Australian Industry Participation Plan Summary - Project Phase

Nominated project proponent: EVA COPPER MINE PTY LTD

Project details

Name: Eva Copper Mine

Location: 75kms from the town of Cloncurry and 95kms North-East of Mt Isa, North-West QLD

Type: Mine or quarry

Purpose: Establish new facility

Capital expenditure: \$500 million - \$1 billion

Description: Harmony is a 70-year-old mining company headquartered in South Africa and listed on the Johannesburg and New York stock exchanges.

In FY2022 Harmony produced 1.49 million ounces of gold with US\$2.8bn of revenue and approximately US\$500m of EBITDA. Harmony is the largest gold producer by volume in South Africa and is a significant operator of gold tailings retreatment facilities. In Papua New Guinea, Harmony owns and operates the Hidden Valley mine and owns 50% of the tier-1 Wafi-Golpu copper-gold project.

In December 2022, Harmony acquired 100% of the Eva Copper Project, a near term copper project in North-West Queensland, Australia.

The Eva Copper Project is envisioned to be an open pit mine with a conventional crush, two-stage grind and flotation circuit for the production of copper and gold concentrates from seven open-pit deposits. Harmony is updating the feasibility study and progressing front-end-engineering and design throughout 2023 prior to a final investment decision (FID).

Once FID is achieved, construction of the mine and processing facility is expected to take up to 36 months. Project construction will include a 300-person accommodation village on site plus administration buildings, maintenance, training and first-aid facilities.

The project is expected to produce 100 million pounds of copper and 14,000 ounces of gold per annum over the life of the mine.

Completion date: 01 Dec 2026

Key goods and	Opportunities for Australian entities*	Opportunities for non-Australian	Explanation for no opportunities for Australian entities
EPCM	Yes	No	
Services			
Road infrastructure	Yes	No	
Power	Yes	No	
Camp facilities	Yes	No	
Catering services	Yes	No

Samplers and Analyzers	Yes	Yes
Flocculent System	Yes	Yes
Weighbridge	Yes	Yes
Magnetic Separator	Yes	Yes

High Pressure Grinding Rolls (HPGR) are not manufactured in Australia. Support for this statement is demonstrated by the existence of current Tariff Concession Orders administered by the Australian Border Force for imported H PGRs, which identify that there are no local Australian manufacturers of substitutable goods.

An Australian entity is an entity with an ABN or

ACN Project standards:

- Australian
- International

Supplier information and communication

Project proponent's contact person for supplier enquiries:

Contact person name Robert Blyth
Contact person position Contracts & Procurement Manager
Phone number 0403368711
E-mail robert.blyth@harmonyseasia.com

Project proponent website: General information will be accessible via the Eva Copper Project website maintained by Harmony, accessible here: <https://www.harmony.co.za/operations/australia/eva-copper-mine-project/>

Project opportunities website: Eva Copper Project has a dedicated ICN gateway page in relation to project opportunities, accessible here: <https://gateway.icn.org.au/project/4930/eva-copper-project>. Eva Copper Project will instruct its procurement contractor (once appointed) to utilise the gateway to maintain an understanding of Australian industry capability. In the alternate, opportunities for key goods and services will be accessible via the Eva Copper Project website maintained by Harmony, accessible here: <https://www.harmony.co.za/operations/australia/eva-copper-mine-project/>

Supplier engagement and communication actions:

- Engage with vendor identification agencies on project opportunities and bid processes
- Conduct supplier information briefings on project opportunities and bid processes
- Issue media releases or investment market announcements on project developments and opportunities
- Develop and distribute a supplier information guide for the project
- Directly contact suppliers with information on project opportunities and bid processes

Building Australian industry capability

Supplier capability development actions:

- Encourage joint ventures and alliances between suppliers
- Support supplier development initiatives of industry associations or governments

Global supply chain integration actions:

- Support suppliers to register with global supplier databases
- Provide references for high performing suppliers

Feedback process for unsuccessful bidders:

Eva Copper Project will provide written feedback to all unsuccessful tenderers, with an open request for a more detailed verbal debrief at their request. Compliance by the procurement entity will be maintained through regular EPCM meetings with AIP compliance being a standing agenda item.
