to ensure a proper comparison with the export price; and
- (d) The export price was incorrectly ascertained.

The goods to which this application relates are:

Stranded wire rope, alloy or non-alloy steel, whether or not coated or impregnated, having both of the following:

- Not greater than 8 strands;
- Diameter not less than 58mm and not greater than 200mm, with or without attachments.

Further information regarding the goods is outlined below:

- (i) *Stranded steel wire rope is rope and strand made of high carbon wire (whether or not containing alloys);*
- (ii) *The strand or rope can also be sheathed or impregnated and sheathed respectively in plastic or composites;*
- (iii) *The wires can be layered-up in various configurations in order to give the strand or rope the desired physical properties;*

(iv) *Variances can include:*

- *strand diameter;*
- *number of wires;*
- *wire finish (e.g. typically black but may be galvanised);*
- *wire tensile grade;*
- *type of lubricant;*
- *strand or rope length; and*
- *whether or not an attachment is included (but not limited to ferrules and/or beackets).*

(v) *Cores may be made of:*

- *natural or synthetic fibre; or*
- *Independent Wire Rope Cores (“IWRC”), which may or may not be sheathed or impregnated in plastic.*

Typical uses include applications such as dragline hoist, drag and dump ropes, and shovelhoist, crowd and retract ropes.

Goods excluded from this investigation are:

- *stranded wire rope that is stainless steel as defined under Note (e) “Stainless steel” to the Tariff;*
- *stranded wire rope with more than 8 strands, regardless of diameter; and*
- *stranded wire rope less than 58mm or greater than 200mm in diameter, regardless of the number of strands.*

The ADRP proposes to conduct a review of the decision.

Submissions

Interested parties have **30 days** from the date this notice is published to provide the ADRP with a submission.

If your submission contains confidential information, you must provide a public version that can be published on the ADRP website. Failure to do so will result in your submission not being considered.

You may either email your submission to ADRP@industry.gov.au or mail the submission to –
