Dear Mr Moore

ADRP review – WIND TOWERS EXPORTED FROM CHINA AND KOREA

I write to you in response to your letter of 4 June 2014 inviting the Anti-Dumping Commission (the Commission) to comment on the applications for review of the decision by the Parliamentary Secretary to the Minister for Industry to publish a dumping duty notice in relation to wind towers exported from the People's Republic of China and the Republic of Korea.

The Commission has prepared its responses to the issues raised by the applicants in a non-confidential form (see Attachment A). Also provided for your reference are the related confidential attachments. The Commission considers that only this letter and non-confidential Attachment A are suitable for publication. The confidential attachments are not suitable for publication.

The Commission has observed the request in your letter of 4 June 2014 and responded to the four specific matters. For each matter the Commission has separately identified information that is not *relevant information* as defined in section 269ZZK(6) of the *Customs Act 1901*.

In relation to the remaining three matters (factual claims disputed, commentary and background) the Commission provided its responses collectively, where identified, given the high degree of overlap in content.

The Commission is available to offer assistance in the form of clarification or relevant material for the matters raised in the applications and the response by the Commission should you so require.

Yours sincerely

A handwritten signature in black ink, appearing to read 'Dale Seymour'.

Dale Seymour
Commissioner
Anti-Dumping Commission
3 July 2014
