Disclaimer: The information provided in the table above is based on an initial assessment by the company. Any questions or issues should be raised with the project contact.

3. Standards to be used in the project

- Australian and recognised International standards will be used for the project.

4. AIP activities to be undertaken by the Project Proponent

The Project Proponent will:

- Publish prequalification requirements, standards for goods and services and the contact details for procurement officers for contracts over \$1m and where the wind farm identifies multiple opportunities in the local market.
- Ensure relevant information from interested parties documented during the construction phase is passed to the Operations and Maintenance Team.
- Maintain a database of applicable training opportunities that may be of interest for Stockyard Hill Wind Farm and distributed to the interest parties as required.
- Manage compliance with the AIP Plan.

5. AIP activities to be undertaken by procurement entities

Procurement Entities will:

- Maintain the SHWF website for interested parties to register their interest in project work opportunities.
- Provide contact details for publication on the project websites.
- Manage detailed tendering and procurement prequalification processes.
