

National Standards Commission

Supplementary Certificate of Approval

No S329

Issued under Regulation 9
of the
National Measurement (Patterns of Measuring Instruments) Regulations

This is to certify that an approval for use for trade has been granted in respect of the

Gogas Model Sealmaster LPG Driveway Flowmeter Nozzle

submitted by Gogas (Australia) Pty Ltd
1 Spring Street
Melbourne VIC 3000.

NOTE: This Certificate relates to the suitability of the pattern of the instrument for use for trade only in respect of its metrological characteristics. This Certificate does not constitute or imply any guarantee of compliance by the manufacturer or any other person with any requirements regarding safety.

CONDITIONS OF APPROVAL

This approval is subject to review on or after 1 March 2001.
This approval expires in respect of new instruments on 1 March 2002.

Instruments purporting to comply with this approval shall be marked NSC No S329 and only by persons authorised by the submitter.

Instruments incorporating a component purporting to comply with this approval shall be marked NSC No S329 in addition to the approval number of the instrument.

It is the submittor's responsibility to ensure that all instruments marked with this approval number are constructed as described in the documentation lodged with the Commission and with the relevant Certificate of Approval and Technical Schedule. Failure to comply with this Condition may attract penalties under Section 19B of the National Measurement Act and may result in cancellation or withdrawal of the approval, in accordance with the Commission's Document 106.

The Commission reserves the right to examine any instrument or component of an instrument purporting to comply with this approval.

DESCRIPTIVE ADVICE

Pattern: approved 12 February 1996

. A Gogas model Sealmaster LPG nozzle for driveway flowmeters.

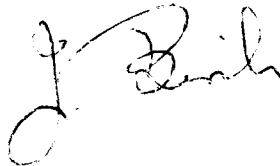

Technical Schedule No S329 describes the pattern.

FILING ADVICE

The documentation for this approval comprises:

Supplementary Certificate of Approval No S329 dated 30 July 1996
Technical Schedule No S329 dated 30 July 1996 (incl. Test Procedure)
Figure 1 dated 30 July 1996

Signed and sealed by a person authorised under Regulation 9 of the National Measurement (Patterns of Measuring Instruments) Regulations to exercise the powers and functions of the Commission under this Regulation.

A handwritten signature in black ink, appearing to read 'J. Birch', is written over the bottom right portion of the page.

National Standards Commission

TECHNICAL SCHEDULE No S329

Pattern: Gogas Model Sealmaster LPG Driveway Flowmeter Nozzle.

Submittor: Gogas (Australia) Pty Ltd
1 Spring Street
Melbourne VIC 3000.

1. Description of Pattern

The pattern (Figure 1) is a Gogas model Sealmaster LPG nozzle which may be fitted to any driveway flowmeter that is Commission-approved to dispense liquefied petroleum gas.

The nozzle will only open when connected to the vehicle's filler valve and is useable in both attendant-operated and self-service (purchaser-operated) situations.

1.1 Modifications to Nozzle Receptacles

When the nozzle is fitted as a replacement of the nozzle nominated in the NSC approval documents for the driveway flowmeter, only modifications to the receptacle to accommodate the nozzle are permitted; no alterations shall be made to the functions of any interlocks.

1.2 Marking

Any driveway flowmeter to which the nozzle is fitted, as a replacement of the nozzle nominated in the NSC approval documents for the driveway flowmeter, shall be marked "NSC No S329" in addition to any other required markings.

TEST PROCEDURE

Instruments shall be tested in conjunction with any tests specified in the approval documentation for the instrument to which the pattern is connected, as appropriate, and in accordance with any relevant tests specified in the Inspector's Handbook.
